SUMMARY: United States Environmental Protection Agency (USEPA) proposes full approval of Wisconsin's 1990 base year ozone (O_3) emission inventory as a revision to the Wisconsin State Implementation Plan (SIP) for O_3. The inventory was submitted by the State of Wisconsin to satisfy a Federal requirement that those States containing O_3 nonattainment areas (NAAs) classified as marginal to extreme submit inventories of actual O_3 season emissions from all sources in accordance with USEPA guidance. In the final rules section of this **Federal Register**, USEPA is approving the State's SIP revision as a direct final rule without prior proposal, because the Agency views this as a noncontroversial revision amendment and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received on this direct final rule, no further activity is contemplated in relation to this proposed rule. If USEPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. USEPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time

DATES: Comments on this proposed rule must be received before July 15, 1994

ADDRESSES: Written comments can be mailed to Carlton T. Nash, Chief, Regulation Development Section, Air Toxics and Radiation Branch (AT–18J), United States Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. Copies of the SIP revision and USEPA's analyses are available for inspection at the following

address: (It is recommended that you telephone Charles Hatten at (312) 886–6031 before visiting the Region 5 Office.) United States Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Charles Hatten (312) 886–6031.

SUPPLEMENTARY INFORMATION: See the information provided in the direct final rule which is located in the rules section of this **Federal Register**.

Authority: 42 U.S.C. 7401–7671q.

Dated: May 18, 1994.

Valdas V. Adamkus,

Regional Administrator.

40 CFR Part 52

[MI19–01–5990; FRL–4999–2]

Disapproval of Clean Air Act PM Implementation Plan for Michigan

AGENCY: United States Environmental Protection Agency (USEPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: The USEPA today proposes disapproval of the State Implementation Plan (SIP) submitted by the State of Michigan for the purpose of bringing about the attainment of the National Ambient Air Quality Standards (NAAQS) for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM), because USEPA finds unapprovable provisions in the consent orders submitted as part of the SIP revision. The implementation plan was submitted by the State to satisfy certain Federal requirements for an approvable nonattainment area PM SIP for Wayne County, Michigan.

DATES: Comments on this proposed action must be received in writing by July 15, 1994.

ADDRESSES: Comments should be addressed to: Carlton T. Nash, Chief, Regulation Development Section, Air Toxics and Radiation Branch (AT–18J), United States Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604–3590.

Copies of the State's submittal and other information are available for inspection during normal business hours at the following location: (It is recommended that you telephone Christos Panos at (312) 353–8328, before visiting the Region 5 office.) United States Environmental Protection Agency, Region 5, Air and Radiation Division, Air Toxics and Radiation Branch, 77 West Jackson Boulevard, Chicago, Illinois 60604–3590.

FOR FURTHER INFORMATION CONTACT: Christos Panos, Environmental Engineer, Regulation Development Section, Air Toxics and Radiation Branch (AT–18J), United States Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604–3590, (312) 353–8328.

SUPPLEMENTARY INFORMATION:

I. Background

Michigan was previously required to modify its particulate matter SIP by the Clean Air Act Amendments of 1977. On May 22, 1981 (46 FR 27923), USEPA conditionally approved portions of Michigan's part D Total Suspended Particulates (TSP) SIP. In response to USEPA's conditional approval the Michigan Department of Natural Resources (MDNR) submitted on May 17, 1985 revised rules, which were effective at the State level on February 22, 1985 to control TSP from iron and steel sources and from other sources in the State.

On August 7, 1987 (52 FR 29383), USEPA categorized areas of the Nation into three groups based on the likelihood that protection of the PM NAAQS would require revision of the existing SIP. The USEPA identified the entire Wayne County, Michigan area as a PM "Group I" area of concern, i.e., an area with a strong likelihood of violating the PM NAAQS and requiring substantial SIP revision. This Group I area was reduced in size on October 31, 1990 and was subsequently designated nonattainment for PM (55 FR 45799), and classified as moderate under sections 107(d)(4)(B) and 188(a) of the Clean Air Act, upon enactment of the Clean Air Act Amendments of 1990.[1] See 56 FR 56694 (November 6, 1991).

On June 11, 1992 (57 FR 24752), USEPA published a final rule which approved certain sections of the State's May 17, 1985 submittal, because the submittal represented an overall strengthening of the existing Michigan SIP and would contribute to general improvement of ambient air quality statewide, and disapproved other sections.

The amended Act required moderate PM nonattainment area SIP submittals by November 15, 1991. On November 19, 1991 USEPA received revisions to the Michigan SIP for the Wayne County PM nonattainment area. The USEPA reviewed the submittal for completeness and found the submittal to be incomplete. The USEPA made a finding pursuant to section 110(k)(1)(C) of the Act that the State failed to submit a complete SIP and notified the Governor in a letter dated December 17, 1991. See 57 FR 19906 (May 8, 1992). The USEPA's finding of incompleteness activated the 18-month clock which could have resulted in the imposition of sanctions pursuant to section 179 of the Act. On June 11, 1993 the State submitted to USEPA new revisions for the Wayne County PM nonattainment area SIP. The submittal was found to be complete pursuant to section 110(k)(1) of the Act and USEPA notified the State accordingly. This completeness determination corrected the State's deficiency under section 179 of the Act and, therefore, discharged the 18-month sanctions clock.

On April 7, 1994 the State submitted to USEPA a SIP revision for the Marblehead Lime Company, River Rouge, Michigan. This submittal supersedes the portion of the June 11, 1993 Wayne County PM nonattainment area SIP submittal applicable to the Marblehead Lime, River Rouge facility.

The air quality planning requirements for moderate PM nonattainment areas are set out in subparts 1 and 4 of title I of the Act.[2] The USEPA has issued a "General Preamble" describing USEPA's preliminary views on how USEPA intends to review SIP's and SIP revisions submitted under title I of the Act, including those State submittals containing moderate PM nonattainment area SIP requirements (see generally 57 FR 13498 (April 16, 1992) and 57 FR 18070 (April 28, 1992)). Because USEPA is describing its interpretations here only in broad terms, the reader should refer to the General Preamble for a more detailed discussion of the interpretations of title I advanced in today's proposal and the supporting rationale. In today's rulemaking action on the Michigan moderate PM SIP, USEPA is proposing to apply its interpretations taking into consideration the specific factual issues presented. Thus, USEPA will consider any timely

---

[1] The 1990 Amendments to the Clean Air Act made significant changes to the Act. See Public Law No. 101–549, 104 Stat. 2399. References herein are to the Clean Air Act, as amended ("the Act"). The Clean Air Act is codified, as amended, in the U.S. Code at 42 U.S.C. 7401, *et seq*

[2] Subpart 1 contains provisions applicable to nonattainment areas generally and subpart 4 contains provisions specifically applicable to PM-10 nonattainment areas. At times, subpart 1 and subpart 4 overlap or conflict. EPA has attempted to clarify the relationship among these provisions in the "General Preamble" and, as appropriate, in today's notice and supporting information.

submitted comments before taking final action on today's proposal.

Those States containing initial moderate PM nonattainment areas were required to submit, among other things, the following provisions by November 15, 1991:

1. Provisions to assure that reasonably available control measures (RACM) (including such reductions in emissions from existing sources in the area as may be obtained through the adoption, at a minimum, of reasonably available control technology—RACT) shall be implemented no later than December 10, 1992;

2. Either a demonstration (including air quality modeling) that the plan will provide for attainment as expeditiously as practicable but no later than December 31, 1994 or a demonstration that attainment by that date is impracticable;

3. Quantitative milestones which are to be achieved every 3 years and which demonstrate reasonable further progress (RFP) toward attainment by December 31, 1994; and

4. Provisions to assure that the control requirements applicable to major stationary sources of PM also apply to major stationary sources of PM precursors except where the Administrator determines that such sources do not contribute significantly to PM levels which exceed the NAAQS in the area. See sections 172(c), 188, and 189 of the Act.

Some provisions were due at a later date. States with initial moderate PM nonattainment areas were required to submit a permit program for the construction and operation of new and modified major stationary sources of PM by June 30, 1992 (see section 189(a)). Such States also were to submit contingency measures by November 15, 1993 which become effective without further action by the State or USEPA, upon a determination by USEPA that the area has failed to achieve RFP or to attain the PM NAAQS by the applicable statutory deadline. See section 172(c)(9) and 57 FR 13543–13544. These provisions will be addressed in separate rulemaking actions.

II. In This Action

Section 110(k) of the Act sets out provisions governing USEPA's review of SIP submittals (see 57 FR 13565–13566). In this action, USEPA is proposing to disapprove the SIP revision submitted by the State of Michigan to USEPA on June 11, 1993 which completed the attainment plan for Wayne County, because it does not meet all of the applicable requirements of the Act. The USEPA will consider any comments submitted during the public comment period before taking final action on today's proposal.

A. Analysis of State Submission

The State's June 11, 1993 submittal consisted primarily of 31 consent orders between the State and PM sources. The air quality dispersion modeling conducted is based upon control measures, limitations, and conditions contained in these orders. The USEPA is proposing to disapprove the State's submittal because USEPA finds unacceptable language in the consent orders submitted for approval into the Michigan SIP. If the State removes the unacceptable language, or replaces it with the previously approved version as detailed below, and submits revised consent orders, the proposed disapproval will be changed to an approval when USEPA takes final action on this submittal.

1. Procedural Background

The Act requires States to observe certain procedural requirements in developing implementation plans and plan revisions for submission to USEPA. Section 110(a)(2) of the Act provides that each implementation plan submitted by a State must be adopted after reasonable notice and public hearing.[3] See also section 110(l) of the Act. The USEPA also must determine whether a submittal is complete and therefore warrants further USEPA review and action (see section 110(k)(1) and 57 FR 13565). The USEPA's completeness criteria for SIP submittals are set out at 40 CFR part 51, appendix V (1991), as amended by 57 FR 42216 (August 26, 1991). The USEPA attempts to make completeness determinations within 60 days of receiving a submission. However, a submittal is deemed complete by operation of law if a completeness determination is not made by USEPA 6 months after receipt of the submission.

The State of Michigan held a public hearing on March 30, 1993 to receive public comment on the implementation plan for the Wayne County nonattainment area. Following the public hearing the plan was adopted by the State and signed by the Governor's designee and submitted to USEPA on June 11, 1993 as a proposed revision to the SIP.

The SIP revision was reviewed by USEPA to determine completeness shortly after its submittal, in accordance with the completeness criteria set out at 40 CFR part 51, appendix V (1991), as amended by 57 FR 42216 (August 26, 1991). The submittal was found to be complete and a letter dated June 30, 1993 was forwarded to the Director, Michigan Department of Natural Resources, indicating the completeness of the submittal and the next steps to be taken in the review process. The State's submittal of a complete SIP stopped the sanctions clock triggered by USEPA's December 17, 1991 finding that Michigan's November 15, 1991 submittal was incomplete. As noted in today's action USEPA proposes to disapprove the Michigan PM SIP submittal for Wayne County.

In addition, the State of Michigan held a public hearing on February 16, 1994 to receive public comment on the implementation plan revision for the Marblehead Lime Company, River Rouge, Michigan. Following the public hearing the plan was adopted by the State and signed by the Governor's designee and submitted to USEPA on April 7, 1994 as a proposed revision to the June 11, 1993 SIP submittal applicable to the Marblehead Lime, River Rouge facility.

2. Emissions Inventory

Section 172(c)(3) of the Act requires that nonattainment plan provisions include a comprehensive, accurate, current inventory of actual emissions from all sources of relevant pollutants in the nonattainment area. The emissions inventory should also include a comprehensive, accurate, and current inventory of allowable emissions in the area. Because the submission of such inventories are necessary to an area's attainment demonstration (or demonstration that the area cannot practicably attain), the emissions inventories must be received with the submission (see 57 FR 13539).

The State provided thorough documentation of its emissions estimates for all sources in the nonattainment area for a 1985 base year. The Wayne County area was shown to include 31 facilities. The allowable emission rates were calculated based on limits contained in Michigan's part 3 Air Pollution Particulate Regulations, limits contained in State permits, and limits contained in State consent orders. Emissions from roadways and other area source types are estimated in accordance with procedures specified in AP–42 and USEPA's guidance document, "Control of Open Fugitive Dust Sources", using inputs that are judged to provide reasonable estimates of these emissions.

[3] Also section 172(c)(7) of the Act requires that plan provisions for nonattainment areas meet the applicable provisions of section 110(a)(2).

The significant sources in the nonattainment area are: (1) Stack sources; (2) process fugitive emissions; and (3) area sources such as roadways and storage piles. The majority of the facilities in the nonattainment area were able to demonstrate attainment of the PM NAAQS with RACT level of control. For facilities where this RACT level of control was insufficient to demonstrate attainment, certain limits were lowered, and various operating conditions were modified to secure enough additional reductions to demonstrate attainment. Refinements to existing fugitive dust plans were made according to the control efficiencies predicted by USEPA's "Open Fugitive Dust Source Computer Model". These emission limits, production limits, and fugitive dust plans are incorporated into the consent orders submitted for approval into the Michigan SIP. For further details see the Technical Support Document (TSD).

The USEPA finds that the emissions inventory generally appears to be accurate and comprehensive, and provides a sufficient basis for determining the adequacy of the attainment demonstration for this area consistent with the requirements of sections 172(c)(3) and 110(a)(2)(K) of the Act. [4]

3. RACM (Including RACT)

As noted, the initial moderate PM nonattainment areas must submit provisions to assure that RACM (including RACT) are implemented no later than December 10, 1993 (see sections 172(c)(1) and 189(a)(1)(C)). The General Preamble contains a detailed discussion of USEPA's interpretation of the RACM (including RACT) requirement (see 57 FR 13539–13545 and 13560–13561).

The USEPA has previously judged that existing TSP regulations applicable to point sources and contained in part 3 of Michigan's Air Pollution Control Commission Rules provide for RACT and have already been incorporated into the Michigan SIP (57 FR 24752, June 11, 1992). The attainment needs of this area are such that additional measures as provided in the current submittal may be considered reasonably available. At the same time, further controls beyond those required in the submittal and necessary for assuring attainment would not be considered reasonable, unless those measures would provide for earlier attainment. (See the General Preamble at 57 FR 13560).

For fugitive dust sources, generic RACT control efficiencies were applied to potential emissions based on whether a facility had, and was implementing, a fugitive dust plan submitted to and approved by the Air Pollution Control Commission [5]. The generic RACT efficiencies and their percent control, as recommended by the Wayne County Air Pollution Control Division, are: unpaved roads and lots, 75 percent; paved roads and lots, 35 percent; and storage piles and storage pile activities, 50 percent.

The USEPA has reviewed the State's explanation and associated documentation and concluded that it adequately justifies the control measures to be implemented. The consent orders in Michigan's submittal provide for compliance by October 1, 1993 and the implementation of the nonattainment plan control strategy will result in the attainment of the PM NAAQS by December 31, 1994, therefore satisfying the requirements of sections 172(c)(1) and 189(a)(1)(C) of the Act.

4. Demonstration of Attainment

As noted, the initial moderate PM nonattainment areas must submit a demonstration (including air quality modeling) showing that the plan will provide for attainment as expeditiously as practicable but no later than December 31, 1994 (See section 189(a)(1)(B) of the Act). Alternatively, the State must show that attainment by December 31, 1994 is impracticable.

The MDNR conducted an attainment demonstration using dispersion modeling for the Wayne County nonattainment area. This demonstration indicates that the NAAQS for PM will be attained by 1994 in Wayne County and maintained in future years. The 24-hour PM NAAQS is 150 micrograms/cubic meter ($\mu g/m^3$), and the standard is attained when the expected number of days per calendar year with a 24-hour average concentration above 150 $\mu g/m^3$ is equal to or less than one. See 40 CFR 50.6. The annual PM NAAQS is 50 $\mu g/m^3$, and the standard is attained when the expected annual arithmetic mean concentration is less than or equal to 50 $\mu g/m^3$. The dispersion modeling in the demonstration predicted 146.3 $\mu g/m^3$ as the 24-hour design concentration, thus demonstrating attainment of the 24-hour PM NAAQS. The dispersion modeling in the demonstration predicted 49.5 $\mu g/m^3$ as the annual design concentration, thus demonstrating attainment of the annual PM NAAQS. The control strategy used to achieve these design concentrations is summarized in the section titled "RACM (including RACT)".

Several factors help assure that the Wayne County nonattainment area will maintain as well as attain the standard. First, a substantial majority of emissions in the area are from industrial sources and were modeled either with maximum allowable emissions (for point sources) or with emissions at the sources' full capacity operation (for area sources). Thus, the only opportunities for growth in the inventory beyond the modeled inventory are new source construction and growth in public area sources. The new source review program assures that new sources will not create violations of the air quality standards. For public area source emissions, the Southeast Michigan Council of Governments (SEMCOG) compiled estimates of daily vehicle miles traveled (VMT) in Wayne County for a 1985 base year. To account for VMT growth in Wayne County, SEMCOG reran their transportation models for the year 2005. The resulting VMT projections were compared to the 1985 base year case and showed a net increase in PM emissions. The increase in emissions, however, has already been accounted for in the attainment demonstration. Michigan's modeling analysis, reflecting emissions in 2005, yielded a design value of 146.3 $\mu g/m^3$. Extrapolating back to 1994 would yield a design value of 146.1 $\mu g/m^3$. Therefore, the State of Michigan has demonstrated maintenance of the air quality standard of 150 $\mu g/m^3$ through the year 2005. See the TSD for a more detailed description of the attainment demonstration and the control strategy used.

5. PM Precursors

The control requirements which are applicable to major stationary sources of PM, also apply to major stationary sources of PM precursors unless USEPA determines such sources do not contribute significantly to PM levels in excess of the NAAQS in that area (see section 189(e) of the Act).

An analysis of air quality and emissions data for the Wayne County nonattainment area indicates that exceedances of the NAAQS are attributable solely to direct PM emissions from stack sources, process fugitive emissions, and area sources such as roadways and storage piles, and not sources of PM precursors. Consequently, USEPA is proposing to find that major sources of precursors of

[4] The EPA issued guidance on PM–10 emissions inventories prior to the enactment of the Clean Air Act Amendments in the form of the 1987 PM–10 SIP Development Guideline. The guidance provided in this document appears to be consistent with the Act.

[5] Michigan eliminated the Air Pollution Control Division in a recent reorganization. MDNR now handles the responsibilities of the former division.

PM do not contribute significantly to PM levels in excess of the NAAQS. The consequences of this finding are to exclude these sources from the applicability of PM nonattainment area control requirements. Note that while USEPA is making a general finding for this area, today's finding is based on the current character of the area including, for example, the existing mix of sources in the area. It is possible, therefore, that future growth could change the significance of precursors in the area The USEPA intends to issue future guidance addressing such potential changes in the significance of precursor emissions in an area.

6. Quantitative Milestones and Reasonable Further Progress (RFP)

The PM nonattainment area plan revisions demonstrating attainment must contain quantitative milestones which are to be achieved every 3 years until the area is redesignated attainment and which demonstrate RFP, as defined in section 171(1), toward attainment by December 31, 1994 (see section 189(c) of the Act). Reasonable further progress is defined in section 171(1) as such annual incremental reductions in emissions of the relevant air pollutant as are required by part D or may reasonably be required by the Administrator for the purpose of ensuring attainment of the applicable NAAQS by the applicable date.

As discussed in the General Preamble (57 FR 13539), attainment plans for moderate areas which demonstrate attainment by December 31, 1994 will satisfy the initial quantitative milestone requirement. The consent orders included in Michigan's SIP submittal require compliance by October 1, 1993. Given this requirement and the fact that Wayne County demonstrates attainment by 1994, USEPA believes the State's submission clearly satisfies the initial quantitative milestone requirement and demonstrates RFP.

7. Enforceability Issues

Sections 110(a)(2)(A) and 172(c)(6) of the Act, 42 U.S.C. 7410(a)(2)(A) and 7502(c)(6), require that each SIP include emission limitations and other control measures, means or techniques, and schedules or timetables for compliance which are enforceable by the State and by USEPA. See also 57 FR 13556. In addition, States must include in their nonattainment area SIPS a program to provide for the enforcement of the measures described in the SIP. 42 U.S.C. 7410(a)(2)(C). The USEPA criteria addressing the enforceability of SIPs and SIP revisions were provided in a September 23, 1987 memorandum (with attachments) from Craig Potter, Assistant Administrator for Air and Radiation, et al. (see 57 FR 13541).

The State of Michigan identified in its submittal particular control measures for stack sources, process fugitive dust emissions, and area sources such as roadways and storage piles. These control measures are addressed in the section entitled "RACM (including RACT)," above. In its submittal, the State specifies how each control measure or limit is made enforceable. The majority of the control measures are contained in the existing TSP regulations and, therefore, are enforceable as part of the existing Michigan SIP. Some of the control measures and applicable recordkeeping requirements, particularly those dealing with area sources of PM, are contained in the 31 consent orders which the State has requested that USEPA approve as part of the Michigan SIP.

The USEPA finds the consent orders are not approvable as part of the Michigan SIP for two reasons. First, each of the 31 consent orders contains a provision (paragraph 11) which allows for the substitution of "equivalent" particulate and fugitive dust control measures. The consent orders provide that a company subject to an order may revise the control programs contained in the order provided that, among other things, neither MDNR nor USEPA objects to the revision within 45 days of receipt of the proposal. The USEPA finds that this means of modifying the control requirements contained in a consent order, which would also (if approved) become part of the Michigan SIP, is inappropriate because it bypasses the Act's substantive and procedural requirements for SIP revisions. See sections 110(a)(2) and 110(i) of the Act, 42 U.S.C. 7410(a)(2) and 7410(i).[6]

By letter dated October 5, 1992 USEPA Region 5 informed MDNR that it could provide sources some flexibility by revising paragraph 11 to permit use of those measures specifically outlined in USEPA's PM–10 Open Fugitive Dust Source Computer Model Package (EPA–450/3–90–010). More details on this mechanism are provided in the October 5, 1992 letter and USEPA's TSD. In its submission, however, Michigan did not revise the orders to include this suggested approach.

Consistent with the above, if, during the public comment period, MDNR revises paragraph 11 to delete the provision for substitution of "equivalent" measures, this portion of the consent orders may be approved. In the alternative, MDNR may permit the use of the measures identified in the Agency's fugitive dust model, in lieu of the provision for substitution of "equivalent" measures, in accordance with USEPA's October 5, 1992 letter.

In addition, each of the 31 consent orders provides for termination upon the issuance of an operating permit pursuant to title V of the Act (paragraph 12). Each title V operating permit, however, must include all Clean Air Act provisions necessary to assure compliance with the applicable requirements of the Act, including those in the SIP. See 42 U.S.C. 7661c(a). Therefore, the requirements contained in the title V operating permit are to be those substantive requirements applicable under other provisions of the Act, such as the SIP. For that reason, the consent orders must not expire, even following issuance of the operating permits.[7] The TSD contains further information on the enforceability of the consent orders.

8. Lignin sulfonate Dust Suppressant

As stated earlier, MDNR used USEPA's "Open Fugitive Dust Source Computer Model" to determine control efficiencies for various combinations of chemical application rates and treatment frequencies applicable to fugitive dust roadway emissions. The model lists watering or chemical suppressants as two possible control options for unpaved roads. Average efficiency curves were generated for four chemical dust suppressants and, because there was little data available at the time, the program was designed to be very general without any reference to a specific chemical or brand name. The model allows for comparisons between watering and chemicals, and between the chemicals originally considered in the generation of the model, but not for the substitution of suppressants other than the four types originally considered by the model. Lignin sulfonate was not one of the four chemicals originally evaluated by USEPA's model.

[6] It should be noted that USEPA regulations promulgated pursuant to title V of the Act contain provisions under which alternative, equivalent emission limits may be incorporated in a title V permit. See 40 CFR 70.6(a)(iii). However, these provisions are applicable solely in the context of title V permits, and then only if the specific requirements in that rule have been met. The USEPA further notes that Michigan does not presently have a federally approved title V program.

[7] The USEPA would not consider a valid termination of the consent orders included in the SIP to have occurred unless and until: The State issues a title V permit that contains the provisions in the consent order; the State submits to USEPA a SIP revision providing for replacement of the consent order with the substitute permit; and USEPA approves the permit provisions as a SIP revision.

Ligninsulfonate has been utilized as a dust suppressant since the early 1900's in Sweden and its use in this country dates to the 1940's. Only one company in the nonattainment area (Levy, at five locations) currently uses ligninsulfonate for dust suppression. The MDNR investigated the relationship between the control efficiencies for lignin suppressants relative to the ones considered in the computer model to correlate the use of lignins to the use of the original four suppressants. MDNR determined that if lignins are applied at a chemical rate 2.3 times that of the chemicals considered in USEPA's computer model, then the efficiency predicted by the model can be applied to uncontrolled emission rates from unpaved roads being treated with ligninsulfonate given equal treatment frequencies. The USEPA believes that the data that has been submitted by the State of Michigan is comparable to the original data used to determine the control efficiencies of the dust suppressants included in the model, and, therefore, is adequate to technically support the use of ligninsulfonate as an alternative suppressant. See the TSD for further details.

9. Contingency Measures

As provided in section 172(c)(9) of the Act, all moderate nonattainment area SIP's that demonstrate attainment must include contingency measures. See generally 57 FR 13543–13544. These measures should consist of other available measures that are not part of the area's control strategy and must take effect without further action by the State or USEPA, upon a determination by USEPA that the area has failed to make RFP or attain the PM NAAQS by the applicable statutory deadline. As noted, States with initial moderate nonattainment areas were not required to submit the contingency measures required in section 172(c)(9) until November 15, 1993. The USEPA will determine the adequacy of such submittal as appropriate in a separate rulemaking.

III. Implications of This Action

The USEPA is proposing to disapprove in its entirety the SIP revision submitted by the State of Michigan on June 11, 1993 for the Wayne County PM nonattainment area because USEPA finds unapprovable provisions in each of the 31 consent orders submitted as part of the SIP revision. If the State removes the unacceptable language in paragraph 11, or replaces it with the previously approved version mentioned above, and removes paragraph 12 in each of the 31 consent orders, and submits revised consent orders which USEPA finds acceptable, the proposed disapproval would be changed to an approval when USEPA takes final action on this submittal. If finalized, this disapproval would constitute a disapproval under section 179(a)(2) of the Act (see generally 57 FR 13566–13567). As provided under section 179(a) of the Act, the State of Michigan would have up to 18 months after a final SIP disapproval to correct the deficiency that is the subject of the disapproval before USEPA is required to impose either the highway funding sanction or the requirement to provide two-to-one new source review offsets. If the State has not corrected its deficiency within 6 months thereafter, USEPA must impose the second sanction. Any sanction USEPA imposes must remain in place until USEPA determines that the State has come into compliance.

IV. Request for Public Comments

The USEPA is requesting comments on all aspects of today's proposal, including USEPA's proposed decision to impose the two to one new source review offset requirement as the first sanction should USEPA ultimately disapprove this submittal in whole or in part and the State fails to timely remedy the deficiency. As indicated at the outset of this document, USEPA will consider any comments received by July 15, 1994.

V. Executive Order 12866

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by an October 4, 1993 memorandum from Michael H. Shapiro, Acting Assistant Administrator for Office of Air and Radiation. A future document will inform the general public of these tables. On January 6, 1989 the Office of Management and Budget (OMB) waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for 2 years. The USEPA has submitted a request for a permanent waiver for Table 2 and 3 SIP revisions. The OMB has agreed to continue the waiver until such time as it rules on USEPA's request. This request continues in effect under Executive Order 12866 which superseded Executive Order 12291 on September 30, 1993. OMB has exempted this regulatory action from E.O. 12866 review.

VI. Regulatory Flexibility

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, USEPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, USEPA may certify that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

The USEPA's disapproval of the State request under section 110 and subchapter I, part D of the Act does not affect any existing requirements applicable to small entities. Any pre-existing Federal requirements remain in place after this disapproval. Federal disapproval of the State submittal does not affect its state-enforceability. Moreover, USEPA's disapproval of the submittal does not impose any new Federal requirements. Therefore, USEPA certifies that this disapproval action does not have a significant impact on a substantial number of small entities because it does not impose any new Federal requirements.

40 CFR Part 180

[OPP–300339/FRL–4780–6]

RIN No. 2070–AC18

Definitions and Interpretations; Oriental Radish

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that 40 CFR 180.1(h) be amended to add EPA's interpretation for the application of tolerances and exemptions from the requirement of a tolerance established for pesticide chemicals in or on the raw agricultural commodity oriental radish. The proposed amendment to 40 CFR 180.1(h) is based, in part, on recommendations of the Interregional Research Project No. 4 (IR-4).

DATES: Comments, identified by the document control number [OPP-300339], must be received on or before July 15, 1994.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt L. Jamerson, Emergency Response and Minor Use Section (7505W), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Sixth Floor, Crystal Station #1, 2800 Jefferson Davis Hwy., Arlington, VA 22202, (703)-308-8783.

SUPPLEMENTARY INFORMATION: Paragraph (h) of 40 CFR 180.1 provides a listing of general commodity terms and EPA's interpretation of those terms as they apply to tolerances and exemptions from the requirement of a tolerance for pesticide chemicals under section 408 of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 346a. General commodities are listed in column A of 40 CFR 180.1(h), and the corresponding specific commodities, for which tolerances and exemptions from the requirement of a tolerance established for the general commodity apply, are listed in column B. The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has requested that 40 CFR 180.1(h) be amended to add the commodity term "oriental radish (root and tops)" to the general category of commodities in column A and to add the corresponding specific commodities "*Raphanus sativus* var. *longipinnatus* (root and tops), including Chinese or Japanese radish (both white and red), winter radish, daikon, lobok, lo pak, and other cultivars and/or hybrids of these" to column B.

The amendment is being requested to establish a commodity definition for oriental radishes for tolerance-setting purposes and to identify the specific commodities which comprise the general category of oriental radishes. In February 1990, in response to a request from the Hawaii Department of Agriculture for EPA to establish a commodity definition for radish to include Japanese and other oriental radishes, the Agency determined that tolerances set for the common radish will not apply to oriental radishes but that it would be appropriate to add a general commodity definition for "oriental radish" for tolerance purposes to cover the wide variety of forms and cultivars which constitute oriental radishes.

The crop group regulations in 40 CFR 180.34(f) enable the establishment of tolerances for a group of related crops. Once the crop group tolerance is established, the tolerance level applies to all raw agricultural commodities within the group, unless a crop is specifically excluded. Currently, Japanese radish (daikon) is included in the Root and Tuber Vegetables group (40 CFR 180.34(f)(9)(i)) and in the Leaves of Root and Tuber Vegetables group (40 CFR 180.34(f)(9)(ii)), but is not covered by individual tolerances for radishes. If this proposed action to amend 40 CFR 180.1(h) is finalized, EPA will initiate revisions to 40 CFR 180.34(f)(9)(i) and (ii) and to any existing tolerance regulations for Chinese or Japanese radishes to reflect the change in nomenclature to "oriental radish."

EPA has completed an evaluation of the proposed amendment and concludes that pesticide residues in the various cultivars of *Raphanus sativus* var. *longipinnatus* are expected to be similar when equal amounts of pesticide are applied for control of a common pest. Radishes are generally affected by the same pest and disease problems as other members of the mustard (Cruciferae) family, such as the cabbages. The major insect pest of radishes is root maggots that attack the roots.

All radishes are forms and species of the genus *Raphanus* and members of the Cruciferae family. Radishes are cool season crops grown as annuals. Seeds are planted in the fall, and the roots enlarge in the cool months.

Most oriental radishes have roots weighing between 3 and 5 pounds; however, Japanese radishes may produce large roots up to 40 to 50 pounds, and their leafy tops can spread to more than 2 feet. They also require a longer growing season (50 to 60 days) than the common radish.

Chinese radish roots can weigh up to 100 pounds, but most are 10 to 20 pounds at maturity, and in Florida the average is 20 pounds. Other oriental radishes have an average weight of 1 to 2-1/2 pounds. Roots range in length from 18 to 24 inches and vary in shape from round to elongated and cylindrical. Colors include white, pink, red, purple, black, and occasionally dark brown

Cultivars of radishes are classified into three types, depending on the number of days it takes the root to mature: (1) spring cultivars, ready to harvest in 20 to 30 days; (2) summer cultivars, ready to harvest in 35 to 40 days; and (3) winter cultivars, ready to harvest in 50 to 60 days and as high as 90 days.

Oriental radishes are usually available all year, mostly from Hawaii and California, with smaller amounts from Florida. The fall and winter roots are milder than the spring and summer radish production which are more pungent. The oriental radishes are eaten fresh (raw) or pickled like cucumbers or grated, chopped, or sliced for use in stir-fry or sushi dishes. Leaves are used like turnip tops as a salad or soup green.

At present, the most common type of oriental radish planted in the U.S. is the daikon or Japanese radish. There are presently many cultivars, plus several new and improved cultivars and hybrids being developed for increased disease resistance, earlier production, and better winter hardiness that will give the grower several options to respond to consumer demand.

Based on the above information, the Agency concludes that it is appropriate that the general commodity "oriental radish (root and tops)" should be interpreted for tolerance purposes to include the corresponding specific commodities "*Raphanus sativus* var. *longipinnatus* (root and tops), including Chinese or Japanese radish (both white and red), winter radish, daikon, lobok, lo pak, and other cultivars and/or hybrids of these." Therefore, it is proposed that the changes to 40 CFR 180.1(h) be made as set forth below.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [OPP-300339]. All written comments filed in response to this proposal will be available in the Public Response and Program Resources Branch, at the address given above from

8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12866.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Although this regulation does not establish or raise a tolerance level or establish an exemption from the requirement of a tolerance, the impact of the regulation would be the same as establishing new tolerances or exemptions from the requirement of a tolerance. Therefore, the Administrator concludes that this rule would not have a significant economic impact on a substantial number of small entities.

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: May 31, 1994.

Stephanie R. Irene,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. Section 180.1(h) is amended by adding and alphabetically inserting the general commodity "oriental radish (root and tops)" in column "A" and the corresponding specific commodities "*Raphanus sativus* var. *longipinnatus* (root and tops), including Chinese or Japanese radish (both white and red), winter radish, daikon, lobok, lo pak, and other cultivars and/or hybrids of these" in column "B" to read as follows:

§ 180.1 Definitions and interpretations.

* * * * *

(h) * * *

A	B
. .	. . . . .
Oriental radish (root and tops)	*Raphanus sativus* var. *longipinnatus* (root and tops), including Chinese or Japanese radish (both white and red), winter radish, daikon, lobok, lo pak, and other cultivars and/or hybrids of these.
. .	. . . . .

RIN 2070-AC18

Pesticide Tolerances for Benomyl

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to recodify tolerances for combined residues of the fungicide benomyl and its metabolites in or on the raw agricultural commodities avocado, dandelion, and papaya. This amendment, which was requested in a petition submitted by the Interregional Research Project No. 4 (IR-4), would establish tolerances for regionally restricted registration of the pesticide on these commodities.

DATES: Comments, identified by the document control number [PP 2E4070/P581], must be received on or before July 15, 1994.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt L. Jamerson, Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460. Office location and telephone number: Sixth Floor, Crystal Station #1, 2800 Jefferson Davis Highway, Arlington, VA 22202, (703)-308-8783.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition (PP) 2E4070 to EPA on behalf of the Agricultural Experiment Stations of Florida and Puerto Rico. This petition requests that EPA recodify tolerances established pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(e), for combined residues of the fungicide benomyl, methyl 1-(butylcarbamoyl)-2-benzimidazolecarbamate, and its metabolites containing the benzimidazole moiety (calculated as benomyl) in or on the raw agricultural commodities avocado and papaya at 3 parts per million (ppm) and dandelion at 10 ppm. Specifically, IR-4 proposes that EPA remove the tolerances for avocado, dandelion, and papaya from 40 CFR 180.294(a) and insert these tolerances under 40 CFR 180.294(b), which lists tolerances established in support of regional registration. This amendment would regionally restrict registration for use of benomyl on dandelion and papaya to Florida and use on avocado to Florida and Puerto Rico.

IR-4's request is in response to EPA's reregistration review of benomyl, which determined that the available residue data are adequate to support continued registration for use of benomyl on dandelion and papaya in Florida and

avocado in Florida and Puerto Rico. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

The scientific data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed action include:

1. Metabolism studies in mice indicate that benomyl is primarily metabolized to methyl 2-benzimidazole carbamate (MBC), which is converted to 2-aminobenzamidole and 5-OH-MBC. Elimination of metabolites occurs rapidly in urine and feces, with no unusual localization of benomyl or its metabolites in animal tissues.

2. A 2-year feeding study in dogs with a no-observed-effect level (NOEL) of 500 ppm (equivalent to 12.5 milligrams (mg)/kilogram (kg)/day. Biochemical changes, hepatic cirrhosis, decreased weight gain and lower food consumption were observed at a feeding level of 2,500 ppm (equivalent to 125 mg/kg/day).

3. A three-generation reproduction study with rats fed diets containing 0, 100, 500, or 2,500 ppm (equivalent to 0, 5, 25, or 125 mg/kg/day) with a NOEL of 100 ppm based on decreased pup weanling weights at the 500 ppm and 2,500 ppm feeding levels.

4. Benomyl and MBC have been shown to cause developmental toxicity in rats. The most common abnormality in studies with rats was microphthalmia. With benomyl, anomalies observed in mice included short and/or kinky tail, fused vertebrae, fused ribs, and cleft palate. NOEL's for developmental toxicity are established at 30 mg/kg/day for rats and 50 mg/kg/day for mice for benomyl. For MBC the NOEL for developmental toxicity in rats is established at 10 mg/kg/day.

5. Mutagenicity studies indicate that benomyl and MBC have weak mutagenic activity that is primarily attributable to adverse effects on the cellular spindle apparatus. Both compounds produced positive effects in tests to assess structural chromosome aberrations, which is consistent with a cellular spindle effect. Equivocal results were obtained in studies performed to assess gene mutation, while tests for other genotoxic effects were negative.

6. A 2-year feeding/carcinogenicity study with rats fed diets containing 0, 100, 500, or 2,500 ppm of benomyl with a NOEL of 2,500 ppm (equivalent to 125 mg/kg/day). There were no carcinogenic or systemic effects observed under the conditions of the study.

7. A 2-year carcinogenicity study with rats fed diets containing 0, 100, 500, 2,500/10,000 or 5,000 ppm of MBC (equivalent to 0, 5, 25, 125/500 or 250 mg/kg/day). There were no carcinogenic effects observed under the conditions of the study.

8. Carcinogenicity studies for benomyl and MBC were conducted with CD-1 mice fed diets containing 0, 500, 1,500 or 7,500/5,000 ppm benomyl or 0, 500, 1,500, 7,500 (females) or 7,500/3,750 (males) ppm MBC. The high dose for benomyl was reduced to 5,000 ppm at 37 weeks in males and females due to weight loss, and the high dose for MBC was reduced to 3,750 at 66 weeks in males due to increased mortality; all males were sacrificed at 73 weeks. Both studies resulted in an increased incidence of benign or combined malignant and benign tumors of the liver. The tumorigenic responses were found to be compound related, e.g., they occurred with significant positive trends, and the elevated incidences exceeded historical rates for these tumor responses. The responses were also associated with foci of cellular alterations that are considered preneoplastic and imply that there is a progression of hepatic lesions.

9. Carcinogenicity studies for MBC were also conducted with Swiss SPF mice and HOE NMRKf mice. Liver tumors were observed in studies using Swiss SPF mice, but there were no carcinogenic effects observed with HOE NMRKf mice.

The Agency has classified benomyl and MBC as Group C carcinogens (possible human carcinogens). This classification is based on the Agency's "Guidelines for Carcinogen Risk Assessment," published in the **Federal Register** of September 24, 1986 (51 FR 33992). The decision supporting classification of benomyl and MBC as possible carcinogens (Group C) rather than probable carcinogens (Group B) is based primarily on the following:

1. The 2-year carcinogenicity study with rats was negative for carcinogenic effects.

2. The carcinogenic responses observed with benomyl and its metabolite MBC were confined to the mouse liver.

3. The liver tumors produced by benomyl and MBC were observed in two genetically related strains of mice (CD-1 and SPF Swiss), which are known to have high background incidence rates of liver tumors; there was no increased incidence of liver tumors observed in HOE NMRKf mice.

4. Benomyl produced weak mutagenic effects consistent with cellular spindle poison activity rather than gene mutation. This pattern of mutagenic activity correlates with the observed developmental toxicity of benomyl.

EPA announced in the **Federal Register** of December 6, 1977 (42 FR 61788), that a Special Review for benomyl had been initiated based on information indicating that benomyl posed risks of mutagenicity (point mutation and chromosomal aberrations), spermatogenic depression and teratogenic effects, acute toxicity to aquatic organisms, and significant population reduction in nontarget organisms.

In the **Federal Register** of August 30, 1979 (44 FR 51166), the Agency issued a Preliminary Notice of determination, which concluded that benomyl continued to pose the risks noted above with the exception of point mutations and significant population reductions in nontarget organisms. In the Notice and the accompanying Position Document 2/3, the Agency weighed the risks and benefits of use together and determined that certain modifications to the terms and conditions of use were necessary to reduce the risks to applicators.

Prior to the publication of the final benomyl regulatory decision, the Agency received new studies (the mice carcinogenicity studies discussed above), indicating that benomyl and its major metabolite MBC are carcinogenic. The Agency's position concerning the Special Review for benomyl was published in the **Federal Register** of October 20, 1982 (47 FR 46747). In the Notice of Determination Concluding the Special Review for benomyl, the Agency determined that the benefits exceed the risk from use of benomyl products if a dust mask is used when mixing and loading for aerial application. Registrants were required to amend their product labels to require use of a dust mask for persons who mix and load benomyl for aerial application.

More recently, dietary risk assessments have been conducted for benomyl in association with the requested recodification of tolerances for avocado, dandelion, and papaya. These risk assessments were conducted for MBC since benomyl readily hydrolyzes to MBC. Dietary risk assessments were conducted based on percent of the Reference Dose (RfD) utilized, carcinogenicity, and developmental toxicity. The results of these risk assessments are as follows:

Percent RfD utilized

An RfD for MBC was calculated of 0.033 mg/kg bwt/day by dividing the benomyl RfD of 0.05 mg/kg body weight (bwt)/day by 1.53, the ratio of the molecular weight of benomyl to the

molecular weight of MBC. The benomyl RfD is based on a NOEL of 5 mg/kg bwt/day from the three-generation rat reproduction study and an uncertainty factor of 100.

Available information on anticipated residues and percent of crop treated was incorporated into this analysis to estimate the Anticipated Residue Contribution (ARC). The ARC is generally considered a more realistic estimate than an estimate based on tolerance-level residues and 100 percent crop treated. The ARC from existing tolerances (including avocado, dandelion, and papaya) is estimated at 0.000248 mg/kg bwt/day and utilizes 0.8 percent of the RfD. The ARC for children aged 1 through 6 years old (the subgroup most highly exposed) utilizes 1.4 percent of the RfD.

Cancer Risk Assessment

The upper-bound carcinogenic risk from benomyl-derived MBC for the U.S. population from existing tolerances is estimated at 1×10^{-6}. The carcinogenic risk assessment was based on an upper-bound potency estimator (Q^*) for MBC of $4.2 \times 10^{-3*}$ and assumes a 70-year lifetime exposure. This estimate is within the range of carcinogenic risk that EPA generally considers negligible.

Developmental toxicity

The population group of interest for this assessment is females aged 13 and above, the subgroup that most closely approximates women of child-bearing age. EPA divided the calculated exposure of the highest exposed individual in this population subgroup (0.1 mg/kg bwt/day) into the developmental NOEL for MBC of 10 mg/kg bwt/day to get a Margin of Exposure of 100. This means that the persons most highly exposed to benomyl-derived MBC in their diet would receive 1/100 the dose that represents the NOEL from rat studies for developmental toxicity for MBC. Less than 1 percent of the population of females 13 or older are exposed through the diet to MBC at 0.1 mg/kg bwt/day or higher. For developmental toxicity, the Agency is not generally concerned unless the Margin of Exposure is below 100.

An adequate analytical method is available for enforcement purposes. The analytical method for enforcing this tolerance is available in the Pesticide Analytical Manual, Vol. II (PAM II).

There is no reasonable expectation that secondary residues will occur in milk, eggs, or meat of livestock and poultry since there are no livestock feed items associated with this action.

There are currently no actions pending against the continued registration of this chemical.

Based on the information and data considered, the Agency has determined that the tolerances established by amending 40 CFR part 180 would protect the public health. Therefore, it is proposed that the tolerances be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the FFDCA.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 2E4070/P581]. All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

Under Executive Order 12866 (58 FR 51735, Oct. 4, 1993), the Agency must determine whether the regulatory action is "significant" and therefore subject to all the requirements of the Executive Order (i.e., Regulatory Impact Analysis, review by the Office of Management and Budget (OMB)). Under section 3(f), the order defines "significant" as those actions likely to lead to a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities (also known as "economically significant"); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement, grants, user fees, or loan programs; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.

Pursuant to the terms of this Executive Order, EPA has determined that this rule is not "significant" and is therefore not subject to OMB review.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Environmental Protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: May 31, 1994.

Stephanie R. Irene,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In § 180.294, by amending paragraph (a) in the table therein by removing the commodities avocado, dandelion, and papaya and by amending paragraph (b) by adding and alphabetically inserting the same commodities, to read as follows:

§ 180.294 Benomyl; tolerances for residues.

* * * * *

(b) * * *

Commodity	Parts per million
Avocado	3
Dandelion	10
Papaya	3

Pseudomonas Fluorescens Strain NCIB 12089; Exemption From the Requirement of a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to establish an exemption from the requirement of a tolerance for residues of *Pseudomonas*

fluorescens in or on the raw agricultural commodity mushrooms. This exemption from the requirement of a tolerance was requested in a petition submitted by the Interregional Research Project No. 4 (IR-4).

DATES: Comments, identified by the document control number [PP 3E4255/P583], must be received on or before July 15, 1994.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW, Washington, DC 20460. In person, bring comments to: Rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt L. Jamerson, Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Sixth Floor, Crystal Station #1, 2800 Jefferson Davis Hwy., Arlington, VA 22202, (703)-308-8783.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition (PP) 3E4255 to EPA on behalf of the State Agricultural Experiment Stations and the United States Department of Agriculture. This petition requests that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(e), establish an exemption from the requirement of a tolerance for residues of the biological pesticide *Pseudomonas fluorescens* strain NCIB 12089, in or on the raw agricultural commodity mushrooms. The proposed use of the biological pesticide is to control bacterial blotch of cultivated mushrooms.

Pseudomonas fluorescens is a naturally occurring bacterium, is the dominant microflora found in mushroom caps, and is found in tap and fresh water, marine environments, and plants. It is reasonable to assume that most people are exposed daily to this bacterium. *Pseudomonas fluorescens* has been marketed for several years in Australia for mushroom blotch control.

The scientific data submitted in the petition and all other relevant material have been evaluated. An acute oral toxicity test indicated that *Pseudomonas fluorescens* strain NCIB 12089 was not toxic or pathogenic to rats by the oral route of exposure. Tests of various *Pseudomonas* strains closely related to those considered in the petition have been conducted. Acute oral, acute injection, and acute inhalation tests indicated that the related strains tested were not lethal or toxic to rats. Primary eye and primary dermal studies in rabbits using closely related strains showed no significant irritation effects.

Growth temperature studies were conducted for *Pseudomonas fluorescens* strain NCIB 12089 between 25 degrees and 37 degrees Centigrade (C). These studies demonstrated that this bacterial strain does not thrive at mammalian body temperatures (above 35 degrees C). This information, along with the toxicity infectivity tests, indicates that this organism is not a human pathogen. None of the members of this biotype of *Pseudomonas fluorescens* have been shown to be involved in mammalian pathogenicity or capable of forming toxic or sensitizing substances.

Reference Dose (RfD) considerations are not relevant to this petition; the available data indicate that this biological agent is not toxic to humans. Since no tolerance level will be set for this microbial control agent, the requirement for an analytical method for enforcement purposes is not applicable to this exemption from the requirement of a tolerance.

Based on the information and data considered, the Agency has determined that a tolerance is not needed to protect the public health. Therefore, it is proposed that the exemption from the requirement of a tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the Federal Register that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the FFDCA.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 3E4255/P583]. All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

Under Executive Order 12866 (58 FR 51735, Oct. 4, 1993), the Agency must determine whether the regulatory action is "significant" and therefore subject to all the requirements of the Executive Order (i.e., Regulatory Impact Analysis, review by the Office of Management and Budget (OMB)). Under section 3(f), the order defines "significant" as those actions likely to lead to a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also known as "economically significant"); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement, grants, user fees, or loan programs; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.

Pursuant to the terms of this Executive Order, EPA has determined that this rule is not "significant" and is therefore not subject to OMB review.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612) the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: May 30, 1994.

Stephanie R. Irene,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371

2. By adding new § 180.1129 to subpart D, to read as follows:

§ 180.1129 Pseudomonas fluorescens strain NCIB 12089; exemption from the requirement of a tolerance.

An exemption from the requirement of a tolerance is established for residues of the biological pesticide *Pseudomonas fluorescens* strain NCIB 12089 in or on mushrooms.

[FRL–4894–7]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List

AGENCY: Environmental Protection Agency.

ACTION: Notice of intent to delete Yakima Plating from the National Priorities List Update: request for comments.

SUMMARY: The Environmental Protection Agency (EPA) Region 10 announces its intent to delete the Yakima Plating Site from the National Priorities List (NPL) and requests public comment on this proposed action. The NPL constitutes appendix B to the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended. EPA and the State of Washington Department of Ecology (Ecology) have determined that the site poses no significant threat to public health or the environment and, therefore, further remedial measures pursuant to CERCLA are not appropriate.

DATES: Comments concerning this site may be submitted on or before July 15, 1994.

ADDRESSES: Comments may be mailed to:

Sean Sheldrake, Environmental Protection Agency, 1200 Sixth Avenue, Mail Stop: HW–113, Seattle, Washington 98101.

Comprehensive information on this site is available through the Region 10 public docket which is available for viewing at the Yakima Site information repositories at the following locations:

Yakima Valley Regional Library, Attn. Cynthia Garrick, 102 N. Third Street, Yakima, WA 98901.

United States Environmental Protection Agency, Region 10 Hazardous Waste Division–Records Center, Attn: Lynn Williams, 1200 Sixth Avenue, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT: Sean Sheldrake, U.S. EPA Region 10, 1200 Sixth Avenue, Mail Stop: HW–113, Seattle, Washington 98101, (206) 553–1220.

SUPPLEMENTARY INFORMATION:

I. Introduction
II. NPL Deletion Criteria
III. Deletion Procedures
IV. Basis of Intended Site Deletion

I. Introduction

The Environmental Protection Agency (EPA) Region 10 announces its intent to delete a site from the National Priorities List (NPL), appendix B of the National Oil and Hazardous Substances Contingency Plan (NCP), 40 CFR part 300, and requests comments on this deletion. EPA identifies sites on the NPL that appear to present a significant risk to human health or the environment. As described in § 300.425(e)(3) of the NCP, sites deleted from the NPL remain eligible for Fund-financed remedial actions in the unlikely event that conditions at the site warrant such actions.

EPA plans to delete the Yakima Plating Site at 1804 ½ South Third Avenue, Yakima, Washington 98902, from the NPL.

EPA will accept comments on the plan to delete this site for thirty days after publication of this notice in the **Federal Register.**

Section II of this notice explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action. Section IV discusses the Yakima Plating Site and explains how the site meets the deletion criteria.

II. NPL Deletion Criteria

Section 300.425(e) of the NCP provides that releases may be deleted from, or recategorized on the NPL where no further response is appropriate. In making a determination to delete a release from the NPL, EPA shall consider, in consultation with the state, whether any of the following criteria have been met:

(i) Responsible parties or other persons have implemented all appropriate response actions required;

(ii) All appropriate Fund-financed response under CERCLA have been implemented, and no further action by responsible parties is appropriate; or

(iii) The remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, taking of remedial measures is not appropriate.

Even if a site is deleted from the NPL, where hazardous substances, pollutants, or contaminants remain at the site above levels that allow for unlimited use and unrestricted exposure, EPA's policy is that a subsequent review of the site will be conducted at least every five years after the initiation of the remedial action at the site to ensure that the site remains protective of public health and the environment. In the case of this site, where plating related hazardous substances are not above health based levels and future access does not require restriction, operation and maintenance activities and five-year reviews will not be conducted. However, if new information becomes available which indicates a need for further action, EPA may initiate remedial actions. Whenever there is a significant release from a site deleted from the NPL, the site may be restored to the NPL without the application of the Hazard Ranking System.

III. Deletion Procedures

The following procedures were used for the intended deletion of this site: (1) EPA Region 10 issued preliminary and final close out reports which documented the achievement of cleanup goals; (2) Ecology concurred with the proposed deletion decision; (3) A notice has been published in the local newspaper and has been distributed to appropriate Federal, state, and local officials and other interested parties announcing the commencement of a 30-day public comment period on EPA's notice of intent to delete; and (4) All relevant documents have been made available for public review in the local site information repositories.

Deletion of the site from the NPL does not itself create, alter, or revoke any individual rights or obligations. The NPL is designed primarily for informational purposes to assist Agency management. As mentioned in Section II of this notice, 40 CFR 300.425(e)(3) states that deletion of a site from the NPL does not preclude eligibility for future Fund-financed response actions.

For deletion of this site, EPA's Regional Office will accept and evaluate public comments on EPA's notice of intent to delete before making a final decision to delete. If necessary, the Agency will prepare a Responsiveness Summary if any significant public comments are addressed.

A deletion occurs when the Regional Administrator places a final notice in the **Federal Register.** Generally, the NPL will reflect deletions in the final update following the Notice. Public notices and copies of the Responsiveness Summary will be made available to local residents by the Regional office.

IV. Basis for Intended Site Deletion

The following site summary provides the Agency's rationale for the intention to delete this site from the NPL.

A. Site Background

Yakima Plating was an electroplating facility located within the southern city limits of Yakima, at 1804 1/2 South Third Avenue in Yakima County, Washington. The area surrounding the site is primarily mixed residential and light commercial property.

B. History

The facility conducted plating operations of automobile bumpers from the early 1960's until 1990. During its operation, the facility discharged a number of plating wastes to an on-site sedimentation tank and drain field. These wastes contained a variety of metals including nickel, cadmium, and chromium.

In 1986, an EPA site investigation found evidence of heavy metals in the groundwater at Yakima Plating. On March 31, 1989, the site was placed on the NPL.

EPA completed the RI/FS and Human Health Risk Assessment in August, 1991. A Record of Decision (ROD) for the site was signed on September 30 1991. The major components of the selected remedy included:

- Liquids and sludges that were in tanks and containers would be removed, treated, and disposed of off-site at a permitted RCRA hazardous waste facility.
- Underground tanks (sedimentation and septic tanks) would be excavated and decontaminated.
- Contaminated soils above cleanup levels would be excavated, treated, and disposed of.
- Institutional controls would be implemented.
- A groundwater monitoring program would be implemented until contaminant levels in all wells allowed for unlimited use and unrestricted exposure.

C. Characterization of Risk

Prior to remediation, the preliminary environmental pathways of concern related to the plating wastes were groundwater, on-site soils and possibly surface water.

To facilitate site remediation, a removal was formally initiated on June 15, 1992, and consisted of the following activities:

- Excavating 2,567 cubic yards of contaminated soil, gravels, and the drain field pipe to the cleanup levels specified in the ROD, followed by off-site disposal to a hazardous waste landfill.
- Excavation and removal to a hazardous waste landfill of three sedimentation tanks.
- Removal of three on-site buildings.
- Neutralization, and containerization of approximately 34 drums of miscellaneous plating-derived waste for off-site disposal.

Analytical data based on five quarters of groundwater monitoring following the completion of the removal indicate concentrations of plating related contamination do not exceed health-based criteria or ROD cleanup levels. Removal of soils, the source of contamination, has assured surface water quality as well.

In addition, no environmental risk has been identified for this site. For example, no critical habitats or endangered species or habitats of endangered species have been identified.

Confirmational monitoring of soil and groundwater demonstrate that no significant risk to public health or the environment is posed by residual materials remaining at the site, and operation and maintenance activities are not required. Based on the removal of contaminated equipment and excavation of contaminated soil, EPA and Ecology believe that hazardous substances have been removed from the site so as to allow for unlimited use and unrestricted exposure within the site, that the site is protective of public health and the environment, and that no further remedial action or institutional controls are needed at the site. Accordingly, EPA will not conduct "five-year reviews" at this site.

One of the three criteria for deletion specifies that EPA may delete a site from the NPL if "all appropriate Fund financed response under CERCLA has been implemented, and no further action by responsible parties is appropriate." EPA, with concurrence of Ecology, believes that this criterion for deletion has been met. The groundwater and soil data confirm that the ROD goals have been met. It is concluded that there is no significant threat to public health or the environment and, therefore, no further remedial action is necessary Subsequently, EPA is proposing deletion of this site from the NPL.

Documents supporting this action are available from the docket.

Dated: April 26, 1994

Jane S. Moore,

Acting Regional Administrator, Region 10

RIN 2040–AC21

Pesticide Chemicals Category, Formulating, Packaging and Repackaging Effluent Limitations Guidelines, Pretreatment Standards and New Source Performance Standards; Extension of Comment Period

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule; extension of comment period.

SUMMARY: EPA is extending the comment period for the Pesticide Formulating, Packaging and Repackaging proposed effluent limitations guidelines and standards by 30 days. EPA has received numerous comments requesting an extension of the comment period.

DATES: Comments on the proposed rule must be received in writing by July 13, 1994.

ADDRESSES: Send comments in writing to Ms. Janet Goodwin, Engineering & Analysis Division (4303), U.S. EPA, 401 M Street SW., Washington, DC 20460

FOR FURTHER INFORMATION CONTACT: For additional technical information write Ms. Shari Zeskin at the above address or call at (202) 260–7130. For additional information on the economic impact analyses contact Dr. Lynne Tudor at the above address or by calling (202) 260–5934.

SUPPLEMENTARY INFORMATION: In a Notice of Proposed Rulemaking on April 14, 1994 (59 FR 17850), EPA proposed effluent limitations guidelines and standards for the control of wastewater pollutants from the Pesticide Formulating, Packaging and Repackaging (PFPR) industry and provided a 60 day comment period. Today's notice extends the comment period by 30 days to July 13, 1994. EPA has received numerous comments requesting an extension of the comment period. EPA recognizes that trade associations and individual PFPR facilities may need additional time to gather substantive data on the expanded scope of pesticide active ingredients

(i.e., the "non-272" PAIs). In particular, facilities may need time to gather data on or conduct treatability studies with the non-272 PAIs. In addition, many of the PFPR facilities are small business and are presently entering their busy-season. EPA recognizes that these facilities may have limited resources (i.e., manpower) and may not be able to comment as effectively as possible within the 60-day comment period. Further, EPA acknowledges that some PFPR facilities use contractor or toll formulating facilities and may need additional time to acquire technical/economic data from their contract facilities. In addition, for some facilities, in particular the agricultural chemical refilling establishments, there may be resource constraints due to the timing of two proposed regulations (i.e., the Office of Water's PFPR Effluent Guidelines and the Office of Pesticide Programs' Pesticide Container and Containment Rule) with overlapping comment periods. EPA believes that an additional 30 days will allow facilities to provide more meaningful and substantive comments.

EPA cannot extend the comment period for a time greater than 30 days because of a court-ordered date of August 1995 for promulgating a final rule. 57 FR 41000 (September 8, 1992) (Effluent Guidelines Plan for complying with consent decree in *NRDC* v. *Reilly*, Civ. No. 89-2980 (D.D.C. 1992)). Those persons who believe that they will be unable to submit comments by the new July 13, 1994 date should contact the Agency through the EPA personnel listed above in the **ADDRESSES** section. EPA will attempt to review such late comments as it can. Due to the scheduling constraints under the *NRDC* v *Reilly* consent decree, however, EPA cannot guarantee that it will be able to consider any information which is submitted beyond July 13, 1994.

Dated: June 9, 1994.

Robert Perciasepe,

Assistant Administrator for Water

[CC Docket No. 92-77, FCC 94-117]

Billed Party Preference for 0+ InterLATA Calls

AGENCY: Federal Communications Commission [FCC].

ACTION: Notice of proposed rulemaking.

SUMMARY: This Further Notice of Proposed Rulemaking seeks further comment on whether the Commission should mandate a system of "billed party preference (BPP)," whereby 0+ interLATA calls—that is, calls made by entering a "0" followed by a long distance number—would be routed automatically to the operator services provider preferred by the party to be billed for the call. While the Commission found that the available evidence indicated that the benefits of BPP—in the form of more competitive service of consumers by operator service providers—outweighed its costs, the Commission also found that some of the data underlying its cost/benefit analysis were not as precise or as current as it desired. Therefore, the Commission seeks additional updated data and further comment on its analysis, as well as on a number of aspects of how BPP might be implemented.

DATES: Interested parties may file comments on the Commission's billed party preference proposal on or before July 8, 1994 and reply comments on or before July 29, 1994.

ADDRESSES: Federal Communications Commission, 1919 M St., NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Mark S. Nadel, Policy and Program Planning Division, Common Carrier Bureau, (202) 632-1301.

SUPPLEMENTARY INFORMATION:

Background

In 1992, the Commission adopted Billed Party Preference for 0+ InterLATA Calls, CC Docket No. 92-77, Notice of Proposed Rulemaking, 7 FCC Rcd 3027, 57 FR 24574 (June 10, 1992), initiating a rulemaking proceeding to consider the merits of an automated "billed party preference" (BPP) routing methodology for 0+ interLATA traffic. The Commission tentatively concluded that BPP is, in concept, in the public interest, but sought comments on the costs and benefits of BPP as well as on a number of aspects of how BPP might be implemented.

Summary of Further Notice of Proposed Rulemaking

This is a summary of the Commission's Further Notice of Proposed Rulemaking in Billed Party Preference, CC Docket No. 94-77; FCC 94-117, adopted May 19, 1994, and released June 6, 1994. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M St., NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, ITS, (202)-857-3800, 2100 M St., NW., suite 140, Washington, DC 20037.

Currently, interstate 0+ calls—that is, interstate calls that are made by entering a "0" followed by a telephone number—are routed to the operator services provider (OSP) selected by either the premises owner or the provider of the phone. Under a system of Billed Party Preference (BPP), such calls would be automatically routed to the OSP preferred by the party to be billed for the call. While the Commission found that the available evidence indicated that the benefits of BPP outweighed its costs, the Commission also found that some of the data underlying its cost/benefit analysis were not as precise or as current as it desired. Therefore, the Commission seeks further comment on BPP.

The Commission found that BPP would provide three principal benefits. First, it would facilitate access to the telephone network by simplifying operator service calling, while guaranteeing that calls are carried by the billed party's preferred carrier. Callers who currently use access codes would no longer need to do so. Callers who do not use access codes would no longer face the risk that their call would be carried by an unfamiliar operator service provider with rates considerably higher than the industry average. Based on data in the Commission's November 1992 report issued pursuant to the Telephone Operator Consumer Services Information Act, the Commission estimated that BPP would likely enable consumers to save about $280 million per year by avoiding operator service providers with rates higher than the AT&T/MCI/Sprint average.

Second, the Commission found that BPP would force OSPs to refocus their competitive efforts toward serving consumers rather than serving aggregators, such as premises owners or payphone providers. The Commission recognized that such a shift in competitive focus would almost certainly eliminate the commissions that OSPs now pay to aggregators for directing 0+ calls to them. Based on the available data, it estimated that the elimination of commissions could save operator service providers about $340 million per year on interLATA 0+ calls, thereby offsetting a substantial portion of the costs of BPP. The Commission found, further, that a shift in competitive focus could also foster lower prices and better service for consumers.

Third, the Commission noted that BPP would eliminate certain AT&T advantages in the operator services market. For example, it would enable AT&T's competitors to offer end users the same 0+ access as AT&T. Finally, the Commission observed that BPP would reduce regulatory costs, likely decrease the cost of collections and uncollectables, and enhance the communications infrastructure.

On the other hand, the Commission also noted that BPP is an expensive technology. It found that available data indicated that the net cost of BPP for local exchange carriers (LECs) would be approximately $380 million on an amortized unseparated cost basis, with an additional estimated $35 million per year for OSP expenses. It observed, however, that this estimate was based on data that was not as precise as it could be.

Therefore, the Commission seeks comment on this analysis and asks parties to submit additional, updated data to corroborate or refute it. In addition, the Commission seeks comment on whether some or all of the benefits of BPP could be achieved through alternative, less costly measures.

The Commission also addressed how BPP should be implemented in the event the Commission decides to mandate it. It tentatively concluded that, if ordered, BPP should generally apply on a nationwide basis to all interLATA 0+ and 0− calls. It seeks comment on the options available to independent LECs for participating in BPP and on the costs of such options. It also seeks additional comment on whether to exempt all inmate telephones from BPP or at least those OSPs serving inmate phones and charging rates below some designated level. It also asks whether those providing LIDB queries should be required to tariff some form of anti-fraud service.

The Commission continues to believe that BPP should be treated as a new service for the purposes of price caps, but it seeks further comments on whether the costs of BPP should be recovered solely from BPP calls or all operator services calls.

The Commission tentatively concluded that if BPP is implemented each LEC would be required to notify its subscribers of their right to choose a 0+ carrier and to provide all subscribers with ballots for doing so. Furthermore, it stated that it would permit such notification to be made by either a separate mailing or a prominent billing insert. It also tentatively concluded that customers who did not return a ballot would be defaulted to their 1+ carrier, although it seeks comments on this matter, particularly from consumers and their representatives. The Commission seeks further information and comment on how secondary carrier arrangements should be handled under BPP and how call branding requirements should apply in a BPP environment.

With respect to line number calling cards, the Commission stated that it would not be in the public interest to adopt a BPP design that gave LECs or OSPs the exclusive ability to issue line number cards. It seeks comment on the relative costs and benefits of permitting BPP to employ a shared line number card option that only required 10-digit screening in LIDB, versus a design that required 14-digit screening.

Finally, the Commission tentatively concluded that, if BPP is implemented, it should accommodate commercial credit cards. It also seeks comments on how soon BPP could be implemented if a final decision mandating BPP is adopted.

[Docket PS–130B; Notice 2]

RIN 2137–AC34

Environmentally Sensitive Areas

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Notice of public meeting.

SUMMARY: RSPA invites representatives of industry, state and local government, and the public to an open meeting on "environmentally sensitive areas." The purpose of this meeting is to gather information which will allow RSPA to establish criteria for the identification of environmentally sensitive areas on or near hazardous liquid pipelines. Such criteria are needed to carry out the requirements of the Oil Pollution Act and the Pipeline Safety Act of 1992.

DATES: The meeting will be held on June 28, 1994, from 9:00 a.m.—4:00 p.m. Persons unable to attend may submit written comments in duplicate by August 1, 1994. Interested persons should submit as part of their written comments all of the material that is considered relevant to any statement of fact or argument made.

ADDRESSES: The meeting will be held at the U.S. Department of Transportation, Nassif Building, 400 Seventh Street SW., Room 2230, Washington, DC. Non-federal employee visitors are admitted into the DOT headquarters building through the southwest quadrant entrance at Seventh and E Streets.

Written comments must be submitted in duplicate and mailed or hand delivered to the Dockets Unit, Room 8421, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590–0001. Please identify the docket and notice numbers stated in the heading of this notice.

All comments and materials cited in this document will be available for inspection and copying in room 8421 between 8:30 a.m. and 4:30 p.m. each business day. The transcript of the meeting will be available approximately three weeks after the meeting.

FOR FURTHER INFORMATION CONTACT: Christina Sames, (202) 366–4561, regarding the subject matter of this notice, or the Dockets Unit, (202) 366–5046, regarding copies of this notice or other material referenced in this notice.

SUPPLEMENTARY INFORMATION:

The Oil Pollution Act of 1990

On January 5, 1993, RSPA published an Interim Final Rule (IFR) ("Response Plans for Onshore Oil Pipelines;" 58 FR 244; Docket No. PS–130; 49 CFR part 194), to implement the requirements of the Oil Pollution Act of 1990 (Pub. L. No. 101–380; 104 Stat. 484; OPA). The IFR requires operators of onshore pipelines that handle, store, or transport oil and, because of their location, could reasonably be expected to cause "substantial harm" or "significant and substantial harm" to the environment by discharging oil into or on any navigable waters or adjoining shorelines, to prepare and submit oil spill response plans for a worst case discharge or the substantial threat of a worst case discharge. The purpose of these requirements is to improve response capabilities and to reduce the environmental impact of oil discharged from onshore oil pipelines.

The IFR requires operators to identify the areas potentially affected by their pipeline which are of greatest

vulnerability to an oil discharge, including navigable waters, public drinking water intakes, and environmentally sensitive areas. The IFR defined environmentally sensitive areas as "an area of environmental importance which is in or adjacent to navigable waters." The IFR stated these areas may include wetlands, national parks, wilderness and recreational areas, wildlife refuges, marine sanctuaries, and conservation areas.

RSPA received ten comments to the docket on the part 194 definition of environmentally sensitive areas. The American Petroleum Institute submitted a proposed definition for environmentally sensitive areas. Three commenters requested that RSPA revise the part 194 definition to be consistent with definitions used elsewhere. Three commenters requested that RSPA revise the part 194 definition to define environmentally sensitive areas as areas where a release has the potential to cause significant long-term environmental harm or represents an imminent threat to human health. Two commenters requested that the definition of environmentally sensitive areas be more specific, and another commenter requested that RSPA broaden the definition to include wildlife habitats.

The Pipeline Safety Act of 1992

Section 202(a) of the Pipeline Safety Act of 1992 (Pub. L. 102–508; October 24, 1992; PSA) requires the Secretary, in consultation with the Administrator of the Environmental Protection Agency, to issue regulations establishing criteria for the identification, by operators of pipeline facilities and gathering lines, of all pipeline facilities and gathering lines that are located in an area that is "unusually sensitive to environmental damage in the event of a pipeline accident." In describing areas that are unusually sensitive to environmental damage, the Secretary is to consider including earthquake zones and areas subject to substantial ground movements, such as landslides; areas where ground water contamination would be likely in the event of the rupture of a pipeline facility; freshwater lakes, rivers, and waterways; and river deltas and other areas subject to soil erosion or subsidence from flooding or other water action, where pipeline facilities are likely to become exposed or undermined.

Section 202 of the PSA directs the Secretary to issue regulations requiring operators to carry out these identifications of environmentally sensitive areas through maps and a pipeline inventory. RSPA has scheduled a separate rulemaking on the creation of such inventories and maps (see Unified Agenda; 59 FR 20662; April 25, 1994).

Revised Definition: In view of the comments we received on the IFR and in view of the requirements of the PSA, RSPA invites comments on the following definition of an environmentally sensitive area:

"Environmentally sensitive area" means any of the following areas where the release of a hazardous liquid from a pipeline could create significant long-term environmental harm or represents an imminent threat to human health:

A. Community water intakes as defined by the Safe Drinking Water Act regulations, 40 CFR 141.2;

B. Freshwater lakes, rivers and waterways;

C. State or Federal wetlands, parks, natural areas, wilderness areas, wild or scenic rivers, wildlife refuges or wildlife sanctuaries specifically designated, identified, and located by the Area Contingency Plans; or

D. River deltas and other areas subject to soil erosion or subsidence from flooding or other water action, where pipeline facilities are likely to become exposed or undermined.

A public meeting will be held to collect information on any of the matters described above. RSPA is particularly requesting comment on the following questions:

(1) Is the above definition adequate for use under part 194?

(2) If the definition is not adequate, what other criteria should be used to identify environmentally sensitive areas?

(3) Would a definition adopted for use under part 194 be adequate for use in amending the requirements of 49 CFR part 195, as required under § 202 of the PSA?

(4) Are there standards, tests, or guidelines available to rank environmentally sensitive areas in terms of the risks posed to those areas by a release of a hazardous liquid ?

(5) Would the above definition change the cost of compliance with part 194? If yes, by what amount?

Interested persons are invited to attend the meeting and present oral or written statements on the matters set for the meeting. Any person who wishes to speak should notify Christina Sames at the above address and phone number. Please estimate the time that will be needed to speak. RSPA requests the right to limit the time of each speaker, if necessary, to ensure that everyone who requests an opportunity to speak is given one. Interested persons that are not scheduled to comment will have an opportunity to comment only after approval of the meeting officer. Written comments may be submitted either at the meeting or by mail to the above address.

Since this meeting concerns an open rulemaking on part 194, RSPA will consider all comments in developing a final definition of "environmentally sensitive areas" for part 194. The meeting is not intended to reopen the docket for comment on other subjects.

Issued in Washington, DC on June 9, 1994.

George W. Tenley, Jr.,

Associate Administrator for Pipeline Safety.

[Docket No. 88–06, Notice 23]

RIN: 2127–AE49

Federal Motor Vehicle Safety Standards; Side Impact Protection—Light Trucks, Buses and Multipurpose Passenger Vehicles

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to extend Standard No. 214's dynamic side impact protection requirements to multipurpose passenger vehicles, trucks and buses with a gross vehicle weight rating of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less. These proposed amendments would require that each of these vehicles must protect its occupants in a full-scale dynamic crash test in which the vehicle is struck on either side by a moving deformable barrier simulating another vehicle. The occupants would be represented by instrumented test dummies. The dummies would be positioned in the target vehicle to measure the potential for injuries to an occupant's thorax and pelvis. Given the differences between these vehicles and passenger cars and their respective crash experiences, the agency is proposing possible modifications in the test procedure for these vehicles.

DATES: Comments must be received on or before August 15, 1994.

ADDRESSES: Comments should refer to the docket and notice numbers set forth above and be submitted (preferably in 10 copies) to the Docket Section, National Highway Traffic Safety Administration, room 5109, 400 Seventh Street SW., Washington, DC 20590. Docket hours are from 9:30 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Dr. Joseph Kanianthra, Chief, Side and Rollover Crash Protection Division, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590 (202–366–4924).

I. Background

IA. Existing Side Impact Requirements

NHTSA's side impact protection requirements are set forth in Federal Motor Vehicle Safety Standard No. 214, Side Impact Protection. The standard specifies two sets of requirements: (1) Quasi-static side door strength requirements for passenger cars and for "LTVs" (trucks, buses and multipurpose passenger vehicles (MPVs) with a gross vehicle weight rating (GVWR) of 10,000 pounds or less), and (2) dynamic requirements for passenger cars.

Standard No. 214's quasi-static side door strength requirements seek to mitigate occupant injuries in side impacts by reducing the extent to which the side structure of a vehicle is pushed into the occupant compartment during a side impact. Under the requirements, side doors must resist crush forces that are applied against the door's outside surface in a laboratory test. The requirements have applied to passenger cars since January 1, 1973, and were extended to LTVs by a final rule published in the **Federal Register** (56 FR 27427) on June 14, 1991. A phase-in for the extension of the requirements to LTVs began on September 1, 1993.

NHTSA added Standard No. 214's dynamic requirements for passenger cars in a final rule published in the **Federal Register** (55 FR 45722) on October 30, 1990. Under the requirements, a passenger car must provide protection to occupants' thoracic and pelvic regions as measured by the accelerations registered on instrumented side impact dummies (SID) in a full-scale crash test. In the test, the car (known as the "target" car) is struck in the side by a moving deformable barrier (MDB) simulating another vehicle. A phase-in for these new requirements also began on September 1, 1993.

The MDB specified in Standard No. 214's dynamic test procedure weighs about 3,000 pounds, and it is 33 inches high (measured from the ground to the top edge of the barrier face). Under the test procedure, the front and rear wheels of the MDB are "crabbed" at an angle of 27 degrees. With the MDB face oriented at a right angle to the target car, the MDB moves at an angle of 27 degrees and at a speed of 33.5 mph into the side of the target car. These aspects of the procedure were selected so that the test simulates the vehicle kinematics and crash forces in the struck car in a real world side crash in which a vehicle traveling at 30 mph perpendicularly strikes the side of a vehicle traveling at 15 mph. The agency determined that the 30 mph/15 mph combination represents the threshold speed of serious chest injury, and that countermeasures designed for the 30 mph/15 mph condition are likely to be effective in reducing chest injury potential over most of the range of impact speeds encountered in side crashes.

Standard No. 214's dynamic test procedure includes placing instrumented SIDs in the outboard front and rear seats on the struck side of the target car. For the thorax, the performance limit is expressed in terms of an injury criterion known as the Thoracic Trauma Index (dummy) or TTI(d). This injury criterion represents the average of peak acceleration values measured on the lower spine and the greater of the acceleration values of the upper and lower ribs of the test dummy. For the pelvis, the performance limit is specified in terms of the peak acceleration measured on the pelvis of the test dummy.

IB. Statutory Requirements

This notice is being issued pursuant to the NHTSA Authorization Act of 1991. Section 2503 of that Act requires the agency to address, through rulemaking, the possible extension of Standard No. 214's dynamic side impact protection requirements for passenger cars to MPVs and trucks with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less. These vehicles comprise a large majority of LTVs. Under section 2502 of the Act, the rulemaking must be conducted under the general provisions of the National Traffic and Motor Vehicle Safety Act concerning safety standards.

Section 2502 required NHTSA to publish, by a specified date, either an advance notice of proposed rulemaking (ANPRM) or an NPRM concerning the extension of Standard No. 214's dynamic side impact requirements to LTVs. In accordance with this requirement, on June 5, 1992, NHTSA published in the **Federal Register** (57 FR 24009) an ANPRM on this subject.

Section 2502 also provides that this rulemaking action must be completed within 26 months of publishing the ANPRM. The rulemaking is considered completed when NHTSA either promulgates a final rule or decides not to promulgate a rule. In either case, the agency must publish its decision in the **Federal Register**.

IC. The June 1992 ANPRM

In the June 1992 ANPRM, NHTSA estimated that the number of LTV fatalities in side impact crashes will rise by about 11 percent between 1989 and the mid-1990's, with front seat fatalities totaling 1,683 to 1,753 annually, and rear seat fatalities totaling 58. The agency indicated that approximately 16 percent of the fatalities are expected to occur in heavy vehicle (GVWR above 10,000 pounds)-LTV side crashes, 39 percent in light vehicle (GVWR of 10,000 pounds or less)-LTV side crashes, and 45 percent in single vehicle LTV crashes. For the multi-vehicle side impacts, approximately 71 percent of the LTV fatalities and 78 percent of serious injuries are caused by passenger cars and LTVs, with LTVs being the dominant striking vehicles. A much smaller percentage of passenger car fatalities and injuries is caused by heavier vehicles in the light-duty vehicle fleet, in multi-vehicle side impacts.

NHTSA explained that the possible extension of Standard No. 214's dynamic requirements to LTVs would primarily address LTV occupant fatalities and serious injuries which result from contacts between the side interior of LTVs and the shoulder, chest, abdomen, back and pelvis of an occupant. The agency estimated that by the mid-1990's, this portion of the side impact problem will account for about 245 LTV occupant fatalities and an additional 825 non-fatal serious injuries (AIS–3 or greater) annually.

NHTSA stated that it believes that the same types of countermeasures that reduce the probability of these types of thoracic and pelvic injuries in passenger cars, i.e., the use of structural modifications in combination with padding or the use of padding alone,

can provide safety benefits for LTVs. The agency also indicated its belief that the approach used in Standard No. 214 for passenger cars of requiring a vehicle to protect its occupants in a full-scale side impact crash test, utilizing an MDB and instrumented test dummies, may be appropriate for LTVs.

The agency emphasized, however, that the possible extension of Standard No. 214's dynamic side impact requirements to LTVs presents the issue of whether those requirements should be extended with or without modification. Given the differences between passenger cars and LTVs and their crash experiences, changes in the dynamic test procedure might be desirable to make it more appropriate for LTVs. NHTSA requested responses to a number of questions in the ANPRM, including whether the weight and height of contact surface of the MDB for side impact testing of passenger cars should be modified to be more representative of the vehicles that cause injuries and fatalities in LTVs.

NHTSA also noted that it had conducted two series of LTV side impact tests similar to the dynamic Standard No. 214 passenger car test. In the first test series, the agency tested seven LTVs using an MDB that was modified to make it more representative of crash conditions causing fatalities and serious injuries in light trucks. The weight of the MDB was increased to 4,000 pounds, and the height of the barrier face was raised between four and 10 inches. In the second test series, NHTSA tested three small LTVs and a fourth vehicle representative of a small LTV, using the current dynamic test procedure, including the 3,000 pound MDB, specified in Standard No. 214 for passenger cars. (The fourth vehicle was a passenger car version of a vehicle which was then marketed in a four-wheel drive version as an LTV. The agency believes that both versions of the vehicle provide similar side impact protection.) The agency noted that the data from the two test series indicate that many current LTVs, especially heavier ones, already meet the performance criteria specified for passenger cars.

III. Comments on the ANPRM

The three large domestic auto manufacturers were opposed to extending Standard No. 214's dynamic requirements to LTVs. General Motors (GM) stated that it is clear, from the examination of field accident data, that LTVs offer side impact protection superior to that of passenger cars. GM also argued that a dynamic side impact test for LTVs would address a very small percentage of LTV occupant serious injuries and an even smaller percentage of total passenger car and LTV occupant harm. GM believed that side impact resources would be diverted from passenger cars where they can be most productive to an area that would result in little benefit to LTV occupants and society in general.

Ford stated that it strongly believes that the dynamic side impact requirements should not be extended to LTVs. That company argued that such an extension would not meet the need for motor vehicle safety. Ford stated that real world traffic accident data show that LTV occupants are safer than passenger car occupants (1.01 fatalities per 1000 crashes for LTVs compared to 2.05 fatalities per 1000 crashes for passenger cars) for non-ejected, near-side occupants in vehicle-to-vehicle side impacts. That company noted that NHTSA research has found that the majority of LTVs tested to the passenger car dynamic side impact procedure would pass the passenger car requirements, supporting the field experience. Ford concluded that extending the dynamic side impact requirements to LTVs would represent rulemaking without any substantiated safety benefit. Ford also argued that the car test procedures define a scenario that applies to less than one percent of LTV fatalities, or about 0.2 percent of all motor vehicle occupant fatalities. That company argued that the use of scarce engineering resources to implement a rule with the potential to affect only about 0.2 percent of fatalities is not justified, even if proposed countermeasures were 100 percent effective in every crash.

Chrysler stated that it does not believe that there is support for the extension of the existing passenger car dynamic side impact requirements to LTVs, much less for the alternative of a more stringent test requirement. That company argued that NHTSA has failed to show that there would be a significant safety benefit from applying a dynamic side impact requirement to LTVs.

Mitsubishi also questioned the need for dynamic side impact requirements for LTVs. It argued that: (1) These vehicles are generally heavier and have higher sill structures which provide substantial side impact protection, (2) many of the larger LTVs probably already comply with such requirements without the need for any countermeasures, and (3) the recent extension of quasi-static side door strength requirements will provide improved side impact protection for LTVs.

Other vehicle manufacturers recommended that NHTSA extend Standard No. 214's dynamic requirements for passenger cars to LTVs but not adopt more stringent requirements. Toyota stated it believes the agency's regulations should require, when necessary and practical, equal levels of safety performance regardless of vehicle category. That company stated that while there are some LTVs whose construction allows them to comply already with the passenger car requirements, this is not true for all LTVs. According to Toyota, there are LTVs whose construction is similar to that of passenger cars that do not now comply with the passenger car requirements. Toyota stated that it believes that the effectiveness of extending the passenger car requirements to LTVs would be greater than the agency estimates. That company stated, however, that if the agency were to adopt a more stringent requirement for LTVs, e.g., by specifying a higher, heavier MDB, it would impose an unreasonable burden on manufacturers. Toyota also argued that if the agency were to adopt an LTV rule more stringent than that applicable to passenger cars, those LTVs whose construction is similar to passenger cars could be eliminated from the U.S. market.

Volkswagen stated that the dynamic side impact requirements should be extended to LTV class vehicles under 10,000 pounds GVWR. That company stated that the barrier was originally specified to represent the stiffness of light trucks, and that it should therefore remain as currently specified in Standard No. 214.

Nissan stated that it believes Standard No. 214's passenger car dynamic test procedure can be applied to LTVs, and that there is no need to establish a unique test procedure. That manufacturer stated that data indicate that the incidence of LTVs being struck by passenger cars is similar to the incidence of side impacts of passenger cars by other passenger cars. It stated further that these incidence rates indicate that the mass and dimensions of the MDB currently specified in Standard No. 214 realistically represent the majority of the striking vehicle population for both passenger cars and LTVs.

Two trade associations, the National Truck Equipment Association (NTEA) and the Recreation Vehicle Industry Association (RVIA) expressed concern about extending the applicability of Standard No. 214's dynamic requirements in light of potential impacts on their members, which include final stage manufacturers and alterers of certified vehicles. NTEA stated that it is concerned that the small businesses which produce work-related vehicles in multiple stages would not be able to conduct the dynamic test which may be proposed. It requested that the agency not propose extending the dynamic requirements to work-related multi-stage produced vehicles which are not able to pass through an incomplete vehicle manufacturer's certification or which cannot be completed within the guidelines provided for completion by the incomplete vehicle manufacturer. RVIA urged NHTSA to exclude motor homes, van conversions and other altered vehicles and otherwise limit the scope of the proposed requirements to those vehicle types that have a poor side impact injury record.

The Insurance Institute for Highway Safety (IIHS) argued that extension of Standard No. 214's dynamic test requirements to LTVs is an obvious necessity after the decade-long growth of this vehicle class as a means of daily private transportation. IIHS stated that it disagrees strongly with the notion that there is no need to require that all vehicles in the LTV class provide a minimum level of protection to occupants if many vehicles in the class already provide that protection. That organization stated that such partial availability demonstrates that the proposed protection is feasible, practical, and easily implemented, and that it should encourage, not discourage, the extension of the test requirements to LTVs.

IIHS argued, however, that the ease with which LTVs are likely to be able to meet the current requirements for cars does suggest that the injury criteria should be different for them. That organization stated that the agency had adopted the existing TTI(d) and pelvic g limits because lower maximum accelerations might be difficult to achieve in the car fleet. IIHS argued that while it does not accept the premise that lower acceleration criteria are not achievable in passenger cars, the agency's concern about passenger cars in this area is not relevant to LTVs. IIHS urged the agency to adopt appropriate lower TTI(d) and pelvic g limits for LTVs.

With respect to the height and weight of the MDB, IIHS stated that it does not believe that the agency should specify different dynamic test conditions for cars and LTVs at this time. That organization stated that the goal of the current rulemaking should be to ensure that all vehicles likely to be used as light-duty passenger vehicles, whether cars or LTVs, meet a common, minimum standard of occupant protection in the crashes to which such vehicles are likely to be exposed. While IIHS stated that it does not believe that the test barrier specifications for cars and LTVs should differ at this time, it suggested that the current barrier (3,000 pounds) may be improperly specified for both types of vehicles. That organization stated that with increasing numbers of LTVs in the light vehicle fleet, many light vehicles struck in the side will be struck by other light vehicles weighing in excess of 3,000 pounds. IIHS stated that NHTSA should consider increasing the weight of the MDB to make it more representative of the vehicle fleet.

The Advocates for Highway and Auto Safety (Advocates) stated that it supports dynamic side impact requirements for LTVs. That organization emphasized, however, that it is convinced that the agency must (1) raise the bumper height of the LTV MDB face above 30 inches, (2) raise the weight, and commensurate mass, of the LTV MDB to 5,000 pounds or more, and (3) increase the test speed of impacts above median levels to represent more of a worst case impact of a LTV by larger, heavier vehicles and some fixed objects. Advocates also argued that the agency should adopt lower TTI(d) and pelvic g limits than it established for cars, a quantified maximum intrusion standard, and coordinate this rulemaking with ones on rollover, roof strength and head injury.

II. Overview of Proposal

After considering the comments on the ANPRM and other available information, NHTSA has decided to propose extending Standard No. 214's dynamic side impact protection requirements to LTVs with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less. Given the differences between passenger cars and LTVs and their crash experiences, the agency is proposing possible modifications in the test procedure that would make it more representative of the crash conditions causing fatalities and serious injuries in LTVs.

NHTSA is proposing two possible modifications: (1) Raising the height of the MDB, and (2) increasing the weight of the MDB. The agency is proposing to specify the MDB height within a range of 33 inches to 45 inches as measured from the ground to the top edge of the barrier face. This would represent up to a 12-inch increase in MDB height as compared to the height specified for passenger car testing.

Within the 33 inch to 45 inch proposed range, NHTSA is proposing two alternative methods for specifying MDB height, one of which would be selected by the agency for a final rule. Under the first method, the MDB height would be raised to match the driver H-point of the tested vehicle. Under the second method, the MDB height would be at the same level for all LTVs, or at the same level for all LTV's within a particular sub-group, e.g., pickups, vans and utility vehicles, with different levels specified for different sub-groups. The agency is proposing to specify the MDB's weight within a range of 3,000 pounds, the current weight, and 3,800 pounds.

Under the proposal, LTVs, like passenger cars, would be required to meet specified TTI(d) and pelvic acceleration limits. NHTSA is proposing to specify a TTI(d) limit of 85 g and a pelvic acceleration limit of 130 g. In considering a possible extension, NHTSA is considering whether the requirements should apply to the front and rear seats of these additional vehicles (as is the case for passenger cars), or whether they should apply to the front seats only of these vehicles.

To provide manufacturers with sufficient leadtime to design their LTVs to meet the proposed performance requirements, NHTSA is proposing two compliance schedules, the choice of which would be at the option of the manufacturer. Under the first schedule, the standard would be phased-in in accordance with the following implementation schedule:

- 10 percent of all LTVs manufactured during the first full production year (September 1 to August 31) beginning approximately two years after the issuance of a final rule;
- 25 percent of all LTVs manufactured during the second full year after that two-year period;
- 40 percent of all LTVs manufactured during the third full year after that two-year period; and
- 100 percent of all LTVs manufactured on or after the beginning of the fourth full year after that two-year period.

Under the second schedule, no compliance would be required during the annual production period beginning approximately two years after the issuance of a final rule, but full implementation would be required beginning with the next production period.

The agency is proposing to exclude walk-in vans, motor homes, tow trucks, dump trucks and ambulances, and is requesting comments on whether to exclude other special types of vehicles

from the dynamic requirements. NHTSA is also proposing a phase-in exclusion for vehicles manufactured in two or more stages and for altered vehicles.

III. The Safety Problem

NHTSA has separately analyzed the fatality and injury experience of LTV occupants involved in side impact crashes. As discussed in the Preliminary Economic Assessment (PEA) accompanying this NPRM, the agency estimates that, by the mid-1990's, side impacts will result in 1763 fatalities for LTV occupants sitting in the front or second seat, annually. Front seat occupants will account for 1705 of the fatalities, with occupants of the second seat accounting for 58 fatalities. Approximately 16 percent of the LTV side impact occupant fatalities are expected to occur in heavy vehicle-LTV side crashes, 39 percent in light vehicle-LTV side crashes, and 45 percent in single vehicle LTV side crashes. (All of the figures in this paragraph and those in the next several paragraphs take into account the safety benefits of side door guard beams installed pursuant to the quasi-static requirements.)

Side impacts are also expected to account for about 6,000 serious but non-fatal (AIS 3–5) injuries to occupants sitting in the front or second seat, annually.

The extension of Standard No. 214's dynamic requirements to LTVs would primarily address LTV occupant fatalities and serious injuries which result from contacts between the side interior of LTVs and the shoulder, chest, abdomen, back and pelvis of the occupants. NHTSA estimates that by the mid-1990's, this portion of the side impact problem will account for 245 LTV occupant fatalities and an additional 970 serious (AIS 3–5) injuries annually. All of the estimated fatalities would result from thorax injuries. Of the 970 AIS 3–5 injuries, 857 would be thoracic injuries and 113 pelvic injuries. Looking solely at multi-vehicle side impacts between LTVs and other light vehicles, approximately 78 percent of the LTV fatal "trunk" injuries are caused by LTV's, and only 22 percent by passenger cars.

The agency notes that the fatality rate for occupants of LTVs in side impact crashes is slightly less than half of that for occupants of passenger cars. The LTV occupant side impact fatality rate per million registered vehicles is 25.7, as compared to 53.3 for passenger cars. The occupant fatality rates for various LTV categories are as follows: Small pickups, 30.1; large pickups, 19.0; utility vehicles 16.0; small vans, 19.3, and large vans, 9.7.

IV. Rulemaking Rationale

In multi-vehicle side impact crashes where fatalities and serious injuries result from contacts between the occupant and the interior side of the vehicle, the same basic chest injury causing dynamic event occurs regardless of whether the occupant is in a passenger car or LTV. The striking vehicle crushes the door of the target vehicle, from outside to inside. The inside door panel of the struck vehicle moves toward the occupant seated next to it, and strikes the occupant's thorax. Depending on the structure of the struck vehicle, the velocity of impact can be as high as the impact speed of the striking vehicle. The occupant's thorax is rapidly deformed as a result of the impact, resulting in injuries to the shoulder, chest, abdomen, back and/or pelvis. A similar event occurs in single vehicle side impacts with stationary objects, except that the injury mechanism is more likely to be related to intrusion than door contact velocity, i.e., the occupant's thorax is likely to experience more concentrated loading.

LTV occupants generally face a smaller risk of side impact thoracic injury than passenger car occupants because seating differences between LTVs and passenger cars make it less likely for the thoracic-injury-producing dynamic event described above to occur for LTVs than for passenger cars. LTV occupants typically sit several inches higher from the ground than passenger car occupants. If a passenger car strikes another passenger car in a side impact, the striking vehicle typically pushes the inside door panel of the struck vehicle directly into the thorax of an occupant sitting next to the door. However, if a passenger car strikes an LTV in a side impact, the primary part of the side structure that is pushed inward is more likely to be below the thorax of an adjacent occupant, thereby resulting in smaller injury-producing loads to the occupant's thorax. Further, the typically higher sill and side structure of LTV's offers significant resistance such that smaller crash loads are transmitted through the door structure to the occupant.

While the thoracic side impact problem is not so great for LTVs as it is for passenger cars, it is nonetheless a significant problem which merits attention. As indicated above, NHTSA estimates that by the mid-1990's, this portion of the side impact problem will account for 245 LTV occupant fatalities and an additional 970 serious (AIS 3–5) injuries annually. The bulk of these fatalities and serious injuries occur in side impacts with LTVs, heavy vehicles, and fixed objects, rather than in side impacts with passenger cars.

Given that the same basic dynamic event causes serious thoracic injuries and fatalities to both passenger car and LTV occupants in side impacts, i.e., medium to high velocity contact between the inside door panel and the thorax of the occupant, NHTSA believes that the same countermeasures developed for improved passenger car side impact protection are also appropriate for LTVs. There are two basic options to improve the side impact protection of a vehicle. It may be possible to increase the stiffness of the side of the vehicle and thereby reduce the velocity with which the vehicle side door interior strikes the occupant. However, given the limited available area along the side of a vehicle in which structure may be added and the enormous mass of a striking vehicle, the ability to improve safety by this means may be somewhat limited. The other available means of improving side impact protection is to cushion the impact between the side of the vehicle and the occupant, such as by adding padding to the side of the vehicle.

In the rulemaking establishing dynamic side impact requirements for passenger cars, NHTSA determined that the risk of thoracic injury can be substantially reduced by the addition of padding, or a combination of padding and structure, to the side of a vehicle. For example, the agency determined, for the driver seating position, that padding is approximately 21 percent effective (i.e., padding reduces TTI(d) by 21 percent), that structure and padding is about 30 percent effective, and that heavyweight structure and padding is 43 percent effective. As discussed in that rulemaking, NHTSA expected manufacturers to meet the dynamic side impact requirements for passenger cars primarily by adding padding.

NHTSA believes that the addition of padding, or the addition of padding and structure, can produce significant safety benefits for LTV occupants in side impacts. The agency notes that it is intuitively obvious that it is better for an occupant to be struck by a padded door than the same door unpadded. In agency research, the addition of three inches of padding in three LTV's reduced driver TTI(d) by 19.4, 28.6 and 35.0 percent. Pelvic g's were reduced by 24.5, 30.1 and 43.8 percent in the same vehicles.

Given the thoracic side impact problem that exists for LTV occupants and the fact that this countermeasure is readily available, NHTSA is currently not accepting the notion that it should decline to establish dynamic side impact requirements for LTVs simply because the type of dynamic event causing serious thoracic injuries to occupants of struck vehicles occurs less frequently for LTVs than for passenger cars.

The purpose of a dynamic side impact protection requirement is to ensure that vehicles provide side impact protection to their occupants in a simulated crash that is representative of a typical real-world crash with serious-injury-causing potential. In its dynamic side impact protection rulemaking for passenger cars, the agency developed an appropriate test procedure and performance requirements for passenger cars. In this rulemaking, NHTSA is addressing whether those requirements should be extended to LTVs. Since this rulemaking is based, in large part, on the passenger car rulemaking, the agency encourages interested persons to examine the record for that rulemaking.

As part of considering the possible extension of Standard No. 214's dynamic side impact protection requirements to LTVs, the agency has conducted several series of LTV dynamic side impact tests. The tests employed the dynamic procedure specified by Standard No. 214 for passenger cars, except that the height and mass of the MDB were varied.

As explained more fully in the PEA, NHTSA has tentatively concluded, based on the results of these tests, that a simple extension of Standard No. 214's dynamic side impact protection requirements to LTVs would result in few, if any, safety benefits. Since the height and weight of the MDB specified by Standard No. 214 are representative of passenger cars, the test essentially replicates a crash in which a passenger car is the striking vehicle. The tests confirm what is already apparent from the real-world crash data: LTV occupants face a very small risk of serious thoracic injury in side impacts by striking passenger cars. As indicated above, this is largely because, given the relatively high seating position of LTV occupants, if a passenger car strikes an LTV in a side impact, the primary part of the side structure of the LTV that is pushed inward is likely to be below the thorax of an adjacent occupant.

It could be argued that, notwithstanding the lack of benefits that would result from a simple extension of Standard No. 214's dynamic requirements to LTVs, NHTSA should adopt that approach to ensure that all light vehicles provide the same minimum level of side impact protection to their occupants. It could also be argued that such an approach would be appropriate because passenger cars and LTV's are operated in the same traffic environment. However, a significant concern about such a regulatory approach, particularly in the context of a requirement incorporating a full-scale dynamic test, is that it would result in significant compliance costs without concomitant benefits. Moreover, such an approach would leave unaddressed the risk of thoracic injury that LTV occupants do face in side impacts with vehicles other than passenger cars.

A second regulatory approach would be to develop a test procedure that simulates the crash conditions that produce serious thoracic injuries in the real world. In developing Federal motor vehicle safety standards, NHTSA focuses on reducing the number of serious injuries and fatalities that are occurring in the real world. The agency has tentatively concluded that this approach is appropriate with respect to dynamic side impact protection requirements for LTVs. However, comments are invited on both regulatory approaches.

V. Proposal

The agency has decided to propose extending Standard No. 214's dynamic side impact protection requirements to LTVs, with possible modifications in the test procedure to make it more representative of a typical real-world crash with serious-injury-causing potential to LTV occupants. The agency is considering two possible modifications: (1) Raising the height of the MDB, and (2) increasing the mass of the MDB. In considering a possible extension, NHTSA is considering whether the requirements should apply to the front and rear seats of these additional vehicles (as is the case for passenger cars), or whether they should apply to the front seats only of these vehicles.

VA. Possible Test Procedure Modifications

NHTSA tentatively concludes that the height of the MDB should be increased because use of this test device with its current height would not create a dynamic event that is representative of the ones likely to cause serious chest injuries to LTV occupants in real world crashes. In particular, with the MDB at a height which is representative of a passenger car, the primary part of the side structure of the LTV that is pushed inward is below the thorax of the adjacent LTV occupant. However, in real world side impact crashes in which LTV occupants are likely to experience serious chest injuries, the side structure of the LTV is typically pushed inward at a height near that of the occupant's thorax. This typically occurs as a result of the LTV being struck in the side by a vehicle other than a passenger car. Vehicles other than passenger cars are, of course, typically higher than passenger cars.

There are a number of possible approaches to determining how much to raise the height of the MDB, assuming that it needs to be raised. One approach is to focus on the struck vehicle. The agency notes that, unlike passenger cars for which vehicle and seating height are very similar, the height of LTVs and LTV seating positions vary considerably. Since the primary relevant safety problem is an impact in which the side structure of the vehicle directly adjacent to an occupant is pushed inward at the height of the thorax of the occupant, the height of the MDB could be based on the H-point of the struck vehicle. This approach would ensure that LTVs provide thoracic side impact protection when they are struck in the side by another LTV of a height that pushes the side door structure inward toward adjacent occupants.

Another approach is to focus on striking vehicles. The agency notes that the two types of striking vehicles that are most likely to cause severe chest injuries in side impacts are standard pickups and compact pickups. These vehicles cause 26 percent and 16 percent of all such injuries, respectively. Thus, MDB height could be based on the heights of the front ends of these vehicles, which are considerably higher than passenger cars.

NHTSA notes that since the heights of the front ends of LTVs and even of pickup trucks vary, specifying a single height that is equally representative of all LTVs does not appear to be possible. The agency also notes that specifying a single height could raise practicability concerns, depending on the height selected. In addition to being concerned that a test procedure simulates conditions representative of real world crashes, the agency must also ensure that its safety standards are practicable. One concern about a test procedure that specifies a single MDB height that is representative of large pickup trucks is whether a requirement based on that procedure is practicable for compact LTVs that have much lower seating heights than the front end heights of large pickup trucks.

NHTSA is proposing to specify an MDB height within a range of 33 inches to 45 inches as measured from the ground to the top edge of the barrier face. By way of comparison, the MDB height for passenger car testing is 33 inches.

Within the proposed range, the agency is proposing two alternative methods for specifying MDB height, one of which would be selected by the agency for a final rule. Under the first method, the MDB height might be raised, as compared to the current height for passenger car testing, to match the driver H-point of the tested LTV (or possibly the front passenger H-point for testing the side of the vehicle away from the driver).

One example of such an approach would be to raise the barrier height by the amount that the H-point height of the tested vehicle exceeds 21 inches. Barrier heights would be raised in one-inch increments up to a maximum of 12 inches. A maximum would be established to ensure that the barrier face top edge would not be above the window of the struck vehicle.

Another example, which uses driver H-point ranges for setting barrier height, would be as follows. For driver H-points 25 inches or lower, the MDB height would be raised four inches. For driver H-points higher than 25 inches but lower than 29 inches, the MDB height would be raised seven inches. For driver H-points at least 29 inches high but lower than 31 inches, the MDB height would be raised nine inches. For driver H-points 31 inches or higher, the MDB would be raised 11 inches.

Under the second method, the MDB height would be raised either to the same level for all LTV's, or to the same level for all LTV's within a particular sub-group, e.g., pickups, vans and utility vehicles, with different levels specified for different subgroups. The level could correspond to the average H-point height of the LTV population as a whole or to the average H-point height of each LTV sub-group.

NHTSA requests comments on these approaches, and on the appropriate vehicle groupings and MDB heights to select under such approaches.

If the agency adopts a methodology in which the MDB height is based on the height of the driver H-point of the tested vehicle, it would be necessary to specify a method for determining that H-point. The agency would contemplate adopting, for purposes of a final rule, an approach based on procedures specified in S4, H-Point Machine, of SAE Standard J826 (May 1987), Devices for Use in Defining and Measuring Vehicle Seating Accommodation. NHTSA requests comments on such an approach.

In addition to proposing to raise the height of the MDB for LTV testing, the agency is also considering increasing its weight. NHTSA derived the weight of the current barrier from the median curb weight of passenger cars (3,181 pounds in 1989) and light trucks (3,958 pounds in 1989). This resulted in a weighted average of 3,423 pounds, which was adjusted downward to account for the then-projected lower weight of vehicles in the 1990's. Based on these considerations, NHTSA derived a barrier weight of 3,000 pounds. Since the late 1980's, however, the sales weighted average curb weight of the passenger car and LTV fleet has been increasing, and is now about 3,310 pounds. The average curb weight of passenger cars is now 2,970 pounds, and the average curb weight of LTVs is about 3,900 pounds. The above weights were derived from the sales weighted EPA test weight for 1993 passenger cars and LTV's, minus 300 pounds.

The agency is proposing to specify the MDB's weight within a range of 3,000 pounds to 3,800 pounds. The lower end of the range is the current weight of the MDB, as specified by Standard No. 214 for passenger car testing. The upper end of the range is based on the average weight of striking vehicles in LTV crashes where an LTV occupant had an AIS ≥ 3 torso injury, as observed in 1988–91 NASS data. NHTSA is not proposing an MDB weight above 3,800 pounds because of concerns about practicability. In particular, the agency believes that as MDB weight is increased much above 3,600 pounds, there are increasing concerns about the feasibility of smaller LTV's meeting the dynamic test requirements with such a barrier.

Although NHTSA is proposing alternative approaches for specifying MDB height and weight, it believes it is desirable, to facilitate more focused comments, to specifically request comments on certain options, considering the pros and cons of those options.

There are several possible advantages in specifying a single height and weight for the barrier. Specification of a single height and a single weight would result in a simpler test procedure. For example, there would be no need to determine the precise H-point height or to adjust the height and weight of the MDB for testing different vehicles.

The agency believes that the combination of raising the MDB to a height in the middle portion of the proposed range, e.g., seven to nine inches above the passenger car barrier height, and increasing its weight to 3600 pounds would be sufficient to create a dynamic event that is representative of the ones likely to cause serious chest injuries to occupants in the most vulnerable LTVs in real world crashes. In particular, the MDB with that combination of height/weight would, in a dynamic test, push the side structure of the vast majority of LTV's inward at a level near that of the occupant's thorax.

In addition, assuming that a single height and a single weight were selected, the agency is concerned that raising the MDB height to a level above the middle portion of the proposed range and/or increasing its weight above 3600 pounds could raise practicability problems for compact LTV's whose H-points are typically only a few inches higher than passenger cars.

One possible concern about specifying a single height would be whether some manufacturers might raise occupant seating height to more easily meet the requirements. Moving the seat too high could increase the vehicle's propensity to rollover.

Other possible options are to specify the height of the MDB to match the H-point of the test vehicle individually or select a setting that would best match the H-point heights of a group of vehicles belonging to a particular type. Specifying the height of the MDB to match the H-point height would result in a test that is similar to that for passenger cars in that the impact of the barrier relative to the occupant's position would be similar. Manufacturers could not avoid the need to add padding simply by raising seating height.

While this would simulate an accident severity that is likely to be experienced by an occupant in that vehicle for thoracic injuries, there may be practical difficulties encountered in conducting side impact tests in that manner. When the MDB height is set to match the H-point of the test vehicle, structurally identical models with different suspension systems that cause changes in H-point heights, would be tested at different severities, resulting in the possibility of requiring different countermeasures for what is essentially the same vehicle. Also, the added step of determining H-point height could introduce variability in test results.

The agency seeks comments on the proposal for a single height and for multiple height settings for the MDB in LTV testing.

The increases in MDB height and weight are the primary test procedure changes that NHTSA believes may be needed in extending Standard No. 214's dynamic requirements to LTV's. The agency does not believe that any changes are needed in the speed or angle of the MDB, and believes that only minor adjustments may be necessary with respect to point of impact.

The specified point of impact for passenger cars is generally 37 inches forward of the center line of the wheelbase of the struck vehicle. However, for cars with wheelbases greater than 114 inches, the point of impact is 20 inches behind the front axle. This ensures that the impact point for cars with very long wheelbases is not so far toward the rear of the car that the front seat dummy does not experience a full impact. The agency is proposing, with one exception, the same impact point for LTVs. To ensure that the impact point is not too far forward for LTVs with very short wheelbases, the agency is proposing that for LTVs with wheelbases of 98 inches or less, the impact point would be 12 inches rearward of vehicle's front axle centerline. This would ensure that the MDB would not likely bridge across the front and rear axles in short wheelbase LTVs.

NHTSA notes that GM expressed concern that specification of impact point based on wheelbase could result in the possibility of having to impact two structurally identical LTV's at two different locations. This is because manufacturers sometimes offer the same LTV with several different wheelbases. The agency requests comments on whether the specified impact point should be adjusted to eliminate this possibility. For example, should the agency either specify impact point based on driver H-point instead of wheelbase or provide a manufacturer option in this area?

The agency also requests comments on whether any other changes should be made in any part of Standard No. 214's dynamic test procedure, in order to make it appropriate for LTV's.

The proposed changes in the regulatory text of Standard No. 214 are set forth at the end of this notice. NHTSA notes that the specifications for the side impact MDB are set forth in part 587. While the agency is not setting forth specific changes to part 587, it would, for purposes of a final rule, specify any necessary changes to reflect the possibly higher, heavier MDB for LTV testing.

NHTSA notes that the weight of the MDB is adjustable by means of removable ballast plates located over the rear axle and directly rearward of the front axle of the carriage (See Figure 2 of Standard No. 214). The weights are placed such that the weight distribution front-to-rear remains as close to the weight distribution in the standard 3000 pound barrier as possible.

The agency notes that the barrier face is vertically adjustable using the hole patterns on the standard passenger car MDB carriage front. The hole patterns currently permit the barrier to be raised 4.0 inches, 7.25 inches, 9.25 inches, and 11.25 inches above the standard passenger car barrier height of 33 inches. (See NHTSA Side Impact Moving Deformable Barrier Drawing No. DSL–1281, page 5.)

Depending on the height specification that might be adopted in a final rule, there could be a need to modify the positions of the holes on the frame. There may also be a need to extend the height of the frame to provide adequate support for the raised barrier plate. The agency has conducted its research tests using a barrier modified in this way.

The agency would also, for purposes of a final rule, make any necessary conforming changes to Figure 2 of Standard No. 214. This figure shows the side impact MDB.

VB. Performance Requirements

Standard No. 214 specifies TTI(d) limits of 85 g for 4-door cars and 90 g for 2-door cars. The standard specifies a pelvic acceleration limit of 130 g for all cars. NHTSA is proposing to specify a TTI(d) limit of 85 g, the same limit as applies to 4-door passenger cars, and a pelvic acceleration limit of 130 g, the same level as applies to all passenger cars.

While some commenters suggested that LTVs might be able to meet even more stringent TTI(d) and pelvic acceleration limits than cars, the agency notes that safety standards are not based on the criterion of maximum feasible safety. The agency believes that TTI(d) and pelvic acceleration limits of 85 g and 130 g, respectively, will make a significant contribution to improve side impact protection for LTVs. This is particularly true given the fact that the agency is considering adjusting the passenger car test procedure, making it more stringent in the case of LTVs, so that it better reflects the types of crashes that result in serious injuries to LTV occupants.

NHTSA notes that, in establishing a slightly higher TTI(d) limit of 90 g for 2-door passenger cars, it explained that it is generally more difficult for manufacturers to achieve lower TTI(d) for two-door cars than four-door cars, given that the door on a two-door model is typically wider than on a four-door model. The reason two-door cars usually have wider doors is to provide occupant access to the rear seat. Two-door LTV's do not typically have wider doors, since the front doors do not provide occupant access to a rear seat. Moreover, many LTVs generally have stiffer side structures than small and medium passenger cars, especially those LTV's equipped with side door beams. Therefore, the agency believes that the 85 g limit can be specified for all LTV's. NHTSA requests comment on this issue.

VC. Rear Seat Requirements

As part of considering an extension of Standard No. 214's dynamic side impact requirements to LTVs, NHTSA is considering whether the requirements should apply to the front and rear seats of these additional vehicles (as is the case for passenger cars), or whether they should apply to the front seats only of these vehicles.

On the subject of whether the requirements should apply to the rear seats of LTVs, NHTSA wishes to call attention to the cost assessment in the PEA for this proposal which raises concerns about the cost effectiveness of requiring the second row of seats in LTVs to meet these proposed requirements. For instance, Tables VIII–6 and VIII–7 of the PEA show the "costs per equivalent life saved" from covering the second row of seats are up to 43 times greater than the costs per equivalent life saved from covering the front seats. These additional costs would be incurred to achieve much lesser benefits. NHTSA estimates that only 4 to 15 percent of all potential benefits would accrue to occupants of rear seats. However, the costs to cover the rear seats range from 23 percent to as high as 74 percent of the total cost of this rulemaking, depending on the option.

The agency is very interested in public comments addressing whether, in view of these cost-effectiveness estimates, second seats in LTVs should be covered by these requirements. In addition, the agency is interested in knowing what provision light truck manufacturers would make for rear-seat occupants if the final rule were limited to the front seats.

The agency notes that the occupants of second seats are very often children, especially in minivans, which constitute the majority of LTVs with more than one row of seats. Thus, a decision to apply the dynamic side impact requirements to second seats would ensure that children riding in these seating positions in vehicles designed and sold for family transportation are afforded the same level of protection offered to adults in the front seats.[1]

[1] NHTSA's analysis (PEA, pp. V–[illegible] and V–26) indicates that, depending on the alternative, application of the requirements to second seats would prevent an additional 4 to 6 fatalities and 7 to 14 serious injuries annually. About ⅓ of these benefits would accrue to children under the age of 15.

NHTSA notes that while the regulatory text set forth in this document does not apply the dynamic side impact requirements to the second seats of LTVs, the agency may, depending on the comments, apply the requirements to second seats in a final role.

NHTSA notes that many LTVs have an aisle between one of the rear outboard seating positions and the side of the vehicle. The agency does not believe there would be any reason to apply the proposed requirements to such seating positions, since they are far enough away from the side of the vehicle that occupants are not likely to experience thoracic injuries in a side impact. Therefore, if NHTSA were to cover rear outboard seating positions where the outermost edge of the rear seat cushion is more than 10 inches away from the interior surface of the side door or wall.

VI. Vehicles Covered by Proposal

As indicated above, the NHTSA Authorization Act of 1991 required the agency to address, through rulemaking, the possible extension of Standard No. 214's dynamic side impact requirements for passenger cars to MPVs and trucks with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less. The agency has considered whether the requirements should also be applied to vehicles with a GVWR greater than 8,500 pounds but less than 10,000 pounds, as well as whether some vehicles with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less should be excluded.

Based on its test series, NHTSA believes that larger, heavier LTVs already meet the proposed dynamic requirements, even with the higher, heavier MDB. Therefore, the agency believes there is no reason to apply the requirements to LTVs with a GVWR above 8,500 pounds.

The agency believes that it may be appropriate to exclude some LTVs with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less. NHTSA is proposing to exclude motor homes, walk-in vans, tow trucks, dump trucks, ambulances, and vehicles which have no doors or exclusively have doors that are designed to be easily attached or removed so the vehicle can be operated without doors.

Many motor homes, walk-in vans, tow trucks, dump trucks and ambulances would already be excluded from the proposed requirements because they have a GVWR greater than 8,500 pounds. Moreover, most that are not excluded would likely already meet the proposed requirements since they would still tend to be among the larger, heavier LTV's. NHTSA is proposing to exclude these categories of vehicles because of the combination of two factors: (1) The likelihood that they already comply with the proposed requirements, and (2) many vehicles within these categories tend to have unusual side structures and are often produced in small volumes, making it potentially very expensive, on a per vehicle basis, to confirm compliance for purposes of certification.

The agency is proposing to exclude vehicles which have no doors, or exclusively have doors that are designed to be easily attached or removed so the vehicle can be operated without doors, because it would be impracticable for such vehicles to meet the proposed requirements.

There is a specialized class of small businesses involved in the final stage manufacture of vehicles manufactured in two or more stages, and/or in the conversion or alteration of new vehicles. In several recent rulemakings, including those extending Standard No. 214's quasi-static side door strength requirements and Standard No. 208's automatic crash protection requirements to LTVs, NHTSA has addressed at length the issue of compliance by these "final-stage manufacturers."

The agency believes that the extension of Standard No. 214's dynamic requirements to LTVs raises the same basic issues concerning final stage manufacturers as the earlier rulemakings on Standards No. 214 and No. 208. NHTSA has tentatively concluded that the proposed requirements would not pose an unreasonable burden on final stage manufacturers, since they have the same means for certifying compliance as they do for Standard No. 208's automatic crash protection requirements and Standard No. 214's quasi-static side door strength requirements.

In many cases, final stage manufacturers can certify compliance simply by staying with limits set by the incomplete vehicle manufacturer. Some final stage manufacturers build their own vehicle body structures. However, these manufacturers are generally larger than most final stage manufacturers, and have greater engineering and testing expertise. Final stage manufacturers can also band together to sponsor testing and/or engineering analysis.

For a full discussion of these issues, see 56 FR 12472, 12477–80, March 26, 1991 (final rule extending Standard No. 208's automatic protection requirements to LTVs); 57 FR 26609, 26612–17, June 15, 1992 (response to petitions for reconsideration of extension of Standard No. 208's automatic protection requirements to LTVs); 56 FR 27427, 27435–36, June 14, 1991 (final rule extending Standard No. 214's quasi-static side door strength requirements to LTVs); 58 FR 19628–31, April 15, 1993 (response to petition concerning the extension of Standard No. 214's quasi static side door strength requirements to LTVs).

NHTSA requests comments on the proposed exclusions discussed above and on whether any other LTVs should be excluded. NHTSA notes that buses within the specified weight limits are covered by the proposal. Some vans are classified as buses. While most such vans have a GVWR above 8,500 pounds there may be some smaller ones with a lower GVWR. The agency is aware that some small buses have an unusual side structure, in that the passenger portion of the bus is wider than the portion which includes the driver seat. NHTSA specifically requests comments on whether any such buses have a GVWR of 8,500 pounds or less and, if so, whether the proposed test procedure would be appropriate for vehicles with that type of side structure. NHTSA also specifically requests comments on the ability of manufacturers of LTVs designed to be driven by persons with disabilities to comply with the proposed requirements.

VII. Benefits

NHTSA's analysis of benefits is presented in the PEA. As discussed in that document, estimated benefits would vary depending on the barrier weight and height specified in a final rule. All LTV's are believed to meet the proposed requirements using the barrier specified by Standard No. 214 for passenger car testing. Thus, benefits would be negligible for that option. The benefits would increase as barrier weight and height increase.

The PEA provides estimates of benefits for six different barrier height alternatives, with the barrier weight at 3,000 and 3,600 pounds. The height of the barrier varies between 35 inches and 45 inches for these alternatives. The estimates of benefits cited below reflect those alternatives.

If the dynamic side impact requirements were extended to the front seat only, with a barrier weight of 3,000 pounds, the agency estimates that there would be 1 to 63 fewer fatalities and 13 to 287 fewer AIS 2–5 injuries annually, depending on the height of the barrier. With a barrier weight of 3,600 pounds, NHTSA estimates that there would be 32 to 116 fewer fatalities and 122 to 472 fewer AIS 2–5 injuries annually, depending on the height of the barrier

If the requirements were extended to the front and rear seats, with a barrier weight of 3,000 pounds, the agency estimates that there would be 5 to 69 fewer fatalities and 20 to 301 fewer AIS 2–5 injuries annually. With a barrier weight of 3,600 pounds, NHTSA estimates that there would be 36 to 122 fewer fatalities and 129 to 486 fewer AIS 2–5 injuries annually.

As discussed in the PEA, there are a number of assumptions underlying these estimates, including the assumption that 12 light truck make/models for which the agency has test data are representative of vehicles in their body style/size class. Another assumption is that either padding or a combination of padding and structure would be employed as countermeasures.

VIII. Costs

The PEA also presents the agency's analysis of costs. As with benefits, estimated costs would vary depending on the barrier weight and height specified in a final rule. Since all LTV's are believed to meet the proposed requirements using the barrier specified by Standard No. 214 for passenger car testing, vehicle costs would be negligible for that option. However, there would be testing costs.

Costs would increase as barrier weight and height increase. The PEA provides estimates of costs for the same barrier height/weight alternatives as for benefits. The estimates of costs cited below reflect those alternatives.

While some LTVs already meet the proposed requirements and would not require any changes, NHTSA believes that all other LTVs could be brought into compliance either by the addition of three inches or less of padding to the door or side of the vehicle adjacent to each outboard occupant's thorax, or by the addition of a combination of padding and structure.

If the dynamic side impact requirements were extended to the front seat only and assuming that the appropriate countermeasures were added to those vehicles requiring changes, NHTSA estimates the average cost per LTV of adding the countermeasure to be $5.55 to $37.07, depending on the weight and height specified for the barrier. (The average cost per LTV is based on the costs for all LTVs, including those which would not require the addition of countermeasures.) The addition of the lifetime fuel costs of carrying the extra weight of the padding/structure increases the average cost per LTV to $7.91 to $65.90. Another possible cost relates to secondary weight, i.e., weight increases in other parts of the vehicle which might be made to compensate for the additional weight of the padding/structure. With the addition of secondary weight and the lifetime fuel costs of carrying the secondary weight, the average cost per LTV would be $10.47 to $97.22.

If the proposed requirements were extended to the front and rear seats, NHTSA estimates the average cost per LTV of adding the countermeasure to be $7.33 to $55.18. The addition of the lifetime fuel costs of carrying the extra weight of the padding/structure increases the cost per LTV to $10.59 to $98.69. With the addition of secondary weight and the lifetime fuel costs of carrying the secondary weight, the average cost per LTV would be $14.13 to $145.96.

As with its estimates of benefits, NHTSA's costs estimates are based on a number of assumptions which are discussed in the PEA.

IX. Leadtime/Phase-In

NHTSA believes that the extension of the dynamic side impact requirements to LTVs would require a similar leadtime to that provided for passenger cars, since the countermeasures and testing needs are the same. The agency is therefore proposing to establish the same phase-in options as it provided for passenger cars.

More specifically, to provide manufacturers with sufficient leadtime to design their LTVs to meet the proposed performance requirements, NHTSA is proposing two compliance schedules, the choice of which would be at the option of the manufacturer. Under the first schedule, the standard would be phased-in in accordance with the following implementation schedule:

- 10 percent of all LTVs manufactured during the first full production year (September 1 to August 31) beginning approximately two years after the issuance of a final rule;
- 25 percent of all LTVs manufactured during the second full year after that two-year period;
- 40 percent of all LTVs manufactured during the third full year after that two-year period; and
- 100 percent of all LTVs manufactured on or after the beginning of the fourth full year after that two-year period.

Under the second schedule, no compliance would be required during the production period beginning approximately two years after the issuance of a final rule, but full implementation would be required beginning with the next production period.

X. Reporting Requirements

Whenever the agency specifies a phase-in of some performance requirement, it is necessary for enforcement of that phase-in to require manufacturers to report, at the end of each production period during the phase-in, its total production of vehicles and the number of such vehicles that are certified as complying with the relevant performance requirement. While the agency is not setting forth specific regulatory text concerning reporting in this NPRM, it would, for purposes of a final rule, establish essentially the same side impact reporting requirements for LTV manufacturers as it established in part 586 for passenger car manufacturers.

XI. Rulemaking Analyses and Notices

Executive Order 12866 and DOT Regulatory Policies and Procedures

NHTSA has considered the costs and other impacts that would be associated with this proposal if it were adopted as a final rule. This rulemaking document was reviewed under Executive Order 12866, "Regulatory Planning and Review." This rulemaking action is considered significant under that executive order and the DOT Regulatory Policies and Procedures because it could have an annual effect on the economy of $100 million or more. The agency's analysis of costs and benefits is presented in the Preliminary Economic Assessment, which is being placed in the docket. A summary of costs and benefits is presented earlier in this notice.

Regulatory Flexibility Act

NHTSA has also considered the effects of this regulatory action under the Regulatory Flexibility Act. I hereby certify that it would not have a significant economic impact on a substantial number of small entities. Accordingly, the agency has not prepared a preliminary regulatory flexibility analysis.

The primary cost effect of the proposed requirements would be on incomplete vehicle manufacturers, which are not small entities. Although many final stage manufacturers are small businesses, NHTSA estimates that the vast majority of those businesses would not be significantly affected by the proposed requirements. Final stage manufacturers would have the same means for certifying compliance as they do for Standard No. 208's automatic crash protection requirements and Standard No. 214's quasi-static side door strength requirements. In many cases, final stage manufacturers can

certify compliance simply by staying with limits set by the incomplete vehicle manufacturer. Some final stage manufacturers build their own vehicle body structures. However, these manufacturers are generally larger than most final stage manufacturers, and have greater engineering and testing expertise. Final stage manufacturers can also band together to sponsor testing and/or engineering analysis.

Small organizations and governmental units should not be significantly affected since the potential cost impacts associated with this proposed action should only slightly affect the purchase price of new motor vehicles.

National Environmental Policy Act

NHTSA has analyzed this rulemaking for the purposes of the National Environmental Policy Act. The addition of padding and structure would result in increased material usage by manufacturers, primarily plastic and metal. There could also be increased material usage associated with possible secondary weight. The agency estimates that LTVs could increase in average curb weight by 0.07 percent to 1.25 percent. Such added weight would result in a very slight increase in fuel consumption. After considering these impacts, the agency has determined that implementation of this action would not have any significant impact on the quality of the human environment.

Executive Order 12612 (Federalism)

The agency has analyzed this proposal in accordance with the principles and criteria set forth in Executive Order 12612. NHTSA has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Paperwork Reduction Act

The reporting and recordkeeping requirements associated with this proposed rule are being submitted to the Office of Management and Budget for approval in accordance with 44 U.S.C. Chapter 35 under OMB No.: 2127–0558. ADMINISTRATION: National Highway Traffic Safety Administration; TITLE: Production Reporting System for Side Impact Protection Compliance (49 CFR part 586); NEED FOR INFORMATION: To assess compliance with dynamic side impact protection phase-in requirements; PROPOSED USE OF INFORMATION: To determine if manufacturers are complying with the dynamic side impact protection phase-in schedule; FREQUENCY: Annually; BURDEN ESTIMATE: 384 hours; RESPONDENTS: 16; FORM(S): None; AVERAGE BURDEN HOURS FOR RESPONDENT: 24 hours.

FOR FURTHER INFORMATION CONTACT: The Information Requirements Division, M–34, Office of the Secretary of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366–4735, or Edward Clarke, Office of Management and Budget, New Executive Office Building, room 3228, Washington, DC 20503, (202) 395–7340.

Civil Justice Reform

This proposed rule would not have any retroactive effect. Under section 103(d) of the National Traffic and Motor Vehicle Safety Act (Safety Act; 15 U.S.C. 1392(d)), whenever a Federal motor vehicle safety standard is in effect, a State may not adopt or maintain a safety standard applicable to the same aspect of performance which is not identical to the Federal standard, except to the extent that the State requirement imposes a higher level of performance and applies only to vehicles procured for the State's use. Section 105 of the Safety Act (15 U.S.C. 1394) sets forth a procedure for judicial review of final rules establishing, amending or revoking Federal motor vehicle safety standards. That section does not require submission of a petition for reconsideration or other administrative proceedings before parties may file suit in court.

XII. Submission of Comments

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length. (49 CFR 553.21) Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation. 49 CFR part 512.

All comments received before the close of business on the comment closing date indicated above for the proposal will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments received too late for consideration in regard to the final rule will be considered as suggestions for further rulemaking action. Comments on the proposal will be available for inspection in the docket. The NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles, Rubber and rubber products, Tires.

In consideration of the foregoing, 49 CFR part 571 would be amended as follows:

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

1. The authority citation for part 571 would continue to read as follows.

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50

2. Section 571.214 would be amended by revising S2, adding S3(f) through S3(h), revising S5.1, S6.1, S6.11, and S7 and adding S8.5 through S8.9.3, to read as follows:

§ 571.214 Standard No. 214, Side Impact Protection.

* * * * *

S2 This standard applies to passenger cars. Effective September 1, 1993, sections S3(a), S3(e), S3.1 through S3.2.3, and S4 of the standard apply to multipurpose passenger vehicles, trucks, and buses with a GVWR of 10,000 pounds or less, except for walk in vans. Effective September 1, 1996 sections S3(f) through S3(h) and S5 of the standard apply to multipurpose passenger vehicles, trucks and buses with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less, except for walk-in vans, motor homes, tow trucks, dump trucks, ambulances, and vehicles which have no doors or exclusively have doors that are designed to be easily attached or

removed so the vehicle can be operated without doors.

* * * * *

S3* * *

(f) When tested according to the conditions of S6, each multipurpose passenger vehicle, truck and bus manufactured on or after September 1, 1999 shall meet the requirements of S5.1, S5.2, and S5.3 in a 33.5 miles per hour impact in which the vehicle is struck on either side by a moving deformable barrier. A part 572, subpart F test dummy is placed in the front outboard seating position on the struck side of the vehicle.

(g) Except as provided in paragraph (h) of this section, from September 1, 1996 to August 31, 1999, a specified percentage of each manufacturer's combined yearly production of multipurpose passenger vehicles, trucks and buses with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less, as set forth in S8, shall, when tested under the conditions of S6, meet the requirements of S5.1, S5.2, and S5.3 in a 33.5 miles per hour impact in which the vehicle is struck on either side by a moving deformable barrier. A part 572, subpart F test dummy is placed in the front outboard seating position on the struck side of the vehicle.

(h) A manufacturer may, at its option, comply with the requirements of this paragraph instead of paragraph (g) of this section. When tested under the conditions of S6, each multipurpose passenger vehicle, truck and bus with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less manufactured from September 1, 1997 to August 31, 1999 shall meet the requirements of S5.1, S5.2, and S5.3 in a 33.5 miles per hour impact in which the vehicle is struck on either side by a moving deformable barrier. A part 572, subpart F test dummy is placed in the front outboard seating position on the struck side of the vehicle.

* * * * *

S5.1 *Thorax.* The Thoracic Trauma Index (TTI(d)) shall not exceed 85 g for passenger cars with four side doors, shall not exceed 90 g for passenger cars with two side doors, and shall not exceed 85 g for multipurpose passenger vehicles, trucks, and buses, when calculated in accordance with the following formula:

$TTI(d)=1/2\ (G_R+G_{LS})$

The term "G_R" is the greater of the peak accelerations of either the upper or lower rib, expressed in g's and the term "G_{LS}" is the lower spine (T12) peak acceleration, expressed in g's. The peak acceleration values are obtained in accordance with the procedure specified in S6.13.5.

* * * * *

S6.1 *Test weight.* Each vehicle is loaded to its unloaded vehicle weight, plus 300 pounds or its rated cargo and luggage capacity (whichever is less), secured in the luggage or load-carrying area, plus the weight of the necessary anthropomorphic test dummies. Any added test equipment is located away from impact areas in secure places in the vehicle. The vehicle's fuel system is filled in accordance with the following procedure. With the test vehicle on a level surface, pump the fuel from the vehicle's fuel tank and then operate the engine until it stops. Then, add Stoddard solvent to the test vehicle's fuel tank in an amount which is equal to not less than 92 percent and not more than 94 percent of the fuel tank's usable capacity stated by the vehicle's manufacturer. In addition, add the amount of Stoddard solvent needed to fill the entire fuel system from the fuel tank through the engine's induction system.

* * * * *

S6.11 *Impact reference line.* For passenger cars with a wheelbase of 114 inches or less and for other vehicles with a wheel base of greater than 98 inches but not greater than 114 inches, on the side of the vehicle that will be struck by the moving deformable barrier, place a vertical reference line which is 37 inches forward of the center of the vehicle's wheelbase. For vehicles with a wheelbase greater than 114 inches, on the side of the vehicle that will be struck by the moving deformable barrier, place a vertical reference line which is 20 inches rearward of the centerline of the vehicle's front axle. For vehicles other than passenger cars, with a wheelbase of 98 inches or less, on the side of the vehicle that will be struck by the moving deformable barrier, place a vertical reference line, which is 12 inches rearward of the centerline of the vehicle's front axle.

* * * * *

S7 *Positioning procedure for the Part 572 Subpart F Test Dummy.* Position a correctly configured test dummy, conforming to subpart F of part 572 of this chapter, in the front outboard seating position on the side of the test vehicle to be struck by the moving deformable barrier and, if the vehicle is a passenger car, position another conforming test dummy in the rear outboard position on the same side of the vehicle, as specified in S7.1 through S7.4. Each test dummy is restrained using all available belt systems in all seating positions where such belt restraints are provided. In addition, any folding armrest is retracted.

* * * * *

S8.5 *Multipurpose passenger vehicles, trucks and buses manufactured on or after September 1, 1996 and before September 1, 1997.*

S8.5.1 The combined number of multipurpose passenger vehicles, trucks and buses with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less complying with the requirements of S3(g) shall be not less than 10 percent of:

(a) the average annual production of multipurpose passenger vehicles, trucks and buses with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less manufactured on or after September 1, 1993, and before September 1, 1996, by each manufacturer, or

(b) the manufacturer's annual production of multipurpose passenger vehicles, trucks and buses with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less during the period specified in S8.5.

S8.6 *Multipurpose passenger vehicles, trucks and buses manufactured on or after September 1, 1997 and before September 1, 1998.*

S8.6.1 The combined number of multipurpose passenger vehicles, trucks and buses with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less complying with the requirements of S3(g) shall be not less than 25 percent of:

(a) the average annual production of multipurpose passenger vehicles, trucks and buses with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less manufactured on or after September 1, 1994, and before September 1, 1997, by each manufacturer, or

(b) the manufacturer's annual production of multipurpose passenger vehicles, trucks and buses with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less during the period specified in S8.6

S8.7 *Multipurpose passenger vehicles, trucks and buses manufactured on or after September 1, 1998 and before September 1, 1999*

S8.7.1 The combined number of multipurpose passenger vehicles, trucks and buses with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less complying with the requirements of S3(g) shall be not less than 40 percent of:

(a) the average annual production of multipurpose passenger vehicles, trucks and buses with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less manufactured on or after September 1, 1994, and before September 1, 1997, by each manufacturer, or

(b) the manufacturer's annual production of multipurpose passenger vehicles, trucks and buses with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less during the period specified in S8.7.

S8.8 Walk-in vans, motor homes, tow trucks, dump trucks, ambulances, and vehicles which have no doors or exclusively have doors that are designed to be easily attached or removed so the vehicle can be operated without doors may be excluded from all calculations of compliance with S8.5.1, S8.6.1 and S8.7.1.

S8.9 *Multipurpose passenger vehicles, trucks and buses produced by more than one manufacturer.*

S8.9.1 For the purposes of calculating average annual production of multipurpose passenger vehicles, trucks and buses with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less for each manufacturer and the number of multipurpose passenger vehicles, trucks and buses with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less manufactured by each manufacturer under S8.5.1, S8.6.1 and S8.7.1, a vehicle produced by more than one manufacturer shall be attributed to a single manufacturer as follows, subject to S8.9.2:

(a) A vehicle which is imported shall be attributed to the importer;

(b) A vehicle manufactured in the United States by more than one manufacturer, one of which also markets the vehicle, shall be attributed to the manufacturer which markets the vehicle.

S8.9.2 A vehicle produced by more than one manufacturer shall be attributed to any one of the vehicle's manufacturers specified by an express written contract, reported to the National Highway Traffic Safety Administration under 49 CFR part 586, between the manufacturer so specified and the manufacturer to which the vehicle would otherwise be attributed under S8.9.1.

S8.9.3 Each multipurpose passenger vehicle, truck and bus with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less that is manufactured in two or more stages or that is altered (within the meaning of § 567.7 of this chapter) after having previously been certified in accordance with part 567 of this chapter is not subject to the requirements of S3(g).

Issued on: June 10, 1994

Barry Felrice,

Associate Administrator for Rulemaking.

Notices

Federal Register
Vol. 59, No. 114
Wednesday, June 15, 1994

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

AGENCY FOR INTERNATIONAL DEVELOPMENT

Voluntary Foreign Aid Advisory Committee; Meeting

Pursuant to the Federal Advisory Committee Act, notice is hereby given of a meeting of the Advisory Committee on Voluntary Foreign Aid (ACVFA) on:

Date: Wednesday, June 29, 1994 9 a.m. to 5 p.m.

Location: Dean Acheson Auditorium, U.S. Department of State, Washington, DC

During the meeting, USAID Administrator J. Brian Atwood and other speakers from USAID and the PVO community will discuss USAID policies that affect the U.S. private and voluntary community.

The meeting is free and open to the public. However, notification by Friday, June 24, 1994, through the Advisory Committee's office is required.

Persons wishing to attend the meeting must call Theresa Oakley (703) 351–0243 or FAX (703) 351–0212. Persons attending must include their name, organization, birth date and social security number for security purposes.

Dated: June 6, 1994.

Louis C. Stamberg,

Office Director, Office of Private and Voluntary Cooperation, Bureau for Humanitarian Assistance.

BILLING CODE 6116–01–M

DEPARTMENT OF COMMERCE

Agency Forms Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Export Administration.

Title: Short Supply Regulations — Unprocessed Western Red Cedar.

Agency Form Number: None but requirements are found at Section 777.7 of the Export Administration Regulations.

OMB Approval Number: 0694–0025.

Type of Request: Extension of the expiration date of a currently approved collection.

Burden: 30 minutes.

Number of Respondents: One.

Avg Hours Per Response: 30 minutes.

Needs and Uses: The Export Administration Act prohibits the export of most unprocessed western red cedar harvested from State or Federal lands, except for unprocessed western red cedar harvested under contracts entered into before 1979. The information is collected as supporting documentation for license applications to enforce the Export Administration Act's prohibition.

Affected Public: Businesses or other for–profit institutions, small businesses or organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Don Arbuckle, (202) 395–7340, Room 3208, New Executive Office Building, Washington, D.C. 20503.

Agency: Inspector General's Office.

Title of Survey: Applicant for Funding Assistance.

Agency Form Number: CD–346.

OMB Approval Number: 0605–0001.

Type of Request: Reinstatement of a previously approved collection.

Burden: 240 hours.

Number of Respondents: 960.

Avg Hours Per Response: 15 minutes.

Needs and Uses: The information provided is used to check the good character of individuals or organizations receiving grants, loans or loan guarantees from the Department of Commerce.

Affected Public: Individuals, businesses or other for–profit institutions, small businesses or organizations, non–profit institutions.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Don Arbuckle, (202) 395–7340, Room 3208, New Executive Office Building, Washington, D.C. 20503.

Agency: National Institute of Standards and Technology.

Title: Malcolm Baldrige Quality Award Application.

Agency Form Number: None.

OMB Approval Number: 0693–0006

Type of Request: Revision of a currently approved collection.

Burden: 10,000 hours.

Number of Respondents: 100.

Avg Hours Per Response: 100.

Needs and Uses: The Malcolm Baldrige Quality Management Act of 1987 established an annual U.S. National Quality Award. The purposes of the Award are to promote quality awareness, recognize quality achievements of U.S. companies, and to publicize successful quality strategies. The information collected from applicants will be used to conduct evaluations and determine who will receive the Awards.

Affected Public: Businesses or other for–profit institutions, small businesses or organizations, non–profit institutions.

Frequency: Annually.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Maya A. Bernstein, (202) 395–3785, Room 3235, New Executive Office Building, Washington, D. C. 20503.

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: NOAA's Teacher At Sea Program.

Agency Form Number: None.

OMB Approval Number: None.

Type of Request: Existing collection in use without an OMB approval number.

Burden: 180 hours.

Number of Respondents: 240.

Avg Hours Per Response: Varies but generally 1 hour for applications and 2 hours for the final report requirement.

Needs and Uses: NOAA provides educators with an opportunity to gain first–hand experience with field research activities through the Teacher at Sea Program. Through this program, educators spend up to 3 weeks at sea on a NOAA research vessel, participating in an on–going research project with NOAA scientists. Information provided through the application process is used in evaluating and selecting applicants. Participants also must provide a final report.

Affected Public: Individuals.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Don Arbuckle, (202) 395–7340, Room 3208, New

Executive Office Building, Washington, D.C. 20503.

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Fisheries Certificate of Origin and ICATT Bluefin Statistical Document.

Agency Form Number: NOAA Form 370.

OMB Approval Number: 0648–0040.

Type of Request: Revision of a currently approved collection.

Burden: 5,133 hours.

Number of Respondents: 583 (over 20 responses per respondent).

Avg. Hours Per Response: Ranges between 20 and 40 minutes.

Needs and Uses: The United States is a member of the International Commission for the Conservation of Atlantic Tunas (ICATT). To comply with a 1992 recommendation of this organization, the United States needs to document bluefin tuna shipments that are imported into or exported from the United States. The Bluefin Tuna Statistical Document will be a condition for import, export, or re–export of fresh or frozen bluefin tuna. This request also covers the requirements of the International Dolphin Conservation Act. This law requires the Secretary to ensure that any tuna or tuna product entering the commerce of the U.S. is dolphin safe.

Affected Public: Small businesses or organizations.

Frequency: Upon import or export, on occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Don Arbuckle, (202) 395–7340, Room 3208, New Executive Office Building, Washington, D.C. 20503.

Agency: Technology Administration.

Title: Application for Manufacturing Technology Fellowship.

Agency Form Number: None assigned.

OMB Approval Number: 0692–0002.

Type of Request: Revision of a currently approved collection.

Burden: 5,400 hours.

Number of Respondents: 200.

Avg Hours Per Response: 27.

Needs and Uses: The information provided is used to determine qualifications of applications for the Manufacturing Technology Fellowship Program. This program gives manufacturing engineers the opportunity to spend up to one year in Japan learning Japanese manufacturing techniques, culture, and language.

Affected Public: Individuals, businesses or other for–profit institutions, small businesses or organizations.

Frequency: Annually.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Maya A. Bernstein, (202) 395–3785, Room 3235, New Executive Office Building, Washington, D.C. 20503.

Copies of the above information collection proposals can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, Room 5327, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Written comments and recommendations for the proposed information collections should be sent to the respective Desk Officer listed above.

Dated: June 9, 1994

Gerald Tache,

Departmental Forms Clearance Officer, Office of Management and Organization.

[FR Doc. 94–14579 Filed 6–14–94; 8:45 am]

BILLING CODE 3510–CW–F

International Trade Administration

Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of initiation of antidumping and countervailing duty administrative reviews and request for revocation in part.

SUMMARY: The Department of Commerce has received requests to conduct administrative reviews of various antidumping and countervailing duty orders, findings and suspension agreements with May anniversary dates. In accordance with the Commerce Regulations, we are initiating those administrative reviews. The Department also received a request to revoke in part a countervailing duty order.

EFFECTIVE DATE: June 15, 1994.

FOR FURTHER INFORMATION CONTACT: Holly A. Kuga, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone: (202) 482–4737.

SUPPLEMENTARY INFORMATION:

Background

The Department of Commerce (the Department) has received timely requests, in accordance with 19 C.F.R. 353.22(a) and 355.22(a) (1993), for administrative reviews of various antidumping and countervailing duty orders, findings, and suspension agreements with May anniversary dates. The Department also received a timely request to revoke in part the countervailing duty order on ceramic tile from Mexico.

Initiation of Reviews

In accordance with sections 19 CFR 353.22(c) and 355.22(c), we are initiating administrative reviews of the following antidumping and countervailing duty orders, findings, and suspension agreements. We intend to issue the final results of these reviews not later than May 31, 1995.

	Period to be reviewed
Antidumping Duty Proceedings	
Brazil:	
Frozen Concentrated Orange Juice, A–351–605: Branco Peres Citrus, S.A. CTM Citrus, S.A	05/01/93–04/30/94
Japan:	
Gray Portland Cement and Clinker, A–588–815: Onoda Cement Co., Ltd.	05/01/93–04/30–94
The People's Republic of China:	
Iron Construction Castings, A–570–502: China National Machinery Import and Export Corporation/Liaoning Branch	05/01/93–04/30/94
All other exporters of iron construction castings are conditionally covered by this review.	
Axes/Adzes; Bars/Wedges; Hammers/Sledges and Picks/Mattocks A–570–803: Fujian Machinery & Equipment Import & Export Corporation (FMEC): Shandong Machinery Import & Export Corporation (SMC)	02/01/93–01/31/94

	Period to be reviewed
All other exporters of hand tools are conditionally covered by this review.*	
*This is an amendment of the February 17, 1994 initiation notice covering axes/adzes, bars/wedges, hammers/sledges, and picks/mattocks from the People's Republic of China.	
The Republic of Korea:	
Dynamic Random Access Memory Semiconductors (DRAMs) of One Megabit, A–580–812: Goldstar Electron Co., Ltd., Hyundai Electronic Industries Co., Ltd., Teijin Shoji Co., Ltd., Actor Inc./AGM, Ark Corporation, Samsung Electronics Co., Ltd., Atomco, First International, Kaitec Corp., Katsuki Co., Ltd., Kawano Electric Co., Ltd., KT Technology c/o Lambda Tech, Lets Corporation, Nambu Syokai Co., Ltd., Nichinan Electronics, Nippon Micro Devices, Suntec Japan Corp, and Tokyo Circuits	10/29/92–04/30/94
Turkey:	
Welded Carbon Steel Standard Pipe and Tube Products, A–489–501: Borusan Group, Mannesmann-Sumerbank Boru Endustrisi T.A.S.; Yucelboru Ihracat, Ithalat ve Pazarlama A.S./Cayirova Boru Sanayi ve Ticaret A.S	05/01/93–04/30/94
Countervailing Duty Proceedings	
Mexico:	
Ceramic Tile, C–201–003	01/01/93–12/31/93
Singapore:	
Ball Bearings, C–559–802	01/01/93–12/31/93
Cylindrical Bearings, C–559–802	01/01/93–12/31/93
Needle Roller Bearings, C–559–802	01/01/93–12/31/93
Spherical Plain Bearings, C–559–802	01/01/93–12/31/93
Spherical Roller Bearings, C–559–802	01/01/93–12/31/93
Thailand:	
Ball Bearings and Parts Thereof, C–549–802	01/01/93–12/31/93
Venezuela:	
Ferrosilicon, C–307–808	08/25/92–12/31/93

Interested parties must submit applications for disclosure under administrative protective orders in accordance with 19 CFR 353.34(b) and 355.34(b).

These initiatives and this notice are in accordance with section 751(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1675(a)) and 19 CFR 353.22(c)(1), 355.22(c)(1), and 355.25(c)(2).

Dated: June 10, 1994.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

[FR Doc. 94–14681 Filed 6–14–94; 8:45 am]

BILLING CODE 3510–DS–M

U.S.-South African Business Development Committee: Membership

ACTION: Notice of Membership Opportunity.

SUMMARY: On June 4, 1994, Secretary of Commerce Ronald H. Brown and South African Minister of Trade and Industry Trevor Manuel signed the document creating the U.S.-South Africa Business Development Committee ("BDC"). The purpose of the BDC will be to provide a forum through which U.S. and South African private sector representatives can furnish advice and guidance to their governments, and in which governments can exchange information, solve problems, and more effectively work together on issues relating to the following important areas:

—Resolving obstacles to trade and investment;
—Developing problem-solving approaches in areas where government action/inaction is affecting a commercial project;
—Improving commercial activity in both countries;
—Implementing promotional programs;
—Identifying further steps to facilitate and encourage the development of commercial expansion between the two countries.

The U.S. private sector side of the BDC will consist of 20 members representing the diversity of American business, with emphasis on: finance and investment, infrastructure, technical assistance, and market access. The Commerce Department is currently seeking nominations of outstanding individuals or companies to serve on the BDC.

In order to meet eligibility requirements for membership, potential candidates must be:

—A U.S. citizen residing in the United States;
—A CEO or other top management level employee of a U.S. company or organization involved with South Africa in the trade and investment fields;
—Not a registered Foreign Agent.

In reviewing eligible candidates, the Commerce Department will consider such selection factors as:

—Experience in the South African market;
—Industry or service sector represented;
—Export/investment experience;
—Contribution to diversity based on industry sectors, company size, location, and demographics.

To be considered for membership, please provide the following: name and title of at least two individuals requesting consideration; name and address of the company or organization sponsoring each individual; company's product or service line; size of the company; export experience/foreign investment experience and major markets; a brief statement of why each candidate should be considered for membership on the BDC; the particular segment of the business community each candidate would represent; and a personal resume.

DATES: In order to receive full consideration, requests must be received no later than: Wednesday, July 20, 1994.

ADDRESS: Please send your requests for consideration to Mrs. S.K. Miller, Director, Office of Africa, either by fax on (202) 482–5198 or by mail at Room 3317, U.S. Department of Commerce, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Mrs. S.K. Miller of the Office of Africa, Room 3317, U.S. Department of Commerce, Washington, DC 20230.

Sally K. Miller,

Director, Office of Africa.

National Oceanic and Atmospheric Administration

[Docket No. 940666-4166; I.D. 052094A]

North Pacific Scallop Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of control date.

SUMMARY: NMFS announces a control date of April 24, 1994, after which scallop harvests made in the exclusive economic zone (EEZ) off Alaska may not apply as catch history for purposes of any future individual fishing quota (IFQ) or licenses in anticipation of a future limited-access program for this fishery. This notice is to notify the public of possible eligibility criteria for future access to the scallop resources in the EEZ off Alaska. The intended effect of announcing this control date is to provide the public with information for making future business decisions.

EFFECTIVE DATE: April 24, 1994.

FOR FURTHER INFORMATION CONTACT: Chris Oliver, 907-271-2809, or David Ham, 907-586-7229.

SUPPLEMENTARY INFORMATION: The scallop fisheries off Alaska are managed by the State of Alaska (State). Access to these fisheries is not limited or controlled by the State at this time. State regulations governing fishing for scallops off Alaska are set forth in the Alaska Administrative Code, Title 5, Chapter 38.

At its meeting of April 19-24, 1994, the North Pacific Fishery Management Council (Council) approved a motion to develop and implement a Fishery Management Plan (FMP) for scallops in the EEZ off Alaska. The proposed FMP would include all scallop species and would be implemented cooperatively by State and Federal agencies. A 3-year moratorium on the entry of new vessels into the scallop fisheries is also included in the proposed FMP, and would be implemented through the issuance of Federal scallop vessel permits. The intent of the proposed vessel moratorium is to stabilize the size and harvesting capacity of the scallop fleet while the Council considers other limited access alternatives for this fishery.

The Council requested NMFS to publish a document in the **Federal Register** announcing that scallop harvests made in the EEZ off Alaska after April 24, 1994, may not apply as catch history for purposes of any future limited access program that may follow the moratorium. The intended effect of announcing this control date is to discourage speculative entry into the scallop fisheries for the purposes of qualifying for a future IFQ program or license limitation program and to discourage increased fishing effort and accumulation of catch history in anticipation of a possible IFQ program in the future.

Fishermen or vessels who made landings prior to this date are not necessarily guaranteed access under any future limited access program developed by the Council or NMFS. This announcement does not prevent any other date for eligibility in these fisheries or another method of controlling fishing effort from being proposed and implemented by NMFS. The Council may recommend additional criteria for qualifying fishermen or vessels as participants in these fisheries.

This notifies current and future participants in these fisheries that the Council has begun deliberations that may affect the success of investments in these fisheries. This announcement does not commit the Council or NMFS to any particular management regime or priority criteria for access to the scallop fisheries in the EEZ off Alaska. Additionally, the Council may choose to take no action to control entry or access to these fisheries.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: June 9, 1994

Nancy Foster,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-F

[I.D. 052794C]

Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Issuance of a Second Modification to Permit 817 (P45K), and Issuance of a Scientific Research Permit 905 (P45L).

On March 9, 1994, notice was published (59 FR 11050) that an application had been filed by the National Biological Survey for a modification to Permit 817 (P45K) to take listed Snake River fall chinook salmon (*O. tshawytscha*) for migration study as authorized by the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and the NMFS regulations governing listed fish and wildlife permits (50 CFR parts 217-222).

Notice is hereby given that on June 3, 1994, as authorized by the provisions of the ESA, NMFS issued a second modification to Permit Number 817 for the above taking, subject to certain conditions set forth therein.

On March 9, 1994, notice was published (59 FR 11050) that an application had been filed by the National Biological Survey, to take listed juvenile Snake River fall chinook salmon (*O. tshawytscha*) as authorized by the ESA to study migration and spawning and rearing habitats.

Notice is hereby given that on June 6, 1994, as authorized by the provisions of the ESA, NMFS issued Permit Number 905 for the above taking, subject to certain conditions set forth therein.

Issuance of this modification and this permit, as required by the ESA, was based on a finding that such modification and permit: (1) Were applied for in good faith; (2) will not operate to the disadvantage of the listed species which is the subject of this modification and permit; (3) are consistent with the purposes and policies set forth in section 2 of the ESA. This modification and this permit were also issued in accordance with and are subject to parts 217-222 of Title 50 CFR, the NMFS regulations governing listed species permits.

The applications, permits, modifications, and supporting documentation are available for review by interested persons in the following offices, by appointment:

Office of Protected Resources, NMFS, 1335 East-West Highway, Silver Spring, MD 20910-3226 (301-713-2322); and

Environmental and Technical Services Division, NMFS, NOAA, 911 North East 11th Ave., Room 620, Portland, OR 97232 (503-230-5400).

Dated: June 8, 1994

William W. Fox, Jr.,

Director, Office of Protected Resources, National Marine Fisheries Service.

Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Modification No. 1 to scientific research permit No. 840 (P531D).

SUMMARY: Notice is hereby given that a request for modification of scientific research permit No. 840 submitted by Mr. Craig Matkin, North Gulf Oceanic Society, Merimac Drive, Mile 10.5 East Road, Homer, AK 99603, has been granted.

ADDRESSES: The modification and related documents are available for review upon written request or by appointment in the following offices:

Permits Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Suite 13130, Silver Spring, MD 20910 (301/713-2289); and

Director, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802-1668 (907/586-7221).

SUPPLEMENTARY INFORMATION: On April 19,1994, notice was published in the **Federal Register** (59 FR 18522) that a modification of permit No. 840, issued May 25, 1993 (59 FR 31370), had been requested by the above-named individual. The requested modification has been granted under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the provisions of §§ 216.33(d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

Permit No. 840 has been modified to authorize biopsy of up to 94 killer whales (*Orcinus orca*) that are part of a long-term photo-identification study.

Dated: June 8, 1994.

William W. Fox, Jr.,

Director, Office of Protected Resources, National Marine Fisheries Service.

Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Issuance of scientific research permit No. 925 (P771#70).

SUMMARY: Notice is hereby given that the National Marine Mammal Laboratory, Alaska Fisheries Science Center, NMFS, 7600 Sand Point Way, NE., Seattle, WA 98115, has been issued a permit to biopsy humpback (*Megaptera novaeangliae*) and killer whales (*Orcinus orca*) for purposes of scientific research.

ADDRESSES: The permit and related documents are available for review upon written request or by appointment, in the following offices:

Permits Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13130, Silver Spring, MD 20910 (301/713-2289);

Director, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802-1668 (907/586-7221); and

Director, Northwest Region, NMFS, NOAA, 7600 Sand Point Way, NE., BIN C15700, Seattle, WA 98115 (206/526-6150).

SUPPLEMENTARY INFORMATION: On April 1, 1994, notice was published in the **Federal Register** (59 FR 15380) that a request for a scientific research permit to biopsy humpback (*Megaptera novaeangliae*) and killer whales (*Orcinus orca*) had been submitted by the above-named organization. The requested permit has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended 16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (16 U.S.C.

1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered fish and wildlife (50 CFR part 222).

Dated: June 8, 1994.

William W. Fox, Jr.,

Director, Office of Protected Resources, National Marine Fisheries Service.

National Telecommunications and Information Administration (NTIA)

RIN 0660-AA05

Spectrum User/Government Public Meeting Concerning the Preliminary Spectrum Reallocation Report

AGENCY: National Telecommunications and Information Administration, Commerce.

ACTION: Notice of a Spectrum user/government meeting to answer questions concerning the preliminary Spectrum Reallocation Report which identifies 200 Megahertz for public use.

SUMMARY: In accordance with the provisions of the Omnibus Budget Reconciliation Act of 1993, Title VI, Communications Licensing and Spectrum Allocation Improvement, NTIA will hold a meeting to answer questions from commercial representatives and the public concerning the Preliminary Spectrum Reallocation Report on June 24, 1994, from 9:30 am to 11:30 am. The meeting will be held in room 4830 at the U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Interested parties are invited to submit questions as soon as possible. Questions can be provided in written form, via the NTIA bulletin board, or via Internet E-mail to "NSCHROEDER@NTIA.DOC.GOV". The report and public comments already received are available now at NTIA in hard copy form and on NTIA's Bulletin Board at (202) 482-1199.

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Federal Information Relay Service (FIPS) on 1-800-877-8339.

FOR FURTHER INFORMATION CONTACT: The person to contact to obtain copies of the report and provide written comments is: Norbert Schroeder, Program Manager, Spectrum Openness, National Telecommunications and Information Administration, room 4092, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230, Telephone: (202) 482-3999, Fax: (202) 482-4396.

Dated: June 10, 1994.

Norbert Schroeder,

Program Manager, Spectrum Openness, NTIA.

BILLING CODE 3510-60-M

Patent and Trademark Office

Extension of Existing Interim Orders Granting Protection Under the Semiconductor Chip Protection Act of 1984 for Nationals, Domiciliaries and Sovereign Authorities of Certain Countries To Which Interim Protection Has Been Extended

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Notice.

SUMMARY: Pursuant to section 914 of the Semiconductor Chip Protection Act of 1984 (SCPA), 17 U.S.C. 914, and the guidelines issued by the Patent and Trademark Office, 49 FR 44517 (Nov. 7, 1984), the Assistant Secretary of Commerce and Commissioner of Patents and Trademarks has determined that existing interim orders under which protection under the SCPA is made available to foreign mask work owners should be extended in duration for nationals, domiciliaries and sovereign authorities of Japan, Sweden, Australia, the Member States of the European Community, Canada, Switzerland, Finland, and Austria under section 914 of the SCPA.

EFFECTIVE DATE: This order is effective on June 30, 1994.

TERMINATION DATE: This order will terminate on July 1, 1995.

ADDRESSES: Address correspondence to Michael S. Keplinger, Office of Legislative and International Affairs, United States Patent and Trademark Office, Box 4, Washington, DC 20231.

FOR FURTHER INFORMATION CONTACT: Michael S. Keplinger, Office of Legislative and International Affairs, United States Patent and Trademark Office, Box 4, Washington, DC 20231, phone (703) 305–9300.

SUPPLEMENTARY INFORMATION: When Congress enacted the Semiconductor Chip Protection Act of 1984 (SCPA), it established an entirely new category of intellectual property that did not fall under the Paris Convention for the Protection of Industrial Property, the Universal Copyright Convention of the Berne Convention for the Protection of Literary and Artistic Works. The Congress created a balanced intellectual property regime for the protection of layout-designs of semiconductor chips that provided a level of protection that was satisfactory to meet the needs of the U.S. public and the domestic semiconductor chip industry. At the same time, Congress was also aware of the need of U.S. chip producers for protection in foreign markets, of the need of foreign chip producers for protection here in the United States and that there was no international treaty for the protection of chips. Faced with this dilemma, Congress created an innovative mechanism to encourage the rapid building of a worldwide consensus on an appropriate regime of intellectual property protection for chip layout-designs that would be compatible with U.S. law and would encourage the development of the international market for semiconductor chip products. To achieve these goals, Congress established a two-tiered system for protecting foreign works in the United States. Section 914 of the CPA permits the Secretary of Commerce to extend interim access to protection under the CPA for foreign chip creators if certain criteria are met, and section 902 permits the President to proclaim indefinite access to protection under the SCPA for foreign creators from countries that protect U.S. works. This system has laid the groundwork for establishing a technology-specific, carefully tailored and balanced regime of mask work protection in other chip-producing countries.

Section 902 of the SCPA sets out the criteria under which foreign works are eligible for protection in the United States. Section 902(a)(1) provides generally that a mask work fixed in a semiconductor chip product, by or under the authority of the owner of the mask work, may be protected under the SCPA if certain criteria are met.

The first of these is that when registration is sought or the mask work is first commercially exploited anywhere in the world, the owner of the mask work is (1) a U.S. national or domiciliary, (2) a national, domiciliary or authority of a foreign country that belongs to a treaty to which the United States also belongs that protects mask works, or (3) a stateless person regardless of where that person may be domiciled. Protection is also available if the mask work is first commercially exploited in the United States, or when the mask work comes within the scope of a Presidential proclamation issued under the SCPA.

The SCPA sets out the statutory criteria against which foreign laws are to be evaluated before issuing a Presidential proclamation. It provides substantially that when the President concludes that a foreign country grants U.S. mask work owners protection substantially the same protection that it grants its own nationals and domiciliaries, or on substantially the same basis as under the SCPA, the President may extend protection under this chapter to mask works of owners who are nationals, domiciliaries, or authorities of that country, or to mask works which are first commercially exploited in that country.

In 1987 the Chairman of the then House Subcommittee on Courts, Civil Liberties and the Administration of Justice noted that the transition provisions in section 914 of the SCPA were "intended to encourage the rapid development of a new worldwide regime for the protection of semiconductor chips." 133 Cong. Rec. E1283 (daily ed. April 6, 1987). These transitional provisions empowered the Executive to use the issuance of interim protection orders under section 914 of the SCPA as a means to encourage other nations to move speedily to establish substantially similar systems of protection These provisions originally were set to expire three years after the date of the enactment of the SCPA, November 7, 1987.

The Congress has twice extended the authority to issue interim orders in the belief that this process is promoting the protection of U.S. mask works abroad and that the speedy enactment of laws in other countries that are patterned after U.S. law is progress. H.R. Rep. 100–388, 100th Cong., 1st Sess. (1987). Under the SCPA, the Assistant Secretary of Commerce and Commissioner of Patents and Trademarks has been delegated the tasks of determining when and under what conditions foreign mask works will be eligible for interim protection. To become eligible, a foreign government must demonstrate that it is making good faith efforts toward establishing a regime of protection in its territory that is substantially similar to that which is provided in the United States under the SCPA.

The countries to which interim protection has been extended (the Member States of the European Community, Australia, Austria, Canada, Finland, Japan, Sweden, and Switzerland) cooperated with the United States to try to establish a treaty for the adequate and effective protection of mask works in the World Intellectual Property Organization (WIPO). A Diplomatic Conference for the negotiation of a Treaty on the Protection of the Layout-Designs of Integrated Circuits (IPIC Treaty) was held in Washington during the month of May 1989. The IPIC Treaty adopted at the conclusion of the Conference did not meet the needs of either Japan or the United States. No developed country has thus far signed the Treaty, and it is yet to come into force.

Subsequent to the Diplomatic Conference, the United States has continued to work to conclude a multilateral agreement for the adequate and effective protection of semiconductor integrated circuit layout-designs. The Agreement on the Trade Related Aspects of Intellectual Property (TRIPs) that was adopted on December 15, 1993, in the Uruguay Round of Trade negotiations in the General Agreement on Tariffs and Trade contains a section that will require such protection. It builds upon the substantive provisions of the IPIC Treaty and adds the missing features deemed necessary to provide an adequate level of protection. It permits compulsory licensing of semiconductor technology only for public non-commercial uses or to remedy an adjudicated antitrust violation, it requires innocent infringers to pay reasonable royalties after notice, and it provides that products that include infringing chips fall within its scope of protection. Thus the TRIPs Agreement provides the level of protection in an internationally recognized text that is fully consistent with the U.S. SCPA and meets, or exceeds, the levels of protection provided in other countries' chip protection laws. The countries to which interim protection has been extended to all worked closely with the United States to achieve this goal. However, the TRIPs Agreement has not yet been implemented by the United States, and the presently issued interim orders will

expire on July 1, 1994, before the implementation of the TRIPs agreement.

The combination of the standards set out in section 902 and the process established to implement section 914 clearly appear to have satisfied the Congressional intent behind this unprecedented process. In 1984, only the United States had specific legislation in place for the protection of chips, while today such protection is in place in all of the countries to which interim protection has been extended. U.S. semiconductor chip layout-designs enjoy protection in all of those countries today. In some, the protection is enjoyed on the basis of national treatment and in some on the basis of reciprocity.

Since the interim orders were last extended, no complaints about the adequacy of the mask work protection laws in any of the countries to which interim protection has been extended have been received. Should such complaints arise in the future, they can be taken into account in determining whether a particular interim order should be rescinded prior to its scheduled termination.

Because of this favorable environment, and in order to ensure the continuing protection of U.S. layout-designs in foreign markets, I have determined that extending the present interim orders will provide the time needed for the final implementation of the TRIPs Agreement which will provide the basis for an adequate and effective muiltinational system for the protection for semiconductor mask works. In light of this, I am extending the interim orders for Japan, Sweden, Australia, the Member States of the European Community, Canada, Switzerland. Finland and Austria under Section 914 of the SCPA. These orders will expire on July 1, 1995.

Dated: May 26, 1994.

Bruce A. Lehman,

Assistant Secretary of Commerce and Commissioner of Patents and Trademarks.

[FR Doc. 94–14520 Filed 6–14–94; 8:45 am]

BILLING CODE 3510–16–M

COMMODITY FUTURES TRADING COMMISSION

The National Futures Association's Proposed Requirements for Break-Even Analyses in Commodity Pool Disclosure Documents

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed registered futures association rule change.

SUMMARY: The National Futures Association ("NFA") has submitted to the Commodity Futures Trading Commission ("Commission") for its approval, pursuant to section 17(j) of the Commodity Exchange Act ("Act"), a proposed amendment to Compliance Rule 2–13 and a proposed Interpretive Notice to Compliance Rule 2–13. The proposal would establish requirements regarding the use of break-even analyses in commodity pool disclosure documents. The Commission has determined that publication of NFA's proposal is in the public interest, will assist the Commission in considering the views of interested persons and is consistent with the purposes of the Act.

DATES: Comments must be received by July 15, 1994.

ADDRESSES: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone: (202) 254–6314.

FOR FURTHER INFORMATION CONTACT: David P. Van Wagner, Special Counsel, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone: (202) 254–8955.

SUPPLEMENTARY INFORMATION:

I. Introduction

By letters dated March 15, 1994 and March 30, 1994, the NFA submitted to the Commission for its approval, pursuant to section 17(j) of the Act, a proposed amendment and Interpretive Notice to NFA Compliance Rule 2–13. The proposal would establish various requirements regarding the use of break-even analyses in commodity pool disclosure documents. NFA's submission indicated that it intended to make the proposed amendment and interpretive notice effective upon receipt of notice of Commission approval.

II. Description of NFA's Proposal

The NFA is proposing an amendment and an associated Interpretive Notice to its Compliance Rule 2–13. Specifically, the amendment to Rule 2–13, a new subsection (b), would require member commodity pool operators ("CPOs") to include a tabular analysis of a pool's "break-even point" in the pool's disclosure document. The break-even analysis would take into account any anticipated fees and expenses and would indicate how much trading profits would have to be achieved in the first year of trading to recoup the customer's initial investment.[1]

The proposed amendment to Compliance Rule 2–13 states that this analysis must be "presented in the manner prescribed by NFA's Board of Directors." In this connection, NFA's proposed Interpretive Notice to Compliance Rule 2–13 would establish guidelines for the determination of a break-even point and the preparation of break-even analyses for pool disclosure documents.

In order to determine a pool's break-even point, the soliciting CPO first would have to calculate the amount of basic fees and expenses which the pool would be expected to incur during its first year and itemize them in tabular form within the disclosure document.[2] The CPO would be required to calculate this fee and expense amount for the pool based upon his actual knowledge or experience, and if not known, the CPO must present a good faith estimate. If any fees were dependent on the amount of funds that the pool raised, an assumed funding level could be stated, but the analysis also would have to indicate alternative break-even points using the minimum and maximum amount of funds the pool could raise.

Second, as part of the required break-even analysis the CPO would have to subtract from the pool's fee and expense total the amount of interest income the CPO expected the pool to earn in its first year. This calculation would produce a "gross trading profits before incentive fees" figure, or preliminary gross trading profits, which the pool would have to earn in its first year to retain its initial net asset value.

Third, the proposed interpretive notice would require a CPO to determine the amount of additional trading profits that would have to be earned to offset the amount of incentive fees which the CPO would charge in managing the pool. This additional trading profit figure would be calculated by determining the incentive fees which would be charged if a pool earned the preliminary gross trading profits amount, and then dividing that amount by one minus the incentive fee percentage rate.[3]

---

[1] Commission Regulation 4.21 requires that CPOs must deliver a disclosure document to prospective pool participants. Commission Regulation 4.21(a)(1) through (18) mandates the content of any such disclosure document.

[2] If the pool had any redemption fees, they would have to be clearly shown and included in the fees and expenses calculation. The pool's incentive fees would not be included in this calculation.

[3] The proposed Interpretive Notice also would require that any break-even analysis particularly

Continued

Finally, under the proposal a CPO would be required to calculate the total amount of trading income which his pool must earn for the pool's net asset value per unit to equal its initial selling price per unit after one year. The break-even analysis also would have to express this amount as a percentage of the pool's initial selling price per unit.

The NFA believes that its proposed tabular presentation of break-even analysis for pools would be an effective means of providing useful information to prospective pool participants when they make their investment decision. The NFA indicates that its proposed form of break-even analysis already is used widely throughout the commodity pool industry.

III. Request for Comments

The Commission requests public comment on NFA's proposed amendment and Interpretive Notice to Compliance Rule 2–13. Copies of NFA's proposed rule amendment and Interpretive Notice will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, except to the extent that the proposal may be entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Copies also may be obtained through the Office of the Secretariat at the above address or by telephoning (202) 254–6314.

Any person interested in submitting written data, views or arguments on NFA's proposed rule amendment or Interpretive Notice or with respect to other materials submitted by the NFA in support of the proposal should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, by the specified date.

Issued in Washington, DC on June 9, 1994.

Jean A. Webb,

Secretary of the Commission.

[FR Doc. 94–14479 Filed 6–14–94; 8:45 am]

BILLING CODE 6351–01–P

The National Futures Association's Proposed Restriction on the Use of Hypothetical Trading Results in Promotional Materials

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed registered futures association rule change.

SUMMARY: The National Futures Association ("NFA") has submitted to the Commodity Futures Trading Commission ("Commission") for its approval, pursuant to Section 17(j) of the Commodity Exchange Act ("Act"), a proposed amendment to NFA Compliance Rule 2–29. The proposal would establish various restrictions on the usage of hypothetical trading results in promotional materials. The Commission has determined that publication of the NFA's proposal is in the public interest, will assist the Commission in considering the views of interested persons and is consistent with the purposes of the Act.

DATES: Comments must be received by July 15, 1994.

ADDRESSES: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone: (202) 254–6314.

FOR FURTHER INFORMATION CONTACT: David P. Van Wagner, Special Counsel, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone: (202) 254–8955.

SUPPLEMENTARY INFORMATION:

I. Introduction

By letter dated March 15, 1994, and received by the Commission on March 17, 1994, the NFA submitted to the Commission for its approval, pursuant to Section 17(j) of the Act, a proposed amendment to NFA Compliance Rule 2–29. NFA's submission indicated that it intended to make the proposed amendment effective upon receipt of notice of Commission approval.

II. Description of NFA's Proposal

NFA's proposed amendment to Compliance Rule 2–29 would establish various requirements on the use of hypothetical trading results in promotional materials. NFA members often use hypothetical trading results in their promotional materials to describe how their trading programs would have performed in the past based upon historical price movements. Current NFA Compliance Rule 2–29(b)(4) specifies that members who use hypothetical trading results in their promotional material must include the disclaimer language of Commission Regulation 4.41(b)(1),[1] NFA's Compliance Rules do not otherwise establish any specific content requirements or restrictions with respect to hypothetical results.

The NFA contends that hypothetical trading results in promotional material can be misleading to customers and in many cases a vehicle for customer abuse. Accordingly, the NFA has proposed to amend its Compliance Rule 2–29 to establish various restrictions on the use of such hypothetical results.

Under the proposal, NFA members who referred to hypothetical trading results in their promotional materials would be required to include comparable information regarding their actual trading results. Advertising members with over a year's experience directing customer accounts would have to include the prior performance results for all such accounts over the past five years or the entire performance history, whichever was less. If a member using hypothetical results in his promotional material had less than one year's experience directing customer accounts, the advertising member would have to include, in addition to the entire performance history for customer accounts, the past performance results of his proprietary trading over the prior five years or the entire performance history, whichever was less.

Under the NFA's proposal, amended Compliance Rule 2–29 would continue to require that promotional material containing hypothetical trading results include the disclaimer language required by Commission Regulation 4.41(b)(1). The proposal's restrictions would not apply to promotional material which was directed exclusively to persons who were Qualified Eligible Participants under Commission Regulation 4.7.

The NFA believes that its proposed amendment would ensure that customers will be provided with practical information with which to assess hypothetical trading results as customers would be able to take into account a member's actual trading results when evaluating a member's preferred hypothetical results.

III. Request for Comments

The Commission requests public comment on NFA's proposed amendment to Compliance Rule 2–29.

Copies of NFA's proposed rule amendment will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, except to the extent that the proposal may be entitled to confidential treatment as set forth in 17 C.F.R. 145.5 and 145.9. Copies also may be obtained through the Office of the Secretariat at the above address or by telephoning (202) 254–6314.

Any person interested in submitting written data, views or arguments on NFA's proposed rule amendment or with respect to other materials submitted by the NFA in support of the proposal should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, by the specified date.

Issued in Washington, DC on June 9, 1994.

Jean A. Webb,

Secretary of the Commission.

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to the Office of Management and Budget (OMB) for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title: National Security Education Program (NSEP) Grants to Institutions for Higher Education.

Type of Request: New collection.

Number of Respondents: 260.

Responses per Respondent: 1.25.

Annual Responses: 250.

Average Burden per Response: 8 hours.

Annual Burden Hours: 2,000.

Needs and Uses: The information collected hereby, will be used by independent panels of reviewers to decide the relative merit of proposals submitted for grants under the Program.

Affected Public: Businesses or other for-profit, non-profit institutions.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Mr. Edward C. Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer for DoD, room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce.

Written requests for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington, VA 22202–4302.

Dated: June 9, 1994.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 94–14466 Filed 6–14–94; 8:45 am]

BILLING CODE 5000–04–M

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title and Applicable OMB Control Number: Defense FAR Supplement, 227, Patents, Data and Copyrights; OMB Control Number 0704–0240.

Type of Request: Extension of a previously approved collection.

Average Burden Hours/Minutes per Response: 79 hours and 28 minutes.

Responses per Respondent: 1.

Number of Respondents: 16,560.

Annual Burden Hours (Including Recordkeepng): 2,307,240.

Annual Responses: 16,560.

Needs and Uses: This request concerns information collection and recordkeeping requirements related to Technical Data, Software, Copyrights, and Contracts.

Affected Public: Businesses or other for-profit, non-profit institutions, and small businesses or organizations.

Frequency: On occasion.

Respondents Obligation: Required to obtain or retain a benefit.

Desk Officer: Mr. Peter N. Weiss.

Written comments and recommendations on the proposed information collection should be sent to Mr. Weiss at the Office of Management and Budget, Desk Officer for DOD, room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce. Written requests for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington, Virginia, 22202–4302.

Dated: June 9, 1994.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Department of the Army

Army Science Board; Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of Committee: Army Science Board (ASB).

Date of Meeting: 6–7 July 1994.

Time of Meeting: 0800–1730 (classified).

Place: Pentagon, Washington, DC.

Agenda: The Army Science Board's 1994 Summer Study on "Capabilities Needed to Counter Current and Evolving Threat" will meet to discuss advanced and novel technology forecasts, operational/analytical models and methodologies, strategic mobility/deployment, operational enhancements of digitization, and future force structure concepts. This meeting will be closed to the public in accordance with Section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 2, subsection 10(d). The unclassified and classified matters to be discussed are so inextricably intertwined so as to preclude opening all portions of the meeting. The ASB Administrative Officer Sally Warner, may be contacted for further information at (703) 695–0781

Department of the Navy

Naval Research Advisory Committee; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. 2), notice is hereby given that the Naval Research Advisory Committee Panel on Modeling and Simulation will meet on June 21, 22 and 23, 1994. The meeting will be held at The Center for Naval Analyses Corporation, 4401 Ford Avenue, Alexandria, Virginia. The first session will commence at 8 a.m. and terminate at 5:30 p.m. on June 21; the second session will commence at 8 a.m. and terminate at 5 p.m. on June 22; and the third session will commence at 8 a.m. and terminate at 3 p.m. on June 23, 1994. All sessions of the meeting will be open to the public.

The purpose of the meeting is to provide the Department of the Navy with an assessment of the importance of high fidelity models and Advanced Distributed Simulation technologies to enhance Department of the Navy test and evaluation, and acquisition programs. The panel will review current utilization of modeling and simulation/Advanced Distributed Simulation; identify key areas that would benefit from an investment in modeling and simulation/Advanced Distributed Simulation; identify candidate demonstration projects to evaluate modeling and simulation/Advanced Distributed Simulation utility; evaluate the strengths and weaknesses of modeling and simulation/Advanced Distributed Simulation technologies from a Department of the Navy perspective; and recommend specific research areas related to modeling and simulation/Advanced Distributed Simulation technologies that warrant investments by the Department of the Navy.

The meeting will include briefings and discussions relating to U.S. Navy and Marine Corps operational and developmental test and evaluation processes and case studies; and applications of modeling and simulation from industry and U.S. Army perspectives.

This Notice is being published late because of administrative delays which constitute an exceptional circumstance, not allowing Notice to be published in the **Federal Register** at least 15 days before the date of the meeting.

For further information concerning this meeting contact: CAPTAIN Michael Brinkac, USN, Office of Naval Research, Ballston Center Tower One, 800 North Quincy Street, Arlington, VA 22217–5660, Telephone Number: (703) 696–4870.

Dated: June 10, 1994.

Lewis T. Booker, Jr.,

LCDR, JAGC, USN, Federal Register Liaison Officer.

BILLING CODE 3810–AE–P

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Acting Director, Information Resources Management Service, invites comments on proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: An expedited review has been requested in accordance with the Act, since allowing for the normal review period would adversely affect the public interest. Approval by the Office of Management and Budget (OMB) has been requested by June 17, 1994.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Dan Chenok, Desk Officer, Department of Education, Office of Management and Budget, 725 17th Street NW., room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection request should be addressed to Patrick J. Sherrill, Department of Education, 400 Maryland Avenue, SW., room 5624, Regional Office Building 3, Washington, DC 20202–4651.

FOR FURTHER INFORMATION CONTACT: Patrick J. Sherrill, (202) 708–8196.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 3517) requires that the Director of OMB provide interested Federal agencies and persons an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Acting Director, Information Resources Management Service, publishes this notice with the attached proposed information collection request prior to submission of this request to OMB. This notice contains the following information: (1) Type of review requested, e.g., expedited; (2) Title; (3) Abstract; (4) Additional Information; (5) Frequency of collection; (6) Affected public; and (7) Reporting and/or Recordkeeping burden. Because an expedited review is requested, a description of the information to be collected is also included as an attachment to this notice.

Dated: June 10, 1994.

Mary P. Liggett,

Acting Director, Information Resources Management Service.

Office of Postsecondary Education

Type of Review: Expedited.

Title: Application and Continuation Application, Reports, and Recordkeeping for the National Science Scholars Program.

Abstract: Individuals use the selection criteria to apply for a Federal scholarship. State Nominating Committees use the information to evaluate the applications and nominate scholars. Institutions use the forms to apply for continuation awards for continuing scholars and to report on the status of the program.

Additional Information: ED is requesting an Expedited approval by OMB in order to announce the competition for FY 1995. This application is currently approved, but a resubmission is necessary in order to comply with a White House mandate to request additional information. The normal clearance process under the Paperwork Reduction Act will not allow the applicants the required time to complete the application process prior to the October 31, 1994 closing date. ED has requested an OMB approval of June 17, 1994.

Frequency: Annually.

Affected Public: Individuals or households; State or local governments; non-profit institutions.

Reporting Burden: Responses: 22,841; Burden Hours: 367,493.

Recordkeeping Burden: Recordkeepers: 56; Burden Hours: 168.

[FR Doc. 94–14589 Filed 6–14–94; 8:45 am]

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Compliance With the National Environmental Policy Act: Record of Decision for Continued Operation of Naval Petroleum Reserve No. 1 (Elk Hills), Tupman, CA

AGENCY: Department of Energy.

ACTION: Record of decision.

SUMMARY: Pursuant to the Council on Environmental Quality regulations (40 CFR parts 1500–1508), which implement the procedural provisions of the National Environmental Policy Act (NEPA), and the U.S. Department of Energy National Environmental Policy Act regulations (10 CFR part 1021), the Department of Energy, Office of Fossil Energy, is issuing a Record of Decision on the continued operation of Naval Petroleum Reserve No. 1, Kern County, California. The Department of Energy has decided to continue current operations at Naval Petroleum Reserve No. 1 and implement additional well drilling, facility development projects and other activities necessary for continued production of Naval Petroleum Reserve No. 1 in accordance with the requirements of the Naval Petroleum Reserves Production Act of 1976 (Pub. L. 94–258). The final Supplemental Environmental Impact Statement, entitled "Petroleum Production at Maximum Efficient Rate, Naval Petroleum Reserve No. 1 (Elk Hills), Kern County, California (DOE/SEIS–0158)," was released on September 3, 1993.

ADDRESSES: To receive a copy of the final Supplemental Environmental Impact Statement or Record of Decision, please contact Mr. James C. Killen, Director, Planning, Analysis, and Program Support Division, U.S. Department of Energy, Naval Petroleum Reserves in California, Tupman, California, 93276, (805) 763–6038.

FOR INFORMATION ON THE NATIONAL ENVIRONMENTAL POLICY ACT PROCESS: Contact Ms. Carol M. Borgstrom, Director, Office of National Environmental Policy Act Oversight, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC, 20585, (202) 586–4600, or (800) 472–2756.

SUPPLEMENTARY INFORMATION: Naval Petroleum Reserve No. 1 (NPR–1) is a large oil and gas field of approximately 74 square miles (47,409 acres) located about 25 miles southwest of Bakersfield in Kern County, California. NPR–1, which was established by Executive Order in 1912 for National defense purposes, is jointly owned and operated by the Federal Government under the jurisdiction of the Department of Energy (DOE), and Chevron U.S.A. Inc. pursuant to a Unit Plan Contract that became effective in 1944. The Government has a 78 percent interest (approximately) in NPR–1 hydrocarbon production and Chevron's interest is approximately 22 percent. Currently, the Government's share of NPR–1 oil production is sold on the open market, with proceeds deposited in the U.S. Treasury, and/or transferred to the U.S. Strategic Petroleum Reserve for storage as protection against future oil supply disruptions. NPR–1 natural gas production is either processed into natural gas liquids for sale on the open market, or reinjected into NPR–1 hydrocarbon reservoirs for pressure maintenance and/or enhanced oil recovery.

NPR–1 was maintained in essentially a shut-in reserve status until the mid-1970's when Congress, in response to the Arab Oil Embargo of 1973, passed the Naval Petroleum Reserves Production Act of 1976 (Pub. L. 94–258), which directed that NPR–1, the adjacent NPR–2, and NPR–3 in Wyoming, be produced for an initial period of 6 years at the maximum efficient rate. Under the Act, maximum efficient rate means the maximum rate of hydrocarbon production that optimizes economic return and ultimate hydrocarbon recovery. Public Law 94–258 also provided the President with the authority to continue production from the Reserves beyond the initial 6 years for an additional and unlimited number of increments of up to three years each. For each added period of production, the President must certify to Congress that it remains in the National interest to continue producing the Reserves. Currently, the Naval Petroleum Reserves are authorized for maximum efficient rate production through April 5, 1997.

Approximately 700 million barrels of oil and 200 million gallons of natural gas liquids have been produced from NPR–1 hydrocarbon reservoirs since the field was opened up to full development in 1976. In 1992, NPR–1 became only the 13th domestic oil field to produce a cumulative total of 1 billion barrels of oil since its initial development began in 1912. Since 1976, revenues in excess of $15 billion have been deposited into the U.S. Treasury from NPR–1 operations. In 1988, NPR–1 hydrocarbon reserves were estimated to be approximately 524–831 million barrels of oil and 1,790–2,497 billion cubic feet of natural gas.

In 1979, DOE published an Environmental Impact Statement (EIS) (DOE/EIS–0012) which described the existing environment at NPR–1 and analyzed the petroleum development activities that were anticipated at that time. The development activities described and evaluated included the drilling of approximately 350 new oil, gas and water wells; construction of two new Lease Automatic Custody Transfer facilities; construction of two gas facilities to process up to 700 million cubic feet per day of wet natural gas; construction of wastewater facilities capable of disposing of approximately 30,000 barrels per day of produced water; and construction of an additional 40,000 square feet of building space for administration and other support facilities. Implementation of these activities increased NPR–1's oil production to a peak level of approximately 181,000 barrels per day by July, 1981. Oil production at NPR–1 has declined since then to the current level of approximately 65,000 barrels per day. NPR–1 currently produces approximately 299–320 million cubic feet per day of natural gas and processes 379,000–456,000 gallons per day of natural gas liquids (propane, butane and natural gasoline).

In an Environmental Assessment prepared in 1985 (DOE/EA–0261), DOE described the potential environmental impacts that could result from implementation of a pilot steamflood project of the Shallow Oil Zone at NPR–1. The Shallow Oil Zone pilot steamflood project subsequently was implemented and a large expansion of this project is proposed and analyzed in the final Supplemental Environmental Impact Statement (SEIS). In 1987, DOE prepared another Environmental Assessment (DOE/EA–0334) which described the potential impacts that could result from the divestiture of NPR–1 and NPR–3. Implementation of this action would require a Congressional directive, which has not occurred.

Primarily as a result of the need to drill additional oil, gas, and water wells at NPR–1, expand the Shallow Oil Zone steamflood project, expand natural gas operations, and reduce power costs and air pollution emissions by constructing

a cogeneration facility, the decision was made to prepare a Supplement to the 1979 EIS to analyze the environmental impact of these and other proposed actions. Accordingly, DOE published a Notice of Intent announcing its decision in the **Federal Register** on April 4, 1988 (53 FR 10922). Pursuant to the Notice of Intent, three public scoping meetings were held in April 1988 and the issues and concerns raised by the public were used in the development of the SEIS. The basis for the SEIS is the April 1989 NPR–1 Long Range Plan, which describes a myriad of planned operations and development projects, maintenance activities, and environmental protection initiatives over the next 25–30 years. A description and evaluation of the existing NPR–1 environment also was provided in the SEIS to assess the level of impacts, if any, that resulted from the NPR–1 activities that were implemented following publication of the 1979 EIS.

In May 1992, DOE published and distributed approximately 200 copies of the draft SEIS. A Notice of Availability of the draft SEIS and an announcement of a public hearing in Bakersfield, California on June 24, 1992 was published in the **Federal Register** on June 5, 1992 (57 FR 24038). Only one speaker provided oral testimony at the public hearing. DOE received 122 written comments from 13 government agencies and interested individuals during the 55-day comment period following publication of the Notice of Availability. DOE considered and responded to all comments on the draft SEIS in the development of the final SEIS. A transcript of the public hearing and all written comments on the draft SEIS were included in the final SEIS.

The final SEIS on the proposed action was released in August 1993. A Notice of Availability of the document was published in the **Federal Register** on September 3, 1993 (58 FR 46969) which announced an incorrect due date for comments of October 18, 1993. An amended Notice of Availability subsequently was published in the **Federal Register** on September 17, 1993 (58 FR 48650) revising the due date to October 5, 1993. Of eight comment letters received on the final SEIS, only the Environmental Protection Agency (EPA) and a local consultant commented on substantive issues. EPA reiterated concerns about the method used to compare impacts of the proposed action and alternatives, completion of the final Biological Opinion for the proposed action, ingestion of oil field chemicals by site wildlife, waste minimization, wetlands delineation, air quality, and sump closures, and recommended deferring expanding operations that may impact groundwater quality in the northeast portion of the site. EPA also recommended discussing in the Record of Decision the feasibility of re-entering shut-in wells as an option to drilling new wells to increase production. Michael R. Rector, a local water resources consultant, raised concerns about groundwater mining and commented that groundwater downdip from site produced water disposal wells should be analyzed for the presence of benzene, toluene and xylenes.

With the exception of the comments regarding comparison of alternative action impacts, deferring operations in the northeast portion of the site, and the feasibility of re-entering shut-in wells, all concerns have been addressed in this Record of Decision under *Major Environmental Impacts and Mitigation Action Plan*.

With regard to the comparison of alternatives, EPA commented that it stands by its earlier comment on the draft SEIS that impacts associated with the no action alternative should be the basis for the comparison of alternative action impacts. DOE maintains that the methodology used in the SEIS is the same, substantively, as that advocated by EPA. This is explained as follows. It is EPA's opinion that in comparing impacts between alternatives, the no action alternative should be the baseline for the comparison. For example, if no action has an impact of X, and the proposed action has an impact of X+Y, then comparisons of these two alternatives should state that the impacts of the proposed action are Y greater than no action. In contrast, the SEIS sometimes makes this comparison by stating that no action has an impact that is X less than the proposed action. DOE believes that either comparison satisfies the requirement under 40 CFR 1502.14 "* * *" to present the environmental impacts of the proposal and the alternatives in comparative form, thus sharply defining issues "* * *". Impacts from existing operations comprising no action are presented in detail in § 3.0, "Existing Environment." Impacts of the proposed action and the modified proposed action are presented in detail in § 4.0, "Environmental Impacts of the Proposed Action and Alternatives." A summary of the elements and impacts of no action; the proposed action, and the modified proposed action are presented in comparative form by Tables 2.0–1 and 2.0–2 in § 2.0, "Alternatives." These tables, together with supporting text, result in a form that sharply contrasts differences between alternatives, as required.

Regarding the comment on the northeast portion of the site, DOE is not proposing to expand operations that may impact groundwater quality in that area. The only activities planned in this area are remediation or facility repair and replacement projects that are designed to enhance the level of environmental protection. These projects are routinely evaluated for environmental impacts, including groundwater impacts, as a matter of standard practice prior to their implementation.

The use of existing shut-in oil production wells for other purposes such as waterflood, gas injection or in the development of underlying/overlying oil or gas zones can provide a significant capital savings and, therefore, is always given serious consideration at NPR–1. Prior to the formal abandonment of any shut-in wells, a determination is made that the well cannot serve any other useful purpose. Table 1.2–3 of the final SEIS indicates that 382 new wells would be completed through the year 2025 under the proposed action. In comparison, for this same time period, the proposed action would involve a total of 571 conversions of existing wells to a different use.

Alternatives Considered

Three alternatives were evaluated in the SEIS: Proposed Action, No Action (Alternative 1), and Modified Proposed Action (Alternative 2). In addition, Alternative 3 (Nonsteamflood Tertiary Oil-Recovery Strategies) and two other alternatives were initially considered and dismissed from further evaluation.

Proposed Action

The proposed action is to continue operating NPR–1 in accordance with the requirements of the Naval Petroleum Reserves Production Act of 1976 by implementing the activities described in the 1989 NPR–1 Long Range Plan. This includes the operation and maintenance of all existing facilities; a program to drill, redrill, or deepen approximately 382 wells; 148 of which would be for the phased 500-acre, 625 million British thermal units per hour Shallow Oil Zone steamflood project; a program to perform approximately 2,663 well remedial jobs as needed to ensure efficient operation and maintenance of approximately 2,697 wells; a program to recycle produced water to the maximum extent technically and economically feasible for use as source water for waterflood operations; a program to abandon approximately 1,080 wells; construction and operation of approximately 46,250 horsepower of additional gas compression for gas-lift and gas-injection projects (37,500 horsepower gas; 8,750 horsepower electric); construction and operation of compression and processing facilities to compress, transport and process up to an additional 100–150 million cubic feet per day of gas (fourth gas plant); construction of new facilities and increased use of existing facilities to expand waterflood operations by approximately 106,000 barrels per day; construction and operation of a 42-megawatt cogeneration facility; construction and operation of a 170,000–220,000 gallon per day butane isomerization facility; a program to investigate, remediate, or otherwise manage numerous old inactive waste sites; a program to reclaim by 1998 approximately 1,045 acres of disturbed lands not needed for current or future NPR–1 operations; the permitting of third parties to construct, operate and maintain pipelines, conduct geophysical surveys and perform other necessary oil-field related activities on NPR–1; and the continued implementation of a comprehensive environmental protection program.

Alternative 1: No Future Development (No Action)

This alternative provides for continued production of NPR–1 by operating and maintaining existing wells and facilities only. It does not include any new development projects needed to enhance efficiency or off-set natural production declines (no new drilling, enhanced recovery, cogeneration, etc.). It does include all maintenance projects, facility development projects and environmental protection initiatives included in the proposed action that are necessary for maintaining the safety and quality of the NPR–1 environment.

Alternative 2: Proposed Action Excluding the Shallow Oil Zone Steamflood Expansion, Gas Processing Expansion, and Cogeneration Project (Modified Proposed Action)

This alternative provides for all activities included in the proposed action, except that the 148-well, 500-acre Shallow Oil Zone steamflood expansion would not be implemented; expansion of NPR–1's gas processing capacity by 100–150 million cubic feet per day (fourth gas plant) would not be undertaken; and the 42-megawatt cogeneration plant would not be constructed.

Alternative 3: Nonsteamflood Tertiary Oil-Recovery Strategies

This alternative provides for all of the activities included in the proposed action and implementation of nonsteamflood tertiary recovery techniques that have been carried out on a limited basis at other oil fields. Examples of these techniques include alkali surfactant polymer injection, micellar polymer injection, carbon dioxide injection and in-situ combustion. Although these techniques may have potential in the long term, their implementation in NPR–1 hydrocarbon reservoirs cannot be considered by decision-makers in the reasonably foreseeable future due to limited technical data and unfavorable current and projected future economic conditions. For this reason, studies were not completed to scope these programs to the level of detail needed to address potential environmental impacts. Accordingly, this alternative was dismissed from further consideration in the SEIS.

Divestiture

The possibility of selling the Government's interest in NPR–1 (divestiture) was initially announced in the Notice of Intent to prepare this SEIS as an alternative in the context of continued operations and future development (53 FR 10922, April 4, 1988). Analysis of this alternative would have expanded on the 1987 Environmental Assessment of Divestiture (DOE/EA–0334). This alternative is considered highly speculative in the absence of Congressional action and, therefore, was not developed in the SEIS.

EPA's Proposed Alternative (No Action followed by Proposed Action)

In its comments on the draft SEIS, EPA recommended analysis of an additional alternative that would involve implementing the no action alternative for the near term and then proceeding with the proposed action at a later date. A brief analysis of this alternative was included in the final SEIS. The analysis indicated that ultimate hydrocarbon recovery losses of approximately 66 million barrels of oil and 132 billion cubic feet of natural gas would occur by deferring development activities at NPR–1 for a period of 10 years. Because this alternative would not allow DOE to meet the purpose and need for the proposed action, which is to produce NPR–1 at the maximum efficient rate in accordance with the Naval Petroleum Reserves Production Act of 1976, it was dismissed from further consideration in the final SEIS.

Environmentally Preferred Alternative

The environmentally preferred alternative is the no action alternative (Alternative 1). Habitat disturbance associated with this alternative is significantly less than for all other alternatives analyzed in the SEIS. Future impacts associated with continued NPR–1 operations would diminish more rapidly under this alternative as NPR–1's economic life would be reached much sooner than would occur under other alternatives (approximately 2000–2010). This alternative would require legislative redirection of DOE's current mission to produce NPR–1 in accordance with the Naval Petroleum Reserves Production Act of 1976.

Decision:

DOE has decided to continue current NPR–1 operations and implement additional well drilling, facility development projects and other activities necessary for continued production of NPR–1 in accordance with the requirements of the Naval Petroleum Reserves Production Act of 1976 (Pub. L. 94–258).

Discussion and Justification of Decision

Pursuant to the Naval Petroleum Reserves Production Act of 1976 and subsequent Presidential certifications, DOE is required to produce NPR–1 at the maximum efficient rate through April 5, 1997. To continue to meet this mandate, continued and enhanced NPR–1 operations are necessary.

The decision to produce the Naval Petroleum Reserves at the maximum efficient rate was initially authorized by Congress in 1976 to address emergency energy needs in response to the Arab oil embargo of 1973–1974. At that time, the Naval Petroleum Reserves were administered by the Secretary of the Navy. Effective October 1, 1977, the DOE Organization Act (Pub. L. 95–91) transferred jurisdiction of the Naval Petroleum Reserves to the new DOE. NPR–1 oil production since 1976 has either been sold on the open market, transferred to the Department of Defense for national security purposes, or transferred to the Strategic Petroleum Reserve for storage in the event of future oil supply disruptions.

In recent years, Congress has recognized other significant reasons for continued maximum efficient rate production of the Naval Petroleum Reserves. In addition to military preparedness and National defense reasons, the following issues were

considered in the most recent extension of the Naval Petroleum Reserves Production Act:

1. National economic impacts, including the direct effect on net Federal revenues and the broader effects on the economy;

2. National energy strategy, reflecting the effects of oil import requirements in the absence of an extension; and

3. Local and regional concerns, involving the effects of operating the Naval Petroleum Reserves on local economies and on upstream and downstream elements of the petroleum industry in the areas served by the Naval Petroleum Reserves.

Selection of the no action alternative (Alternative 1) would not allow DOE to meet the statutory mandate to produce NPR–1 at the maximum efficient rate, and would result in ultimate recovery losses of up to 500 million barrels of oil and more than 250 billion cubic feet of natural gas reserves. This represents a reduction of 58 percent of the remaining oil reserves and 20 percent of the remaining gas reserves, respectively. Under this alternative, the economic return on NPR–1 investment would be greatly diminished in comparison to that of the proposed action.

Selection of the modified proposed action alternative (Alternative 2) would eliminate important facility projects including Shallow Oil Zone steamflooding, expanded gas processing, and cogeneration power production that are needed to ensure continued maximum efficient rate production at NPR–1, as required by the Naval Petroleum Reserves Production Act of 1976. As in the case of Alternative 1, implementation of Alternative 2 would not allow DOE to meet its statutory mandate.

Major Environmental Impacts and Mitigation Action Plan

The environmental impacts that could result from implementation of the proposed action were summarized in Table 2.0–2 and analyzed in detail in Section 4.0 of the final SEIS. DOE believes that most of these impacts can either be eliminated or reduced to acceptable levels. Accordingly, a total of 88 mitigation commitments were made in the final SEIS to ensure impact levels would be minimized to the maximum extent possible. These mitigation commitments form the basis of the NPR–1 Mitigation Action Plan to reduce potential impacts from proposed action activities. The NPR–1 Mitigation Action Plan provides detailed activities, implementing organizations, activity milestone dates and mitigation monitoring protocol. Upon publication of the Record of Decision in the **Federal Register**, the Mitigation Action Plan will be made available for public review in reading rooms at the offices of the Naval Petroleum Reserves in California and DOE Headquarters in Washington, DC. The plan will also be provided to local libraries.

As noted earlier, EPA and a private water resources consultant provided substantive comments on the final SEIS. EPA encouraged DOE to continue ongoing efforts to identify wetland resources on NPR–1. As detailed in the Mitigation Action Plan, a formal wetland delineation study of potential wetlands on NPR–1 will be conducted in 1994. This study will be coordinated with both the U.S. Army Corps of Engineers and EPA. If jurisdictional wetlands are identified, DOE will comply with the provisions of the Clean Water Act regarding wetland disturbances.

As indicated in the final SEIS and associated Mitigation Action Plan, DOE is committed to remediating all inactive sumps and managing active sumps in accordance with Waste Discharge Requirements issued by the State of California's Central Valley Regional Water Quality Control Board. DOE is actively proceeding with plans to continue the remediation of historic produced water sumps. The Mitigation Action Plan also provides details (Mitigation Nos. WG–30 and WR–9) of a site-wide sump closure plan that was approved in 1991 by the Central Valley Regional Water Quality Control Board. EPA will be provided a copy of this closure plan as suggested in their comment. DOE is permitted to sump wastewater at NPR–1 by Waste Discharge Requirements #58–491 and #68–262, which prohibit the release of wastewater into unlined sumps located on alluvial soils if the wastewater exceeds 1,000 parts per million total dissolved solids. Accordingly, wastewater sumps on or near alluvial soils have been lined or taken out of service. DOE will continue to ensure the integrity of the liners at these locations.

DOE will complete a Groundwater Management Protection Plan for NPR–1 in 1994. The management plan will include, among other components, a site-wide Groundwater Monitoring Plan. On September 28, 1993 DOE briefed the California Department of Water Resources, the California Central Valley Regional Water Quality Control Board and the Kern County Water Agency on the development of these groundwater plans. DOE acknowledged the need to better characterize groundwater in the northeast portion of NPR–1 due to its proximity to a subsurface water bank under development by the water agencies. DOE facilitated a discussion of their respective interests regarding the development of NPR–1 groundwater plans. Future data review and exchange activities were discussed, which DOE will honor. Continued interactions with these agencies will be given a high priority by DOE.

The Groundwater Protection Management Plan will also address concerns raised by Mr. Rector regarding the withdrawal of waterflood source water and produced water injection activities on the south flank of NPR–1. DOE regularly monitors the quality of the source well water, including tests for volatile organics such as benzene, toluene, and xylenes as Mr. Rector suggested in his comment. Potential adverse impacts to the NPR–1 aquifer from groundwater withdrawal will continue to be monitored as well.

Other concerns raised by EPA regard issues with the potential for major environmental impacts. Acknowledgement of these concerns is included in the following discussion of the major environmental impacts associated with the proposed action and the principal mitigation measures planned to minimize the impacts.

1. Potential Erosion from Construction Disturbances to 1,569 Acres On and Off NPR–1

Soil Conservation Service erosion control/site-rehabilitation measures will be implemented in planning, design, and operational activities.

2. Slight Possibility of Subsidence and Induced Seismicity Due To Increased Withdrawal of Source Water From the Tulare Formation and Oil and Gas Withdrawal From Deep Producing Formations

NPR–1 facilities will be designed in accordance with the latest edition of the Uniform Building Code and the recommendations of the NPR–1 Geotechnical and Earthquake Engineering Study.

3. Production of Drilling Wastes Associated With A 382-Well Drilling Program, 2,663 Remedials, and 1,080 Abandonments

Drilling fluid additives utilized at NPR–1 will be limited to those that are included on the list of approved nonhazardous drilling fluid additives issued by the California Department of Health Service in 1982.

4. 100,000–181,000 Barrels Per Day of Produced Wastewater Would Require Recycling or Disposal

To the extent technically and economically feasible, produced water will be recycled for use as source water for waterflood operations.

5. Nonhazardous Solid Waste Quantities from Construction and Operations Would Increase Above the Current Volume of 24,000 Cubic Yards Per Year

NPR–1 will establish and implement a waste minimization program to reduce the volume of all nonhazardous solid wastes.

6. Hazardous Waste From Construction and Operations Would Increase Slightly Above the Current Level of Approximately 19,800 Pounds Per Year

Hazardous waste minimization reviews will be conducted for all proposed facility projects. State of California regulatory requirements, such as the Hazardous Waste Reduction and Management Review Act of 1989 (SB 14) will be followed. In addition, NPR–1 will comply with Executive Order 12856 (Federal Compliance with Right-to-Know Laws and Pollution Prevention Requirements) which was signed on August 3, 1993. This order requires Federal agencies to the maximum extent possible to reduce, recycle and treat toxic chemical waste. As required by the Order, NPR–1 will report in a public manner toxic chemicals entering any wastestream from the facility, and will improve local emergency planning, response and accident notification procedures.

7. Fugitive Particulate Emissions from Construction Activities and Seismic Survey Disturbances on Approximately 8,349 Acres

NPR–1 will develop and implement a particulate matter control plan.

EPA also recommended that measures be implemented to ensure compliance with the requirements of EPA's emissions trading policy. It should be noted that all air permitting operations at NPR–1 are closely coordinated with the San Joaquin Valley Unified Air Pollution Control District to ensure compliance with applicable regulations. Accounting of emission reductions is a District staff function. These issues are closely monitored by the California Air Resources Board and Region IX of EPA.

8. Increases in Current Operational Emissions By A Maximum of Approximately 133.6, 124.2, 367.0, 0.7, 5.8, and 85.8 Pounds Per Hour of Reactive Organic Gas, Nitrogen Oxide, Carbon Monoxide, Sulfur Dioxide, Total Suspended Particulate, and Particulate Matter With Aerodynamic Diameters Less Than 10 Microns, Respectively, As the Result of Proposed New Sources

New compressor engines will be equipped with low nitrogen oxide emission precombustion chambers. Steam generators, heaters, and cogenerators also will be equipped with appropriate low nitrogen oxide combustion technology. Anode beds will be watered frequently to reduce reactive organic gas emissions.

EPA also inquired if, in the absence of a State Implementation Plan, whether the impacts of continued and proposed NPR–1 operations would be in conformity with the provisions of the Federal Clean Air Act. NPR–1 will operate either under locally mandated New Source Review regulations if the State Implementation Plan is approved by EPA, or under Federally mandated New Source Review regulations if the plan is not approved. Further, operations regulated under New Source Review would be exempt from the conformity provisions as outlined in the March 1993 draft Rule (55 FR 13866). It should also be pointed out that in 1994, EPA will review the local Air Pollution Control District's proposed Federal operating permit program. Even if EPA approves the operating permit program, EPA would still retain the authority to veto permits that are not issued in accordance with the approved program.

9. Oils, Chemical, and Produced Waters Could Inadvertently Spill and Degrade Groundwater

All spills will be cleaned up as they are identified in accordance with the NPR–1 Spill Prevention, Control, and Countermeasure Plan.

10. Development of 1,569 Acres of Wildlife Habitat On and Off NPR–1 and Potential for Adverse Impacts To Wildlife From Inadvertent Harassment, Vehicle Mortality and Contact With Hydrocarbons and/or Oil-Field Chemicals

Preactivity surveys will be conducted by qualified personnel prior to any construction, maintenance, clean-up, or other ground disturbance in undeveloped areas to minimize the amount of habitat disturbed and to avoid protected species and their habitat to the maximum extent possible. Disturbed habitats will be revegetated as part of an ongoing habitat reclamation program.

In 1987, the U.S. Fish and Wildlife Service rendered a non-jeopardy Biological Opinion for the continued operation and development of NPR–1 at the maximum efficient rate of production. On October 9, 1991, consultation for maximum efficient rate production was reinitiated by DOE for the SEIS, and by letter dated May 28, 1993 (received by DOE on June 7, 1993), the U.S. Fish and Wildlife Service issued a draft Biological Opinion for this action which also concluded non-jeopardy. This consultation is still in progress, and when it is completed DOE will comply with the requirements contained in the new Biological Opinion. The U.S. Fish and Wildlife Service indicated by letter dated April 12, 1993, that the 1987 Biological Opinion will remain in effect for all activities specifically described therein until the current consultation is complete. DOE will continue to comply with the requirements of the 1987 Biological Opinion until such time as they are superseded by new requirements in subsequent Biological Opinions.

Most impacts associated with the proposed action of the SEIS and the 1993 draft Biological Opinion (including those associated with no action) were addressed in the 1987 Biological Opinion. For those proposed new activities that were not so addressed, DOE will not make any irreversible or irretrievable commitments of resources which would foreclose the formulation or implementation of any reasonable and prudent alternatives needed to avoid violating section 7(a)(2) of the Endangered Species Act until the impacts of these new activities have been subjected to review under section 7 of the Endangered Species Act. EPA recommended that no Record of Decision be issued until a new final Biological Opinion had been issued, and discussed the need to prepare additional National Environmental Policy Act documentation should the final Biological Opinion require modified operations not evaluated in the SEIS. DOE believes that the limitation on proceeding with new activities pending receipt of a final Opinion assures compliance with the Endangered Species Act. Furthermore, DOE commits to completing such documentation if required by the new Opinion.

EPA also questioned what steps DOE will take to prevent ingestion of chemicals by threatened, endangered and other animal species on NPR–1. DOE has in place a comprehensive

program to prevent the ingestion of oil field chemicals by wildlife. This program includes, but is not limited to, adherence to the facility Spill Prevention Control and Countermeasure Plan; proper storage, handling and disposal of chemical containers; procuring bulk chemicals whenever possible to eliminate storage in the field; proper management of hazardous wastes in conforming 90-day storage facilities; prompt evacuation of oily fluids from structures; managing current waste disposal sites in accordance with permit requirements; and remediating historical waste disposal sites. These standard management practices all provide protection from ingestion of oil field chemicals by wildlife.

To further reduce the potential for adverse impacts to listed species, DOE agrees to implement the following mitigation activities addressed in the May 28, 1993 draft Biological Opinion:

a. Continue to implement an endangered species program, including the NPR–1 Wildlife Management Plan;

b. Continue to conduct the endangered species worker education/training program;

c. Continue to conduct preactivity surveys as appropriate to minimize habitat disturbances and harm or mortality to listed species;

d. To the extent feasible, avoid sensitive habitats such as San Joaquin kit fox dens, giant and Tipton kangaroo rat burrows, and burrows potentially utilized by blunt-nosed leopard lizards;

e. Refrain from destroying San Joaquin kit fox dens that cannot be avoided until approval is obtained from the U.S. Fish and Wildlife Service;

f. Continue to implement a habitat reclamation program to reclaim disturbed areas that are no longer needed for oil-field operations;

g. Minimize off-road vehicle travel;

h. Prohibit employees from bringing pets onto NPR–1;

i. Clean up oil and chemical spills in accordance with the Spill Prevention Control and Countermeasure Plan.

j. Continue to evaluate sumps and catch basins to identify potential hazards to wildlife and remediate these hazards to the extent feasible;

k. Continue to evaluate and, to the extent feasible, remediate well cellar covers posing hazards to wildlife; and

l. Continue to report to the U.S. Fish and Wildlife Service on an annual basis on the status of the endangered species program.

11. Potential Disturbance of Cultural Resources From Development of 1,569 Acres On and Off NPR–1

NPR–1 will develop and implement a cultural resource management plan for the protection of cultural resources.

12. Potential for Well Blowouts and Gas Explosions From Closed Compressor Facilities

DOE will continue to conduct internal safety appraisals of all NPR–1 facilities.

Unavoidable Adverse Impacts

The unavoidable adverse impacts resulting from the proposed action that cannot be fully mitigated are as follows:

1. Some soil erosion would occur, especially in areas of new construction if major storms occur before soil stabilization measures take effect.

2. There is some potential for subsidence as the result of oil, gas, and water withdrawals from underlying geologic structures.

3. Inadvertent releases of oil or other oil field chemicals that are not entirely recovered on a timely basis could, over a period of time, migrate into and degrade groundwater aquifers.

4. Small net increases in the NPR–1 emissions of carbon monoxide and particulate matter could occur, resulting in minor increases in ambient concentrations of these pollutants in western Kern County.

5. There would be unavoidable, long-term adverse impacts to a net of 74 acres of wildlife habitat on and off NPR–1 as a result of permanent construction disturbances. (See Table 2.2–1 on page 2–11 of the final SEIS.)

6. The loss of habitat, potential exposure to hydrocarbons or other oil field chemicals and site activities may result in the death, injury and displacement of some plants and animals, including threatened and endangered species.

7. There is a very small potential that produced wastewater disposed of into disposal wells and sumps might degrade off-site groundwaters.

8. Increased consumption of energy and fresh water supplies would occur.

Conclusion

The production of NPR–1 in accordance with the Naval Petroleum Reserves Production Act of 1976 continues to serve a vital role in National defense, U.S. Treasury revenues, and local, regional, and National economics. Until Congress and the President modify the mission of DOE with respect to the Naval Petroleum Reserves, DOE will continue to produce NPR–1 in the most efficient and environmentally responsible manner possible.

Issued at Washington DC, this 25th day of February, 1994.

Marvin I. Singer,

Acting Assistant Secretary for Fossil Energy.

[FR Doc. 94–14553 Filed 6–14–94; 8:45 am]

BILLING CODE 6450–01–P

Notice of Floodplain and Wetlands Involvement for Hydrogeological Characterization Studies at the Pantex Plant, Amarillo, TX

AGENCY: Department of Energy (DOE).

ACTION: Notice of floodplain and wetlands involvement.

SUMMARY: DOE proposes to conduct hydrogeological characterization studies, some of which would be within floodplains and wetlands within the borders of or surrounding the Pantex Plant in Carson County, 17 miles northeast of Amarillo, Texas. In accordance with 10 CFR part 1022, DOE will prepare a floodplain and wetlands assessment and will perform this proposed action in a manner so as to avoid or minimize potential harm to or within the affected floodplain and wetlands.

DATES: Comments on the proposed action must be received by June 30, 1994.

ADDRESSES: Comments concerning this Notice should be addressed to: Floodplain and Wetlands Comments, Tom Walton, Public Affairs Office, U.S. Department of Energy, Amarillo Area Office, P.O. Box 30020, Amarillo, Texas 79177, (806) 477–3120, (806) 477–3185 (Fax).

Information on this proposed action, including a map of proposed sampling locations, is also available.

FOR FURTHER INFORMATION CONTACT: Information on general DOE floodplain and wetlands environmental review requirements is available from: Carol M. Borgstrom, Director, Office of NEPA Oversight, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–4600, (800) 472–2756.

SUPPLEMENTARY INFORMATION: DOE proposes to conduct a hydrogeological characterization study within floodplains and wetlands on and surrounding the Pantex Plant. The characterization studies would be conducted in support of the Permit for Industrial Solid Waste Management Site issued by the Texas Water Commission (now known as the Texas Natural Resources Conservation Commission) as part of DOE's effort to determine the nature and extent of any environmental contamination resulting from Pantex operations. On-site activities would occur within Solid Waste Management Units (SWMU) 6 (Playa Basin 1), SWMU 7 (Playa Basin 2), SWMU 8 (Playa Basin 3), SWMU 9 (Playa Basin 4), and SWMU 10 (Pantex Lake). Off-site activities would occur at Playa 5, located 2 miles southwest, and the Playa owned by the Texas Department of Criminal Justice, located 4.5 miles northeast of the Pantex Plant. On- and off-site activities would be conducted by the State of Texas under an Agreement in Principle with the DOE. The characterization studies occurring near or in the floodplain and wetlands would include:

1. Drilling boreholes for the purpose of collecting core samples from the playa basins.

2. Routine sampling, downloading, and maintenance of installed instrumentation.

3. Conducting soil gas surveys in and near the floodplain and wetlands.

4. Seismic survey activities to define playa basin geologic structure.

5. Trenching in or near the floodplain and wetlands for the installation of soil moisture instrumentation such as: thermocouple psychrometers, tensiometers, and Time Domain Reflectometers (TDR).

6. Trenching in and near the floodplain and wetlands to perform chemical (food coloring) tracer tests.

7. Surveying activities to define playa basin topography.

A more specific description of the seven activities listed above follows:

1. Borehole drilling would involve driving a drilling rig and a portable core sample laboratory to the site, drilling the boreholes, and collecting the core samples as the drilling progresses. The boreholes would be either closed by back-filling with the cuttings, or completed as soil solution sampling wells or neutron probe access tubes. The core sample borings will not exceed 120 feet in depth and the soil solution sampling wells and neutron probe access tubes would not exceed a maximum depth of 80 feet. Because the playa basin is ephemeral, drilling activities would only occur during the dry cycle of the playa.

2. The routine sampling, downloading, and maintenance of installed instrumentation would involve driving a utility vehicle to the site. Some instrumentation would be installed in the wetland and would involve entering the playa during the wet season to take samples and download data. Personnel entering wet areas of the playa would enter on foot to avoid undue impact to the floodplain and wetlands.

3. Soil gas surveys would be conducted during both dry and wet seasons in the playas and would involve driving a utility vehicle near the playa floor to download soil gas to a portable gas chromatograph. Personnel entering wet areas of the playa would enter on foot to avoid undue impact to the floodplain and wetlands.

4. Seismic survey activities would involve driving two utility vehicles and a trailer mounted weight-drop unit, used as an energy source, into the playa basin. This activity involves driving across the playa floor and can only be accomplished when the playa is completely dry, to minimize undue impact to the floodplain and wetlands.

5,6. Trenching in or near the floodplain and wetlands would involve driving a truck (larger than ton) and trailer mounted backhoe into the wetland areas to excavate the trenches. The trenches for the tracer tests would not exceed 3 meters in depth and would be the appropriate length and width to satisfy OSHA requirements. The trenches would remain open as long as the tracer tests are ongoing, and then would be backfilled and leveled. The trenches for the installation of the soil moisture instrumentation would not exceed 4.5 feet in depth and would involve installing TDR and psychrometer probes into the sidewall and endwall of the trench. These instrument trenches would be backfilled immediately after the probes are installed. Clean Water Act Section 404 permit authorization has been received for the trenching in these areas.

7. Surveying activities would involve driving a utility vehicle carrying equipment into the playa basin. The surveying would be done by personnel on foot to minimize any potential impact to the floodplain and wetlands.

In accordance with DOE regulations for compliance with floodplain and wetlands environmental review requirements (10 CFR part 1022), DOE will prepare a floodplains and wetlands assessment for this proposed DOE action which may be incorporated into the appropriate National Environmental Policy Act documentation. After DOE issues the assessment, a floodplain statement of findings will be published in the Federal Register.

Ralph G. Lightner,

Director, Office of Southwestern Area Programs, Environmental Restoration.

BILLING CODE 6450–01–P

Energy Information Administration

Forms; Availability, etc.: Coordinated Regional Bulk Power Supply Program Report

AGENCY: Energy Information Administration (EIA), DOE.

ACTION: Solicitation of comments on proposed revisions to Form OE–411 "Coordinated Regional Bulk Power Supply Program Report," and its filing frequency.

SUMMARY: EIA, as part of its continuing effort to reduce paperwork and respondent burden (required by the Paperwork Reduction Act of 1980, Public Law No. 96–511, 44 U.S.C. 3501 *et seq.*), conducts a presurvey consultation program to provide the general public and other Federal agencies with an opportunity to comment on proposed and/or continuing reporting forms. This program helps to ensure that requested data can be provided in the desired format, reporting burden is minimized, reporting forms are clearly understood, and the impact of data collection requirements on respondents can be properly assessed. Currently, EIA is soliciting comments concerning proposed revisions to the Form OE–411, "Coordinated Regional Bulk Power Supply Program Report" and its filing cycle.

Any changes to Form OE–411, determined to be necessary, based on evaluation of comments received in response to this notice will be reflected in and apply to the data submission scheduled for April 1, 1995.

DATES: Written comments must be submitted on or before July 15, 1994. If you anticipate that you will submit comments, but cannot do so within the period of time allowed by this notice, please advise the contact listed below. An additional 30 days may be allowed.

ADDRESSES: Send comments to Dennis K. Taillie, Director, Office of Emergency Planning, 1000 Independence Avenue SW., Washington, DC 20585 (Phone number (202) 586–3271, FAX (202) 586–1737).

FOR FURTHER INFORMATION OR TO OBTAIN COPIES OF THE EXISTING FORM AND INSTRUCTIONS: Requests for additional information or copies of the form and instructions should be directed to Mr. Taillie at the address listed above.

SUPPLEMENTARY INFORMATION:

I. Background

II. Current Actions

III. Request for comments

I. Background

Among the documents currently used to collect U.S. electric power system data is Form OE–411 (Coordinated Regional Bulk Power Supply Program Report). Formerly, authority for the Form OE–411 data collection was delegated to the Office of Emergency Planning and Operations (OE) within the Department of Energy. The OE organization no longer exists, but its functions relevant to the Form are now in the Office of Emergency Planning, Assistant Secretary for Policy, Planning, and Program Evaluation; and the Office of Emergency Management, Director of Nonproliferation and National Security.

EIA also has functions relevant to the Form. In order to fulfill its responsibilities under the Federal Energy Administration Act of 1974 (Pub. L. No. 93–275), and the Department of Energy Organization Act (Pub. L. No. 95–91), EIA is obliged to carry out a central, comprehensive, and unified energy data and information program. This program will collect, evaluate, assemble, analyze, and disseminate data and information related to energy resource reserves, production, demand and technology, and related economic and statistical information relevant to the adequacy of energy resources to meet demands in the near and longer term future for the Nation's economic and social needs.

The Form annually collects data needed to assess the adequacy and reliability of U.S. bulk power supply for a 10-year advance period. This assessment is necessary for DOE to fulfill the requirements of section 202(a) of the Federal Power Act, as amended.

Supplemented by additional reports published by the North American Electric Reliability Council (NERC), EIA and others, the data in the Form enable DOE to perform its assigned tasks, which include:

- Assessment of the adequacy of the U.S. electric power supply;
- Assessment of the vulnerability of the U.S. electric power supply to disruptions from all causes, and evaluation of the risks of such disruptions; and
- Energy-related support activities designated by the Federal Response Plan (the Robert T. Stafford Disaster Relief and Emergency Assistance Act, Public Law 93–228, as amended).

The supplemental additional reports noted above include NERC's 10 year forward reliability assessment and its yearly pre-season and post-season summer and winter operations assessments.

The Form is filed with the DOE annually on April 1 by each of the Regional Electric Reliability Councils of NERC in the United States. There are nine Councils in the contiguous U.S. and one in Alaska. No Council has been established by the electric utilities in Hawaii. Each Council files Form OE–411 with DOE and provides copies to the Federal Energy Regulatory Commission and to the Public Service Commission of each State that is wholly or partly within the Council's boundaries. The DOE makes the OE–411 reports available to the public for inspection and copying in its Office of Freedom of Information Reading Room at its Washington, DC, headquarters, 1000 Independence Avenue, SW., Washington, DC 20585.

The Form collects numerical and descriptive information concerning regional electric power supply systems. The numerical information consists of historic data and data projected for a 10-year advance period. The descriptive data consist of each Council's assessment of the projected reliability of the bulk power supply in its region over the next five years, and material concerning planning and operating practices of the Council.

Form OE–411 originated as "Appendix A" of Order 383–2, issued by the then Federal Power Commission on April 10, 1970. Since then, the Form has been incrementally revised from time-to-time and transferred to the jurisdiction of several groups within DOE, being variously designated as ERA–411, EP–411, IE–411 and currently OE–411. The title "Coordinated Regional Bulk Power Supply Program Report" has not been changed, as it reflects the continuing focus and purpose of the document.

The concept of regional electric power supply, coordinated for the purposes of reliability and adequacy on a regional scale by electric utilities working in the cooperative setting provided by the Regional Councils, was developed by the industry and the Federal Power Commission in the aftermath of the November 9, 1965, Northeast Blackout. That event made clear the need for neighboring interconnected electric utilities to coordinate their planning and operation in the interests of electric power supply reliability. Accordingly, the electric power industry, with the assistance and encouragement of the Federal Power Commission, organized Regional Electric Reliability Councils to improve inter-utility coordination of system planning and operation. These Councils provide an institutional mechanism for the activities needed to assure region-wide planning and operation of power system facilities, establishment of appropriate standards for the improvement of interconnected system operation and response to contingencies, and other relevant matters.

Form OE–411 provides a mechanism for recording in a single compact volume the basic data and practices resulting from regionally coordinated efforts by electric utilities to assure adequate, continuous and reliable electric power supply. The Form annually provides, in convenient, form basic information needed by the Federal government, State agencies, electric utilities and the public to assess the reliability and adequacy of electric bulk power supply as projected for a decade ahead.

II. Current Actions

Since the predecessor of Form OE–411 was initiated in 1970, significant changes have occurred in the technology of electric power generation, transmission, distribution and use which have been accompanied by reduced growth of electric demand. Coupled with changes in the national economy, the structure of the electric power industry, new Federal energy legislation and changes in Federal and State regulatory practices, it is appropriate to reconsider Form OE–411 at this time with respect to: Frequency of reporting, scope and content, duplicate reporting of data, and administrative arrangements.

Administrative Arrangements

The Survey Management Division, Office of Coal, Nuclear, Electric and Alternate Fuels of the EIA is assuming responsibility for administration of the Form. EIA will be responsible for preparing the blank Form, sending it to the Reliability Councils (in hard copy, diskette or by other means), receiving the completed Form from each Council, entering the data into an electronic database readily accessible to government agencies and the public, and providing a hard copy of each Council's Form to the DOE Freedom of Information Reading Room for inspection and copying by the public.

EIA also will be responsible for making changes to the Form, if revisions are found to be needed, after consultation with DOE's Office of Emergency Planning and Office of Emergency Management, the North American Electric Reliability Council (acting for the Regional Councils) and other interested parties. If this change in administrative responsibility is implemented, the designation of the Form will become EIA–411. Response to Form OE–411 and its predecessors was voluntary. It is now proposed that response to Form EIA–411 will be mandatory.

Frequency of Reporting

The Department of Energy is considering reducing the filing frequency for the new Form (EIA–411) to biennially instead of annually. Accordingly, the 1995 filing would be required, but the next filing would not be due until 1997. When the Form's predecessor was initiated in 1970 the demand for electric power was exhibiting a high rate of annual increase and the planning and construction of electric system facilities was correspondingly rapid. Annual reporting was appropriate at that time so that assessment of reliability could be based on the latest data, which changed rapidly. The present annual growth rate of electricity demand is approximately half of what it was in the late 1960's and early 1970's. It appears probable that the growth rate will not increase greatly in the foreseeable future. The pace of facilities construction has slowed correspondingly and it seems appropriate to reduce the frequency of data reporting.

Biennial preparation of Form EIA–411 will reduce the reporting burden on the utility industry (which provides the data to the Councils) and on the Councils (which aggregate the data, prepare the response and make distribution to the Department of Energy, the Federal Energy Regulatory Commission and State Public Service Commissions). Since year-to-year changes are smaller than previously, the validity of adequacy assessments based on the biennial reports is not likely to be affected significantly.

Elimination of Duplication

Some data on utility-owned generating units are currently reported by utilities twice: To EIA on Form EIA–860 (Annual Electric Generator Report) and also on Form OE–411. Currently, data on the mode of transportation of fuel to these units are reported on Form OE–411 but not on Form EIA–860; however, EIA intends to modify Form EIA–860 to include reporting of the fuel transportation data. Also, electric utility, unauthorized planned new generators are reported on Form OE–411 but not on Form EIA–860. EIA will modify Form EIA–860 to include electric utility, unauthorized planned new generators. Once this is done, Form EIA–860 will include all of the utility-owned generating unit data required, and the duplicative work of the Councils in preparing a separate list of utility-owned generating unit data (including mode of fuel transportation) for Form EIA–411 will become unnecessary.

However, complete and accurate generating unit data will be needed in Form EIA–411 to make it a "stand-alone" document. Therefore, EIA will furnish to each Council the data (reported on Form EIA–860) concerning the utility-owned units in that Council, to be incorporated by the Council in its response to Form EIA–411. The procedure to do this will be developed jointly by EIA and the Councils to assure that the data reported in Form EIA–411 are complete, accurate and correctly reflect the generating capacity owned by utilities and non-utility generators (NUGs) within the Council boundaries. Data concerning non-utility generating capacity will be obtained by utilities as is done currently, will be reported by the utilities to the Councils and will be reported by each Council in its response to Form EIA–411.

Content of Proposed Form EIA–411

The following discussion lists items being considered for inclusion in proposed Form EIA–411. A brief justification for each proposed change from Form OE–411 is also provided.

Item No.

1. Projected energy and peak demand for ten years and actual data for the previous year.

No change is proposed for this item.

2A. Existing generating capacity.

No change is proposed for the content of this item. The method by which the data are to be obtained is discussed above under the heading "Elimination of Duplication."

2B. Projected Generating Capacity Installations, Changes and Removals.

No change is proposed for this item. The method by which the data are to be obtained is discussed above under the heading "Elimination of Duplication."

2C. Projected capacity purchases and sales.

It is proposed to add to this item, for the peak hour of each month of the preceding year, the actual purchases and sales of capacity resulting from transactions with sources external to the Council area.

Justification: For some Councils, purchased capacity is a significant portion of the total available and significantly affects the adequacy of regional power supply. No means now exist for tracking this information in Form OE–411.

3A. Projected capacity and demand for ten years.

No change is proposed for this item.

3B. Five-year assessment of adequacy by the Council.

No change is proposed for this item.

3C. Regional generating capacity unavailability.

Only data on utility-owned generating capacity are currently reported. It is proposed that unavailability data for non-utility (NUG) generator capacity be added to this item to the extent that it is made available by NUG entities

Justification: As NUG capacity becomes a larger portion of total installed capacity in a Council area, it becomes more important to be able to assess its reliability.

New Item 3D. Regional Demand Projections.

Discuss the forecasting method and basic assumptions employed by the Council in reaching aggregate demand and energy projections, tabulated in Item 3A, for normal weather. Also discuss how the Council plans to meet contingencies caused by extreme weather.

Justification: The discussion will provide a basis, not currently available, for understanding the forecasts.

4A. Bulk Power Transmission System Maps.

No change is proposed for this item.

4B. Projected Bulk Power Transmission Line Additions.

No change is projected for this item.

5A. Near-term Transmission Adequacy.

No change is projected for this item.

5B. Future Critical Bulk Power Transmission Facilities That Will Not Be In Service When Required.

It is proposed to replace this item by a new item 5B requesting:

(1) Summary data on actual inter-Council purchase and sale transactions which took place during the seasonal (summer and winter) peak load periods of the preceding year and (2) a discussion of the extent to which the magnitude of these transactions approached the transfer capacity of the inter-Council transmission facilities under conditions then existing.

Justification: Industry reports claim that some U.S. transmission facilities are approaching their capacity transfer limits but do not support these claims with quantitative information. The data requested will provide an understanding of the ability of transmission facilities to transfer the capacity purchases and sales reported in item 3A among Councils.

5C. System Evaluation Criteria.

It is proposed to enlarge this item to include discussion of the effects of non-utility generating sources and increased access by independent power producers to transmission facilities as they specifically relate to reliability of supply in the Council's area.

Justification: Increasing non-utility generation and the issues associated with integrating that generation into the utility network may have effects on system reliability that are not thoroughly explored elsewhere.

6A. Coordination of Operations.

No change is proposed for this item.

6B. Load preservation program.

It is proposed to add to this item requests for: (1) description of the voltage reduction procedures employed by the utilities in the Council area, their effectiveness in reducing peak demands and the effects on customer equipment; and (2) discussion of conditions and practices related to reduction of peak demand under control of or at the request of the system operator. These practices are usually described by such terms as "direct load control," "interruptible load," or "load management." The terminology used should be defined.

Justification: Load preservation practices and procedures differ among Councils. Further information is necessary to understand their potential for preserving load.

7. Additional Information

No change is proposed for this item.

III. Request for Comments

Prospective respondents and other interested parties are requested to comment on the proposed revisions discussed above and to propose such other modifications as they deem useful. The following general questions are provided to assist in the preparation of responses:

For the potential respondent and user:

A. Are current instructions and definitions in Form OE–411 clear and sufficient? If not, what changes do you suggest?

B. Can the information requested be submitted consistent with the existing definitions? (Note: It is intended to adopt, if possible, the definitions in the "Glossary of Terms For NERC Publications" to be published by the North American Electric Reliability Council on June 9, 1994.)

C. Can the information requested be submitted within the response time specified in the instructions?

D. For Form OE–411 as currently constituted, public reporting burden is estimated to average 13 hours per response for the utilities that provide the basic information and 1000 hours for each Reliability Council respondent. How much time, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information, do you estimate would be required to complete Form EIA–411 if it should be promulgated as proposed in this Notice?

E. What specific changes do you suggest?

F. If you know of any Federal, State or local governmental agency that collects identical data in the same single volume format, specify the agency and a reference citation.

G. For what purposes would you use the EIA–411 report? Please be specific.

H. What are the deficiencies and strengths of any alternate source of numerical and descriptive information that you use?

EIA also is interested in receiving comments regarding the need for the information provided in Form OE–411 (existing) or Form EIA–411 (proposed).

Comments will become a matter of public record.

The Office Of Emergency Planning and EIA will review and evaluate all comments received as a result of this Notice in the context of best serving the interests of the public, the electric utility industry, State governments and the Federal government. A statement will be prepared integrating the views expressed above with the comments received in response to this notice. If appropriate after review by these offices, the Office of Management and Budget (OMB) will be requested to authorize use of Form EIA–411 for the period 1995–1997.

Statutory Authorities: Sec. 2(a) of the Paperwork Reduction Act of 1980, (Public Law No. 96–511), which amended Chapter 35 of Title 44 United States Code. [See 44 U.S.C. 3506(a) and (c)(1)].

Issued in Washington, DC June 9, 1994.

Yvonne M. Bishop,

Director, Office of Statistical Standards, Energy Information Administration.

BILLING CODE 6450–01–P

Federal Energy Regulatory Commission

[Docket No. QF87–422–005]

Indeck-Corinth Limited Partnership; Application for Commission Recertification of Qualifying Status of a Cogeneration Facility

June 9, 1994.

On June 8, 1994, Indeck-Corinth Limited Partnership (Indeck-Corinth) of 1130 Lake Cook Road, suite 300, Buffalo Grove, Illinois 60089, submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207(b) of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

According to the applicant, the natural gas-fueled cogeneration facility is located in Corinth, New York. The Commission previously certified the capacity of the facility to be 36.65 MW. The facility was to consist of a combustion turbine generator and a heat recovery boiler. Thermal energy recovered from the facility was to be used in paper manufacturing processes. The instant application for recertification is submitted to report the addition of an extraction/condensing steam turbine generator and an approximately 3.5-mile, 115 kV transmission line to the facility. Furthermore, the application reflects an increase in the facility's maximum net electric power production capacity to 137.4 MW, use of thermal energy output for space heating, and the transfer of ownership from International Paper Company to Indeck-Corinth.

Any person desiring to be heard or objecting to the granting of qualifying status should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed within 30 days after the date of publication of this notice in the **Federal Register** and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Linwood A. Watson, Jr.,

Acting Secretary.

[FR Doc. 94–14488 Filed 6–14–94; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. EL94–65–000, et al.]

Consumers Power Company, et al.; Electric Rate and Corporate Regulation Filings

June 8, 1994.

Take notice that the following filings have been made with the Commission:

1. Consumers Power Co.

[Docket No. EL94–65–000]

Take notice that on May 4, 1994, Consumers Power Company tendered for filing a Petition for waiver of policy statement regarding post-employment benefits other than pensions.

Comment date: June 23, 1994, in accordance with Standard Paragraph E at the end of this notice.

2. Louis Dreyfus Electric Power Inc.

[Docket No. ER92–850–006]

Take notice that on May 2, 1994, Louis Dreyfus Electric Power Inc.

(Dreyfus) filed certain information as required by the Commission's December 2, 1992 letter order in this proceeding. 61 FERC ¶ 61,303 (1992). Copies of Dreyfus' informational filing are on file with the Commission and are available for public inspection, with the exception of certain data which Dreyfus claims is privileged pursuant to Section 388.112 of the Commission's Rules of Practice and Procedure.

3. PSI Energy, Inc.

[Docket No. ER94–533–000]

Take notice that PSI Energy, Inc. (PSI) and Indiana Municipal Power Agency on May 13, 1994, tendered for filing amended Service Schedules in the FERC Filing in Docket No. ER94–533–000 to comply with a FERC Staff request.

Copies of the filing were served on Indiana Municipal Agency and the Indiana Utility Regulatory Commission.

Comment date: June 22, 1994, in accordance with Standard Paragraph E at the end of this notice.

4. Western Resources, Inc.

[Docket No. ER94–1010–000]

Take notice that on May 25, 1994, Western Resources, Inc. tendered for filing additional information to its March 2, 1994 filing in the above-referenced docket.

Comment date: June 20, 1994, in accordance with Standard Paragraph E at the end of this notice.

5. Southwestern Public Service Co.

[Docket No. ER94–1093–000]

Take notice that on June 1, 1994, Southwestern Public Service Company tendered for filing an amendment to its March 28, 1994 filing in the above-referenced docket.

Comment date: June 22, 1994, in accordance with Standard Paragraph E at the end of this notice.

6. The Montana Power Co.

[Docket No. ER94–1189–000]

Take notice that on May 27, 1994, The Montana Power Company (Montana) tendered for filing with the Federal Energy Regulatory Commission pursuant to 18 CFR 35.13, an amendment to its filing in the above referenced docket. Said amendment was filed so as to provide the Commission with a Certificate of Concurrence from Enron Power Marketing, Inc. (Enron).

A copy of the filing was served upon Enron and Lassen Municipal Utility District.

Comment date: June 22, 1994, in accordance with Standard Paragraph E at the end of this notice.

7. Atlantic City Electric Co.

[Docket No. ER94–1316–000]

Take notice that on May 31, 1994, Atlantic City Electric Company (ACE) tendered for filing a Letter Agreement between ACE and Baltimore Gas & Electric Company (BG&E). Pursuant to the Letter Agreement, ACE has agreed to sell to BG&E PJM firm installed capacity credits pursuant to the current PJM Interconnection Agreement Schedule 4.01.

ACE requests waiver of the notice requirements in order that the Letter Agreement may become effective as of June 1, 1994.

Copies of the filing have been served on New Jersey Board of Regulatory Commissioners, the Maryland Public Service Commission, and Baltimore Gas & Electric Company.

Comment date: June 22, 1994, in accordance with Standard Paragraph E at the end of this notice.

8. Northeast Utilities Service Co., Central Maine Power Co.

[Docket No. ER94–1317–000]

Take notice that on May 31, 1994, Northeast Utilities Service Company (NUSCO), on behalf of The Connecticut Light and Power Company (CL&P), Western Massachusetts Electric Company (WMECO), Holyoke Water Power Company (HWP), Holyoke Power and Electric Company (HP&E) and Public Service Company of New Hampshire (PSNH) along with Central Maine Power Company (CMP) tendered for filing a capacity exchange agreement dated May 15, 1994 between NUSCO and CMP.

NUSCO states that a copy of this information has been mailed to CMP and the Maine Public Utilities Commission, Connecticut Department of Public Utility Control, Massachusetts Department of Public Utilities and New Hampshire Public Service Commission.

Comment date: June 22, 1994, in accordance with Standard Paragraph E at the end of this notice.

9. Northeast Utilities Service Co.

[Docket No. ER94–1318–000]

Take notice that on May 27, 1994, Northeast Utilities Service Company (NUSCO) submitted for filing, on behalf of the Northeast Utilities (NU) System Companies, a System Power Sales Agreement between NUSCO and Bozrah Light and Power Company (Bozrah) and a Service Agreement between NUSCO and the NU System Companies for service under NUSCO's Transmission Tariff No. 5 (Service Agreement). NUSCO requests that the Agreement and the Service Agreement be permitted to become effective May 1, 1994.

Comment date: June 22, 1994, in accordance with Standard Paragraph E at the end of this notice.

10. The Washington Water Power Co.

[Docket No. ER94–1320–000]

Take notice that on May 31, 1994, The Washington Water Power Company (WWP), tendered for filing with the Federal Energy Regulatory Commission pursuant to 18 CFR 35.13 revisions to the borderline transmission service provided by WWP to the Bonneville Power Administration (Bonneville) under terms of the WWP/Bonneville General Transfer Agreement.

A copy of this filing has been served upon Bonneville, the Idaho Public Utilities Commission, and the Washington Utilities and Transportation Commission.

Comment date: June 22, 1994, in accordance with Standard Paragraph E at the end of this notice.

11. Green Mountain Power Corp.

[Docket No. ER94–1321–000]

Take notice that on May 31, 1994, Green Mountain Power Corporation (GMP) tendered for filing a Service Agreement and Certificate of Concurrence for Consolidated Edison under FERC Electric Tariff No. 2, known as GMP's Opportunity Transaction Tariff (Tariff). The Service Agreement is intended to supersede the unexecuted Service Agreement for Consolidated Edison, identified as Rate Schedule No. 19 under the Tariff. The Service Agreement and Certificate of Concurrence will allow Consolidated Edison to enter into transactions, including exchange unit transactions, in accordance with the Tariff. No terms or conditions of the Tariff are affected by the form of Service Agreement.

Comment date: June 22, 1994, in accordance with Standard Paragraph E at the end of this notice.

12. Central Maine Power Co.

[Docket No. ER94–1323–000]

Take notice that on June 1, 1994, Central Maine Power Company (CMP), tendered for filing a Settlement Agreement between CMP and New England Power Company (New England Power), dated as of June 1, 1994 (Agreement). In accordance with the terms of the Agreement, CMP will provide New England Power with two cash payments, and a CMP system energy sale of capacity and associated energy for the months of August and September 1994 priced at CMP's projected incremental cost of production.

Comment date: June 22, 1994, in accordance with Standard Paragraph E at the end of this notice.

13. Northern States Power Co. (Minnesota)

[Docket No. ER94–1324–000]

Take notice that on June 1, 1994, Northern States Power Company (Minnesota) tendered a Relocation Agreement between NSP and City of Chaska.

NSP requests that the Commission disclaim jurisdiction over this Agreement. If the Commission claims jurisdiction over this Agreement, NSP alternatively requests that the Commission accept for filing the attached Agreement effective as of May 23, 1994, and requests waiver of any applicable Commission Notice Requirements under Part 35.

Comment date: June 22, 1994, in accordance with Standard Paragraph E at the end of this notice.

14. Commonwealth Edison Co., Madison Gas & Electric Co.

[Docket No. ER94–1325–000]

Take notice that on June 2, 1994, Commonwealth Edison Company (Edison) submitted a Service Agreement, dated June 1, 1994, establishing Madison Gas & Electric Company (MG&E) as a customer under the terms of Edison's Power Sales Tariff PS–1 (PS–1 Tariff). The Commission has previously designated the PS–1 Tariff as FERC Electric Tariff, Original Volume No. 2. Edison and MG&E also submitted for filing a Letter Agreement, dated June 1, 1994, whereby Edison and MG&E agree to cancel an existing Letter Agreement, dated February 1, 1990, and a Notice of Cancellation with respect to the MG&E rate schedule.

Edison requests an effective date of June 1, 1994, and accordingly seeks waiver of the Commission's requirements. Copies of this filing were served upon MG&E, the Public Service Commission of Wisconsin, and the Illinois Commerce Commission.

Comment date: June 22, 1994, in accordance with Standard Paragraph E at the end of this notice.

15. Texas-New Mexico Power Co.

[Docket No. ER94–1326–000]

Take notice that on June 2, 1994, Texas-New Mexico Power Company tendered for filing Amendment No. 1 of a certain agreement between TNP and El Paso Electric Company (EPE) pertaining to communication facilities at Long Ridge Electronic Site.

Asserting that the agreement does not provide for TNP either to sell electric power at wholesale or to perform a wheeling service, TNP requests that the Commission disclaim jurisdiction and reject the tender for filing. If the Commission does not disclaim jurisdiction, TNP requests that the Commission waive its notice requirements and accept such Amendment effective as of June 1, 1994.

TNP asserts that the filing has been served on EPE, the New Mexico Public Utility Commission, and the Public Utility Commission of Texas.

Comment date: June 22, 1994, in accordance with Standard Paragraph E at the end of this notice.

16. Orange and Rockland Utilities, Inc.

[Docket No. ER94–1327–000]

Take notice that on June 2, 1994, Orange and Rockland Utilities, Inc. (Orange and Rockland) tendered for filing pursuant to the Federal Energy Regulatory Commission's order issued January 15, 1988, in Docket No. ER88–112–000, an executed Service Agreement between Orange and Rockland and Chromalloy Wallkill Corporation.

Comment date: June 22, 1994, in accordance with Standard Paragraph E at the end of this notice.

17. CMEX Energy, Inc.

[Docket No. ER94–1328–000]

Take notice that on June 2, 1994, CMEX Energy, Inc. (CMEX) tendered for filing pursuant to Rule 205, 18 CFR 385.205, a petition for waivers and blanket approvals under various regulations of the Commission and for an order accepting its FERC Electric Rate Schedule No. 1 to be effective August 2, 1994.

CMEX intends to engage in electric power and energy transactions as a marketer and a broker. In transactions where CMEX sells electric energy it proposes to make such sales on rates, terms, and conditions to be mutually agreed to with the purchasing party. Neither CMEX nor any of its affiliates are in the business of generating, transmitting, or distributing electric power.

Rate Schedule No. 1 provides for the sale of energy and capacity at agreed prices. Rate Schedule No. 1 also provides that no sales may be made to affiliates.

Comment date: June 22, 1994, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 94–14487 Filed 6–14–94; 8:45 am]

BILLING CODE 6717–01–P

[Project No. 6624–099 New York]

Alfred D. Huey; Availability of Environmental Assessment

June 9, 1994.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47910), the Office of Hydropower Licensing (OHL) reviewed site restoration measures for the removal of a powerhouse at the Tyrone Project. The removal of the powerhouse is required in the termination of the exemption (license).[1] The project is located on Big Tobehanna Creek near the Village of Tyrone in Schuyler County, New York.

The staff of OHL's Division of Project Compliance and Administration prepared on Environmental Assessment (EA), for the proposed action. In the EA, the staff concludes that the licensee's proposals would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Reference and Information Center, room 3308, of the Commission's offices at 941 North Capitol Street, NE, Washington, DC 20426.

Linwood A. Watson, Jr.,

Acting Secretary.

---

[1] See 64 FERC ¶ 61,356.

[Project No. 8864–009 Washington]

Weyerhaeuser Co; Availability of Environmental Assessment

June 9, 1994.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47910), the Office of Hydropower Licensing (OHL) has reviewed the application to change the design of the transmission line for the Calligan Creek Project. The proposed 2.5 mile long transmission line would be buried for its entire length in the shoulder of a Weyerhaeuser Company logging road. No other private or residential landowners would be affected.

The staff of OHL's Division of Project Compliance and Administration has prepared an Environmental Assessment (EA) for the proposed action. In the EA, the staff concludes that the licensee's proposals would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Reference and Information Center, room 3308, of the Commission's Offices at 941 North Capitol Street, NE., Washington, DC 20426.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–M

[Docket No. TM94–10–23–001]

Eastern Shore Natural Gas Co.; Proposed Changes in FERC Gas Tariff

June 9, 1994.

Take notice that on June 1, 1994, Eastern Shore Natural Gas Company (ESNG) tendered for filing certain revised tariff sheets included in Appendix A attached to the filing. Such tariff sheets are proposed to be effective May 1, 1994.

On May 2, 1994, ESNG filed revised tariff sheets pursuant to § 154.309 of the Commission's regulations and §§ 21.2 and 21.4 of ESNG's General Terms and Conditions. ESNG states that the filing reflected a decrease in ESNG's Commodity and Demand sales rates, as compared to rates filed in Docket No. TQ94–5–23–000, et al. It has recently come to ESNG's attention that the storage tracker component of its GSS–1 Storage Service rates for: (1) Excess Delivery From Buyer's Storage Gas Balance Charge, and (2) Excess Delivery Not Reducing Buyer's Storage Gas Balance Charge were incorrectly calculated. ESNG states that the instant filing is being tendered in order to correct the GSS–1 General Storage Service rates involved.

ESNG states that copies of the filing have been served upon its jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before June 16, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–M

[Docket No. RP94–268–000]

Energy Production Corporation v. Koch Gateway Pipeline Company; Compliant

June 9, 1994.

Take notice that on May 31, 1994, Energy Production Corporation (EPCo), pursuant to Rule 206 of the Commission's Rules of Practice and Procedure, 18 CFR 385.206, and Section 1b.8 of the Commission's general rules, 18 CFR 1b.8, submits for filing its formal complaint against Koch Gateway Pipeline Company (Koch).

EPCo requests the Commission utilize its power under the Natural Gas Act to issue a show cause order against Koch for charging rates in excess of the maximum allowed for open access transportation under its rate schedule in violation of the Natural Gas Act and to order Koch to refund any charges in excess of the maximum allowed for open access transportation and to take any and all necessary actions to prohibit Koch from continuing to charge a gathering rate for service that is clearly transmission and to refund any gathering rate charges that have been improperly collected.

EPCo respectfully requests that the Commission act promptly to (a) order Koch to refund all gathering fees improperly collected and (b) to cease collecting any new gathering fees on gas delivered through such meter point.

EPCo requests immediate action in this matter to avoid the imminent and irreparable competitive harm associated with application of the illegal rate. EPCo states that it has been required to deliver gas through an adjoining pipeline facility at a higher pressure which other facility may not be available to it in the future.

Any person desiring to be heard or to protest said complaint should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214, 385.211. All such motions or protests should be filed on or before July 11, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. Answers to this complaint shall be due on or before July 11, 1994.

Panhandle Eastern Pipe Line Company; Amended Filing of FERC Gas Tariff

June 9, 1994.

Take notice that on June 6, 1994, Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing the following substitute tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1, pertaining to the flow through mechanism for the recovery of Dakota Gasification Transition Costs billed to Panhandle by ANR Pipeline Company (ANR). Panhandle proposes that the substitute tariff sheets become effective June 1, 1994:

Substitute Second Revised Sheet No. 11
Substitute Second Revised Sheet No. 12
Substitute Second Revised Sheet No. 13
Substitute First Revised Sheet No. 14

The Commission approved the implementation of a mechanism to flow through the Dakota Gasification Transition Costs, subject to refund and subject to the ultimate disposition of proceedings in Docket No. RP94–150–000, by order dated May 27, 1994. Panhandle states that the substitute tariff sheets should be accepted for filing because Panhandle has not actually been billed for the transition costs by ANR for the first quarter. Consequently, the substitute tariff sheets reduce the surcharge associated with the Dakota Gasification Transition Costs to zero. Panhandle also states that it reserves its right to file subsequently under Section 18.11 of the General Terms and Conditions of its Tariff to implement the flow through cost recovery mechanism as may be necessary in the future.

Panhandle requests that the Commission grant all necessary waivers of the Regulations so as to place the instant substitute tariff sheets and attendant surcharge into effect on June 1, 1994.

Panhandle states that a copy of this tariff filing is being served on all affected customers and state commissions.

Any person desiring to protest the said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC, 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests should be filed on or before June 16, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Linwood A. Watson, Jr.,
Acting Secretary.

BILLING CODE 6717–01–M

[Docket No. GT94–42–000]

Texas Eastern Transmission Corp.; Refund Report

June 9, 1994.

Take notice that on May 10, 1994, Texas Eastern Transmission Corporation (Texas Eastern) tendered for filing with the Federal Energy Regulatory Commission (Commission) its Refund Report summarizing a flow-through refund from Transcontinental Gas Pipe Line Corporation (TGPL) in Docket No. RP92–137. The refunds, plus interest, are being flowed through pursuant to Section 15.2(D) of the General Terms and Conditions of Texas Eastern's FERC Gas Tariff, Sixth Revised Volume No. 1.

Texas Eastern states that the refund amounts are based on each customer's charges under the applicable Stranded Account No. 858 Costs filing in Dockets Nos. RP93–204 and RP94–99 for the periods June 1, 1993 through August 31, 1993 and September 1, 1993 through October 31, 1993, respectively. For these two periods, Texas Eastern reports principal refund amounts totalling $78,938.55 plus interest of $2,230.47 from TGPL. Texas Eastern included additional interest $761.32 in the amounts flowed through to its affected customers to cover the period from March 14, 1994 to May 10, 1994, the date of refund.

Texas Eastern states that a copy of the refund summary schedule and detailed calculations was sent to each of Texas Eastern's affected customers, and a copy of the refund summary was sent to the respective state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before June 16, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Linwood A. Watson, Jr.,
Acting Secretary.

BILLING CODE 6717–01–M

[Docket No. GT94-43-000]

Transcontinental Gas Pipe Line Corp.; Refund Report

June 9, 1994.

Take notice that on May 17, 1994, Transcontinental Gas Pipe Line Corporation (TGPL) tendered for filing with the Federal Energy Regulatory Commission (Commission) a Refund Report summarizing its flow-through of a refund received from CNG Transmission Corporation (CNG). The report states that on May 13, 1994, TGPL refunded $46,614.45, including $3,558.53 in interest, to its LSS customers in accordance with section 4 of its Rate Schedule LSS. The report shows the computation of the refund amounts for the period January 10, 1991 through July 31, 1992, pursuant to the settlement of CNG's rate case in Docket No. RP92-14.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before June 16, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Linwood A. Watson, Jr.,
Acting Secretary.

[FR Doc. 94-14496 Filed 6–14–94; 8:45 am]
BILLING CODE 6717–01–M

[Docket No. RP92–137–204]

Transcontinental Gas Pipe Line Corp.; Refund Report

June 9, 1994.

Take notice that on March 10, 1994, Transcontinental Gas Pipe Line Corporation (TGPL) tendered for filing with the Federal Energy Regulatory Commission (Commission) a report summarizing refunds disbursed on

March 8, 1994 to certain sales, storage and transportation customers. On December 16, 1993, TGPL filed a request to accelerate partial refunds in advance of the date provided under Article IV of the settlement approved by the Commission of November 4, 1993, in Docket No. RP92–137–015. The request was granted by the Commission on February 14, 1994 in Docket Nos. RP92–137–021, *et al.* subject to TGPL making refunds to all affected parties.

TGPL states that the refunds were calculated for the locked-in period from September 1, 1992 through October 31, 1993 based on the difference between the amounts billed and the amounts computed using the settlement rates. TGPL's report shows refunds totalling $99,202,619.93, including $5,067,299.00 in interest; however, TGPL notes that the refund calculations for Panda Energy Corporation, Baltimore Gas & Electric, New York Power Authority, and South Jersey Energy Corporation indicate that additional amounts are due TGPL as a result of an increase in rates for service provided under Rate Schedule FT–NT.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211). All such protests should be filed on or before June 16, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–M

Office of Arms Control and Nonproliferation

Proposed Subsequent Arrangement

Pursuant to Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160), notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation between the Government of the United States of America and Government of Sweden concerning Peaceful Uses of Nuclear Energy, and the Agreement for Cooperation between the Government of the United States of America and the Government of Norway concerning Peaceful Uses of Nuclear Energy.

The subsequent arrangement to be carried out under the above-mentioned agreements involves approval of the following retransfer: RTD/NO(SW)–22, for the transfer of 3 rod segments from Sweden to Norway for testing in the Halden reactor. The segments contain 900 grams of uranium containing 2 grams of the isotope uranium-235 and 8 grams of plutonium. After testing at Halden, the segments are to be returned to Sweden.

In accordance with Section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

Issued in Washington, DC on June 10, 1994.

Edward T. Fei,

Acting Director, Division of International and Regional Security; Office of Arms Control and Nonproliferation.

[FR Doc. 94–14556 Filed 6–14–94; 8:45 am]

BILLING CODE 6450–01–M

Southwestern Power Administration

Sam Rayburn Dam Project and Robert D. Willis Hydropower Project

AGENCY: Southwestern Power Administration, DOE.

ACTION: Notice of Proposed Sam Rayburn Dam and Robert Douglas Willis power rates and opportunities for public review and comment.

SUMMARY: The Administrator, Southwestern, has prepared Current and Revised 1994 Power Repayment Studies for the Sam Rayburn Dam (Rayburn) project and the Robert Douglas Willis (Willis) Hydropower project which indicate the need for rate adjustments at both projects to meet cost recovery criteria. These rate adjustments are needed primarily to recover estimated increases in Corps of Engineers' operation and maintenance expenses at the two hydropower projects. The proposed rate for Rayburn increases annual revenue requirements approximately 4.4 percent from $2,076,444 to $2,168,136, beginning October 1, 1994. The proposed rate for the Willis project increases annual revenue requirements approximately 3.6 percent from $284,580 to $294,696, beginning October 1, 1994. The Administrator has developed proposed rate schedules for the Rayburn and Willis projects to recover the required revenues.

DATES: A Public Information Forum will be held July 7, 1994, in Tulsa, Oklahoma. A Public Comment Forum will be held August 1, 1994, in Tulsa, Oklahoma. Written comments are due on or before August 15, 1994. Revised rates for Sam Rayburn Dam and Robert D. Willis projects are calculated based on an October 1, 1994, implementation date. Therefore, to provide opportunities for public consultation and comment while also meeting the October 1, 1994, date for implementation, Southwestern is conducting a 60 day public notice and comment period (10 CFR 903.14(d)). This public participation period is reduced since there is only a single customer for each project and those two customers directly impacted have been informed of the impending rate increases; any comments from the customers are expected to be developed well within the 60 day period; coordination, if needed, can be accomplished within that same period. In addition, Southwestern does not expect much, if any, interest in these proceedings from any other entity. [Note: The proposed rate change for the Willis project is classified as a minor rate adjustment and does not require any comment period to exceed 30 days (10 CFR 903.14).]

ADDRESSES: Written comments should be submitted to the Administrator, Southwestern Power Administration, U.S. Department of Energy, P.O. Box 1619, Tulsa, Oklahoma 74101.

FOR FURTHER INFORMATION CONTACT: Mr. George C. Grisaffe, Assistant Administrator, Office of Administration and Rates, Southwestern Power Administration, U.S. Department of Energy, P.O. Box 1619, Tulsa, Oklahoma 74101 (918) 581–7419.

SUPPLEMENTARY INFORMATION: The U.S. Department of Energy (DOE) was created by an Act of the U.S. Congress, Department of Energy Organization Act, Pub. L. 95–91, dated August 4, 1977, and Southwestern's power marketing activities were transferred from the Department of Interior to the DOE, effective October 1, 1977. Guidelines for preparation of power repayment studies are included in DOE Order No. RA 6120.2, Power Marketing Administration Financial Reporting. Procedures for Public Participation in Power and Transmission Rate Adjustments of the Power Marketing Administrations are found at Title 10, Part 903, Subpart A of the Code of Federal Regulations (10 CFR 903).

Southwestern markets power from 24 multiple-purpose reservoir projects with power facilities constructed and operated by the U.S. Army Corps of Engineers (Corps). These projects are located in the States of Arkansas, Missouri, Oklahoma, and Texas. Southwestern's marketing area includes these states plus Kansas and Louisiana. Of the total, 22 projects comprise the Integrated System and are generally interconnected through Southwestern's transmission system and exchange agreements with other utilities. The power produced by the remaining two hydroelectric generating projects, Rayburn and Willis, is marketed by Southwestern under separate contracts through which two customers purchase the entire power output at each of the two projects. The Rayburn project, located on the Angelina River within the Neches River Basin, in eastern Texas, consists of two hydroelectric generating units with a total capacity of 52.0 megawatts (MW). The Willis project is located on the Neches River downstream from the Rayburn project and has two hydroelectric generating units with a total capacity of 7.4 MW. The two customers, Sam Rayburn Dam Electric Cooperative, Inc. (SRDEC) and the Sam Rayburn Municipal Power Agency (SRMPA), currently receive the entire output of the Rayburn and Willis projects, respectively. In the case of Willis, SRMPA receives the entire electrical output of the project as a result of its non-federally funding the construction of the hydroelectric facilities at the project. SRDEC receives the entire electrical output of the Rayburn project through a contract that provides for an isolated rate. These projects are not currently interconnected with Southwestern's Integrated System. A separate power repayment study is prepared for each project and both have special rates based on their non-interconnected operations. Following DOE Order No. RA 6120.2 guidelines, the Administrator, Southwestern, prepared a Current Power Repayment Study for both the Rayburn and Willis projects using existing rates.

Both Current Power Repayment Studies indicated that the legal requirement to repay the power-related costs, with interest, will not be met without additional revenue. This revenue need results primarily from increased annual operation and maintenance expenses projected by the Corps. The Revised Power Repayment Study for Rayburn shows that additional annual revenue of $91,692 (a 4.4 percent increase), beginning October 1, 1994, is needed to satisfy repayment criteria. This would increase revenues received from the Rayburn project customer (SRDEC) from the current $2,076,444 to $2,168,136 annually. The Revised Power Repayment Study for Willis shows that additional annual revenue of $10,116 (a 3.6 percent increase), would provide sufficient revenues for repayment of the projected expenses within the required period. This would increase revenues received from the Willis project customer (SRMPA) from the current $284,580 to $294,696 annually, beginning October 1, 1994.

Opportunity is presented for customers and other interested parties to receive copies of the Rayburn and Willis studies and the proposed rate schedules. If you desire a copy of the Power Repayment Study Data Package for either or both projects, submit your request to Mr. George C. Grisaffe at the address cited above.

A Public Information Forum will be held at 1 p.m., Thursday, July 7, 1994, in Southwestern's offices, Room 1402, Williams Center Tower I, One West Third Street, Tulsa, Oklahoma, to explain to customers and interested parties the proposed rates and supporting studies. The Forum will be conducted by a chairman who will be responsible for orderly procedure. Questions concerning the rates, studies and information presented at the Forum may be submitted from interested persons and will be answered, to the extent possible, at the Forum. Questions not answered at the Forum will be answered in writing, except that questions involving voluminous data contained in Southwestern's records may best be answered by consultation and review of pertinent records at Southwestern's offices. Persons interested in attending the Public Information Forum should indicate in writing by Monday, July 4, 1994, their intent to appear at such Forum. Accordingly, if no one so indicates their intent to attend, no such Forum will be held.

A Public Comment Forum will be held at 1 p.m., Monday, August 1, 1994, at the same location established for the Public Information Forum. At the Public Comment Forum, interested persons may submit written comments or make oral presentations of their views and comments. This Forum will also be conducted by a chairman who will be responsible for orderly procedure. Southwestern's representatives will be present, and they and the chairman may ask questions of the speakers. Persons interested in attending or speaking at the Public Comment Forum should indicate in writing (use same address as used for submitting comments) by Wednesday, July 27, 1994, their intent to appear/speak at such Forum. Accordingly, if no one so indicates their intent to attend, no such Forum will be held. The chairman may allow others to speak if time permits.

A transcript of each Forum will be made. Copies of the transcripts may be obtained from the transcribing service. Copies of all documents introduced will be available from Southwestern upon request, for a fee. Written comments on the proposed rates for either project are due on or before August 15, 1994. Written comments should be submitted to the Administrator, Southwestern Power Administration, U.S. Department of Energy, P.O. Box 1619, Tulsa, Oklahoma 74101.

Following review of the oral and written comments and the information gathered in the course of the proceedings, the Administrator will submit the rate proposals, and Power Repayment Studies in support of the proposed rates, to the DOE Deputy Secretary for confirmation and approval on an interim basis, and to the Federal Energy Regulatory Commission (FERC) for confirmation and approval on a final basis. The FERC will allow the public an opportunity to provide written comments on the proposed rate increases before making a final decision.

Issued in Tulsa, Oklahoma, this 9th day of June, 1994.

Dallas Cooper,

Acting Administrator.

BILLING CODE 6450-01-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4998-5]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden.

DATES: Comments must be submitted on or before July 15, 1994.

FOR FURTHER INFORMATION CONTACT: For further information, or to obtain a copy

of the ICR contact Sandy Farmer at EPA, (202) 260–2740.

SUPPLEMENTARY INFORMATION:

Office of Research and Development

Title: Milk Cow and Population Survey (EPA No. 1221.04; OMB No. 2080–0017).

Abstract: This ICR is a renewal of an existing information collection. Under 44 U.S.C. 3501(1)(3), the EPA conducts an annual or biennial survey of dairy farms and ranches within a 300 kilometer radius of the Nevada Test Site (NTS). The information collected includes the location of dairy farms and ranches, and the diet and number of milk-producing livestock at these farms and ranches. The EPA compiles this information in a directory that is used, along with other data, to predict radiation exposure levels outside of the NTS. The directory may also be used by the EPA to develop a sampling strategy following a release of radioactivity from the NTS.

Burden Statement: Public reporting burden for this collection of information is estimated to average 30 minutes per response including reviewing instructions, searching existing information sources, maintaining records, and completing and reviewing the collection of information.

Respondents: Farms.

Estimated Number of Respondents: 565.

Frequency of Collection: Annual.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 283 hours.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (2136), 401 M Street, SW., Washington, DC 20460.

and

Timothy Hunt, Office of Management and Budget, Office of Information and Regulatory Affairs, 25 17th Street, NW., Washington, DC 20503.

Dated: June 9, 1994.

Paul Lapsley,

Director, Regulatory Management Division.

Clean Air Act Committee; Meeting

ACTION: Clean Air Act Advisory Committee Notice of Meeting.

SUMMARY: The Environmental Protection Agency (EPA) established the Clean Air Act Advisory Committee (CAAAC) on November 19, 1990 to provide independent advice and counsel to EPA on policy issues associated with the implementation of the Clean Air Act of 1990. The charter for the CAAAC was reissued and the Committee was authorized to be extended until November 19, 1994 under regulations established by the Federal Advisory Committee Act (FACA).

OPEN MEETING NOTICE: Notice is hereby given that the reauthorized Clean Air Act Advisory Committee will hold its next open meeting on Tuesday, July 12, 1994 from 8:30 a.m. to 4 p.m., at the Omni Shoreham Hotel, 2500 Calvert Street, NW. in Washington, DC. Seating will be available on a first come, first served basis.

The meeting will include reports from the first meetings of the subcommittees, as well as a discussion of sanctions and attainment demonstration issues and a discussion of the linkages between transportation, energy and air quality issues, including Employee Commute Option Programs.

INSPECTION OF COMMITTEE DOCUMENTS: Documents relating to the above noted topics will be publicly available at the meeting. Thereafter, these documents, together with the CAAAC meeting minutes will be available for public inspection in EPA Air Docket Number A–94–34 in room 1500 of EPA Headquarters, 401 M Street, SW., Washington, DC.

FOR FURTHER INFORMATION: Concerning this meeting of the CAAAC please contact Karen Smith, Office of Air and Radiation, US EPA (202) 260–6379, FAX (202) 260–5155, or by mail at US EPA, Office of Air and Radiation (Mail Code 6101), Washington, DC. 20460.

Dated: June 7, 1994.

Mary D. Nichols,

Assistant Administrator for Air and Radiation.

BILLING CODE 6560–50–M

[OPP–30367; FRL–4873–5]

Aankill Inc.; Application to Register a Pesticide Product

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of an application to register the pesticide product Aankill, containing active ingredients not included in any previously registered product pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

DATES: Written comments must be submitted by July 15, 1994.

ADDRESSES: By mail, submit written comments identified by the document control number [OPP–30367] and the file symbol (63709–R), attention Product Manager (PM) 18, Registration Division, to: Public Response and Program Resources Branch, Field Operations Divisions (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Environmental Protection Agency, Rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. a copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: PM 18, Phil Hutton, Rm. 213, CM #2, (703–305–7690).

SUPPLEMENTARY INFORMATION: EPA received an application from Aankill 44, Inc., 3121 S. Eastman Rd., P.O. Box 7426, Longview, TX 75607–7426, to register the pesticide product Aankill (File Symbol 63709–R). This product which contains the ingredients turpentine and ammonia, is being considered for registration as an insecticide. Aankill would be used to control fire ants by applying it onto fire ant mounds. The product contains active ingredients not included in any previously registered product pursuant to the provisions of section 3(c)(4) of FIFRA. Notice of receipt of the application does not imply a decision by the Agency on the application.

Notice of approval or denial of an application to register a pesticide product wil be announced in the **Federal Register**. The procedure for requesting data will be given in the **Federal Register** if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice, will available in the Public Response and Program Resources Branch, Field Operation Division office at the address provided from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing the application file, telephone the FOD office (703–305–5805), to ensure that the file is available on the date of intended visit.

Authority: 7 U.S.C. 136.

List of Subjects

Environmental protection, Pesticides and pests, Product registration.

Dated: June 9, 1994.

Emergency Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions for the control of various pests to the seven States as listed below. Three crisis exemptions were initiated by various States and one was subsequently revoked. A quarantine exemption was also granted to the Guam Department of Agriculture, Office of the Governor and the United States Department of Agriculture. These exemptions, issued during the months of January and February 1994, except for the one in November 1993, are subject to application and timing restrictions and reporting requirements designed to protect the environment to the maximum extent possible. EPA has denied three specific exemption requests. Information on these restrictions is available from the contact persons in EPA listed below.

DATES: See each specific, crisis, and quarantine exemption for its effective date.

FOR FURTHER INFORMATION CONTACT: See each emergency exemption for the name of the contact person. The following information applies to all contact persons: By mail: Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: 6th Floor, CS #1, 2800 Jefferson Davis Highway, Arlington, VA, (703–308–8417).

SUPPLEMENTARY INFORMATION: EPA has granted specific exemptions to the:

1. California Environmental Protection Agency, Department of Pesticide Regulation, for the use of benomyl on artichokes to control ramularia leaf spot; February 7, 1994, to December 31, 1994. A notice of receipt published in the **Federal Register** of December 23, 1993 (58 FR 68144). Ramularia leaf spot has recently developed as a serious disease of artichokes, resulting in an urgent nonroutine situation. Without benomyl, a significant economic loss is expected. The use of benomyl will not cause unreasonable adverse effects on human health or the environment. Benomyl was also the subject of Special Review from 1977 to 1982. (Susan Stanton)

2. California Environmental Protection Agency, Department of Pesticide Regulation, for the use of fenamiphos on broccoli and cauliflower to control nematodes; February 14, 1994, to February 13, 1995. California had initiated a crisis exemption for this use which was later inactivated. (Libby Pemberton)

3. Florida Department of Agriculture and Consumer Services for the use of avermectin on peppers to control melon thrips; February 15, 1994, to February 14, 1995. (Andrea Beard)

4. Florida Department of Agriculture and Consumer Services for the use of imidacloprid on peppers to control melon thrips; February 15, 1994, to February 14, 1995. A notice of receipt published in the **Federal Register** of January 19, 1994 (59 FR 2849); no comments were received. The application proposed use of a new chemical. The situation was determined to be an emergency, since the melon thrip was recently discovered in Florida and has since developed into a devastating pest. Significant economic losses could occur if this pest is not adequately controlled and the registered pesticides appear to be ineffective. Imidacloprid is authorized to be used at transplanting. Since it is a systemic, it will be taken up by the developing seedlings and protect them during this vulnerable stage of development. (Andrea Beard)

5. Florida Department of Agriculture and Consumer Services for the use of imidacloprid on citrus to control the citrus leafminer; February 15, 1994, to February 14, 1995. (Andrea Beard)

6. Louisiana Department of Agriculture and Forestry for the use of paraquat on rice to control weeds; February 17, 1994, to June 15, 1994. (Susan Stanton)

7. New Mexico Department of Agriculture for the use of propazine on sorghum to control pigweed; January 27, 1994, to August 1, 1994. A notice of receipt published in the **Federal Register** of December 29, 1993 (58 FR 68908); no comments were received. The applicant requested use of an active ingredient not contained in any registered product. The situation was determined to be urgent and nonroutine and significant economic losses could occur without the use of propazine. (Andrea Beard)

8. Oregon Department of Agriculture for the use of fenoxycarb on pears to control pear psylla; February 14, 1994, to May 1, 1994. (Andrea Beard)

9. Oregon Department of Agriculture for the use of sethoxydim on canola to control volunteer grains and grasses.; January 31, 1994, to December 31, 1994. (Susan Stanton)

10. Oregon Department of Agriculture for the use of chlorothalonil on hazelnuts to control eastern filbert blight; January 31, 1994, to May 30, 1994. (Susan Stanton)

11. Texas Department of Agriculture for the use of esfenvalerate on kale and mustard greens to control cabbage loopers; February 16, 1994, to November 30, 1994. (Libby Pemberton)

12. Texas Department of Agriculture for the use of propazine on sorghum to control pigweed; January 27, 1994, to August 1, 1994. A notice of receipt published in the **Federal Register** of December 29, 1993 (58 FR 68908); no comments were received. The applicant requested use of an active ingredient not contained in any registered product. The situation was determined to be urgent and nonroutine and significant economic losses could occur without the use of propazine. (Andrea Beard)

13. Texas Department of Agriculture for the use of bifenthrin on cucurbits (cucumbers, melons, and squash) to control the sweet potato whitefly; January 21, 1994, to January 20, 1995. (Andrea Beard)

14. Texas Department of Agriculture for the use of imidacloprid on cucurbits (cucumbers, melons, and squash) to control the sweet potato whitefly; January 21, 1994, to January 20, 1995. A notice of receipt published in the **Federal Register** of January 7, 1994 (59 FR 1018); no comments were received. The situation was determined to be urgent and nonroutine and the currently

available pesticides and practices are not providing adequate control; without adequate control of the sweet potato whitefly significant economic losses are expected. (Andrea Beard)

15. Washington Department of Agriculture for the use of fenoxycarb on pears to control pear psylla; February 14, 1994, to May 1, 1994. A notice of receipt published in the **Federal Register** of December 29, 1993 (58 FR 68907); no comments were received. The situation was determined to be urgent and nonroutine and significant economic losses are expected without the use of fenoxycarb. (Andrea Beard)

Crisis exemptions were initiated by the:

1. Illinois Department of Agriculture on Janury 14, 1994, for the use of sodium chlorite on inlet pipe at the Illinois Power Company to control Zebra mussels. This program has ended. (Libby Pemberton)

2. Oklahoma Department of Agriculture on November 1, 1993, for the use of metolachlor on spinach to control sibara. This program has ended. (Margarita Collantes)

3. Puerto Rico Department of Agriculture (PRDA) on January 8, 1994, for the use of avermectin on tomatoes to control leafminers. PRDA's crisis exemption and authority to issue crisis exemptions for this use were revoked on February 28, 1994. (Lawrence Fried)

Quarantine exemptions were granted to the:

1. Guam Department of Agriculture, Office of the Governor for the use of methyl bromide on letuce, celery, spinach, broccoli, and cauliflower imported from the United States mainland for consumption in Guam to control western flown thrips and cabbage aphids; February 28, 1994, to February 27, 1997. (Libby Pemberton)

2. United States Department of Agriculture for the use of quaternary ammonium compound on farm equipment to control witchweed in North and South Carolina; February 22, 1994, to February 21, 1997. (Margarita Collantes)

EPA has denied a specific exemption request from the:

1. Arkansas State Plant Board for the use of pyrithiobac sodium on cotton to control cocklebur and morningglory. (Susan Stanton)

2. Georgia Department of Agriculture for the use of iprodione on tobacco to control target spot. A notice of receipt published in the **Federal Register** of January 19, 1994 (59 FR 2851); no comments were received. This specific exemption was denied because of inadequate progress toward registration. (Susan Stanton)

3. Mississippi Department of Agriculture and Commerce for the use of pyrithiobac sodium on cotton to control common cocklebur. A notice of receipt published in the **Federal Register** of December 29, 1993 (58 FR 68909). This specific exemption was denied because an emergency condition does not exist and it was not possible to determine whether the proposed use would cause unreasonable adverse effects. The Agency could not evaluate the risks associated with the proposed use because studies submitted to EPA in support of a Temporary Tolerance and Experimental Use Permit have not been fully reviewed.(Susan Stanton)

Authority: 7 U.S.C. 136.

Miles Inc.; Approval of Pesticide Product Registrations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces Agency approval of applications submitted by Miles Inc., to conditionally register seven pesticide products containing a new active ingredient not included in any previously registered products pursuant to the provisions of section 3(c)(7)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

FOR FURTHER INFORMATION CONTACT: By mail: Dennis Edwards, Product Manager (PM) 19, Registration Division (7505C), Office of Pesticide Programs, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 207, CM #2, Environmental Protection Agency, 1921 Jefferson Davis Hwy, Arlington, VA 22202, (703–305–6386).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of July 15, 1992 (57 FR 31369), which announced that Miles Inc., 8400 Hawthorn Road, Kansas City, MO 64120-0013, had submitted five applications to conditionally register the pesticide products BAY NTN 33893 Technical, BAY NTN 33893 75% Concentrate, NTN 33893 0.62% Granular, BAY NTN 33893 2.5% Granular, and BAY NTN 33893 2 Systemic (File Symbols 3125–URU, 3125–URL, 3125–URA, 3125–URT, and 3125–URI), containing the active ingredient imidacloprid, 1-[(6-chloro-3-pyridinyl)methyl]-*N*-nitro-2-imidazolidinimine at 94, 75, 0.62, 2.5, and 21.4 percent respectively, an active ingredient not included in any previously registered products.

The company amended the name of three of their products as applied and they are now known as Merit 0.62% Granular (3125–URA), Merit 2.5 Granular (3125–URT), and Merit 2 Systemic (3125–URI).

The Agency also received applications from Miles Inc., to conditionally register pesticide products Merit 75 WP (3125–UER) and Merit 75 WSP (3125–UGO), containing the active ingredient imidacloprid, 1-[(6-chloro-3-pyridinyl)methyl]-*N*-nitro-2-imidazolidinimine at 75 percent. However, since the notice of receipt of application to register these pesticide products as required by section 3(c)(4) of FIFRA, as amended was inadvertently omitted in the notice of July 15, 1992 (57 FR 31369), interested parties may submit comments within 30 days from the date of publication of this notice for these two products only.

The following applications were approved on March 18, 1994, except for the product Merit 75 WSP which was approved on March 22, 1994, as listed below:

1. BAY NTN 33893 Technical for use in the manufacture of insecticides (EPA Reg. No. 3125–414).

2. BAY NTN 33898 75% Concentrate for use in the manufacture of insecticides (EPA Reg. No. 3125–415).

3. Merit 0.62% Granular for insect control in ornamentals (EPA Reg. No. 3125–416).

4. Merit 2.5 Granular for insect control in ornamental crops (EPA Reg. No. 3125–417).

5. Merit 2 Systemic for insect control in turfgrass and ornamentals (EPA Reg. No. 3125–418).

6. Merit 75 WP for insect control in turfgrass, landscape ornamentals, and interior plantscapes (EPA Reg. No. 3125–421).

7. Merit 75 WSP for insect control in turfgrass, landscape ornamentals, and interior plantscapes (EPA Reg. No. 3125–439).

A conditional registration may be granted under section 3(c)(7)(C) of FIFRA for a new active ingredient where certain data are lacking, on condition that such data are received by the end of the conditional registration period and do not meet or exceed the risk criteria set forth in 40 CFR 154.7; that

use of the pesticide during the conditional registration period will not cause unreasonable adverse effects; and that use of the pesticide is in the public interest.

The Agency has considered the available data on the risks associated with the proposed use of imidacloprid, and information on social, economic, and environmental benefits to be derived from such use. Specifically, the Agency has considered the nature and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of imidacloprid during the period of conditional registration will not cause any unreasonable adverse effect on the environment, and that use of the pesticide is, in the public interest.

Consistent with section 3(c)(7)(C), the Agency has determined that these conditional registrations are in the public interest. Use of the pesticides are of significance to the user community, and appropriate labeling, use directions, and other measures have been taken to ensure that use of the pesticides will not result in unreasonable adverse effects to man and the environment.

More detailed information on this conditional registration is contained in a Chemical Fact Sheet on imidacloprid.

A copy of this fact sheet, which provides a summary description of the chemical, use patterns and formulations, science findings, and the Agency's regulatory position and rationale, may be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161.

In accordance with section 3(c)(2) of FIFRA, a copy of the approved label and the list of data references used to support registration are available for public inspection in the office of the Product Manager. The data and other scientific information used to support registration, except for material specifically protected by section 10 of FIFRA, are available for public inspection in the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 1132, CM #2, Arlington, VA 22202 (703–305–5805). Requests for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A-101), 401 M St., SW., Washington, D.C. 20460. Such requests should: (1) Identify the product name and registration number and (2) specify the data or information desired.

Authority: 7 U.S.C. 136.

Rodenticide Bait Stations; Availability of Draft PR Notice and Technical Report

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In previous notices, EPA announced its intention to hold hearings on the use of bait stations, as required by rodenticide labeling, when baits are to be applied in locations accessible to children, pets, domestic animals, or wildlife. EPA held two sessions of public hearings to obtain information and to determine whether future actions were needed. In this document, EPA is announcing the availability of a draft PR Notice to manufacturers, formulators, registrants, and users of pesticides regarding the label improvement program for the revision of use directions for commensal rodenticides and the Agency's policies and conclusions regarding the use of rodenticide bait stations.

DATES: Written comments, identified by the docket control number [OPP–210014A], must be submitted to: Public Response and Program Resources Branch, Field Operations Division (address below), on or before August 15, 1994.

ADDRESSES: By mail, submit written requests for draft PR notice and technical report to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703)-305-5805.

Information submitted and any comment(s) concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment(s) that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. Information on the proposed text and any written comments will be available for public inspection in Rm. 1132 at the Virginia address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: William W. Jacobs, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 255, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA, (703)-305-6406.

SUPPLEMENTARY INFORMATION: In PR Notice 83-5 (August 16, 1983), EPA presented its policies and criteria concerning tamper-proof bait stations." In the **Federal Register** of October 20, 1983 (48 FR 48711), EPA announced a schedule of hearings to provide interim guidance to rodenticide users and to gather information on the use of bait stations. The hearings were held under authority of section 21(b) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (7 U.S.C. 136s(b)).

Subsequent to the hearings, the Agency has developed a Draft Notice to manufacturers, formulators, and registrants and users of pesticides regarding its label improvement program for the revision of use directions for commensal rodenticides and a statement of the Agency's policies on the use of rodenticide baits stations. This Notice requires registrants of certain pesticide products claimed to control commensal rodents and registered under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) to revise the label of such products to bear certain statements concerning "tamper-resistant bait stations."

This Notice also informs rodenticide registrants, applicants, and other interested persons of EPA's continued concern for the safe use of rodenticides. This Notice outlines EPA's current policies regarding the isolation of commensal rodenticides from children, dogs, other pets, domestic animals, and nontarget wildlife. For purposes of this Notice, product labels, and EPA's policies, the term "commensal rodents" includes the following species: Norway rats (*Rattus norvegicus*), roof rats (*R. rattus*), and/or house mice (*Mus musculus*).

For certain rodenticide baits with labels not now in compliance with this Notice, registrants would have to submit an application for amended registration. The products affected include: (1) ready-to-use solid bait formulations (e.g., pellets, meal, paraffinized block, etc.); (2) liquid baits; (3) concentrates with labels bearing directions for preparing and applying solid or liquid baits; and (4) tracking powders for which current labeling permits use in "tamper-proof bait boxes," other protective structures, or other locations accessible to children or nontarget animals. Amended registration applications for such products would be required to include proposed amended labeling revised as indicated in this Notice. Within 90 days of receipt of this Notice, all registrants of products affected by this Notice would have to submit five copies of revised labeling for each affected product.

The new labeling requirements for baits and concentrates from which users prepare baits are listed under the heading "Required Label Statements" in the Notice. The types of label statements that must be deleted from labels for tracking powders are discussed in the Notice. Any registrant who wishes to modify the label statements prescribed by the Notice must include with the application for an amended registration a statement of each specific modifiction sought and the reasons why each modification is believed to be justified. Alternative text would not be accepted if EPA determines that it is not consistent with the intent of the Notice. All affected products released for shipment after 18 months from the issuance date must bear labeling in compliance with the Notice.

Dated: May 31, 1994.

Stephanie R. Irene,

Acting Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560–50–F

[OPP–34057; FRL 4865–1]

Notice of Receipt of Requests for Amendments to Delete Uses in Certain Pesticide Registrations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, EPA is issuing a notice of receipt of request for amendment by registrants to delete uses in certain pesticide registrations.

DATES: Unless a request is withdrawn, the Agency will approve these use deletions and the deletions will become effective on September 13, 1994.

FOR FURTHER INFORMATION CONTACT: By mail: James A. Hollins, Office of Pesticide Programs (7502C), Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460. Office location for commercial courier delivery and telephone number: Room 216, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703) 305–5761.

SUPPLEMENTARY INFORMATION:

I. Introduction

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be amended to delete one or more uses. The Act further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, the Administrator may approve such a request.

II. Intent to Delete Uses

This notice announces receipt by the Agency of applications from registrants to delete uses in the nine pesticide registrations listed in the following Table 1. These registrations are listed by registration number, product names and the specific uses deleted. Users of these products who desire continued use on crops or sites being deleted should contact the applicable registrant before September 13, 1994, to discuss withdrawal of the applications for amendment. This 90–day period will also permit interested members of the public to intercede with registrants prior to the Agency approval of the deletion.

TABLE 1. — REGISTRATIONS WITH REQUESTS FOR AMENDMENTS TO DELETE USES IN CERTAIN PESTICIDE REGISTRATIONS

EPA Registration No.	Product Name	Delete From Label
000241–00343	TRI-4 HF Herbicide	Mint
000264–00465	MOCAP 10% Granular Nematicide Insecticide	Sod farms
000279–01254	Ethion 4 Miscible Miticide/Insecticide	Bulb vegetables (onions), legume vegetables (beans), fruiting vegetables (eggplants, peppers, pimentos & tomatoes), cucurbit vegetables (cucumbers, melons & squash), pome fruits (apples & pears), stone fruits (apricots, cherries, nectarines, peaches, prunes & plums), small fruits & berries (grapes & straw berries), tree nuts (almonds, chestnuts, filberts, pecans & walnuts), cereal grains (corn & sorghum), alfalfa, peanuts, cotton, tea, terrestrial non-food crops (bermuda- grass, junipers, ornamental evergreens, pine trees, lawns, ornamental turf & ornamental plants), greenhouse non-food crops (ornamental plants), domestic outdoors uses (domestic dwellings & lawns)
00279–02280	FMC Ethion Technical Insecticide	Bulb vegetables (onions), legume vegetables (beans), fruiting vegetables (eggplants, peppers, pimentos & tomatoes), cucurbit vegetables (cucumbers, melons & squash), pome fruits (apples & pears), stone fruits (apricots, cherries, nectarines, peaches, prunes & plums), small fruits & berries (grapes & strawberries), tree nuts almonds, chestnuts, filberts, pecans & walnuts), cereal grains (corn & sorghum), alfalfa, peanuts, cotton, tea, terrestrial non-food crops (bermuda- grass, junipers, ornamental evergreens, pine trees, lawns, ornamental turf & ornamental plants), greenhouse non-food crops (ornamental plants), domestic outdoors uses (domestic dwellings & lawns)

TABLE 1. — REGISTRATIONS WITH REQUESTS FOR AMENDMENTS TO DELETE USES IN CERTAIN PESTICIDE REGISTRATIONS—Continued

EPA Registration No.	Product Name	Delete From Label
000464–00070	DOWICIDE 1 Antimicrobial	Postharvest uses on Apples, cantaloupes, carrots, cherries, cucumbers, kiwifruit, kumquats, nectarines, peppers (bell), peaches, pineapples, plums (fresh prunes), sweet potatoes, tomatoes, aquatic uses (swimming pools)
001386–00626	Fruit Spray Powder	Apples
004787–00010	Cheminova Ethion Technical Insecticide	Bulb vegetables (onions), legume vege tables (beans), fruiting vegetables (eggplants, peppers, pimentos & tomatoes), cucurbit vegetables (cucumbers, melons & squash), pome fruits (apples & pears), stone fruits (apricots, cherries, nectarines, peaches, prunes & plums), small fruits & berries (grapes & strawberries), tree nuts (almonds, chestnuts, filberts, pecans & walnuts), cereal grains (corn & sorghum), alfalfa, peanuts, cotton, tea, terrestrial non-food crops (bermuda- grass, junipers, ornamental evergreens, pine trees, lawns, ornamental turf & ornamental plants), greenhouse non-food crops (ornamental plants), domestic outdoors uses (domestic dwellings & lawns)
050383–00014	Malathion 50% Insect Spray	Apples, pears, plums, around animal quarters
051036–00186	Dylonate 2-G	Beans (green & dry), beans (lima), cole crops (broccoli, brussels sprouts, cabbage, cauliflowers), mint (peppermint & spearmint), bulb onions, peanuts, potatoes (irish), strawberries, sugar beets, table beets, tomatoes
058266–00004	Technical Chloropicrin	Aquatic, forestry, post-harvest uses

The following Table 2 includes the names and address of record for all registrants of the products in Table 1, in sequence by EPA company number.

TABLE 2. — REGISTRANTS REQUESTING AMENDMENTS TO DELETE USES IN CERTAIN PESTICIDE REGISTRATIONS

Company No.	Company Name and Address
000241	American Cyanamid Co., Agricultural Research Div., P.O. Box 400, Princeton, NJ 08543.
000264	Rhone-Poulenc Ag Co., P.O. Box 12014, 2 T.W. Alexander Dr., Research Triangle Park, NC 27709.
000279	FMC Corporation, Agricultural Chemical Group, 1735 Market St., Philadelphia, PA 19103.
001386	Universal Cooperatives, Inc., 7801 Metro Parkway, P.O. Box 460, Minneapolis, MN 55440.
004787	Cheminova Agro A/S, 1700 Route 23, Suite 210, Wayne, NJ 07470.
051036	Micro Flo. Co., P.O. Box 5948, Lakeland, FL 33807.
050383	Wilson Laboratories, Inc., 150–152 Mason St., Greenwich, CT 06830.
058266	Shadow Mountain Products Corp., P.O. Box 1327, Hollister, CA 95024.

III. Existing Stocks Provisions

The Agency has authorized registrants to sell or distribute product under the previously approved labeling for a period of 18 months after approval of the revision, unless other restrictions have been imposed, as in special review actions.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 800 North Capitol Street, NW., 9th Floor. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 202–011353–006.

Title: Caribbean and Central American Credit Agreement.

Parties:

A.P. Moller-Maersk Line
Consorsio Naviero Occidente, C.A.
Crowley American Transports, Inc.
Kirk Line
Puerto Rico Maritime Shipping Authority
Seaboard Marine, Ltd.
Sea-Land Service, Inc.
Venezuela Container Service

Synopsis: The proposed Agreement (1) modifies the scope of the Agreement; (2) changes the name of the Agreement to the "Credit Agreement"; and (3) restates the Agreement.

Agreement No.: 202–011456.

Title: South Europe American Conference.

Parties:

Evergreen Marine Corporation (Taiwan) Ltd.
"Italia" di Navigazione, S.P.A.
Lykes Bros. Steamship Co., Ltd.
A.P. Moller-Maersk Line
Nedlloyd Lijnen B.V.
P&O Containers Limited
Sea-Land Service, Inc.
Zim Israel Navigation Company, Ltd.

Synopsis: The proposed Agreement authorizes the parties to discuss and agree upon rules, rates, charges and other transportation matters pertaining to the movement of cargo between, on the one hand, United States Atlantic and Gulf coast ports and points via such ports and, on the other hand, Italian ports, French Mediterranean ports, Spanish ports, and Portuguese ports, including ports on Madeira Island and the Azores Islands and points in Continental Europe (excluding points in the former Yugoslav Republic of Macedonia, Bosnia and Herecegovina, Croatia, Slovenia, and Serbia) via such ports.

Agreement No.: 202–011457.

Title: Ediship Agreement.

Parties:

Andrew Weir Shipping Ltd.
Compagnie Generale Maritime (Holdings) PLC
Hapag-Lloyd Ag
A.P. Moller-Maersk Line
Nedlloyd Lijnen B.V.
P&O Containers Limited
Sea-Land Service, Inc.
NYK Line (Europe) Ltd.
Orient Overseas Container Line (UK) Ltd.

Synopsis: The proposed Agreement provides for the parties to cooperate in the promotion of technological innovation and economic efficiencies through development and utilization of common of compatible information systems to facilitate access by customers and other third parties in Europe to the parties' common carrier services between all United States ports and points and all foreign ports and points.

Dated: June 10, 1994.

By order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

First American Bank Group, Ltd.; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than July 8, 1994.

A. Federal Reserve Bank of Chicago (James A. Bluemle, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. First American Bank Group, Ltd., Fort Dodge, Iowa; to acquire 81 percent of the voting shares of Hill Investment Company, Jewell, Iowa, and thereby indirectly acquire Farmers State Bank, Jewell, Iowa; 97 percent of the voting shares of Story County Bancorporation, Jewell, Iowa, and thereby indirectly acquire American State Bank, Ames, Iowa; and 82 percent of the voting shares of Agri Bancorporation, Webster City, Iowa, and thereby indirectly acquire Farmers Bank & Trust, Webster City, Iowa.

In connection with this application, Applicant also proposes to acquire 88 percent of the voting shares of First American Credit Corporation, Fort Dodge, Iowa, and thereby engage in making and servicing loans pursuant to § 225.25(b)(1); and 88 percent of the voting shares of Hill Land Company, Fort Dodge, Iowa, and thereby engage in investing in corporations or projects engaged in community development pursuant to § 225.25(b)(6) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, June 8, 1994.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

KeyCorp; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such

VOL

UMI

as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than July 8, 1994.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. KeyCorp, Cleveland, Ohio; to acquire through its subsidiary, Society National Bank, Cleveland, Ohio, Society Interim Savings Bank, Toledo, Ohio, which will merge with State Home Savings Bank FSB, Bowling Green, Ohio, and thereby engage in operating a savings and loan association pursuant to § 225.25(b)(9) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, June 9, 1994.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Establishment of an Advisory Committee on Services for Families With Infants and Toddlers

AGENCY: Administration on Children, Youth, and Families, ACF, DHHS.

ACTION: Notice of the establishment of an Advisory Committee on Services for Families with Infants and Toddlers.

SUMMARY: Pursuant to Public Law 92–463, the Federal Advisory Committee Act, the Department of Health and Human Service (DHHS) announces the establishment by the Secretary of the Advisory Committee on Services for Families with Infants and toddlers.

The Committee shall advise the Secretary and Assistant Secretary for Children and Families on the development of program approaches for the initiative for families with infants and toddlers that will address the parenting and child development needs of low-income parents and their infants and toddlers. In doing so, the Committee will pay particular attention to the key principles and array of models of effective culturally and developmentally appropriate service delivery.

The Committee shall terminate on September 30, 1994.

FOR FURTHER INFORMATION CONTACT: David Siegel, 370 L'Enfant Promenade, SW., 7th Floor, Washington, DC 20447 (202) 401–9215.

Dated June 10, 1994.

Mary Jo Bane,

Assistant Secretary for Children and Families.

BILLING CODE 4110–60–M

Agency Information Collection Under OMB Review

Under the provisions of the Federal Paperwork Reduction Act (44 U.S.C. Chapter 35), the Administration for Children and Families (ACF) requests approval of a new information collection entitled: "Quality Control—AFDC, Food Stamps, and Adult Assistance Negative Case Action Review Schedule," Form ACF–6402. This request for clearance is made by the Office of Family Assistance (OFA) of the Administration for Children and Families (ACF). The purpose of the Negative Case Action (NCA) review is to assure that individuals are not being denied assistance for which they are eligible.

ADDRESSES: Copies of the Information Collection request may be obtained from Edward E. Saunders of the Office of Information Systems Management, ACF, by calling (202) 205–7921.

Written comments and questions should be sent directly to: Laura Oliven, OMB Desk Officer for ACF, OMB Reports Management Branch, New Executive Office Building, room 3002, 725 17th Street, NW., Washington, DC 20503, (202) 395–7316.

Information on Document

Title: Quality Control—AFDC, Food Stamps, and Adult Assistance Negative Case Action Review Schedule, Form ACF–6402.

OMB No.: New Request.

Description: This information collection is authorized by Sections 2(a)(6), 408(a), 1002(a)(6), 1402(a)(6), and 1602(a)(6) of the Social Security Act, and required under regulatory authority found at 45 CFR 205.40 (a)(2). The purpose of this collection of information is to assure that individuals are not being denied categories of Federal assistance for which they are eligible and to take necessary corrective measures to reduce the incidence of improperly authorized or denied assistance. Specifically, categories of assistance covered by this collection of information are Aid to Families With Dependent Children (AFDC) in all States and jurisdictions, and Adult Assistance Programs under titles I, X, XIV, and XVI of the Social Security Act in Guam, Puerto Rico, and the Virgin Islands.

This collection of information was jointly designed and will be used by the Food and Nutrition Service and the Administration for Children and Families both of the Department of Health and Human Services and the Department of Agriculture.

The Quality Control Negative Case Action system is a joint State/Federal effort to obtain data on the correctness of State actions to deny or terminate AFDC/Adult financial assistance or Food and Nutrition Service. This information is utilized in determining the principal causes of incorrect actions and in developing appropriate corrective action. The Quality Control Negative Case Action system promotes proper State administration of their AFDC and adult programs by helping to assess performance in the denial or termination of benefits. Negative case action quality control therefor provides: (a) Continuous review of a statistically reliable statewide samples of negative actions; and (b) periodic compilation and analysis of findings to determine the incidence of incorrect actions. The Negative Case Action review supplements the Quality Control review of active cases and, thus, provides a balanced quality control system capable of measuring overall program performance.

BILLING CODE 4184–01–M

Agency Information Collection Under OMB Review

Under the provisions of the Federal Paperwork Reduction Act of 1981 (44 U.S.C. Chapter 35), we have submitted to the Office of Management and Budget (OMB) a request sponsored by the National Center on Child Abuse and Neglect (NCCAN), a component of the Administration on Children, Youth and Families (ACYF) at the Administration for Children and Families (ACF) for the reinstatement of an information collection titled: "ACF Program Instruction: Children's Justice Act." This information collection was previously approved under OMB control number 0980–0196.

ADDRESSES: Copies of this information collection may be obtained from Edward E. Saunders of the Office of Information Systems Management, ACF, by caliing (202) 205–7921.

Written comments and questions regarding this information collection should be sent directly to: Laura Oliven, OMB Desk Officer for ACF, OMB Reports Management Branch, New Executive Office Building, room 3002, 725 17th Street, NW., Washington, DC 20503, (202) 395–7316.

Information on Document

Title: ACF Program Instruction: Children's Justice Act.

OMB No.: 0980–0196.

Description: The Child Abuse Prevention and Treatment Act (42 U.S.C. 5101 *et. seq.* and CFDA No. 13.699) was amended by the Children's Justice and Assistance Act of 1986 (Pub. L. 99–401) to establish two new programs of grants to States. Sections 109(a) of Title I of the Child Abuse Prevention and Treatment Act, as amended, authorizes grants to States that meet specified eligibility requirements for the purpose of assisting States in developing, establishing, and operating programs designed to improve:

(1) The handling of child abuse and neglect cases, particularly cases of child sexual abuse and exploitation, in a manner which limits additional trauma to the child victim;

(2) The handling of cases of suspected child abuse or neglect related fatalities; and

(3) The investigation and prosecution of cases child abuse and neglect, particularly child sexual abuse and exploitation.

Applications will be reviewed by ACF staff against requirements contained in the statute to determine the States eligibility for Children's Justice Act grants.

Annual Number of Respondents: 57

Annual Frequency: 1

Average Burden Hours Per Response: 80

Total Burden Hours: 4,560

Dated: June 2, 1994.

BILLING CODE 4184–01–M

Food and Drug Administration

[Docket No. 88F–0322]

Nippon Gohsei (U.S.A) Co., Ltd.; Filing of Food Additive Petition; Amendment

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is amending the filing notice for a food additive petition filed by Nippon Gohsei (U.S.A.) Co., Ltd., to indicate that the petitioned additive, a polyester resin prepared from terephthalic acid, isophthalic acid, succinic anhydride, ethylene glycol, diethylene glycol, and 2,2-dimethyl-1,3-propanediol as a component of polymeric coatings, is also intended for use in contact with aqueous foods. The previous filing notice stated that the additive was intended for use only in contact with alcoholic foods.

FOR FURTHER INFORMATION CONTACT: Vir D. Anand, Center for Food Safety and Applied Nutrition (HFS–216), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–254–9500.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of November 4, 1988 (53 FR 44670), corrected on December 23, 1988 (53 FR 51950), FDA announced that a food additive petition (FAP 7B4017) had been filed by Nippon Gohsei (U.S.A.) Co., Ltd., 747 Third Ave., New York, NY 10017, proposing that § 175.300 *Resinous and polymeric coatings* (21 CFR 175.300) be amended to provide for the safe use of a polyester resin prepared from terephthalic acid, isophthalic acid, succinic anhydride, ethylene glycol, diethylene glycol, and 2,2-dimethyl-1,3-propanediol as a

component of polymeric coatings intended to contact alcoholic foods:

Upon further review of the petition, the agency notes that the petitioner had requested use of the additive in contact with aqueous foods also. Therefore, FDA is amending the filing notice of November 4, 1988, to state that the petitioner requested that the food additive regulations be amended to provide for the safe use of a resin prepared from terephthalic acid, isophthalic acid, succinic anhydride, ethylene glycol, diethylene glycol, and 2,2-dimethyl-1,3-propanediol as a component of polymeric coatings intended to contact aqueous and alcoholic foods.

Dated: June 3, 1994.

BILLING CODE 4160-01-F

Advisory Committee Meeting; Amendment of Notice

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an amendment to the notice of a meeting of the Dental Products Panel of the Medical Devices Advisory Committee, which is scheduled for June 28 and 29, 1994. This meeting was announced in the **Federal Register** of May 23, 1994 (59 FR 26650 at 26652). The amendment is being made to add an agenda item for discussion in the open portion of the meeting. There are no other changes. This amendment will be announced at the beginning of the open portion of the meeting.

FOR FURTHER INFORMATION CONTACT: Carolyn A. Tylenda, Center for Devices and Radiological Health (HFZ-410), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301-594-3090.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of May 23, 1994, FDA announced that a meeting of the Dental Products Panel would be held on June 28 and 29, 1994. On page 26652, in the second column, under "*Open committee discussion*" the agenda for this meeting is amended to read as follows:

Open committee discussion. The committee will discuss classification of bone filling and augmentation materials, classification of dental amalgam, proposed reclassification of dental mercury, and dental device ingredient labeling.

Dated: June 10, 1994.

Linda A. Suydam,

Interim Deputy Commissioner for Operations.

BILLING CODE 4160-01-F

Public Health Service

[GN 2254]

Orphan Products Board; Public Meeting

AGENCY: Office of the Assistant Secretary for Health, DHHS.

ACTION: Notice of public meeting; Orphan Products Board.

SUMMARY: The Department of Health and Human Services and the Office of the Assistant Secretary for Health announce that a public meeting of the Orphan Products Board will be held on June 29, 1994 in Washington, DC. During the session there will be an opportunity for interested persons to present information and views on the issue of orphan products development. The meeting will be chaired by the Assistant Secretary for Health and Chairman, Orphan Products Board. It will commence at 1 p.m., in room 729-G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

ADDRESSES: Written requests to participate should be sent to Dr. Richard J. Bertin, Executive Secretary, Orphan Products Board, Food and Drug Administration (HF-35), Room 8-73, 5600 Fishers Lane, Rockville, Maryland 20857, and should be received by June 22, 1994.

FOR FURTHER INFORMATION CONTACT: Dr. Richard J. Bertin, Executive Secretary, Orphan Products Board, Food and Drug Administration (HF-35), 5600 Fishers Lane, Rockville, Maryland 20857. (301) 443-4903.

SUPPLEMENTARY INFORMATION: An orphan drug is a drug for the treatment of a rare disease or condition which either (1) has a prevalence in the United States of Under 200,000 persons or (2) has a higher prevalence and for which there is no reasonable expectation that the cost of developing and making available in the United States a drug for such disease or condition will be recovered from sales in the United States of such drug. The Orphan Drug Act, Public Law 97-414 enacted on January 4, 1983, as amended, established a number of incentives to encourage the development and marketing of orphan drugs.

The act also established an Orphan Products Board to promote the development of drugs and devices for rare diseases or conditions and to assure appropriate coordination among all interested Federal agencies, manufacturers, and organizations representing patients with rare diseases.

The Orphan Products Board is chaired by the Assistant Secretary for Health. The Board is composed of representatives from the Department of Health and Human Services (DHHS), the Department of Veterans Affairs (DVA), The National Institute for Disability and Rehabilitation Research (NIDRR), and the Department of Defense (DoD). Within DHHS, representatives from the Agency for Health Care Policy and Research (AHCPR), the Centers for Disease Control and Prevention (CDC), the Food and Drug Administration (FDA), the Health Care Financing Administration (HCFA), the National Institutes of Health (NIH), the Office of the Assistant Secretary for Health (OASH), and the Social Security Administration (SSA), serve on the Board. This public meeting will have two purposes.

1. An update will be provided on the activities of the Orphan Products Board, and members of the Board will discuss their agencies' recent orphan product development activities.

2. In keeping with its mandate to foster actions within the Department to facilitate the research, development, and approval of orphan products and to coordinate government activities with the private sector in order to achieve these goals, the Board encourages presentations by members of the public on any issues involving the development and availability of orphan products. Those persons wishing to make a presentation at the meeting, should submit a written request for a time slot to the Executive Secretary of the Orphan Products Board, the request for participation should be submitted by June 22, 1994, and should include:

a. Name, address, and telephone number of the person desiring to make a presentation;

b. Affiliation, if any;

c. A summary of the presentation; and

d. The approximate amount of time required for the presentation (no more than 10 minutes, unless more time can be justified.)

Individuals and organizations with common interests or proposals are urged to coordinate or consolidate their presentations. Joint presentations may be required of persons or organizations with a common interest. The time available will be allocated among the individuals who request an opportunity for a presentation. Formal written statements or extension of remarks (five copies may be presented to the Chairman on the day of the meeting for inclusion in the record of the meeting. At the discretion of the Chairman, and as time permits, any person in attendance may be heard. This time will, most likely, be at the end of the scheduled session. For those unable to attend the meeting; comments may be sent to the Executive Secretary of the Orphan Products Board at the address listed above.

Dated: May 31, 1994.

Phillip R. Lee,

Assistant Secretary for Health.

BILLING CODE 4160-17-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Fair Housing and Equal Opportunity

[Docket No. N-94-3691; FR-3348-N-08]

State and Local Fair Housing Laws: Notice of Initial Determination Concerning Substantial Equivalency of Fair Housing Laws of the States of Massachusetts and Nebraska

AGENCY: Office of the Assistant Secretary for Fair Housing and Equal Opportunity, HUD.

ACTION: Notice and request for comments.

SUMMARY: In accordance with 24 CFR 115.6(c), this notice announces the Department's initial determination that the fair housing laws of the States of Massachusetts and Nebraska are substantially equivalent, on their face, to the Fair Housing Act. This notice solicits comments from the public on the initial determinations made with respect to each State. This notice also solicits comments on the Department's proposed determinations that the present practices and past performance of the agency enforcing the fair housing law of the State of Massachusetts and the agency enforcing the fair housing law of the State of Nebraska demonstrate that, in operation, the fair housing laws of these two States provide rights and remedies that are substantially equivalent to those available under the Fair Housing Act.

DATES: Comment Due Date: July 15, 1994.

ADDRESSES: Interested persons are invited to submit comments regarding this notice to the Office of General Counsel, Rules Docket Clerk, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying on weekdays between 7:30 a.m. and 5:30 p.m. at the above address.

FOR FURTHER INFORMATION CONTACT: Marcella O. Brown, Director, Funded Programs Division, Office of Fair Housing and Equal Opportunity, Department of Housing and Urban Development, 451 Seventh Street, SW., room 5234, Washington, DC 20410, telephone (202) 708-0455 (voice/TDD). (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Background

Under the Fair Housing Act (42 U.S.C. 3600-3619), the Department is authorized to investigate complaints alleging discrimination in housing. (Title VIII of the Civil Rights Act of 1968, as amended by the Fair Housing Amendments Act of 1988, is cited as the "Fair Housing Act.") Section 810(f) of the Fair Housing Act requires the Department to refer complaints to State and local agencies that have "substantially equivalent" fair housing standards, as determined and certified by the Department. Part 115 of the Department's regulations (24 CFR part 115) contain the certification standards and the procedures for certifying State and local fair housing laws that provide substantive rights and remedies for alleged discriminatory housing practices that are substantially equivalent to those provided in the Fair Housing Act.

On July 23, 1993 (58 FR 39561), the Department published the annual notice required by 24 CFR 115.6, which announced, among other things, the updated, consolidated list of all certified agencies, and a list of agencies with which an agreement for interim referrals or other utilization of services had been entered into under 24 CFR 115.11. In the July 23, 1993 notice, the Department listed thirty-four jurisdictions, among which were the States of Massachusetts and Nebraska, that had entered into agreements with the Department, subsequent to September 12, 1988, for interim referrals. These thirty-four jurisdictions were considered to have interim certification in accordance with section 810(f)(4) of the Fair Housing Amendments Act of 1988 (hereafter the "Act"). (The Fair Housing Amendments Act of 1988 was enacted on September 13, 1988.)

Announcement of Initial Determinations and Solicitation of Comments

In accordance with 24 CFR 115.6(c)(1), this notice announces that the fair housing laws of the States of Massachusetts and Nebraska have been determined by the Assistant Secretary of Fair Housing and Equal Opportunity to be substantially equivalent, on their face, to the Fair Housing Act. The Assistant Secretary has determined, after application of the criteria set forth in 24 CFR 115.3 and 115.4, that the fair housing laws for the States of Massachusetts and Nebraska provide, on their face, substantive rights and remedies for alleged discriminatory housing practices that are substantially equivalent to those provided in the Fair Housing Act.

Following, a review of performance standards and other materials pertaining to the fair housing laws of the States of Massachusetts and Nebraska, the Department expects to make final determinations that the laws of each State, in operation, provide rights and remedies that are substantially equivalent to those available under the Fair Housing Act. The Department intends to execute a Memorandum of Understanding with the agency charged with enforcement of the fair housing law of each State in accordance with 115.6(c).

In accordance with 24 CFR 115.6(b), the public is invited to submit written comments on this notice. Specifically, the Department requests written comments on the proposed determinations that the current

practices and past performance of the State agencies charged with administration and enforcement of the fair housing laws of the States of Massachusetts and Nebraska demonstrate that, in operation, these laws provide substantive rights and remedies that are substantially equivalent to the Fair Housing Act. This notice also invites comments from the public on the Department's determination that the fair housing laws of the States of Massachusetts and Nebraska are, on their face, substantially equivalent to the Fair Housing Act. In commenting on this notice, the Department requests that commenters identify the State for which comments are submitted.

Dated: June 6, 1994.

Roberta Achtenberg,

Assistant Secretary for Fair Housing and Equal Opportunity.

BILLING CODE 4210-28-P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WY-920-04-4120-03, WYW132663]

Coal Exploration License, WY

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Invitation for Coal Exploration License.

SUMMARY: Pursuant to section 2(b) of the Mineral Leasing Act of 1920, as amended by section 4 of the Federal Coal Leasing Amendments Act of 1976, 90 Stat. 1083, 30 U.S.C. 201(b), and to the regulations adopted as 43 CFR subpart 3410, all interested parties are hereby invited to participate with Antelope Coal Company on a pro rata cost sharing basis in its program for the exploration of coal deposits owned by the United States of America in the following-described lands in Converse and Campbell Counties, Wyoming:

T. 40 N., R. 71 W., 6th P.M., Wyoming
Sec. 5: Lots 5 thru 20;
Sec. 6: Lots 8 thru 23;
Sec. 7: Lots 5 thru 13, 17, 18;
Sec. 8: Lots 1 thru 16;
T. 41 N., R. 71 W., 6th P.M., Wyoming
Sec. 14: Lots 3 thru 6, 10 thru 15;
Sec. 15: Lots 1 thru 16;
Sec. 19: Lots 9, 10, 13 thru 19.
Sec. 20: Lots 9 thru 16;
Sec. 21: Lots 7 thru 16;
Sec. 22: Lots 4 thru 7;
Sec. 23: Lots 2 thru 4, 6, 7;
Sec. 28: Lots 1 thru 8, 10 thru 15;
Sec. 29: Lots 1 thru 16;
Sec. 30: Lots 5 thru 16;
Sec. 31: Lots 5 thru 20;
Sec. 32: Lots 1 thru 16;
Sec. 33: Lots 4, 5, 12, 13;
T. 40 N., R. 72 W., 6th P.M., Wyoming
Sec. 1: Lots 5, 12, 13.

Containing approximately 7,814.04 acres.

All of the coal in the above-described land consists of unleashed Federal coal within the Power River Basin Known Recoverable Coal Resource Area. The purpose of the exploration program is to conduct off-lease exploration by drilling.

ADDRESSES: The proposed exploration program is fully described and will be conducted pursuant to an exploration plan to be approved by the Bureau of Land Management. Copies of the exploration plan are available for review during normal business hours in the following offices (serialized under number WYW132663): BLM, Wyoming State Office, 2515 Warren Avenue, P.O. Box 1828, Cheyenne, WY 82003; and, BLM, Casper District Office, 1701 East 'E' Street, Casper, WY 82601.

SUPPLEMENTARY INFORMATION: This notice of invitation will be published in the Douglas Budget of Douglas, WY, once each week for two consecutive weeks beginning the week of June 15, 1994, and in the **Federal Register**. Any party electing to participate in this exploration program must send written notice to both the BLM and Antelope Coal Company no later than thirty (30) days after publication of this invitation in the **Federal Register**. The written notice should be sent to the following addresses: Antelope Coal Company, Attn: John Trummel, Caller Box 3009, Gillette, WY 82717-3009, and the BLM, Wyoming State Office, Chief, Branch of Mining Law and solid Minerals, P.O. Box 1828, Cheyenne, WY 82003.

The foregoing is published in the **Federal Register** pursuant to 43 CFR 3410.2-1(c)(1).

Lynn E. Rust,

Chief, Branch of Mining Law & Solid Minerals.

BILLING CODE 4310-22-M

Fish and Wildlife Service

Receipt of Applications for Permit

The following applicants have applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, *as amended* (16 U.S.C. 1531, *et seq.*):

PRT-781217

Applicant: The Chambers Group, Inc., Irvine, CA

The applicant requests an amendment to their current permit to include take (nest monitoring) of Least Bell's vireo (*Vireo bellii pusillus*) for the purpose of enhancement of the survival of the species.

PRT-791144

Applicant: Michael Dowd, Pueblo, CO

The applicant requests a permit to import the sport-hunted trophy of one male bontebok (*Damaliscus dorcas dorcas*) culled from the captive herd maintained by the Ciskei Government, at Tsolwana Game Reserve, P.O. Box 1424, Queenstown, Ciskei, Republic of South Africa, for the purpose of enhancement of survival of the species.

PRT-790766

Applicant: National Zoological Park, Washington, DC,

The applicant requests a permit to import blood, milk, and tissue samples from live toque macaques (*Macaca sinica sinica*) and tissue samples from opportunistically obtained macaque carcasses as part of a long-term study at Polonnaruwa Nature Sanctuary, Sri Lanka, for scientific research to enhance the survival of the species.

PRT-791161

Applicant: Zoological Society of San Diego, San Diego, CA,

The applicant requests a permit to import 6 male and 9 female Philippean deer (*Cervus porcinus calamianensis*) from the managed population in Calauit Island Game Preserve and Wildlife Sanctuary, Palawan Province, Philippines, for the purpose of enhancement of propagation of the species.

PRT-791106

Applicant: Exotic Feline Breeding Compound, Rosamond, CA,

The applicant requests a permit to import one captive-bred female Chinese leopard (*Panthera pardus japonensis*) from the Menagerie Du Jardin Des Plantes, Paris, France, for the purpose of enhancement of survival of the species through breeding.

Written data or comments should be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, Room 420(c), Arlington, Virginia 22203 and must be received by the Director within 30 days of the date of this publication.

Documents and other information submitted with these applications are available for review, *subject to the requirements of the Privacy Act and Freedom of Information Act*, by any party who submits a written request for a copy of such documents to the

following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, Room 420(c), Arlington, Virginia 22203. Phone: (703/358–2104); FAX: (703/358–2281).

Dated: June 10, 1994.

Caroline Anderson,

Acting Chief, Branch of Permits, Office of Management Authority.

[FR Doc. 94–14505 Filed 6–14–94; 8:45 am]

BILLING CODE 4310–55–P

Wild Bird Conservation Act (WBCA) of 1992; Petition for a Moratorium on Imports of Wild Birds From Guyana Into the United States

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of petition receipt.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the receipt of a petition to impose a moratorium on the imports of wild birds from Guyana into the United States under the Wild Bird Conservation Act of 1992. The petition has been found to present sufficient information indicating that imposing a moratorium on the imports of wild birds from Guyana may be warranted under the WBCA, and that the trade in wild birds from Guyana may be detrimental to species' survival. Through the issuance of this notice, the Service requests additional data, comments, and suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning trade in, and the status of, wild bird species in Guyana.

DATES: The Fish and Wildlife Service (Service) will consider comments and information received by September 13, 1994 in making a final decision on this petition.

ADDRESSES: Comments and information should be sent to: Director, U.S. Fish and Wildlife Service, c/o Mr. Marshall P. Jones, Chief, Office of Management Authority, 4401 N. Fairfax Dr., Room 420 C, Arlington VA 22203.

FOR FURTHER INFORMATION CONTACT: Dr. Susan S. Lieberman, Office of Management Authority, at the above address, telephone (703) 358–2093.

SUPPLEMENTARY INFORMATION: On October 23, 1992, the Wild Bird Conservation Act (WBCA) was signed into law. The purposes of the WBCA include promoting the conservation of exotic birds by: ensuring that all imports into the United States of species of exotic birds are biologically sustainable and not detrimental to the species; ensuring that imported birds are not subject to inhumane treatment; and assisting wild bird conservation and management programs in countries of origin.

Pursuant to Section 108(a)(2)(B), "Moratoria for species not covered by Convention" of the WBCA, the Secretary of the Interior (Secretary) is authorized to establish a moratorium on the importation of all species of exotic birds from a particular country, if the Secretary determines that:

1. The country has not developed and implemented a management program for exotic birds in trade generally, that ensures both the conservation and the humane treatment of exotic birds during capture, transport, and maintenance; and

2. The moratorium or quota is necessary for the conservation of the species or is otherwise consistent with the purpose of the WBCA.

This notice is based on various documents, including published and unpublished studies, and agency documents. These documents are on file in the Service's Office of Management Authority, and are available on request.

On August 30, 1993, the Animal Welfare Institute, Defenders of Wildlife, and the Environmental Investigation Agency submitted a petition (AWI petition) to the Department of the Interior requesting that the Secretary impose a moratorium on the import of wild exotic birds from Guyana under the WBCA.

Guyana is slightly smaller in size than the state of Idaho, measuring 214,970 km^2 and 63% of this acreage is forest habitat. Its rainforests contain much biodiversity and an abundance of wildlife, although the number of bird species found in Guyana is presently unknown (WCMC 1992). Guyana has been one of the major exporters of neotropical birds (Mulliken et al. 1992).

The majority of birds exported from Guyana have been psittacines, including Amazon parrots, macaws, and a variety of conures and parakeets. Between 1983 and 1989, 172,557 specimens of 31 species of wild-caught psittacines were exported from Guyana (Edwards 1992). Due to mortalities in capture, holding, and transport, far more were removed from the wild during the same period.

The European Community (EC) banned imports from Guyana in 1986 and in response, Guyana imposed a nine-month suspension of exports in 1986–87. Guyana reopened bird exports in 1987 and instituted an export quota system, although that quota system was not based on scientific analyses. The number of birds exported in 1988 was 19,641 and in 1989 was 15,325 (Edwards 1992). In May of 1993, Guyana temporarily suspended the export of wildlife, including birds until further notice. That trade suspension is still in effect.

The capture and trade of wild birds in Guyana is regulated by the Wildlife Services Division, Department of Crops and Livestock, Ministry of Agriculture, which serves as the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) Management Authority for Guyana. Within this Division, the day-to-day administration is the responsibility of the Assistant Chief Crops and Livestock Officer who serves as head of the Wildlife Services Division. The National Research Council of Guyana is the designated CITES Scientific Authority, although it has been inactive and has made no recommendations in the establishment of wildlife trade quotas (Edwards 1992) The Service is not aware of any scientific research having been carried out by or in conjunction with the National Research Council of Guyana.

The Wild Birds Protection Act of 1919, as amended in 1969, is the only Guyana law specific to wildlife (Edwards 1992). In 1977, Guyana became a signatory to CITES, and the Wildlife Services Division presently operates under an 'Administrative Agreement' with the Senior Minister of Agriculture to implement CITES. Actions taken by the Division, including the issuance or termination of export licenses, assignment of quotas, and establishment of export levies are all undertaken within the framework of this Administrative Agreement (Edwards 1992). Information available to the Service does not indicate that Guyana has comprehensive CITES-implementing legislation.

The export of wild birds from Guyana is regulated by a system of quotas. This system was established in 1987 in response to the 1986 EC ban on wildlife imports from Guyana. The EC initiated that ban on the grounds that Guyana lacked a proper management program for psittacine exports. The EC lifted the import ban following implementation of the 1987 quota system.

The Wildlife Services Division of Guyana assigns quotas for each species at levels below those which they believe may threaten wild populations (Edwards 1992). Following the assignment of species' quotas, the Wildlife Services Division establishes individual quotas for each exporter. In the absence of any population surveys or scientific data, export quotas are calculated on the basis of exporters'

previous trade levels (Edwards 1992). The Division has reduced or eliminated the quota for certain species upon advice from the CITES Secretariat. The species quotas have remained unchanged since 1990.

The government of Guyana has not undertaken any field surveys of wild bird species in trade (Edwards 1992) nor is the Service aware of any demographic studies of wild bird populations being undertaken. In the absence of such studies, there is insufficient scientific information on which to base the sustainable management of wild bird populations in Guyana and to determine that such trade is not detrimental to the species. Lastly, export quotas that do not incorporate capture quotas make no provision for mortalities during capture, transport, and maintenance, with further potential detriment to species in the wild.

The AWI petition claimed that export quotas for macaws and Amazon parrots were exceedingly high in the absence of scientific information. These are K-selected species which are long-lived, have delayed sexual maturity, and exhibit low reproductive rates in the wild. Guyana is South and Central America's largest exporter of macaws and export quotas for 1991 included 6,000 macaws of the following species: Blue and Gold macaw (*Ara ararauna*), Green-winged macaw (*Ara chloroptera*), Red-bellied macaw (*Ara manilata*), and Red-shouldered macaw (*Ara nobilis*).

In addition to psittacine exports, Guyana has been one of the largest exporters of toucans to the United States. Very little scientific information exists on the status of wild populations of toucans, and the Service is not aware of any scientific assessment of the sustainable utilization of toucans.

No records on the domestic trade in Guyana of wild birds are available (Edwards 1992) and this trade is neither monitored nor regulated. Many species of macaws and toucans are used in subsistence hunting by Amerindians. The effects of the domestic trade and subsistence use on wild bird populations remain unknown.

The AWI petition provided information on the alleged illegal trade in psittacines from Venezuela to Guyana. Desenne and Strahl (1991) reviewed the current status of psittacine populations in Venezuela and concluded that the smuggling of birds illegally taken in Venezuela and exported from Guyana was a conservation threat to wild parrot populations in Venezuela, particularly those in the Orinoco Delta region. In October of 1991, the Sociedad Conservacionista Audubon de Venezuela (Venezuela Audubon Conservation Society) expressed its concern to the CITES Secretariat on the illegal trade in birds from Venezuela and cited recent law enforcement seizures of illegal birds by the Venezuelan Fish and Wildlife Service and National Guard in the Orinoco Delta.

There appear to be no measures to ensure the humane treatment of wild birds during capture, transport and maintenance in Guyana, in spite of relevant CITES requirements. The AWI petition provided unpublished data extracted from analyses of U.S. Department of Agriculture Quarantine Forms which show that transport mortality for Guyanese birds is relatively high.

After a review of the petition and other information available to it, the Service concludes that imposing a moratorium on the imports of wild birds from Guyana may be warranted under the WBCA, and that the trade in wild birds from Guyana may be detrimental to species' survival. The information available indicates that Guyana has been unable to implement a management program for wild birds in trade that ensures both the conservation of the species and the humane treatment of birds during capture, trade and maintenance.

On November 16, 1993, the Service published a final rule (in 50 CFR Part 15) in the **Federal Register** (58 FR 60524), that established the prohibitions and requirements of the WBCA, and permit issuance procedures for four types of permits established by the WBCA. No CITES-listed birds can be imported into the United States, including from Guyana, unless they are accompanied by an import permit issued by the Office of Management Authority of the Service, or are on an approved list. The approved list has not yet been finalized. It will contain exclusively captive-bred species (wherein all birds in trade are bred in captivity), approved breeding facilities, and species with approved management plans for wild caught birds. The Service's proposed regulations for implementing these approvals were published in the **Federal Register**, March 17, 1994 (59 FR 12784), and included criteria for the approval of scientifically-based sustainable use management plans, as required by the WBCA. The Service will consider all comments and information received by May 16, 1994 in formulating a final decision for these approvals, except for scientifically-based sustainable use management plans for which the Service will consider comments and information received by June 15, 1994 in formulating a final decision.

Therefore, although the importation of CITES-listed exotic bird species from Guyana is currently prohibited, non-CITES-listed birds can be imported into the United States from Guyana. If, at the close of the comment period, information received in response to this notice and other information available in the administrative record supports action under § 108 of the WBCA, the Service may grant the petition and propose a suspension in trade in all wild exotic birds from Guyana.

Public Comments Solicited

The Service intends that any final decision resulting from its evaluation of this petition will be as accurate and as effective as possible. Therefore, any comments or data from the public, other concerned governmental agencies, the scientific or conservation communities, trade organizations, or any other interested party concerning any aspect of the wild bird trade in Guyana are hereby solicited. The Service is particularly interested in receiving information on the status and any population data on the psittacines of Guyana, including the *Ara* and *Amazona* species.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–645 (Final)]

Calcium Aluminate Flux From France

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines,[2] pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. § 1673d(b)) (the Act), that an industry in the United States is threatened with material injury by reason of imports from France of calcium aluminate (CA) flux,[3] provided for in subheading 2523.10.00 of the Harmonized Tariff Schedule of the United States, that have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV). The Commission further determines, pursuant to 19 U.S.C. § 1673d(b)(4)(B), that it would not have found material injury but for the suspension of liquidation of entries of the merchandise under investigation.

Background

The Commission instituted this portion of its investigation effective March 23, 1994, following a final determination by the Department of Commerce that imports of CA flux from France were being sold at LTFV within the meaning of section 733(b) of the Act (19 U.S.C. § 1673b(b)). Notice of the institution of the Commission's investigation and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of March 28, 1994 (59 FR 14425). The hearing was held in Washington, DC, on March 31, 1994, and all persons who requested the opportunity were permitted to appear in person or by counsel.

[1] The record is defined in sec. 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR § 207.2(f)).

[2] Vice Chairman Watson and Commissioner Crawford dissenting. Commissioner Bragg did not participate in the Commission's determination.

[3] CA flux is used primarily as a desulfurizer and/or cleaning agent in the steel manufacturing process. Like CA cement (CAC) clinker, the CA flux that is subject to investigation contains by weight more than 32 percent but less than 65 percent alumina and more than one percent each of iron and silica. However, CA flux has a chemical composition distinct from CAC clinker. CAC clinker contains the hydraulic mineral mono-calcium aluminate, which gives it a molar ratio of lime to alumina of approximately 1:1. In contrast, CA clinker sold as a flux does not contain mono-calcium aluminate; it contains the complex mineral $C_{12}A_7$(12CaO * $7Al_2O_3$), which gives it a molar ratio of lime to alumina of approximately 2:1.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on June 6, 1994. The views of the Commission are contained in USITC Publication 2780 (June 1994), entitled "Calcium aluminate flux from France: Investigation No. 2780 (Preliminary)."

Issued: June 8, 1994.

By order of the Commission.

Donna R. Koehnke,

Secretary.

BILLING CODE 7020–02–P

[Investigation No. 731–TA–651 (Final)]

Silicon Carbide From the People's Republic of China

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines, pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)) (the Act), that an industry in the United States is not materially injured or threatened with material injury, and the establishment of an industry in the United States is not materially retarded, by reason of imports from the People's Republic of China of silicon carbide,[2] provided for in subheadings 2849.20.10 and 2849.20.20 of the Harmonized Tariff Schedule of the United States, that have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV).[3]

Background

The Commission instituted this investigation effective December 8, 1993, following a preliminary determination by the Department of Commerce that imports of silicon carbide from the People's Republic of China were being sold at LTFV within the meaning of section 733(b) of the Act (19 U.S.C. 1673b(b)). Notice of the institution of the Commission's investigation and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of January 26, 1994 (59 FR 3735). The hearing was held in Washington, DC, on May 2, 1994, and all persons who requested the opportunity were permitted to appear in person or by counsel.

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[2] The imported merchandise covered by this investigation is silicon carbide, regardless of grade or form, containing by weight from 20 to 98 percent, inclusive, silicon carbide and with a grain size coarser than size 325 F (as set by the American National Standards Institute), and inclusive of split sizes. Silicon carbide covered by this investigation typically contains additional impurities: iron, aluminum, silica, silicon, and carbon, as well as calcium and magnesium.

[3] Commissioner Lynn M. Bragg did not participate in the determination in this investigation.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on June 6, 1994. The views of the Commission are contained in USITC Publication 2779 (June 1994), entitled "Silicon Carbide from the People's Republic of China: Investigation No. 731–TA–651 (Final)."

Issued: June 7, 1994.

By order of the Commission.

Donna R. Koehnke,

Secretary.

BILLING CODE 7035–01–P

[Finance Docket No. 29009 (Sub-No. 6)]

Norfolk Southern Railway Company—Amended Trackage Rights Exemption—CSX Transportation, Inc.

CSX Transportation, Inc. (CSXT), has agreed to grant approximately 28.59 miles of overhead trackage rights to Norfolk Southern Railway Company (NSR) between milepost 1.08 at Glasgow, VA, via the Glasgow Industrial Track, and milepost 174.89 at Balcony Falls, VA, a point of connection with CSXT's main line, and between milepost 174.89 at Balcony Falls, VA, and milepost 147.38 at Lynchburg, VA, in Rockbridge, Amherst, and Bedford Counties, and the City of Lynchburg, VA.[2] The trackage rights will facilitate more economic and efficient operations by providing an alternative route for NSR traffic to Hagerstown, MD, particularly during peak periods. NSR's existing route to Hagerstown includes a single-track branch line between Manassas and Front Royal, VA. The proposed consummation date is on or after June 15, 1994.

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: James R. Paschall, Three Commercial Place, Norfolk, VA 23510–2191.

As a condition to use of this exemption, any employees adversely affected by the trackage rights will be protected pursuant to *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Decided: June 10, 1994.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035–01–P

[Finance Docket No. 32511]

Norfolk Southern Railway Company—Trackage Rights Exemption—Norfolk and Western Railway Company

Norfolk and Western Railway Company (NW) has agreed to grant to its corporate parent, Norfolk Southern Railway Company (NSR), overhead trackage rights over approximately 134.1 miles of rail line, between NW's milepost H–63, near Front Royal, VA, and milepost H–197.1, near Glasgow, VA.[1] NSR's trackage rights will permit direct movement of NSR trains via Lynchburg and Glasgow to and from the interchange with Conrail at Hagerstown, MD. The trackage rights are to become effective on June 15, 1994.

This notice is filed under 49 CFR 1180.2(d)(7).[2] If the notice contains false or misleading information the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: James R. Paschall, Norfolk Southern Corporation, Three Commercial Place, Norfolk, VA 23510.

As a condition to the use of this exemption, any employees affected by the trackage rights will be protected under *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Decided: June 10, 1994.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

BILLING CODE 7035–01–P

[Docket No. AB–12 (Sub-No. 158X)]

Southern Pacific Transportation Company—Discontinuance of Service Exemption—San Bernardino County, CA

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission, pursuant to 49 U.S.C. 10505, exempts from the prior approval requirements of 49 U.S.C. 10903, *et seq.* the discontinuance of service by Southern Pacific Transportation Company over a 15.70-mile portion of the Baldwin Park Branch between milepost 519.80, at or near the Upland rail station and milepost 535.50, at or near the Rialto rail station, in San Bernardino County, CA, subject to standard labor protective conditions.

DATES: Provided no formal expression of intent to file a financial assistance offer has been received, this exemption will be effective on July 15, 1994. Formal expressions of intent to file financial assistance offers[1] under 49 CFR 1152.27(c)(2) must be filed by June 24, 1994. Petitions to stay must be filed by June 30, 1994. Petitions to reopen must be filed by July 11, 1994.

ADDRESSES: Send pleadings referring to Docket No. AB–12 (Sub-No. 158X) to: (1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423; and (2) Petitioner's representative: Gary A. Laakso, Southern Pacific Building, One Market Plaza, San Francisco, CA 94105.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar (202) 927–5660. [TDD for hearing impaired: (202) 927–5721.]

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289–4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 927–5721.]

Decided: June 6, 1994.

By the Commission, Chairman McDonald, Vice Chairman Phillips, Commissioners Simmons and Morgan.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035–01–P

---

[1] This notice adds operations by Norfolk Southern Railway Company (NSR), the parent of Norfolk and Western Railway Company (NW), to an existing trackage rights agreement between NW and the Chesapeake and Ohio Railway Company (C&O), the predecessor of CSX Transportation, Inc., that was the subject of an application in *Norfolk and Western Railway Company Trackage Rights over the Chesapeake and Ohio Railway Company between Glasgow and Lynchburg, in Rockbridge, Amherst and Bedford Counties, VA, and in the City of Lynchburg, VA*, Finance Docket No. 29009 (Sub-No. 6), that was subsequently consolidated in a control proceeding and approved in *CSX Corp.-Control-Chessie and Seaboard C.L.I.*, 363 I.C.C. 521 (1980). This amended notice is issued under the same docket number assigned to the original NW–C&O trackage rights notice of exemption.

[2] In a notice of exemption concurrently filed on May 26, 1994, in *Norfolk Southern Railway Company—Trackage Rights Exemption—Over Norfolk and Western Railway Company—Between Glasgow, VA, and Front Royal, VA*, in Finance Docket No. 32511, NW has agreed to grant to its parent, NSR, overhead trackage rights over approximately 134.1 miles of NW's line of railroad between milepost H–63, near Front Royal, VA, and milepost H–197.1 near Glasgow, VA. This will complete NSR's route to Hagerstown, MD.

[1] By notice of exemption in *Norfolk Southern Railway Company—Trackage Rights Exemption—Norfolk and Western Railway Company*, Finance Docket No. 31283 (Sub–No. 1) (ICC served June 17, 1991), NW was granted overhead trackage rights over a 63-mile line of railroad between milepost H–63, at Front Royal, VA, and milepost H–0, at Hagerstown, MD. In a concurrently filed notice of exemption in *Norfolk Southern Railway Company—Amended Trackage Rights Exemption—CSX Transportation, Inc.*, Finance Docket No. 29009 (Sub–No. 6), NSR has applied for overhead trackage rights over approximately 28.59 miles of CSX Transportation, Inc.'s (CSXT) rail line between milepost 1.08 at Glasgow, VA, via the Glasgow Industrial Track and milepost 174.89 at Balcony Falls, VA, a point of connection with CSXT's main line and between milepost 174.89 and milepost 147.38 at Lynchburg, VA. The trackage rights in this notice will connect these two lines and complete NSR's alternate route to Hagerstown. NSR's existing route to Hagerstown includes a single-track branch line between Manassas and Front Royal, VA.

[2] NW and NSR indicate that this transaction is within a corporate family and, thus, also exempt under 49 CFR 1180.2(d)(3).

[1] *See Exempt. of Rail Abandonment—Offers of Finan. Assist.*, 4 I.C.C.2d 164 (1987).

DEPARTMENT OF JUSTICE

Information Collections Under Review

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

(1) The title of the form/collection;

(2) The agency form number, if any, and the applicable component of the Department sponsoring the collection;

(3) How often the form must be filled out or the information is collected;

(4) Who will be asked or required to respond, as well as a brief abstract;

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond;

(6) An estimate of the total public burden (in hours) associated with the collection; and,

(7) An indication as to whether Section 3504(h) of Public Law 96–511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Mr. Jeff Hill on (202) 395–7340 and to the Department of Justice's Clearance Officer, Mr. Robert B. Briggs, on (202) 514–4319. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the DOJ Clearance Officer of your intent as soon as possible.

Written comments regarding the burden estimate or any other aspect of the collection may be submitted to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Robert B. Briggs, Department of Justice Clearance Officer, Systems Policy Staff/Information Resources Management/Justice Management Division, suite 850, WCTR, Washington, DC 20530.

New Collection

(1) Community Relations Service Customer Satisfaction Feedback Plan.

(2) Community Relations Service.

(3) On occasion, annually.

(4) Individuals or households, State or local governments, Federal agencies or employees, non-profit institutions, and small businesses or organizations. The Community Relations Service seeks to survey its customers to determine the kind and quality of services they want and their level of satisfaction with existing services. Based on the information collected, the Community Relations Service may change policies or procedures to enhance or streamline CRS's overall operation.

(5) 2,153 respondents @ .137 hours per response.

(6) 294 annual burden hours.

(7) Not applicable under Section 3504(h).

Public comment on this item is encouraged.

Dated: June 10, 1994.

Robert B. Briggs,

Department Clearance Officer, United States Department of Justice.

BILLING CODE 4410–17–M

National Institute of Corrections

Solicitation for a Cooperative Agreement: Design, Development and Implementation of Community Corrections Options

June 1, 1994.

This solicitation requests grant proposals for a cooperative agreement to conduct a training and technical assistance project aimed at increasing the effectiveness of community corrections programs by supporting purposeful design, development and implementation efforts in state and local agencies. The Project will be a collaborative venture with NIC's Community Corrections Division. Funding for the project is $180,000, which will support one cooperative agreement for a 15 month period.

Background

Corrections is expressing enormous interest in experimentation with community sanctions. Agencies are struggling to provide a more diverse array of sanctions, higher quality supervision, and more accountability for a growing number of offenders—all at a time when resources are decreasing for many agencies. Recent literature on the development of community corrections programs has focused attention on the critical need for more purposeful and disciplined program design, implementation, and evaluation if community sanctions are to achieve clearly defined and measurable results.

A continued interest of the Community Corrections Division is to provide assistance to agencies in the early stages of program design and implementation. In 1990, the Division supported a program design workshop for community corrections practitioners. Three-person teams from five jurisdictions participated in two, intensive 1-week seminars, which were separated by a period for program design work at their home agencies. The workshop was conducted by the Crime and Justice Foundation, Boston, Massachusetts, under a $90,000 cooperative agreement with NIC.

The Division subsequently allocated additional resources to this project and revised the strategy to include one seminar, preceded by substantial on-site work with each jurisdictional team; greater attention to the development of a sound information base for program design; and more attention to the organizational climate in which the program changes would occur. In fiscal years 1993 and early 1994, project services were provided by Temple University, Department of Criminal

Justice, under a $150,000 cooperative agreement grant. Five sites were selected in March 1993; the seminar was held in mid-July; and services will be provided through June, 1994.

The next round of project services also will be provided by a grantee agency under the terms of a cooperative agreement. The Division will be actively involved in all aspects of the work, including the selection of participating agencies and the design and delivery of project services. NIC will retain the authority to approve the final selection of participating jurisdictions.

Scope

The goal of the project is to improve program effectiveness by supporting careful program development and more complete implementation of program changes through an integrated program of training and technical assistance. Project services will be provided to teams of community corrections executives and key staff from five agencies/jurisdictions seeking to introduce, modify, or expand community sanctions for adult offenders.

The project assumes that for community corrections programs to succeed they must be well designed and fully implemented. This requires agencies to engage in a rational development process that includes articulation of clear policy on the goals, outcomes, intervention approaches and target populations of the proposed program. Agencies need to weigh the impact of proposed changes on other parts of the criminal justice system, carefully target offender populations, consider cost implications and build external and internal support among major stake holders and implementers.

The project intends to help community corrections agencies do a better job of designing and implementing whatever changes in program or procedures are important to them in order to achieve their defined outcomes. It will in no way direct or coerce agencies toward specific program choices or activities. It also is important to distinguish this project from the policy development assistance offered by such efforts as the joint NIC/State Justice Institute's Intermediate Sanctions Project. This is not primarily a policy development project. We expect that agencies will be proceeding with the program development tasks of this project within the context of an articulated policy direction.

In sum, the project offers an opportunity to slow down the development process, resist the often extreme pressure to adopt a "quick fix" or model solution, and to plan a rational and practical approach.

Agencies Targeted To Receive Project Services

The grantee and NIC will work with five state, county, and large city, adult community corrections agencies (probation, parole, or other community-based agencies) with sufficient staff and financial resources to support the planning process. Agencies selected must demonstrate a strong interest and commitment to implementing the proposed change in their sanctioning and supervision practices. They also need to supervise a large enough population so that the proposed change will impact a significantly sized offender group. They should propose a three person team with the experience and authority to succeed in the program development effort (e.g., the chief administrator, principal planner, and/or key staff responsible for program implementation). The team may also include senior managers or officials, from any branch of government (e.g., a funding agency), who are critical to the successful design and implementation of the program.

Project Activities

A former announcement of project services will be developed by NIC's Community Corrections Division and the grantee. The announcement will describe fully the project approach and services, application requirements, selection criteria, and the deadline for the receipt of applications.

Prior to selecting the five agencies for this project, telephone interviews and, in some cases, on-site visits should be conducted with promising candidates to assess both the internal, organizational climate and external factors which may indicate whether the agency is in a good position to engage in program change or innovation at this time.

Project activities should begin with on-site work by the local agency teams, assisted by project (grantee and NIC) staff. The initial work should focus on such issues as the level of support for proposed changes among significant stake holders, the quality of data with which to engage the program development process, and the capacity of the agency to conduct the effort including any organizational issues which should be addressed.

Several months after project initiation, a three to five day seminar will be offered to participating teams. The seminar should provide a common framework for program development and implementation, offer hands-on experience with some critical aspects of the work, offer opportunities for peer consultation, and result in a work plan for each agency for pursuing its program development objectives, including further technical assistance needs from the project.

Technical assistance, tailored to the specific needs of each jurisdiction, should be provided for the duration of the project. Participating agencies must make a commitment to attend the seminar and participate in the entire, fifteen month project.

Expenses for travel, lodging, meals and seminar materials will be covered by the project for up to three members of each agency team. Additional team members may attend the seminar at the expense of the jurisdictions, however, such additional participation will depend on the seminar goals and approach.

Application Requirements

For the total 15 month project, applicants are expected to define the conceptual framework(s) which best applies to this project, discuss the varying purposes of technical assistance to support the work of the five, participating teams, and define the likely content and timing for the seminar. Recognizing the various kinds of experts required by the project, applicants are to identify the principal members of the applicant team and their specific, relevant expertise. Because this is a cooperative venture with the Community Corrections Division, applicants also should address how they would perform the project tasks in collaboration with NIC.

At a minimum, applications must address:

- The development and implementation of a plan: To publicize the project and solicit applications from eligible community corrections agencies; develop selection criteria; screen applications with telephone calls and, in some cases, on-site visits; and select five sites. As stated earlier, NIC will retain the authority under the cooperative agreement to approve final participant selections.
- The planning, delivery and management of an integrated, technical assistance project, consisting of preliminary on-site work with the participating agencies, a 3 to 5 day seminar, and follow-on technical assistance activities. Efforts should be made to include community corrections practitioners as peer consultants, where appropriate.
- Preparation of a report which summarizes the activities of the participating agencies and results achieved, and makes recommendations

concerning ways to improve program development and implementation in community corrections agencies. While NIC is interested in summarizing the practical learning from this effort, the primary purpose of the project is to maximize the delivery of technical assistance services to participating agencies (bullet above).

Applicaton Procedures

Funding for this project has been set at $180,000. This amount will support one cooperative agreement award. Project activities must be completed within a 15 month period. The following criteria will be used to evaluate applications:

1. The applicant's understanding of the concepts and critical issues in (a) the design, implementation and evaluation of community corrections programs; (b) planned change in a criminal justice system context; and (c) organizational development and management to support major program changes.

2. The applicant's demonstrated capacity to collaborate with other organizations on such efforts.

3. The applicant's experience, both in terms of key project staff and the organization, in working with community corrections agencies on program design issues, planning and conducting training for community corrections practitioners, and delivering and managing technical assistance programs.

4. The soundness of the proposed project objectives and methodology, including the approach to publicizing the program, selecting participants, providing integrated technical assistance services, and planning and conducting the seminar.

5. The feasibility of the proposed management plan, the specificity of the proposed tasks, the nature of the proposed roles and responsibilities relating to collaboration with NIC, and the identification of realistic milestones and task completion dates.

6. The reasonableness and clarity of the proposed budget and budget narrative.

Applications should not exceed twenty-five, double-spaced, typed pages in length, not including standard grant forms, attachments and appendices. This is a technical assistance award. Applicants must submit a copy of their proposal to the state "single point of contact," where applicable, simultaneously with submitting six copies to the Community Corrections Division, National Institute of Corrections, 320 First Street NW., Washington, DC 20534, no later than 4 p.m., Eastern time, Friday, July 15, 1994. The street address for overnight mail or hand delivery of applications is 500 First Street, NW., room 700, Washington, DC 20534.

If you have any questions regarding the solicitation, please write or call Phyllis Modley, (202) 307–3995, extension 133. Applicants interested in obtaining a packet of material on the current project, may write or call the Project Director, Dr. Alan Harland, Temple University, Department of Criminal Justice, 5th Floor, Gladfelter Hall, Philadelphia, PA 19122; telephone (215) 204–1506 or 7918.

Dated: June 9, 1994.

Larry B. Solomon,

National Institute of Corrections.

BILLING CODE 4410–36–M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel; Meeting

AGENCY: National Endowment for the Humanities.

ACTION: Notice of meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended), notice is hereby given that the following meeting of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: David C. Fisher, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, DC 20506; telephone (202) 606–8322. Hearing-impaired individuals are advised that information on this matter maybe obtained by contacting the Endowment's TDD terminal on (202) 606–8282.

SUPPLEMENTARY INFORMATION: The Museums Evaluation Advisory Panel will meet on June 27, 1994, in room 415 of the Old Post Office Building, 1100 Pennsylvania Avenue NW., Washington, DC. The meeting is scheduled from 8:30 a.m. to 5 p.m. and is open to the public. Advance notice of any special needs or accommodations is appreciated.

The purpose of this meeting is to provide consultation to the Humanities Projects in Museums and Historical Organizations Program on issues relating to project evaluation. Consultation will focus on ways in which the Division can enhance applicants, grantees and the Endowment's ability to measure the educational effectiveness of public projects in the humanities, submitted to the Division of Public Programs.

David C. Fisher,

Advisory Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. M–48, 70–7001 and 70–7002]

U.S. Enrichment Corporation; Intent To Establish Local Public Document Rooms

Notice is hereby given that the Nuclear Regulatory Commission (NRC) intends to establish two (2) local public document rooms (LPDRs) to maintain the publicly available records pertaining to the U.S. Enrichment Corporation's (USEC) operation of Department of Energy Gaseous Diffusion Plants to enrich uranium located in Paducah, Kentucky, and Piketon, Ohio. One LPDR will be set up for each location.

Among the factors the NRC will consider in selecting locations for the LPDR collections are:

(1) Whether the institution is an established document repository with a history of impartially serving the public;

(2) The physical facilities available, including shelf space, patron work space, and copying and mircographic equipment;

(3) The willingness and ability of the library staff to maintain the LPDR collection and assist the public in locating records;

(4) The public accessibility of the library, including parking, ground transportation, and hours of operation, particularly evening and weekend hours;

(5) The accessibility of the library to the handicapped;

(6) The proximity of the library to the Gaseous Diffusion Plants in Paducah, Kentucky, and Piketon, Ohio.

Public comments are requested on libraries in the vicinity of the Paducah, Kentucky, and Piketon, Ohio, sites that might be considered for selection as the locations for these LPDRs.

The comment period expires July 15, 1994. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments filed on or before this date.

Written comments may be submitted to Mr. David L. Meyer, Chief, Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U S Nuclear Regulatory

BILLING CODE 7590–01–M

Issuance of Amendment 21 to Source Material License SUA–917 Amending License Condition (LC) 55 for Atlas Corporation's (ATLAS') Uranium Mill Facility at Moab, UT

AGENCY: Nuclear Regulatory Commission.

ACTION: Amendment 21 to Source Material License SUA–917, issued May 23, 1994, amends LC 55 to change the date for completion of placement of the interim cover on the tailings pond from April 30, 1994, to February 15, 1995.

SUMMARY: On May 11, 1994, NRC noticed in the **Federal Register**; receipt of a request from Atlas to amend Source Material License SUA–917 to extend the completion dates by one year for all site reclamation milestones. Atlas indicated that due to seasonal precipitation and the relative impermeability of the fine tailings in the central portion of the tailings pile, a pond of approximately five acres in size and one to two feet in depth exists on the tailings pile. This situation prevented Atlas' contractor from placing the remainder of the interim cover over the tailings area by April 30, 1994, as required by LC 55 A.(2). Atlas has been placing the interim cover as the pile dried sufficiently to allow equipment to work. At present, approximately 80 percent of the tailings pile has the interim cover in place. The remainder will be placed as soon as the water evaporates and the tailings are dry enough to support equipment. Radon emissions from the uncovered portion of the pile are attenuated by the pond and will reduced by the high moisture content of the tailings after the pond evaporates such that there should be no public health risk during the time prior to completion of the interim cover. The license was amended to change the date for completion of placement of the interim cover from April 30, 1994 to February 15, 1995.

Atlas also requested extensions of one year on completion of the reclamation milestones in LC 55 A.(1) and (3), and LC 55 B.(1) and (2), which relate to placement of windblown tailings on the pile, placement of the final radon cover, placement of erosion protection, and completion of groundwater corrective actions. The extension request was attributed by Atlas to NRC's decision to prepare an Environmental Impact Statement (EIS) for the revised reclamation plan. Although the time required to complete the EIS (April 1995) and the subsequent deferral on approval of the revised reclamation plan will impact the cited dates, the license is not being amended for these milestones until such time as the schedule can be better determined.

FOR FURTHER INFORMATION CONTACT: Allan Mullins, Office of Nuclear Material Safety and Safeguards, Washington, DC 20555, Telephone: 301–415–6693.

Dated at Rockville, Maryland, this 1st day of June, 1994.

Joseph J. Holonich,

Chief, High-Level Waste and Uranium Recovery Projects Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590–01–M

[Docket No. 50–397]

Washington Public Power Supply System; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 123 to Facility Operating License No. NPF–21, issued to the Washington Public Power Supply System (licensee), which changed the operating license of the WNP–2 nuclear plant located in Benton County, Washington. The amendment is effective as of the date of issuance.

The amendment allows the licensee to upgrade the plant analog main steam line (MSL) radiation monitors to digital monitors.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment.

The Notice of Consideration of Issuance of Amendment to Facility Operating License and Opportunity for a Hearing in connection with this action was published in the **Federal Register** on March 10, 1994 (59 FR 11334). No request for hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of this amendment will not have a significant effect on the quality of the human environment (59 FR 28432).

For further details with respect to the action see (1) the application for amendment dated November 30, 1993, (2) Amendment No. 123 to License No. NPF–21, (3) the Commission's related Safety Evaluation dated June 2, 1994, and (4) the Commission's Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building 2120 L Street NW., Washington, DC 20555, and at the local public document room located at the Richland Public Library, 955 Northgate Street, Richland, Washington 99352.

Dated at Rockville, Maryland this 2nd day of June 1994.

For the Nuclear Regulatory Commission.

Theodore R. Quay,

Director, Project Directorate IV–3, Division of Reactor Projects III/IV, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

OFFICE OF PERSONNEL MANAGEMENT

Request for Reclearance of Form RI 30–1

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (title 44, U.S. Code, chapter 35), this notice announces a request for a reclearance of an information collection. Form RI 30–1, Request to Disability Annuitant for Information on Physical Condition and Employment, is used by persons who are not yet age 60 and who are receiving disability annuity and are subject to inquiry as to their medical condition as OPM deems reasonably necessary. RI 30–1 collects information as to whether the disabling condition has changed.

There are estimated to be 8,000 respondents for RI 30–1. It takes approximately 60 minutes to complete RI 30–1. The combined annual burden is 8,000 hours.

For copies of this proposal, contact C. Ronald Trueworthy on (703) 908–8550.

DATES: Comments on this proposal should be received on or before July 15, 1994.

ADDRESSES: Send or deliver comments to:

Lorraine E. Dettman, Retirement and Insurance Group, Operations Support Division, U.S. Office of Personnel Management, 1900 E Street, NW. room 3349, Washington, DC 20415

and

Joseph Lackey, OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, NW., room 3002, Washington, DC 20503.

FOR INFORMATION REGARDING ADMINISTRATIVE COORDINATION CONTACT: Mary Beth Smith-Toomey, Chief, Forms Analysis and Design, (202) 606–9623.

U.S. Office of Personnel Management.

BILLING CODE 6325–01–M

Request for Clearance of a Revised Information Collection Form RI 25–15

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (title, 44 U.S. Code, chapter 35), this notice announces a request for clearance of a revised information collection. Form RI 25–15, Survey of Student's Eligibility to Receive Benefits, is used to collect sufficient information from adult children of deceased Federal employees or annuitants to assure that the child continues to be eligible for payments from OPM.

Approximately 12,000 RI 25–15 forms are completed annually. It takes approximately 15 minutes to complete this form. The total annual burden is 3,000 hours.

For copies of this proposal, contact C. Ronald Trueworthy on (703) 908–8550.

DATES: Comments on this proposal should be received on or before July 15, 1994.

ADDRESSES: Send or deliver comments to—

BILLING CODE 6325–01–M

Request for Clearance of a Revised Information Collection Form RI 30–10

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (title 44, U.S. Code, chapter 35), this notice announces a request for clearance of a revised information collection. Form RI 30–10, Disabled Dependent Questionnaire, is used to collect sufficient information about the medical condition and earning capacity for OPM to be able to determine whether a disabled adult child is eligible for health benefits coverage and/or survivor annuity payments under the Civil Service Retirement System/Federal Employees Retirement System.

Approximately 2,500 RI 30–10 forms are completed annually. The form requires approximately 30 minutes to complete. The annual burden is 1,250 hours.

For copies of this proposal, contact C. Ronald Trueworthy on (703) 908–8550.

DATES: Comments on this proposal should be received on or before July 15, 1994.

Excepted Service

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: This gives notice of positions placed or revoked under Schedules A and B, and placed under Schedule C in the excepted service, as required by Civil Service Rule VI, Exceptions from the Competitive Service.

FOR FURTHER INFORMATION CONTACT: Sherry Turpenoff, (202) 606–0940.

SUPPLEMENTARY INFORMATION: The Office of Personnel Management published its last monthly notice updating appointing authorities established or revoked under the Excepted Service provisions of 5 CFR 213 on May 23, 1994 (FR 26680). Individual authorities established or revoked under Schedules A and B and established under Schedule C between April 1 and April 30, 1994, appear in the listing below. Future notices will be published on the fourth Tuesday of each month, or as soon as possible thereafter. A consolidated listing of all authorities as of June 30, 1994, will also be published.

Schedule A

No Schedule A authorities were established or revoked during April 1994.

Schedule B

Department of Defense

Acquisition positions at grades GS–5 through GS–11, whose incumbents have successfully completed the required course of education as participants in the Department of Defense scholarship program authorized under 10 U.S.C. 1744. Effective April 12, 1994.

Schedule C

Consumer Product Safety Commission

Executive Assistant to the Commissioner. Effective April 20, 1994.

Corporation for National and Community Service

Executive Assistant to the Managing Director. Effective April 20, 1994.

Legislative and Intergovernmental Specialist to the Director, Congressional and Intergovernmental Affairs. Effective April 29, 1994.

Department of Agriculture

Staff Assistant to the Assistant Secretary for Economics. Effective April 5, 1994.

Confidential Assistant to the Administrator, Rural Electrification Administration. Effective April 7, 1994.

Confidential Assistant to the Director/Press Secretary, Office of Public Affairs. Effective April 13, 1994.

Confidential Assistant to the Administrator, Farmers Home Administration. Effective April 13, 1994.

Confidential Assistant to the Administrator, Agricultural Stabilization and Conservation Service. Effective April 15, 1994.

Staff Assistant to the Assistant Secretary for Administration. Effective April 15, 1994.

Confidential Assistant to the Administrator, Food Safety and Inspection Service. Effective April 20, 1994.

BILLING CODE 6325–01–M

Privacy Act of 1974; Amendment to Existing Notices of Systems of Records

AGENCY: Office of Personnel Management.

ACTION: Notice of updates of existing systems of records.

SUMMARY: OPM proposes to add new routine uses of disclosure to four existing record systems, and expand the purpose for which one of the systems collects information.

DATES: The changes will become effective without further notice on July 15, 1994, unless comments are received that dictate otherwise.

ADDRESSES: Written comments should be sent to C. Ronald Trueworthy, Chief, Information Policy Branch, room CHP 500, Plans and Policies Division, Office of Information Resources Management, Administration Group, Office of Personnel Management, 1900 E Street NW., Washington DC 20415.

FOR FURTHER INFORMATION CONTACT: Leslie Crawford, 703–908–8550.

SUPPLEMENTARY INFORMATION: This notice is being published under the authority of 5 U.S.C. 552a(e)(4) and (11), which provide that the public be given a 30-day period to comment on any new routine uses of a system of records. The Office of Management and Budget (OMB), which has oversight responsibilities under the Privacy Act, requires a 40-day period to review the reported changes. A report of these changes has been provided to OMB and Congress.

OPM's Internal and Central system notices were previously published in the **Federal Register** in full on April 12, 1993 (58 FR 19154–19191). OPM's Governmentwide system notices were last published in full on August 10, 1992 (57 FR 35698), with a correction published on November 30, 1992 (57 FR 56733).

The Office of Personnel Management (OPM) is establishing new routine uses for OMP/Internal–6 and OPM/Internal–11 to allow for the disclosure of information to contractors/grantees/volunteers performing a service for the Federal government.

A new routine use is being added to OPM/Central–10 to allow disclosure of Federal Executive Alumni (FEI) directory information to FEI alumni.

In OPM/Central–11, Presidential Management Intern Program Records, the entries detailing the categories of individuals and records included the system are being updated for accuracy. The Purpose section is being expanded to include the facilitation of interaction between PMIP participants and alumni. The Routine Uses section is being modified to add a new routine use to allow the disclosure of names and home addresses to other PMIP participants and alumni.

Office of Personnel Management.

Lorraine A. Green,

Deputy Director.

Revision of existing system notices:

BILLING CODE 6325–01

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–34189; File No. SR–DTC–94–06]

Self-Regulatory Organizations; The Depository Trust Company; Filing and Immediate Effectiveness of a Proposed Rule Change Relating to Enhancements to the Reorganization and Deposit Services

June 9, 1994.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on April 25, 1994, The Depository Trust Company ("DTC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change (File No. SR–DTC–94–06) as described in Items I, II, and III below, which items have been prepared primarily by DTC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of enhancements to the reorganization and deposit services of DTC.

II. Self-Regulatory Organization's Statement of the Propose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, DTC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. DTC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to permit DTC to enhance its reorganization and deposit services. DTC-eligible securities may become the subject of reorganization activities including maturities, full and partial calls, and mandatory actions such as mergers and reverse splits. When a security becomes the subject of a reorganization, DTC presents the certificates for that security on deposit at DTC to the issuer's agent and collects the proceeds of the reorganization activity (either cash or new securities) for credit participants' accounts.

Under its current procedures, DTC ceases to accept deposits of a security when it becomes the subject of a reorganization activity. For example, deposit services terminate upon DTC's receipt of a notice of a full call or thirty business days prior to the maturity date of a debt issue. After DTC's deposit services terminate for a security which is the subject of a reorganization activity, participants sometimes receive certificates for the security from their customers. The participants must then bear the operational burden of presenting the certificates to the issuer's agent and collecting the proceeds.

DTC is enhancing its reorganization and depository services in order to offer its participants the Reorg Deposits Service. The Reorg Deposits Service will enable participants to deposit at DTC certificates for securities for up to two years after the reorganization activity and to have DTC collect the proceeds on their behalf. Cash proceeds will be credited to participants upon DTC's receipt of the funds. Proceeds which are a DTC-eligible security usually will be credited to participants at the time of deposit.

The Reorg Deposits Service will be implemented first for full calls and maturing securities and later for partial calls and mandatory actions. A separate fee for the Reorg Deposits Service may be established in the future.

The proposed rule change is consistent with the requirements of Section 17A of the Act and the rules and regulations thereunder applicable to DTC because the proposed rule change will contribute to efficiencies in the handling of securities which are the subject of reorganization activities. The proposed rule change is consistent with DTC's obligation to safeguard securities and funds in its custody or control or for which it is responsible because the proposed rule change will be implemented consistently with DTC's other safeguarding procedures.

B. Self-Regulatory Organization's Statement on Burden on Competition

DTC does not believe that the proposed rule change will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

DTC has discussed and tested the proposed rule change with a small number of participants. Written comments from DTC participants or others have not been solicited or received on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective on filing pursuant to Section 19(b)(3)(A)(iii)[2] of the Act and pursuant to Rule 19b–4(e)(4)[3] promulgated thereunder because the proposed rule change effects a change in an existing service at DTC that does not adversely affect DTC's obligation to safeguard securities and funds and does not significantly affect the rights or obligations of DTC or persons using the service. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purpose of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of DTC. All submissions should refer to File No. SR–DTC–94–06 and should be submitted by July 6, 1994.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[4]

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34–34187; File No. SR–MCC–93–09]

Self-Regulatory Organizations; Midwest Clearing Corporation; Order Approving Proposed Rule Change Amending the Definition of Settlement Price

June 9, 1994.

On December 23, 1993, the Midwest Clearing Corporation ("MCC") filed a proposed rule change (File No. SR–MCC–93–09) with the Securities and Exchange Commission ("Commission") pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act").[1] Notice of the proposals was published in the **Federal Register** on March 7, 1994.[2] No comments were received by the Commission. This order approves the proposal.

I. Description of the Proposal

The rule change amends MCC's definition of the term "settlement price," which is set forth in Article I, Rule 1 of MCC's Rules. In essence, the amended rule now provides that the settlement price shall be the closing price or the last sale price on the business day prior to the day such price is used, but where no closing price or last sale price is available for the prior business day, the settlement price shall be a price which MCC deems appropriate.

II. Discussion

The Commission believes that the proposal is consistent with the Act and particularly with Section 17A of the Act.[3] Section 17A(b)(3)(F) of the Act requires that the rules of clearing agencies be designed to foster cooperation and coordination with persons engaged in the clearance and settlement of securities transactions and to remove impediments to and perfect the mechanism of a national market system for the clearance and settlement of securities transactions.[4]

The term settlement price is used by MCC and other clearing agencies to determine daily mark-to-market credits or debits and to value settling trades. Accordingly, the definition of settlement price should be uniform among clearing corporations in order for interfaces between them to function smoothly in the settlement of transactions. This rule change, in conjunction with a recent rule change to the rules of the National Securities Clearing Corporation ("NSCC"), will conform MCC's definition of settlement price to NSCC's definition of that term.[5] Consequently, the Commission believes that this technical rule change will foster cooperation and coordination and will help perfect the national clearance and settlement system and, therefore, is consistent with the Act.

III. Conclusion

For the reasons discussed above, the Commission believes that the proposal is consistent with the requirements of the Act, particularly with Section 17A of the Act, and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[6] that the above-mentioned proposed rule change (File No. SR–MCC–93–09) be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[7]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 94–14529 Filed 6–14–94; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–34188; File No. SR–MSTC–93–13]

Self-Regulatory Organizations; Midwest Securities Trust Company; Order Approving Proposed Rule Change to Rescind Signature Distribution and Signature Guarantee Programs

June 9, 1994.

On December 15, 1993, the Midwest Securities Trust Company ("MSTC") filed a proposed rule change (File No. SR–MSTC–93–13) with the Securities and Exchange Commission ("Commission") pursuant to Section 19(b) of the Securities Exchange Act of 1934 ("Act").[1] Notice of the proposal was published in the **Federal Register** on March 3, 1994, to solicit comments from interested persons.[2] No comments have been received by the Commission. This order approves the proposal.

I. Description of the Proposal

On January 6, 1992, the Commission promulgated Securities Exchange Act Rule 17Ad–15.[3] That rule permits transfer agents to reject signature guarantees from eligible guarantor institutions if the eligible guarantor institutions are not part of a signature guarantee program, as defined in Rule 17Ad–15. Additionally, the new rule renders obsolete the MSTC's existing Signature Guarantee Program (MSTC Rules, Article III, Rule 5, Section 1) and MSTC's existing Signature Guarantee Program (MSTC Rules, Article III, Rule 5, Section 2). Therefore, to avoid costs that produce no benefits, MSTC seeks to eliminate its Signature Distribution and Signature Guarantee Programs and to delete from its Rules Article III, Rule 5, Sections 1 and 2 which govern these programs.

II. Discussion

The Commission believes that the proposal is consistent with the Act and particularly with Section 17A of the Act.[4] Sections 17A(b)(3)(A) and (F) of the Act[5] require that a clearing agency be organized and its rules be designed to facilitate the prompt and accurate clearance and settlement of securities transactions. Moreover, Section 17A(a)(1) of the Act[6] calls for the use of efficient, effective, and safe procedures in the clearance and settlement of securities transactions.

The proposed rule change rescinds MSTC's Signature Distribution and Signature Guarantee Programs, two programs which have been rendered obsolete by the Commission's adoption of Rule 17Ad–15. The Commission agrees with MSTC that it would be wasteful and inefficient for a clearing agency to have to maintain such obsolete programs. The Commission believes that MSTC's rescission of the two programs and their related rules will facilitate prompt and accurate clearnace and settlement of securities transactions by making MSTC, its rules, and its procedures more efficient and effective.

III. Conclusion

For the reasons discussed above, the Commission believes that the proposal is consistent with the requirements of the Act, particularly with those of Section 17A of the Act, and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[7] that the above-mentioned proposed rule change (File No. SR–MSTC–93–13) be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[8]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 94–14530 Filed 6–14–94; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–34178; File No. SR–PTC–94–02]

Self-Regulatory Organizations; Participants Trust Company; Filing and Immediate Effectiveness of Proposed Rule Change Relating to a Modification of Fees

June 8, 1994.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on June 3, 1994, the Participants Trust Company ("PTC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change (File No. SR–PTC–94–02) as described in Items I, II, and III below, which Items have been prepared primarily by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change reduces fees for four PTC services. The modified fees will be effective July 1, 1994.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to amend PTC's schedule of fees to reduce fees for four PTC services specifically Account Maintenance, Book-entry Delivery and Receipt of Securities and Funds, Repo Movements, and Deposits. The modified fees will be effective July 1, 1994.

PTC believes that the amounts of the fees are appropriate based on PTC's projected earnings and expenses and its program to provide rebates to participants to the level required to

cover the variability in transaction volume.

PTC believes that the proposed rule change is consistent with Section 17A(B)(3)(D) of the Act,[2] and the rules and regulations thereunder, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among its participants.

(B) Self-Regulatory Organization's Statements on Burden on Competition

PTC does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

PTC has not solicited comments with respect to the proposed rule change, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b–4 thereunder, because the proposed rule change establishes a due, fee, or other charge imposed by the self-regulatory organization. At any time within 60 days of the filing of such rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of PTC. All submissions should refer to File No. SR–PTC–94–02 and should be submitted by July 6, 1994.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[3]

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34–34180; File No. SR–PHLX–94–27]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by the Philadelphia Stock Exchange, Inc., Relating to Revised Index Option Transaction Value Charges

June 8, 1994.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 25, 1994, the Philadelphia Stock Exchange, Inc. ("PHLX") or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission in publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Currently, the option transaction value charge for customer orders with options premiums of less than $1.00 is $.15 per contract and $.30 per contract for customer orders with premium values of $1.00 or more. The option transaction value charge for firms is $.06 per contract. The PHLX proposes to amend its schedule of dues, fees, and charges for options transactions to provide the following index option transaction value charges: $.20 per contract for customer orders with premium values of less than $1.00; $.40 per contract for customer orders with premium values of $1.00 or more; and $.10 per contract for firms. The revised index option transaction value charges do not apply to Value Line Index ("VLE") options.

The text of the proposed rule change is available at the Office of the Secretary, PHLX, and at the Commission.

[3] 17 C.F.R. 200.30–3(a)(12).

II. Self-Regulatory Organizations: Statement of the Purpose of, and Statutory Basis For, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The PHLX proposed to amend its schedule of dues, fees and charges for the transaction of business on the PHLX's options floor, specifically the index option transaction value charge. Effective at the opening of business on Tuesday, May 31, 1994, the PHLX proposes to adopt the following index option transaction value charges; $.20 per contract for customer orders with premium market values of less than $1.00; $.40 per contract for customer orders with premium market values of $1.00 or more; and $.10 per contract for firms. The revised schedule does not apply to VLE options.

The PHLX states that the revised index option transaction value charges are more reflective of the PHLX's cost of conducting business, including the support of the computation and dissemination of respective index values to market participants. The PHLX states that the proposal presents a fee structure designed to be more reflective of the actual cost of supporting the index options traded on the PHLX. In addition, the PHLX states that the revised index option transaction value charges are competitive with the rates charged by the other options market centers and substantially correspond to the existing charges for PHLX VLE options.

The PHLX believes that the proposal is consistent with Section 6(b) of the Act, in general, and, in particular, with Section 6(B)(4), in that it provides for the equitable allocation of reasonable dues, fees and other charges among its members and other persons using the Exchange's facilities.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The PHLX does not believe that the proposed rule change will impose any inappropriate burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change establishes or changes a due, fee or other charge imposed by the Exchange, it has become effective pursuant to Section 19(b)(3)(A) of the Act and subparagraph(e) of rule 19b–4 thereunder. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by July 6, 1994.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[1]

BILLING CODE 8010–01–M

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges; Notice and Opportunity for Hearing; Philadelphia Stock Exchange, Inc.

June 9, 1994.

The above named national securities exchange has filed applications with the Securities and Exchange Commission ("Commission") pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule12f-1 thereunder for unlisted trading privileges in the following securities:

Stephan Company
Common Stock, $.01 Par Value (File No. 7–12503)
NorAm Energy Corporation
$3.00 Conv. Exchangeable Preferred Stock, Series A (File No. 7–12504)
Blyth Industries, Inc.
Common Stock, $.02 Par Value (File No. 7–12505)
Grupo Industrial Maseca S.A. de C.V.
American depositary Shares, No Par Value (File No. 7–12506)
Morgan Stanley Global Opportunities Bond Fund, Inc.
Common Stock, $.01 Par Value (File No. 7–12507)
Beacon Properties Corporation
Common Stock, $.01 Par Value (File No. 7–12508)
Republic New York Corporation
Dep. Shares each Representing ¼th of a share of Adj. Rate Cum. Pfd. Stock Series D (File No. 7–12509)
Mikasa, Inc.
Common Stock, $.01 Par Value (File No. 7–12510)
Alert Centre, Inc.
Common Stock, $.01 Par Value (File No. 7–12511)
Alert Centre, Inc.
Purchase Warrants (File No. 7–12512)
Atlantis Group, Inc.
Class A Common stock, $.01 Par Value (File No. 7–12513)
Banco O'Higgins
American Depositary Shares Each Representing Six Shares of Common Stock, No Par Value (File No. 7–12514)
U.S. Delivery Systems, Inc.
Common Stock, $.01 Par Value (File No. 7–12515)
Digital Communications Technology Corporation
Common stock, $.01 Par Value (File No. 7–12516)
Citicorp
Dep. Shares Each Representing 1/10th of a share of Adj. Rate Cum. Pfd. Stock (File No. 7–12517)

These securities are listed and registered on one or more other national securities exchanges and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before June 30, 1994, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC-20347; 812-8956]

Liberty All-Star Equity Fund, et al.; Notice of Application

June 8, 1994.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "Act").

APPLICANTS: Liberty All-Star Equity Fund ("All-Star") and Liberty Asset Management Company ("LAMCO"), on behalf of themselves and present and future sub-advisers of All-Star.

RELEVANT ACT SECTIONS: Conditional order required under section 6(c) for an exemption from section 15(a) of the Act.

SUMMARY OF APPLICATION: Applicants request an order amending an existing order that permits LAMCO to hire and fire sub-advisers for All-Star, and delay shareholder approval of the subadvisory contracts until All-Star's next annual meeting of shareholders. The amended order would extend that relief so that, in the event of an "assignment," as that term is defined in section 2(a) (4) of the Act, of a subadvisory agreement, the parties could enter into a new subadvisory agreement and delay shareholder approval until All-Star's next annual meeting of shareholders.

FILING DATE: The application was filed on April 25, 1994.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be

issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on July 5, 1994, and should be accompanied by proof of service on the applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicants, Federal Reserve Plaza, Boston, Massachusetts, 02210.

FOR FURTHER INFORMATION CONTACT: Fran Pollack-Matz, Senior Attorney, at (202) 942-0570, or C. David Messman, Branch Chief, at (202) 942-0564 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applications' Representations

1. All-Star is a closed-end diversified management investment company. LAMCO is a registered investment adviser and an indirect wholly-owned subsidiary of Liberty Financial Companies, Inc. ("LFC"). LFC is an indirect wholly-owned subsidiary of Liberty Mutual Insurance Company.

2. All-Star employs a multi-manager methodology of portfolio management. It allocates its investment portfolio on an approximately equal basis among several independent investment management firms ("Sub-Advisers") selected and recommended by LAMCO based on specific criteria, including a sufficient diversity and breadth of investment styles. None of the Sub-Advisers have any affiliation with All-Star or LAMCO other than as Sub-Adviser.

3. All-Star and LAMCO received an order that permits LAMCO to hire and fire Sub-Advisers for All-Star and to delay shareholder approval of such subadvisory agreements until All-Star's next annual meeting of shareholders ("Order").[1] Applicants reaffirm all of the representations made in the original application, as amended, for the Order.

4. All-Star and LAMCO seek to amend the Order so that, in addition to the relief granted by the Order, in the event of a sale of assets, merger or transfer of voting securities of a Sub-Adviser or other transaction constituting an "assignment," as that term is defined in section 2(a)(4) of the Act, of All-Star's subadvisory agreement with that Sub-Adviser, All-Star, LAMCO, and that Sub-Adviser or its successor could enter into a new subadvisory agreement and delay shareholder approval of such agreement until All-Star's next annual meeting of shareholders.

Applicants' Legal Analysis

1. Section 15(a) makes it unlawful for any person to act as an investment adviser to a registered investment company except pursuant to a written contract, whether with such registered company or with an investment adviser of such registered company, which has been approved by the vote of a majority of the outstanding voting securities of such registered company and which precisely describes all compensation to be paid thereunder.

2. Section 15(a) (4) also requires that the investment advisory contract provide, in substance, for its automatic termination in the event of its assignment. "Assignment" is defined in section 2 (a) (4) to include any direct or indirect transfer of a contract by the assignor, or of a controlling block of the assignor's outstanding voting securities by a security holder of the assignor.

3. Rule 15a–4 permits an investment adviser to an investment company to act under an agreement not approved by shareholders for up to 120 days after the terminations of an investment advisory agreement by an event (other than by an assignment by an investment adviser in connection with which such investment adviser, or a controlling person thereof, directly or indirectly receives money or other benefit) described in paragraphs (3) and (4) of section 15(a) of the Act or by failure to renew such contract. Rule 15a-4 does not provide adequate relief to All-Star because All-Star is seeking to delay a shareholder vote in the event that a change in a Sub-Adviser occurs as the result of an "assignment" in which an investment adviser (*i.e.*, the Sub-Adviser) receives an economic benefit.

4. Applicants assert that because of the lack of affiliation between LAMCO and the Sub-Advisers (unlike conventionally structured single-manager investment companies), LAMCO has no interest other than the efficient and effective functioning of All-Star's multi-manager methodology and the enhancement of All-Star's investment performance when recommending the replacement or addition of a Sub-Adviser. Applicants represent that neither LAMCO nor any of its affiliates will be parties to the acquisition or other transaction giving rise to the termination and assignment of the subadvisory agreement or receive any economic benefit in connection with such transaction.

5. Applicants believe that the SEC excluded assignments in which the investment adviser receives an economic benefit from the exemption provided by rule 15a–4 because such assignments are reasonably foreseeable. Applicants state that LAMCO has no affiliation with All-Star's Sub-Advisers and has no control or influence over the timing of possible transfers of controlling interests in them or other transactions that may result in technical assignment and termination of their subadvisory agreements with All-Star.

6. Section 6(c) authorizes the Commission to exempt persons or transactions from the provisions of the Act to the extent that such exemptions are appropriate in the public interest and consistent with the protection of investors and the policies and purposes fairly intended by the policies and provisions of the Act. Applicants submit that the requested amendment to the exemption from section 15(a) of the Act granted by the existing Order would be consistent with the standards set forth in section 6(c) of the Act and would be in the best interests of All-Star and its shareholders.

Applicants' Conditions

Applicants agree that any order granting the requested relief shall be subject to the following conditions:

1. Each new subadvisory agreement will be submitted for ratification and approval to the vote of All-Star's shareholders no later than at the regularly scheduled annual meeting of shareholders of All-Star next following the effective date of the new agreement, and its continuance after such meeting will be conditioned on approval by the required majority vote of such shareholders.

2. All-Star will continue to hold annual meetings of its shareholders, whether or not required to do so by the rules of the New York Stock Exchange, Inc. or otherwise.

3. The trustees of All-Star, in addition to approving the new subadvisory agreement in accordance with the requirements of section 15(c) of the Act, will specifically determine that entering into a subadvisory agreement with the new or additional Sub-Adviser in advance of the next regular annual meeting of shareholders of All-Star and

[1] Investment Company Act Release Nos 19436 (April 27, 1993) (notice) and 19491 (May 25, 1993) (order).

without prior shareholders approval is in furtherance of All-Star's multi-manager methodology and is in the best interest of All-Star and its shareholders.

4. The new subadvisory agreement involved will, when entered into, affect no more than 25% of All-Star's assets.

5. The new Sub-Adviser will have no affiliation with All-Star or LAMCO other than as Sub-Adviser, and will have no duties or responsibilities with respect to All-Star beyond the investment management of the portion of All-Star's portfolio assets allocated to it by LAMCO from time to time and related record keeping and reporting.

6. The new subadvisory agreement will provide for a subadvisory fee no higher than that provided in All-Star's existing subadvisory agreements, and, except for the provisions relating to shareholder approval referred to in condition 1, will be on substantially the same other terms and conditions as such existing agreements, and, if the new subadvisory agreement provides for subadvisory fees at rates less than those provided in the existing subadvisory agreements, the difference will be passed on to All-Star and its shareholders through a corresponding voluntary reduction in the fund management fee payable by All-Star to LAMCO.

7. The appointment of the new Sub-Adviser will be announced by press release promptly following the trustees' action referred to in condition 3 above, and a notice of the new subadvisory agreement, together with a description of the new Sub-Adviser, will be included in All-Star's next report to shareholders.

8. LAMCO will provide general management and administrative services to All-Star, including overall supervisory responsibility for the general management and investment of all of All-Star's securities portfolio subject to All-Star's investment objectives and policies and any directions of All-Star's Trustees. In particular, LAMCO will (i) provide overall investment programs and strategies for All-Star, (ii) recommend to All-Star's Trustees investment management firms for appointment or replacement as All-Star Sub-Advisers, (iii) allocate and reallocate All-Star's portfolio assets among the Sub-Advisers, and (iv) monitor and evaluate the investment performance of the Sub-Advisers, including their compliance with All-Star's investment objectives, policies and restrictions.

9. LAMCO or the Sub-Adviser (or successor Sub-Adviser) will pay the incremental cost of including the proposal to approve or disapprove the new subadvisory agreement in the proxy material for the next annual meeting of All-Star's shareholders.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. IC-20345; 812-8270]

The Variable Annuity Life Insurance Company et al.

June 8, 1994.

AGENCY: Securities and Exchange Commission (the "SEC" or "Commission").

ACTION: Notice of application for exemptions under the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: The Variable Annuity Life Insurance Company ("VALIC"), Separate Account A of The Variable Annuity Life Insurance Company (the "Account"), any other separate account established by VALIC in the future to support certain variable annuity contracts issued by VALIC ("Other Account"; together with the Account, the "Separate Account," unless the context otherwise requires), and The Variable Annuity Marketing Company ("VAMCO").

RELEVANT 1940 ACT SECTIONS: Order requested under section 6(c) under the 1940 Act for exemptions from sections 22(e), 26(a)(2)(C), 27(c)(1), 27(c)(2), and 27(d).

SUMMARY OF APPLICATION: Applicants seek an order to permit (a) the deduction of a mortality and expense risk charge from the assets of the Account in connection with the offering of certain variable annuity contracts and from any Other Account that offers variable annuity contracts that are similar in all material respects to contracts offered by the Account, and (b) the Account and the Other Accounts to comply with redeemability restrictions imposed by the Optional Retirement Program of the State University System of Florida ("Florida ORP") as administered by the Division of Retirement of the Florida Department of Management Services ("Retirement Division"), in connection with the proposed offering of certain variable annuity contracts by the Account and the proposed offering by any Other Account of contracts similar in all material respects to those offered by the Account.

FILING DATES: The application was filed on February 14, 1994 and amended on April 20, 1994 and June 3, 1994.

HEARING OR NOTIFICATION OF HEARING: An order granting the Application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving Applicants with a copy of the request, personally or by mail. Hearing requests must be received by the SEC by 5:30 p.m. on July 5, 1994, and must be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reasons for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549. Applicants, 2929 Allen Parkway, P.O. Box 3206, Houston, Texas 77019.

FOR FURTHER INFORMATION CONTACT: C. Christopher Sprague, Senior Staff Attorney, at (202) 942-0670, or Michael V. Wible, Special Counsel, at (202) 942-0670, Office of Insurance Products, Division of Investment Management.

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application is available for a fee from the Commission's Public Reference Branch.

Applicants' Representations

1. VALIC is a stock life insurance company organized under the laws of the State of Texas as the successor to Variable Annuity Life Insurance Company of America, a District of Columbia life insurance company organized in 1955. VALIC transacts business in all 50 states and the District of Columbia, and has total assets exceeding $20 billion. VALIC is an indirect wholly-owned subsidiary of American General Corporation, a Texas corporation. VALIC serves as sponsor and depositor of the Account. It also serves as the investment adviser of American General Series Portfolio Company (the "Series Company"), a diversified, open-end management investment company registered under the 1940 Act. Shares of the Series Company are purchased by divisions of the Account. VALIC may establish one or more Other Accounts in the future, for which it will serve as sponsor and depositor.

2. The Account is a segregated asset account of VALIC. It was established under the Texas Insurance Code on April 18, 1979, pursuant to a resolution of VALIC's Board of Directors. The Account is registered with the Commission as a unit investment trust. That portion of the assets of the Account equal to the reserves and other contract liabilities of the Account is not chargeable with liabilities arising out of any other business VALIC may conduct. Any income, gains or losses, realized or unrealized, from assets allocated to the Account are credited to or charged against the Account without regard to other income, gains or losses of VALIC. The Account currently funds forms of variable annuity contracts that are offered by VALIC (the "Existing Contracts"). VALIC recently registered certain new forms of variable annuity contracts (the "Account Contracts") funded by the Account. The exemptions requested with respect to the operation of the Florida ORP and the mortality and expense risk charge would apply to the Account Contracts issued by the Account, to contracts offered by the Account on a basis that is similar in all material respects to the basis on which the Account Contracts are offered (the "Other Contracts"; together with the Account Contracts, the "Contracts," unless the context otherwise requires), and to Other Contracts issued by Other Accounts.

3. The Account is subdivided into several divisions, each of which invests, or will invest, solely in the shares of a mutual fund. In each case, the mutual fund will be a diversified, open-end, management investment company registered under the 1940 Act, shares of which are registered under the Securities Act of 1933. VALIC serves as investment adviser to the Series Company but does not advise certain other underlying mutual funds that sell their shares to the Account. At a later date, VALIC may determine to create one or more additional or replacement divisions of the Account to invest in mutual funds or portfolios thereof that may now or in the future be available. Similarly, divisions may be combined or eliminated from time-to-time. Applicants request that any order the Commission issues in response to this Application be deemed to apply under any such circumstances.

4. VAMCO is a wholly-owned subsidiary of VALIC. It will be the principal underwriter of the Account Contracts. VAMCO is the principal underwriter of the Existing Contracts. VAMCO may act as principal underwriter for any Other Contracts issued by VALIC in the future. VAMCO is registered with the Commission as a broker-dealer under the Securities Exchange Act of 1934, and is a member of the National Association of Securities Dealers, Inc.

5. The Contracts are designed to provide benefits under retirement programs that qualify for favorable tax deferred treatment under the Internal Revenue Code of 1986, as amended (the "Code"); they may also be used to provide retirement benefits on a non-tax deferred basis. The Contracts will be offered in group and individual form, on an immediate and deferred annuity basis. The initial and subsequent purchase payments for a periodic payment Contract must be at least $30. For single payment Contracts, the minimum purchase payment is $1,000 for each annuitant. VALIC may waive these minimum payment requirements where one purchaser, such as an employer, purchases a number of Contracts. Purchase payments under the Contracts are accumulated before retirement, and annuity benefits are received after retirement, on a variable basis through use of the Separate Account.

6. VALIC proposes to receive compensation for assuming certain mortality and expense risks under the Account Contracts by deducting, from the assets of the Separate Account, daily asset charges for such risks. VALIC will assume several mortality risks under the Account Contracts. First, VALIC will assume a mortality risk by its contractual obligation to pay a death benefit to the beneficiary if the annuitant under an Account Contract dies during the accumulation period. Generally speaking, the Account Contracts provide a death benefit that is guaranteed to be the greater of the accumulation value under the Account Contract or the sum of the purchase payments, less withdrawals, plus, if the annuitant dies before age 70, interest at an annual rate of 3%. Thus, VALIC assumes the risk that the annuitant may die during the accumulation period at a time when the death benefit guaranteed by the Account Contract may be higher than the accumulation value. Second, VALIC will assume a mortality risk arising from the fact that the Account Contract does not impose any surrender charge on the death benefit. Third, VALIC will assume an additional mortality risk by its contractual obligation to continue to make annuity payments for the entire life of the annuitant under annuity options involving life contingencies. This assures each annuitant that neither the annuitant's own longevity nor an improvement in life expectancy generally will have an adverse effect on the annuity payments received under an Account Contract and relieves the annuitant from the risk of outliving the amounts accumulated for retirement. At the same time, VALIC assumes the risk that annuitants as a group will live a longer time than VALIC's annuity tables predict, which would require VALIC to pay out more in annuity income than it planned. Fourth, VALIC will assume an additional mortality risk under its annuity purchase rate tables which are guaranteed for the life of an Account Contract. The tables contained in the Account Contracts are based on the 1983 TABLE A annuity table and, for variable annuity options, assumed interest rates of 3%, 3½%, 4½% and 5%, respectively.

7. In addition to mortality risks, VALIC will assume an expense risk under the Account Contracts. This is because the maintenance charge, described below, deducted under the Account Contracts to cover administrative expenses is not expected to be sufficient to cover the expenses actually incurred. Administrative expenses include such costs as processing purchase payments, annuity payments, surrenders and transfers; furnishing confirmation notices and periodic reports; calculating mortality and expense risk charges; preparing voting materials and tax reports; updating the registration statement for the Account Contracts; and actuarial and other expenses.

8. In order to receive compensation for assuming these mortality and expense risks, VALIC will assess each division of the Account a daily charge for mortality and expense risks at an annual aggregate rate of not less than 1.00% nor more than 1.25%. Under the Account Contracts, .80% of the annual charge will, in the case of each division, be allocated to the mortality risks that VALIC will assume. With respect to divisions that purchase shares of an investment portfolio of the Series Company, for which VALIC serves as investment adviser ("Inside Funds"), the expense risk component of that charge is .20%; as to divisions that purchase shares of a mutual fund, or a series thereof, for which VALIC does not serve as investment adviser ("Wrapped Funds"), the expense risk component is .45%. VALIC earns an advisory fee in connection with its responsibilities as investment adviser to the Series Company, the proceeds of which are deposited in VALIC's general account. General obligations of VALIC, including any expenses incurred for administering the Account Contracts that exceed revenues from the fixed maintenance charge, are funded from VALIC's general account. The additional revenues generated from VALIC's investment advisory activities with regard to the

Inside Funds thereby reduce the magnitude of risk that VALIC's expenses of administering the Account Contracts will exceed revenues. This additional source of revenue is not available for investments in divisions investing in Wrapped Funds. Because VALIC experiences less risk to the extent it can depend on revenues from its investment advisory activities, with regard to investments in divisions investing in Inside Funds, it is able to impose a lower expense risk charge to those divisions than to the divisions investing in Wrapped Funds.

9. Under the terms of the Account Contracts, the mortality and expense risk charge is fixed and may not be increased by VALIC. The group Account Contract provides that it may be changed by VALIC, subject to applicable regulatory requirements, upon written notice to the owner of the Account Contract. However, any change will only apply to individuals who become participants under the group Account Contract after the effective date of a change. Purchase payments received by VALIC from participants or owners existing on the effective date of a change would not be affected by the change, and would continue to be subject to the same charges as were applicable prior to the change. Thus, VALIC will continue to assume the mortality and expense risks, described above, based on the charge in effect before the change. Although the group Account Contract also provides that VALIC may, at its discretion and upon notice, curtail or prohibit new participants, VALIC will continue to assume the mortality and expense risks, described above, with respect to existing participants and their purchase payments, including future purchase payments, held under a group Account Contract.

10. If the mortality and expense risk charge is insufficient to cover the expenses and costs assumed, the loss will be borne by VALIC. Conversely, if the amounts deducted from the mortality and expense risk charge prove more than sufficient, the excess will be profit to VALIC. VALIC does not expect to earn a profit from that portion of the mortality and expense risk charge which is for the expense risk. It does, however, expect to derive a profit from the mortality risk charge. To the extent that the surrender charge, described below, is insufficient to cover the actual costs of distribution, the expenses will be paid from VALIC's general account assets, which will include profit, if any, derived from the mortality and expense risk charge.

11. No front-end sales charge will be imposed when purchase payments are applied under the Account Contracts. However, a surrender charge may be assessed if the Account Contract is surrendered, or a partial surrender or withdrawal is made. The surrender charge is 5% of (a) the amount of the preceding 60 months' purchase payments being withdrawn, or (b) the amount withdrawn, whichever is less. For purposes of the charge, withdrawals are treated as withdrawals of purchase payments before any earnings, and the most recent purchase payments are treated as being withdrawn first. The amounts obtained from the surrender charge will be used to help defray expenses incurred in of the sale of the Account Contracts, including commissions and other promotional or distribution expenses associated with the printing and distribution of prospectuses and sales literature. The surrender charge is waived under certain circumstances.

12. The maintenance charge to be assessed under each Account Contract will be an annual charge of $15, deducted in quarterly installments in each quarter during which amounts are credited to any variable investment option. The charge will be deducted at the end of the calender quarter, and at the time of any surrender of the Account Contract or transfer of all of such accumulation values to a fixed interest option. The maintenance charge may be waived or reduced uniformly on all Account Contracts issued under certain plans or arrangements which are expected to result in administrative cost savings. The maintenance charge is guaranteed not to increase over the life of an Account Contract.

13. Under Contracts subject to a premium tax, the amount of the tax may be deducted, either from purchase payments when received, or from the amount applied to effect any annuity at the time annuity payments commence, depending on applicable law. Premium taxes ranging from zero to 3% are currently imposed by certain states and municipalities on purchase payments made under the Contracts. VALIC will not make a profit on premium taxes.

14. The Florida ORP is a defined contribution plan designed to provide retirement and death benefits to participants through individual or group annuity contracts, which may be fixed or variable, or combination fixed and variable. The Florida ORP is available to certain faculty members within the State University System of Florida (the "Florida University System"), as well as to persons holding certain administrative and professional staff positions within the Florida University System (collectively, "Eligible Employees" or "Participants"). The Florida ORP is an alternative to the Florida Retirement System, a defined benefit retirement plan, and Eligible Employees have the option of participating in the Florida Retirement System or the Florida ORP. A statutory presumption deems any employee who becomes eligible to participate on or after January 1, 1993 to have elected to participate in the Florida ORP, unless such employee specifically elects membership in the Florida Retirement System.

15. Under the Florida ORP, the universities in the Florida University System provide for employee retirement benefits by contributing a percentage of each Participant's gross compensation regardless of service to purchase an annuity when the employee retires. The Retirement Division designates companies from which annuity contracts may be purchased under the Florida ORP.

16. Participants in the Florida ORP may themselves contribute, by way of salary reduction, a percentage of their respective gross compensation (not to exceed the percentage amount contributed by the employer). Payments of Participant contributions are made by the financial officer of the employer to the Retirement Division, which in turn forwards the contributions to the designated company or companies contracting for payment of benefits for the Participant under the Florida ORP.

17. The Retirement Division prohibits distributions of employer contributions under the Florida ORP to a Participant on a lump sum basis (other than upon the Participant's death) or exclusively on the basis of a period certain. These restrictions apply only to employer contributions and do not limit access to Participant contributions. Participants are also free to transfer both employer and Participant contributions among the available fixed or variable investment options and to substitute entirely a qualified contract offered by any of the other companies designated under the Florida ORP.

18. In order to offer the Contracts under the Florida ORP, the Contracts, with respect to accumulations based on employer contributions, will provide that: (a) Benefits based on employer contributions are payable only upon the Participant's death, retirement or termination of employment (as defined in Section 121.021(3) of the Florida Statutes); (b) benefit payments will not be made based solely on a period certain; (c) accumulations based on employer contributions are not subject to withdrawal or surrender and may not be rolled over other than to a designated company or companies contracting for payment of benefits under the Florida ORP; and (d) accumulations are not subject to loan, assignment, execution or attachment.

Applicants' Legal Analysis

1. Applicants respectfully request that the Commission, pursuant to section 6(c) of the 1940 Act, grant the exemptions from (a) sections 26(a)(2)(C) and 27 (c)(2) of the 1940 Act in connection with Applicants' assessment of a charge for mortality and expense risks under the Contracts, and (b) sections 22(e), 27(c)(1), and 27(d) to the extent necessary to permit compliance with the Florida ORP as administered by the Retirement Division, with respect to the Contracts. Applicants believe, based on the grounds set out below, that the requested exemptions meet the standards of section 6(c) of the 1940 Act. Applicants believe that the terms of the relief requested with respect to any Other Contracts funded by the Account or any Other Account, in the future, are consistent with the standards enumerated in section 6(c) of the 1940 Act. Without the requested relief, Applicants would have to request and obtain exemptive relief in connection with Other Contracts to the extent required. Any such additional request for exemption would present no issues under the 1940 Act that have not already been addressed in this Application. Applicants submit that the requested relief is appropriate in the public interest, because it would promote competitiveness in the variable annuity contract market by eliminating the need for VALIC to file redundant exemptive applications, thereby reducing its administrative expenses and maximizing the efficient use of its resources. The delay and expense involved in having to repeatedly seek expemptive relief would impair VALIC's ability to effectively take advantage of business opportunities as they arise.

2. Applicants further submit that the requested relief is consistent with the purposes of the 1940 Act and the protection of investors for the same reasons. If VALIC were required to repeatedly seek exemptive relief with respect to the same issues addressed in this Application, investors would not receive any benefit or additional protection thereby. Indeed, they might be disadvantaged as a result of VALIC's increased overhead expenses. Thus, Applicants believe that the requested exemption is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

3. Sections 26(a)(2)(C) and 27(c)(2) of the 1940 Act prohibit a registered unit investment trust, and any depositor thereof or principal underwriter thereof, from selling periodic payment plan certificates unless the proceeds of all payments (except such amounts as are deducted for sales load) are deposited with a trustee or custodian having the qualifications prescribed by section 26(a)(1) of the 1940 Act and are held under an agreement that provides that no payment to the depositor or principal underwriter shall be allowed except as a fee, not exceeding such reasonable amount as the Commission may prescribe, for bookkeeping and other administrative services.

4. VALIC proposes to assess each division of the Separate Account with a daily charge for mortality and expense risks at the aggregate annual rates of not less than 1.00% nor more than 1.25%. Applicants represent that the levels of the mortality and expense risk charges are within the range of industry practice for comparable annuity contracts. Applicants state that they have reviewed publicly available information regarding products of other companies taking into consideration such factors as minimum death benefit guarantees, guaranteed annuity purchase rates, administrative fees, and the existence of charge level guarantees. Based upon this review, Applicants have concluded that the mortality and expense risk charge is within the range of charges determined by industry practice for comparable products. VALIC represents that it will maintain at its principal office, and make available on request to the Commission and its staff, a memorandum setting forth in detail the variable annuity products analyzed and the methodology and results of the aforesaid comparative review.

5. Applicants acknowledge that the surrender charge may be insufficient to cover all costs relating to the distribution of the Contracts and that, if a profit is realized from the mortality and expense risk charges, all or a portion of such profit may be offset by distribution expenses not reimbursed by the surrender charge. In such circumstances, a portion of the mortality and expense risk charge might be viewed as providing for a portion of the costs relating to distribution of the Contracts. Notwithstanding the foregoing, VALIC has concluded that there is a reasonable likelihood that the proposed distribution financing arrangements made with respect to the Contracts will benefit the Separate Account and Contract owners. VALIC represents that it will maintain at its principal office, and make available on request to the Commission and its staff, a memorandum setting out the basis for such conclusion.

6. Moreover, VALIC represents that the Separate Account will invest only in an underlying mutual fund that undertakes, in the event it should adopt any plan under Rule 12b–1 under the 1940 Act to finance distribution expenses, to have such plan formulated and approved by a board of directors, a majority of the members of which are not "interested persons" of such fund within the meaning of section 2(a)(19) of the 1940 Act.

7. Section 22(e) of the 1940 Act provides that "[n]o registered investment company shall suspend the right of redemption, or postpone the date of payment or satisfaction upon redemption of any redeemable security in accordance with its terms for more than seven days after the tender of such security to the company or its agent designated for that purpose for redemption," except in certain prescribed circumstances. Section 27(c)(1) of the 1940 Act makes it unlawful "for any registered investment company issuing periodic payment plan certificates, or for any depositor of or underwriter for such company, to sell any such certificate unless such certificate is a redeemable security." Section 27(d) of the 1940 Act makes it unlawful "for any registered investment company issuing periodic payment plan certificates, or for any depositor of or underwriter for such company, to sell any such certificate unless the certificate provides that the holder thereof may surrender the certificate at any time within the first eighteen months after the issuance of the certificate" and receive a specified amount.

8. Applicants request the exemptive relief from sections 22(e), 27(c)(1) and 27(d) of the 1940 Act to the extent necessary to permit compliance with the Florida ORP, as administered by the Retirement Division with respect to the Contracts.

9. The exemptive relief requested herein is consistent with Rule 6c–7 under the 1940 Act, which provides exemptions from sections 22(e), 27(c)(1) and 27(d) of the 1940 Act for registered separate accounts, and depositors of or underwriters for such separate accounts, to the extent necessary to permit compliance with certain restrictions on redemptions involving variable annuity contracts issued to certain employees participating in the Texas Optional Retirement Program ("Texas ORP").

10. The exemptive relief requested herein is also consistent with the position taken by the Commission staff in a letter to the American Council of Life Insurance ("ACLI") advising that the staff would not recommend enforcement action to the Commission if the registered separate accounts issuing variable annuity contracts as funding vehicles for retirement plans meeting the requirements of section 403(b) of the Code comply with the restrictions imposed by subsection (11) of that Section.

11. The Retirement Division's administration of the Florida ORP, and its requirement that annuity contracts specifically restrict certain rights of redemption, present a direct conflict with the 1940 Act's redemption provisions discussed above. The terms of the Contracts to be offered under the Florida ORP, as required by the Retirement Division, clearly permit payment of employer-contributed contract benefits only in the event of death, retirement, or termination of employment, and are substantially identical to the Texas ORP limitations.

12. The legislative purpose of the Florida ORP is similar to that of the statutes discussed above. In each case, the constraints on redeemability are designed to ensure that the annuity contract is used for the principal purpose of long-term retirement accumulation. Thus, without the exemptive relief requested, persons participating in the Florida ORP would be denied the opportunity to select the Contracts as a funding medium for their retirement benefits. Furthermore, the limited restrictions on redemption would be voluntarily assumed by Participants (*i.e.*, eligible Employees may elect not to participate in the Florida ORP), were not formulated or suggested by Applicants, and are reasonable in light of the benefits of participating in the Florida ORP. In addition, consistent with the precedents cited above, Participants are able to transfer their account values among the investment alternatives available under the Contracts (including the fixed alternative funded through the general account of VALIC) and to qualified contracts of other companies designated under the Florida ORP.

13. As explained above, the requested exemptive relief is substantially identical to that requested and obtained in connection with similar constraints on redeemability imposed by other governing authorities. Applicants submit that the relief requested herein raises no novel issues of law or fact.

14. Applicants will ensure that appropriate disclosure is made to Eligible Employees, informing them of the restrictions stated in the Florida ORP Contracts. Applicants represent that they will:

a. Include appropriate disclosure regarding the restrictions on redemption imposed by the Retirement Division in each registration statement, including the prospectus, relating to the Contracts issued in connection with the Florida ORP;

b. Include appropriate disclosure regarding the restrictions on redemption imposed by the Retirement Division in any sales literature used in connection with the offer of Contracts to Eligible Employees;

c. Instruct salespeople who solicit Eligible Employees to purchase the Contracts specifically to bring the restrictions on redemption imposed by the Retirement Division to the attention of the Eligible Employees;

d. Obtain from each Participant in the Florida ORP who purchases a Contract, prior to or at the time of such purchase, a signed statement acknowledging the Participant's understanding: (i) of the restrictions on redemption imposed by the Retirement Division, and (ii) that other investment alternatives are available under the Florida ORP, to which the Participant may elect to transfer his or her Contract values; and

e. Include in any registration statement filed in connection with the Contracts a representation that this exemptive application is being relied upon and that the provisions of paragraphs (a) through (d) above have been complied with.

Applicants' Conclusion

Applicants request exemptions, pursuant to section 6(c) of the 1940 Act, from (a) sections 26(a)(2)(C) and 27(c)(2) to the extent necessary to permit the assessment of the mortality and expense risk charges and (b) sections 22(e), 27(c)(1) and 27(d) to permit compliance with the Florida ORP as administered by the Retirement Division, with respect to the Contracts as discussed herein. Applicants submit, based on the grounds stated herein, that their exemptive request meets the standards set out in section 6(c) of the 1940 Act and that the Commission, therefore, should grant the requested order.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8025-01-M

[Application No. 99000122]

First Commerce Capital, Inc.; Filing of an Application for a License To Operate as a Small Business Investment Company

Notice is hereby given of the filing of an application with the Small Business Administration (SBA) pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1994)) by First Commerce Capital, Inc. at Suite 1027, 821 Gravier Street, New Commerce Capital, Inc. at Suite 1027, 821 Gravier Street, New Orleans, LA 70119, for a license to operate as a small business investment company (SBIC) under the Small Business Investment Act of 1958, as amended, (15 U.S.C. et. seq.), and the Rules and Regulations promulgated thereunder.

First Commerce Capital, Inc. will be managed by Mr. William J. Harper, President and CEO, and Mr. Paul F. Griffin, Senior Vice President, First Commerce Corporation, a Louisiana bank holding company, will own 100% of the common stock of First Commerce Capital, Inc. The officers and directors of First Commerce Capital, Inc. are:

Name	Title
Ian Arnof	Director.
Ashton J. Ryan	Director.

Name	Title
Joseph V. Wilson III ..	Director.
Michael A. Flick	Director.
William J. Harper	Director, President, and CEO.
Paul F. Griffin	Senior Vice President.
Michael P. Kirby	Vice President.
Elizabeth W. Storms .	Secretary.
Jane B. Truett	Treasurer.

All outside directors are officers of First Commerce Corporation.

The applicant will have Regulatory Capital of $5.0 million in the first year rising to $24.0 million in year five. It will be a source of debt and equity financing for qualified small business concerns throughout the United States concentrating primarily in states around the Gulf of Mexico.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including profitability and financial soundness in accordance with the Act and Regulations.

Notice is hereby given that any person may, not later than 30 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Associate Administrator for Investment, Small Business Administration, 409 3rd Street, SW., Washington, DC 20416.

A copy of this Notice will be published in a newspaper of general circulation in New Orleans, Louisiana.

BILLING CODE 8025–01–M

[Application Number: 99000107]

Chesapeake Capital Lending Fund, L.P.; Application for a License To Operate as a Small Business Investment Company

An application for a license to operate as a limited partnership small business investment company (SBIC) under the provisions of Section 301(c) of the Small Business Investment Act of 1958, as amended (Act) (15 U.S.C. 661, *et seq.*) has been filed by Chesapeake Capital Lending Fund, L.P. ("Applicant"), 629 E. Main Street, suite 1200, Richmond, Virginia 23219, with the Small Business Administration (SBA) pursuant to 13 CFR 107.102 (1994).

The partners and their respective partnership interest in the Applicant are as follows:

Name and address	Title	Partnership interest (percent)
Several Unidentified Corporations and/or Individuals.	Limited Partners (no limited partner will have greater than 10% interests).	70
CCLF, L.C., 629 E. Main Street, Suite 1200, Richmond, VA 23219.	General Partner	30

The proposed members and officers of CCLF, L.C., a limited liability company, are as follows:

Name and address	Position	Percentage of ownership
Charles E. Coudriet, 10221 Navarre Court, Richmond, VA 23233.	Member, President and Chief Executive Officer.	50
Carter Kaplan & Company, L.P. 629 E. Main Street, Suite 1200, Richmond, VA 23219.	Member	50
Robert R. Kaplan, 3808 Old Gun Road, West, Midlothian, VA 23113.	Chairman	0
William P. Carter, 2902 Fincastle Court, Midlothian, VA 23113.	Secretary-Treasurer.	0

CKC Advisors, L.C. is proposed to be the Applicant's Investment Advisor. The proposed members and officers of CKC Advisors, L.C., also a limited liability company, are as follows:

Name and address	Position	Percentage of ownership
Charles E. Coudriet, 10221 Navarre Court, Richmond, VA 23233.	Member, President and Chief Executive Officer.	50
Carter Kaplan & Company, L.P. 629 E. Main Street, Suite 1200, Richmond, VA 23219.	Member	50
Robert R. Kaplan, 3808 Old Gun Road, West, Midlothian, VA 23113.	Chairman	0
William P. Carter, 2902 Fincastle Court, Midlothian, VA 23113.	Executive Vice President.	0

The Applicant proposes to begin operations with a capitalization of $10,000,000 and will be a source of long-term loan funds for qualified small business concerns.

The Applicant intends to conduct its business operations primarily in the States of Maryland, North Carolina, Virginia and the District of Columbia.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owner and management, and the probability of successful operations of the Applicant under their management including profitability and financial soundness, in accordance with the Act and Regulations.

Notice is hereby given that any person may, no later than 30 days from the date of publication of this Notice, submit written comments on the proposed Applicant. Any such communication shall be addressed to the Associate Administrator for Investment, Small Business Administration, 409 Third Street, SW., Washington, DC 20416.

A copy of this notice will be published in a newspaper of general circulation in Richmond, Virginia.

[Application No. 99000093]

SBIC Partners, L.P.; Filing of an Application for a License To Operate as a Small Business Investment Company

Notice is hereby given of the filing of an application with the Small Business Administration (SBA) pursuant to Section 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1994)) by SBIC Partners, L.P., 201 Main Street, suite 2302, Fort Worth, Texas 76102, for a license to operate as a small business investment company (SBIC) under the Small Business Investment Act of 1958, as amended, (15 U.S.C. *et seq.*), and the Rules and Regulations promulgated thereunder. SBIC Partners, L.P. is a Texas limited partnership.

SBIC Partners, L.P. will have two general partners: Forrest Binkley & Brown Venture Co., the managing general partner, located at 201 Main Street, Fort Worth, Texas 76102; and FW–SBIC, Inc. located at 201 Main Street, Forth Worth, Texas 76102. The officers, directors, and owners of Forrest Binkley & Brown Venture Co. are:

Name	Title	Ownership (percent)
Gregory J. Forrest.	Co-President and Chairman.	33.3
Nicholas B. Binkley.	Co-President and Director.	33.3
Jeffrey J. Brown	Co-President, Secretary, and Director.	33.3

All these officers and directors have offices at 201 Main Street, Fort Worth, Texas 76102.

The officers, directors, and owners of FW–SBIC, Inc. are:

Name	Title	Ownership (percent)
William Hallman, Jr..	President and Director.	50
Peter Sterling ...	Chairman	50
W.R. Cotham ...	Vice President, Secretary, and Treasurer.	0

All these officers and directors have offices at 201 Main Street, Fort Worth, Texas 76102.

The following limited partners own or control 10 percent or more of the proposed SBIC's Regulatory Capital:

Name	Percentage of ownership
Michael Eisner, 500 South Buena Vista Street, Burbank, California 91521	27.2
Lee M. Bass, 201 Main Street, suite 3200, Fort Worth, Texas 76102	17.1
Alamo Partners, 201 Main Street, suite 3200, Fort Worth, Texas 76102	10.5

The following investor owns or controls 10 percent or more of the applicant's private capital: William Hallman, Jr., 201 Main Street, suite 3200, Fort Worth, Texas 76102.

The applicant has total committed capital of $30.0 million. It will be a source of debt and equity financings for qualified small business concerns, and will invest primarily in the states of Texas and California.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including profitability and financial soundness in accordance with the Act and Regulations.

Notice is hereby given that any person may, not later than 30 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Associate Administrator for Investment, Small Business Administration, 409 3rd Street, SW., Washington, DC 20416.

A copy of this Notice will be published in a newspaper of general circulation in Fort Worth, Texas.

BILLING CODE 8025–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Receipt of Noise Compatibility Program and Request for Review; Modesto City-County Airport (MOD) Modesto, CA

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces that it is reviewing a proposed Noise Compatibility Program that was submitted by the City of Modesto for Modesto City-County Airport (MOD), Modesto, California, under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96–193) (hereinafter referred to as "the Act") and 14 CFR part 150. This program was submitted subsequent to a determination by the FAA that associated Noise Exposure Maps submitted under 14 CFR part 150 for Modesto City-County Airport were in compliance with applicable requirements effective February 26, 1993. The proposed Noise Compatibility Program will be approved or disapproved on or before November 23, 1994.

EFFECTIVE DATE: The effective date of the start of the FAA's review of the Noise Compatibility Program is May 27, 1994. The public comment period ends July 26, 1994.

FOR FURTHER INFORMATION CONTACT: Joseph B. Rodriguez, Federal Aviation Administration, San Francisco Airports District Office, 831 Mitten Road, Burlingame, California 94010–1303, Telephone: (415) 876–2805. Comments on the proposed Noise Compatibility Program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA is reviewing a proposed Noise Compatibility Program for Modesto City-County Airport which will be approved or disapproved on or before November 23, 1994. This notice also announces the availability of this program for public review and comment.

An airport who has submitted Noise Exposure Maps are found by the FAA to be in compliance with the requirements of Federal Aviation Regulations (FAR) part 150, promulgated pursuant to title I of the Act, may submit a Noise Compatibility Program for the FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

The FAA has formally received the Noise Compatibility Program for Modesto City-County Airport, effective on May 27, 1994. It was requested that the FAA review this material and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a Noise Compatibility Program under

Section 104(b) of the Act. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of Noise Compatibility Programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on or before November 23, 1994.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR part 150, § 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Copies of the Noise Exposure Maps, the FAA's evaluation of the maps, and the proposed Noise Compatibility Program are available for examination at the following locations:

Federal Aviation Administration, 800 Independence Avenue SW., room 615, Washington, DC 20591

Federal Aviation Administration, Western-Pacific Region, Airports Division, 15000 Aviation Boulevard, room 3012, Hawthorne, California, Mail: P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009

Mr. Howard L. Cook, AAE/CAE, Airport Manager, Modesto City-County Airport, 617 Airport Way, Modesto, California 95354–3916.

Questions may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT.**

Issued in Hawthorne, California on May 27, 1994.

Herman C. Bliss,

Manager, Airport Division, Western-Pacific Region.

[FR Doc. 94–14577 Filed 6–14–94; 8:45 am]

BILLING CODE 4910–13–M

National Highway Traffic Safety Administration

[Docket No. 93–48; Notice 3]

Cosco, Inc.; Appeal of Denial of Petition for Determination of Inconsequential Noncompliance

Cosco, Inc. (Cosco), of Columbus, Indiana, has appealed a decision by the National Highway Traffic Safety Administration (NHTSA) that denied Cosco's petition that its noncompliance with Federal Motor Vehicle Safety Standard (FMVSS) No. 213, "Child Restraint Systems," be deemed inconsequential as it relates to motor vehicle safety (Docket No. 93–48, Notice 2; 59 FR 14443; March 28, 1994).

This notice of receipt of Cosco's appeal is published in accordance with NHTSA regulations (49 CFR 556.7 and 556.8) and does not represent any agency decision or other exercise of judgment concerning the merits of the appeal.

Paragraph S5.7 of FMVSS No. 213 states that "[e]ach material used in a child restraint system shall conform to the requirements of S4 of FMVSS No. 302 ["Flammability of Interior Materials"] (571.302)." Paragraph S4.3(a) of FMVSS No. 302 states that "[w]hen tested in accordance with S5, material described in S4.1 "[W]hen tested in accordance with S5, material described in S4.1 and S4.2 shall not burn, nor transmit a flame front across its surface, at a rate of more than 4 inches per minute."

Cosco determined that some of its child safety seats failed to comply with FMVSS No. 213, and filed an appropriate report pursuant to 49 CFR part 573, "Defect and Noncompliance Reports." Cosco petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (Act) (15 U.S.C. 1381 *et seq.*) on the basis that the noncompliance is inconsequential as it relates to motor vehicle safety.

Notice of receipt of the petition was published in the **Federal Register** on July 7, 1993 (58 FR 36510). On March 28, 1994, NHTSA published a notice in the **Federal Register** denying Cosco's petition, stating that the petitioner had not met its burden of persuasion that the noncompliance is inconsequential as it relates to motor vehicle safety. The reader is referred to these notices for a further discussion of the noncompliance and the agency's rationale in denying the petition.

In Cosco's original petition and part 573 report, it stated that it produced 133,897 child restraint seats with shoulder harness straps that do not comply with the flammability requirements of FMVSS No. 213. In its appeal it states that, due to an error in its data processing system, this number was incorrect. The correct number of seats covered by the noncompliance determination is 23,449.

In its appeal, Cosco contends that it is extremely unlikely that straps of its child restraints would ignite independently of an interior fire that was already in progress from another source. It argues that NHTSA based its denial of the petition on hypothetical situations rather than confirmed reports of child restraint fires.

Interested persons are invited to submit written data, views, and arguments on the appeal of Cosco, described above. Comments should refer to the docket and notice number and be submitted to: Docket Section, National Highway Traffic Safety Administration, room 5109, 400 Seventh Street, SW., Washington, DC, 20590. It is requested but not required that six copies be submitted.

All comments received before the close of business on the closing date indicated below will be considered. All comments received after the closing date will also be filed and will be considered to the extent feasible. When the appeal is granted or denied, notice will be published in the **Federal Register**.

Comment closing date: July 15, 1994.

Authority: 15 U.S.C. 1417; delegations of authority at 49 CFR 1.50.

Issued on: June 9, 1994

Eligibility Requirements for Candidacy for Union Office; Proposed Rule

DEPARTMENT OF LABOR

Office of Labor-Management Standards

29 CFR Part 452

RIN 1294–AA09

Eligibility Requirements for Candidacy for Union Office

AGENCY: Office of Labor-Management Standards, Labor.

ACTION: Advance Notice of Proposed Rulemaking.

SUMMARY: The Office of Labor-Management Standards is requesting comments from the public on how its interpretative regulations on labor organization officer elections should be modified. The regulations may need to be modified in order to accommodate a decision of the Court of Appeals for the District of Columbia Circuit regarding the reasonableness of meeting attendance requirements set by labor organizations for eligibility for union office.

DATES: Interested parties may submit comments on or before August 15, 1994.

ADDRESSES: Written comments should be submitted to Edmundo A. Gonzales, Deputy Assistant Secretary for Labor-Management Standards, Office of the American Workplace, U.S. Department of Labor, 200 Constitution Avenue, NW., Room S–2203, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT: Kay H. Oshel, Chief, Division of Interpretations and Standards, Office of Labor-Management Standards, Office of the American Workplace, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N–5605, Washington, D.C. 20210, (202) 219–7373. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

I. Background and Overview

Title IV of the Labor-Management Reporting and Disclosure Act of 1959, as amended (LMRDA), sets forth standards and requirements for the election of labor organization officers. Section 401(e), 29 U.S.C. 481(e), provides in part that every member in good standing has the right to be a candidate subject "to reasonable qualifications uniformly imposed."

The Department is responsible for enforcing LMRDA title IV. After receipt of a timely complaint from a member and a finding that a violation may have affected the outcome of an officer election, the Secretary brings civil action in U.S. district court where the union is located seeking a new election supervised by the Secretary.

The Department does not have formal rulemaking authority to set standards and requirements regarding LMRDA title IV. However, the Department has issued interpretative regulations, 29 CFR part 452, in order to provide the public with information as to the Secretary's "construction of the law which will guide him in performing his [enforcement] duties." 29 CFR 452.1.

Two provisions in the Department's interpretative regulations regarding LMRDA title IV discuss in general terms the issue of reasonable candidate qualifications, and one provision deals specifically with meeting attendance requirements. The first general provision on candidate qualifications, 29 CFR 452.35, provides that although labor organizations may have a legitimate interest in setting minimum standards for office-holding, a basic principle of the free and democratic elections which the LMRDA is intended to ensure is that members will exercise good judgment and common sense in voting for officers. Consequently, qualifications for candidacy must be closely scrutinized to determine that they serve union purposes of such importance, in terms of protecting the union as an institution, as to justify subordinating the right of the individual member to seek office and the interest of the membership in a free, democratic choice of leaders.

The second general provision dealing with reasonable candidate qualifications is 29 CFR 452.36. Section 452.36(a) states that although the question of whether a qualification is reasonable is not subject to precise definition and will ordinarily depend on the facts of each case, court decisions furnish some general guidelines. In particular, § 452.36(a) cites *Wirtz v. Hotel, Motel and Club Employees Union, Local 6*, 391 U.S. 492 (1968), in which the Supreme Court stated that the term "'reasonable qualifications uniformly imposed' should not be given a broad reach," *Id.*, at 499, and "Congress' model of democratic elections was political elections in this country." *Id.*, at 502. Consequently, § 452.36(a) states that

> [U]nion qualifications for office should not be based on assumptions that certain experience or qualifications are necessary * * * and a qualification may not be required without a showing that citizens assumed to make discriminating judgments in public elections cannot be relied on to make such judgments when voting as union members.

29 CFR 452.36(b) goes on to enumerate five factors to be considered in determining whether a qualification for candidacy is reasonable: (1) The relationship of the qualification to the union's legitimate needs and interests; (2) the relationship of the qualification to the demands of the union office; (3) the impact of the qualification in reducing the number of eligible members in light of the LMRDA's purpose in fostering membership participation in union affairs; (4) the appropriateness of the qualification in view of requirements prescribed by other unions; and (5) the difficulty in meeting the qualification.

In addition to the general discussions of candidate qualifications in 29 CFR 452.35 and § 452.36, 29 CFR 452.38 deals specifically with meeting attendance requirements. This provision states that it may be reasonable to require attendance at a certain number of meetings immediately preceding an officer election in order to insure that candidates have an interest in and familiarity with the union's affairs, and that the reasonableness of a meeting attendance requirement must be gauged in light of all the circumstances of the particular case, including not only the frequency of meetings, the number of meetings which must be attended and the period of time over which the requirement extends, but also such factors as the nature, availability and extent of excuse provisions, whether all or most members have the opportunity to attend meetings, and the impact of the rule, i.e., the number or percentage of members who would be rendered ineligible by its application.

Sections 452.38(a–1) and 452.38(b) cite a number of specific court decisions which provide guidance on the type of meeting attendance requirements that would be held unreasonable. § 452.38(a–1) discusses the Supreme Court decision in *Steelworkers, Local 3489 v. Usery*, 429 U.S. 305 (1977). The Court held that a candidate qualification requiring attendance at half the meetings for three years preceding the election which made 96.5% of the members ineligible was unreasonable. The Court also stated that the standard set forth in § 452.38(a) for determining the reasonableness of meeting attendance eligibility requirements is the type of flexible rule which Congress contemplated in using the word "reasonable" in LMRDA § 401(e).

Finally, § 452.38(b) cites four court decisions which held the meeting attendance requirement at issue unreasonable because of several of the factors cited in the standard established in § 452.38(a). One candidate qualification required attendance at one meeting each quarter for three years prior to the election and disqualified 99% of the membership. Another candidate qualification required attendance at 75% of the meetings for two years before the election, had a very limited excuse provision, and disqualified 97% of the members. A third candidate qualification required attendance at all of the eight meetings between the nomination and the election, which were held at widely scattered locations in the state. The final candidate qualification discussed in § 452.38(b) required attendance at six meetings per year for two years before the election, which would require that a member decide to be a candidate at least 18 months before the election.

In summary, §§ 452.35 and 452.36 discuss the basic issues involved in reviewing all types of qualifications for candidacy for union office, and § 452.36 in particular lists five factors to be considered in making determinations. Section 452.38 deals specifically with meeting attendance requirements. It states at the outset that this type of qualification may serve legitimate union purposes. It then sets forth a flexible standard, which elaborates upon the factors established in § 452.36, for determining whether a meeting attendance requirement is unreasonable: (1) The terms of the requirement itself, i.e., whether it requires a member to decide to meet the qualification in order to be a candidate an excessively long period in advance of the election, (2) the difficulty of meeting the requirement, i.e., the opportunity to attend meetings held at times and places that are not excessively inconvenient and the availability of excuse provisions, and (3) the impact of the requirement.

These regulations may need to be revised as a result of the ruling of the United States Court of Appeals for the District of Columbia Circuit in *Doyle v. Brock*, 821 F.2d 778 (D.C. Cir. 1987). *Doyle* deals with a case in which the Secretary, after investigating a complaint filed by a member regarding his union's meeting attendance requirement, decided not to bring civil action against the union even though the requirement (half the meetings during the year prior to the election) disqualified 97% of the members. The Secretary's position, relying on the "all the circumstances" language set forth in 29 CFR 452.38, was that since the requirement was not on its face unreasonable (i.e., it did not require a member to decide to become a candidate an excessively long period before the election) and it was not difficult to meet (i.e., the meetings were held at convenient times and locations and the union provided liberal excuse provisions), the large impact of the requirement was not by itself sufficient to render it unreasonable.

The member then filed suit against the Secretary in the U.S. District Court for the District of Columbia, in accordance with the Supreme Court's decision in *Dunlop v. Bachowski*, 421 U.S. 560 (1975). (In *Bachowski*, the Court held that judicial review of the Secretary's decision not to bring litigation in LMRDA title IV cases is available under the Administrative Procedure Act.) The district court held that the Secretary's decision not to bring litigation against the union was arbitrary and capricious, *Doyle v. Brock*, 641 F. Supp. 223 and 632 F. Supp. 256 (D.D.C. 1986).

The court of appeals in *Doyle* affirmed the district court's decision. It rejected the Secretary's position summarized above, emphasizing the importance of the impact of the requirement in this case in disqualifying 97% of the membership.

There is no basis, in [the Supreme Court's decision in *Steelworkers, Local 3489*] or in any other case, for the notion that an attendance requirement that has a large antidemocratic effect can be reasonable on its face, and that some additional factor is necessary to find the requirement violative of the LMRDA. *Id.*, at 785.

The court of appeals also rejected the Secretary's reliance on the fact that the Supreme Court in *Steelworkers, Local 3489* (where 96.5% of the membership was disqualified by the requirement to attend half of the meetings in the preceding three years) did not adopt a per se rule based on impact, but in fact cited with approval the flexible standard set forth in 29 CFR § 452.38. The court stated that

> [I]t is true that *Steelworkers* did not adopt a *per se* effects test. Nonetheless, it came "close to doing so. The fact that 96.5% of Local 3489's members chose not to comply with its rule was given controlling weight." [Quoting from the dissenting opinion in *Steelworkers, Local 3489*; citations omitted.] Thus, although one must read *Steelworkers* as holding that attendance requirements are to be subjected to a case-by-case analysis, the analysis is limited to determining only if "the anti-democratic *effects* of the meeting-attendance rule outweigh the *interests* urged in its support." [Quoting from *Steelworkers, Local 3489*; citations omitted.] * * * In fact, it appears that the "all the circumstances" language is included to help assess the reasonableness of a requirement in which the antidemocratic effect is not as dramatic as the one in *Steelworkers* or the instant case. *Id.*, at 785.

The court of appeals, again citing the Supreme Court decision in *Steelworkers, Local 3489*, also rejected "the argument that the reasonableness of a requirement is to be judged by the burdensomeness of compliance." *Id.*, at 784. Candidacy qualifications must be judged by their effect on free and democratic elections.

The court of appeals further stated that only a demonstration that a rule serves important union interests can justify a candidate qualification having a large antidemocratic effect. The union's interest cited in *Doyle* (encouraging participation in union affairs by potential candidates) has not been served by the meeting attendance requirement, and the existence of liberal excuse provisions "severely *undercuts* both the legitimacy of the claim and the effectiveness of the provision in achieving its alleged objective." *Id.*, at 786.

In summary, the court emphasized the importance of the impact of meeting attendance requirements, especially where the number of members excluded results in a "large" antidemocratic effect. The court's discussion also raised questions about the relevance of other factors such as the availability of excuse provisions and the difficulty of complying with meeting attendance requirements.

After the *Doyle* decision was issued, the union did not apply the meeting attendance requirement in the next (1987) regularly scheduled election, and it subsequently eliminated the requirement. Nonetheless, the interpretative regulations may need to be modified in order to be consistent with the court's holdings in *Doyle*. The provision of the regulations which is most directly affected by *Doyle* is 29 CFR 452.38. In addition, *Doyle* and its construction of *Steelworkers, Local 3489* may have implications for 29 CFR 452.35 and 452.36, which deal generally with candidate qualifications and the factors to be considered in determining whether they are reasonable.

II. Request for Comments

There are several general ways in which the regulations can be modified in light of *Doyle*. The option which would require the greatest change in the regulations is to hold that meeting attendance requirements are per se unreasonable. The basis for this position would be that this type of qualification does not serve union interests of such importance to justify limiting the rights of members to be candidates and vote for candidates of their choice, and/or that this type of qualification often excludes large numbers of members.

This option provides the simplest resolution (in that case-by case determinations would not be necessary), results in no uncertainty (in that unions

and members would know in advance that the Department will challenge all meeting attendance requirements), and is most consistent with the free and open elections which the LMRDA is intended to foster; it would also eliminate any perceived advantage of incumbent officers who attend meetings as part of their duties. A disadvantage of this option is that adopting a flat prohibition in place of the current case-by-case approach may be too broad a reading of *Doyle*, and would eliminate a rule which may provide some benefits to unions and their members.

The option which would require the least change in the regulations would retain language to the effect that the reasonableness of a meeting attendance requirement is determined by reviewing a number of factors on a case-by-case basis, and add a statement to the effect that there is an inverse relationship between the portion of the membership that is disqualified by the requirement and the probability that the requirement will be considered reasonable. That is, the greater the portion of the membership that is disqualified by a meeting attendance requirement, the less likely the union will be able to justify the requirement.

The advantages of this option are that it is intended to closely follow the court decisions in *Doyle* and it retains the case-by-case approach approved by the Supreme Court in *Steelworkers, Local 3489*. A disadvantage is that it provides little guidance to labor organizations and members as to whether a particular rule will be considered unreasonable. (In this connection, however, it should be noted that the Supreme Court in *Steelworkers, Local 3489* recognized that a flexible rule, which "Congress clearly contemplated" in using the word "reasonable," leads to uncertainty. The Court also stated that the "contention that [one would have] no way of knowing that a rule disqualifying 90% of a local's members from office would be regarded as unreasonable in the absence of substantial justification is unpersuasive." 429 U.S. 305, at 313–4 (1977).)

A third option, actually a combination of the first two, would be to generally retain the case-by-case analysis of multiple factors, but add a statement to the effect that once the portion of the disqualified membership reaches a certain percentage (such as 50%, 75%, or 90%), the meeting attendance rule will be considered unreasonable per se. The advantages of this approach are that it retains the case-by-case approach as in the second option but provides more guidance. The disadvantage is that any particular number which is chosen would be somewhat arbitrary.

Specific comments are requested on the merits of each of these three options for revising § 452.38, as well as suggestions for other options. Most helpful would be comments, especially by those unions which have meeting attendance requirements, providing detailed information and data on

—The nature and importance of the union interests which are claimed to be served by meeting attendance requirements,

—Whether (and if so, how) those interests have in fact been served by the requirements,

—The impact of those requirements on the percentage of members disqualified from candidacy, especially with regard to non-incumbents, and

—With regard to the third option, what the appropriate threshold percentage of disqualified members should be for the qualification to be considered unreasonable.

Comments are also specifically requested on whether changes are necessary and/or appropriate to make §§ 452.35 and 452.36 consistent with *Doyle*, particularly in connection with the references in those provisions to factors to be considered in assessing the reasonableness of a qualification for candidacy such as

—The impact of candidate qualifications,

—The difficulty in meeting a candidate qualification, and

—The candidate requirements of other unions.

Finally, suggestions are requested for the specific language of revised § 452.38 and, if appropriate, §§ 452.35 and 452.36.

III. Administrative Notices

A. Executive Order 12866

The Department of Labor has determined that this rule is not a significant regulatory action as defined in section 3(f) of Executive Order 12866 in that it will not (1) have an annual effect on the economy of $100 million or more, or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities, (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency, (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof, or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in Executive Order 12866.

B. Regulatory Flexibility Act

The Agency Head has certified that any revision to the regulations considered in this rulemaking process will not have a significant impact on a substantial number of small entities as defined in the Regulatory Flexibility Act. Any regulatory revision will only apply to labor organizations, and the Department has determined that labor organizations regulated pursuant to the statutory authority granted under the LMRDA do not constitute small entities. Therefore, a regulatory flexibility analysis is not required.

C. Paperwork Reduction Act

This rule contains no information collection requirements for purposes of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

List of Subjects Affected in 29 CFR Part 452

Labor unions.

Signed in Washington, DC, this 9th day of June 1994.

Martin Manley,

Assistant Secretary for the American Workplace.

BILLING CODE 4510–86–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Tunica-Biloxi Indian Tribe of Louisiana Liquor Control Code

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This Notice is published in accordance with authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8, and in accordance with the Act of August 15, 1953, 67 Stat. 586, 18 U.S.C. § 1161. I certify that Resolution No. 05–94, A Resolution to Enact the Tunica-Biloxi Liquor Control Code was duly adopted by the Tunica-Biloxi Indian Tribe of Louisiana on March 6, 1994. The Ordinance provides for the regulation of the activities of the manufacture, distribution, sale, and consumption of liquor within the exterior boundaries of the Tunica-Biloxi Reservation under the jurisdiction of the Tunica-Biloxi Indian Tribe of Louisiana.

DATES: This Ordinance is effective as of June 15, 1994.

FOR FURTHER INFORMATION CONTACT: Chief, Branch of Judicial Services, Division of Tribal Government Services, 1849 C Street N.W., MS 2611–MIB, Washington, D.C. 20240–4001; telephone (202) 208–4400.

SUPPLEMENTARY INFORMATION: The Tunica Biloxi Liquor Control Code of the Tunica-Biloxi Indian Tribe of Louisiana, Resolution No. 05–94, is to read as follows:

Tunica-Biloxi Liquor Control Ordinance

Article 1. The Tunica-Biloxi Tribe and the State of Louisiana possess concurrent power and jurisdiction to control alcoholic beverages within the Tunica-Biloxi Reservation.

Article 2. All persons, entities, or corporations who desire to sell alcoholic beverages within the exterior boundaries of the Tunica-Biloxi Reservation must first secure a license to sell alcoholic beverages from the State of Louisiana before making application to the Tribe for the sale of alcoholic beverages.

Article 3. The sale of intoxicating liquor or alcoholic beverages within the gaming facility on [of] the Tunica-Biloxi Tribe, or within such ancillary facilities for the service of food or beverages as are located in the same or adjoining buildings as the gaming facility shall be subject to the provisions of the Indian Gaming Regulatory Act and the Compact between the Tunica-Biloxi Tribe and the State of Louisiana.

Article 4.

A. An application to sell alcoholic beverages within the exterior boundaries of the Tunica-Biloxi Reservation shall be submitted to the Tunica-Biloxi Tax Commission, in triplicate, and shall consist of the following:

(1) A valid license from the state;

(2) the applicant's full name, address, telephone number and social security number;

(3) a fee of five hundred dollars;

(4) location of premises where the sale of alcoholic beverages is to take place;

(5) types of alcoholic beverages to be sold.

B. The Tax Commission shall consider and decide whether to grant or deny a license. The applicant has the right to request a hearing before the Tax Commission. Upon an unfavorable determination by the Tax Commission, the applicant may appeal for a rehearing. The applicant shall notify the Commission of his intention to appeal within 30 days of the Commission's initial determination.

Article 5. The license to purchase alcoholic beverages shall be publicly exhibited on the premises where the alcoholic beverages are to be sold.

Article 6. Failure to abide by any tribal or state law shall be punished by revocation of the license, and where appropriate, exclusion from the Reservation. Appeal from any action taken to suspend or revoke a license shall be as in Article 4(B).

Article 7. The duration of each license shall be one year, beginning on January 1st. Applications shall be filed with the Tax Commission on or before November 15th.

Ada E. Deer,

Assistant Secretary—Indian Affairs.

Part IV

Department of Education

Training in Early Childhood Education and Violence Counseling, Grants Availability; Notices

DEPARTMENT OF EDUCATION

Training in Early Childhood Education and Violence Counseling

AGENCY: Department of Education.

ACTION: Notice of Final Priorities for Fiscal Year 1994.

SUMMARY: The Secretary announces final priorities for the Training in Early Childhood Education and Violence Counseling program to ensure effective use of program funds and to direct funds to areas of identified need during fiscal year 1994. The notice includes an absolute priority, two invitational priorities, and a competitive preference. The absolute priority would ensure that trainees would be prepared for work in economically disadvantaged areas. The invitational priorities express the Secretary's particular interest in funding projects that target Federal financial resources on several categories of disadvantaged students who are seeking careers in early childhood development or violence counseling, and increase the likelihood that the disadvantaged students would be retained in the training program. The competitive preference would increase the likelihood that applicants address the critical need for individuals trained to provide counseling to young children who have been affected by violence and to adults who work with these young children.

EFFECTIVE DATE: These priorities take effect 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of these priorities, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Alexander, U.S. Department of Education, 400 Maryland Avenue, S.W., Room 4400, Portals Building, Washington D.C., 20202–2641. Telephone: (202) 260–0994. Individuals who use a telecommunication device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The Training in Early Childhood Education and Violence Counseling program provides assistance to institutions of higher education to establish innovative programs to recruit and train students for careers in early childhood development and care, or preschool programs; or providing counseling to young children from birth to 5 years of age who have been affected by violence and to adults who work with these children. The statute gives priority in granting funds to institutions that prepare students for work in economically disadvantaged areas; plan to focus their recruitment, retention, and training efforts on disadvantaged students; and have demonstrated effectiveness in providing the type of training for which the institution seeks assistance.

On February 10, 1994, the Secretary published a notice of proposed priorities for this program in the **Federal Register** (59 FR 6249).

The purpose of these priorities is to advance the National Education Goals by improving early childhood education and child care services in disadvantaged areas, providing training opportunities to adults in order that they may possess the skills necessary to compete in a global economy, and enhancing the ability of educators and others to help young children and their families cope with violence.

Analysis of Comments and Questions

In response to the Secretary's invitation in the notice of proposed priorities, 11 parties submitted comments. An analysis of the comments and of the changes in the proposed priorities follows. Technical and other minor changes—and suggested changes the Secretary is not legally authorized to make under the applicable statutory authority—are not addressed.

Comment: Nine commenters indicated that the proposed absolute priority, which would have required that the training program result in a two-year certificate or degree, would be unduly restrictive.

Discussion: The proposed priority was not intended to limit the kind of training grantees could provide only to courses of study resulting in a two-year certificate or degree. It was intended to permit institutions of higher education to provide a range of training opportunities—including a Child Development Associate certificate, Head Start's training certificate, and masters' and doctoral degrees as part of an articulated system or continuum of training so long as one of the credentials offered for the career ladder was a two-year degree or certificate. The Secretary believes that the inclusion of shorter term entry level training, as one of the components of a training continuum can lead to fulfilling jobs and meaningful career and higher education opportunities for many individuals. Two-year degrees or certificates are often offered by institutions of higher education either directly or indirectly through partnerships with community colleges or other training sources.

Changes: In response to the concern about requiring a course of study leading to a two-year degree or certificate, the Secretary has changed the absolute priority to an invitational priority. The phrase "either directly or through a partnership with a community college or other training source," has been added after institution of higher education (IHE) and the word "primary" modifying "component" has been deleted.

Comment: Five commenters believed the proposed absolute priority defining several groups of disadvantaged individuals to be targeted for training to be overly prescriptive. One commenter objected to giving priority to welfare recipients and not to other poverty-level individuals who are not welfare recipients.

Discussion: The Act itself requires projects to target services on disadvantaged students. The intent of the proposed priority was to further clarify the term "disadvantaged" in order to develop successful training models for these populations, not to exclude students who are not disadvantaged from participation in the training program.

Changes: In response to the concern about requiring projects to target recruitment and training primarily on certain categories of disadvantaged individuals, the Secretary has eliminated the word "primarily" and changed the priority from absolute to invitational. The invitational priority expresses the Secretary's interest in funding projects that target recruitment and training on individuals living in poverty and graduating high school students who have been eligible for free or reduced price lunch.

Comment: Three commenters recommended deletion of the proposed absolute priority requiring students to engage in field experience in communities where there is highly concentrated poverty, a high incidence of violence, or both, as either unnecessary or, in combination with the other two proposed absolute priorities, unduly restrictive.

Discussion: The Secretary considers field experience to be an essential component of a successful training program—not just to increase employability and the likelihood that students will return to disadvantaged areas for employment, but also to improve student retention during the training experience.

Changes: None.

Comment: Four commenters said that giving competitive preference for applicants whose proposed projects include training and field experience in

violence counseling gives the impression that training in violence counseling is merely an "add-on" component.

Discussion: On the contrary, it is the intention of the competitive preference to emphasize training in violence counseling and ensure that projects funded under the program address issues of violence as a core part of the program and not as an optional "add-on." Under the statute, training may be in "early childhood development and care, or preschool programs; or providing counseling to young children from birth to 6 years of age who have been affected by violence and to adults who work with such children." Thus, applicants have the option of addressing either one or both components. The Secretary recognizes the importance of meaningful training for all early childhood professionals to assist them in helping children, their parents, and other caregivers who have been victims of violence or who live in violent environments.

Changes: None.

Absolute Priority

Under 34 CFR 75.105(c)(3) the Secretary gives an absolute preference to and will fund only those applications that meet the following priority. The Secretary funds under this competition only applications that meet this absolute priority:

Background: Under this absolute priority, all individuals served by the proposed project must receive substantial field experience in early childhood development and care, preschool education, or violence counseling.

Research in adult learning emphasizes the need to link training to practical issues in participants' lives—often through the use of concurrent hands-on practice. This is especially important for trainees who will be working in disadvantaged areas. Coursework alone is insufficient to prepare trainees for work in the childcare field; the curriculum should relate closely to real-world issues and include practical experience. Students need experience working with children in appropriate high-quality settings where they can observe other teachers and practice what they have learned through coursework.

Training programs in early childhood education and violence counseling that include concurrent classroom training and field experience components are not only more likely to retain students, but may result in higher employability following the training and increase the likelihood that students will return to disadvantaged areas for employment.

Priority

All individuals served by the proposed project must receive substantial field experience in early childhood development and care, preschool education, or violence counseling. The field experience must be in communities where there is highly concentrated poverty, a high incidence of violence, or both.

Competitive Preference

Under 34 CFR 75.105(c)(2)(i) the Secretary gives preference to applications that meet the following competitive priority. The Secretary awards 10 points to an application that meets this priority in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program.

Background: Each day in American communities, children are witnesses to violent acts or are victims of abuse or personal assault. Recent studies report high percentages of young children witnessing shootings and stabbings at home and on the street. Other studies show an alarming increase in the numbers of pediatric firearm deaths and injuries.

Some experts describe the impact of violence on many children as "post-traumatic stress disorder." Research has found that chronic exposure to violence can have serious developmental consequences for children, including psychological disorders, grief and loss reactions, impaired intellectual development and school problems, truncated moral development, pathological adaptation to violence, and identification with the aggressor. Furthermore, research demonstrates that the younger the child, the greater the threat of exposure to violence is to healthy development.

Most teachers and childcare providers have not been trained to help children cope with the effects of violence. Given the national epidemic of violence, there is a responsibility to enhance the ability of educators to help young children and their families cope with violence and promote their resilience. There is also a need to train additional service providers to address the developmental impact of exposure to violence on young children and to support families in their efforts to protect their children's physical and emotional well-being. The purpose of this competitive preference is to provide a strong incentive for all applicants to include a course of study in violence counseling in their proposed projects.

Priority

Competitive preference will be given to applicants whose proposed project includes training and field experience leading to a degree or certificate in violence counseling for some or all of the participants.

Invitational Priority 1—Focusing Training and Recruitment on Certain Categories of Disadvantaged Students

Background: There is a growing need for well-qualified early childhood educators and childcare providers, especially by parents who are on public assistance and seeking employment. Studies demonstrate that more than 11 million children are involved in early care and education outside their homes, including approximately 60 percent of children in families with incomes of $10,000 or less. The quality of the services these children receive will depend on the knowledge and skills of the people who care for and teach them.

The statute requires grantees to focus their recruitment, retention, and training efforts on disadvantaged individuals. Under this invitational priority, the Secretary encourages each IHE to include in its application a plan for targeting its recruitment, retention, and training efforts, at least in part, toward one or more of the following categories—(1) Individuals who are living in poverty; (2) graduating high school seniors who are eligible for free or reduced priced lunch; (3) individuals who lack a postsecondary degree and are currently working in a Chapter 1 Head Start or Even Start program or other Federal, State, or local program primarily serving disadvantaged young children; or (4) individuals who lack a postsecondary degree and are parents of children participating in Chapter 1 Head Start or Even Start programs or another Federal, State, or local programs primarily serving disadvantaged young children.

Invitational Priority

The Secretary is especially interested in funding applicants that include a plan demonstrating that their recruitment, retention and training efforts will be targeted, at least in part, toward one or more of the following categories:

(1) Individuals living in poverty.

(2) Graduating high school seniors who are eligible for free or reduced priced lunch.

(3) Individuals who lack a postsecondary degree and are currently working in a Chapter 1 Head Start or

Even Start program or other Federal, State, or local programs primarily serving disadvantaged young children.

(4) Individuals who lack a postsecondary degree and are parents of children participating in Chapter 1 Head Start or Even Start programs or another Federal, State, or local program primarily serving disadvantaged young children.

Invitational Priority 2—Training Programs Resulting in a Two-Year Certificate or Degree

Background: The typical lead teacher in non-school sponsored early childhood classrooms has completed high school and has had some postsecondary education. In Head Start, for example, one study found that 56.5 percent of lead teachers had a high school diploma, or equivalent, or a Child Development Associate (CDA) certificate (Observational Study of Early Childhood Programs), but had not completed a formal education program at the postsecondary level. The same study showed that 63.2 percent of the teaching assistants or aides in school-sponsored preschool programs had not completed any formal education beyond high school and most lacked specific training in early childhood education.

Childcare workers have one of the highest turnover rates of all occupations. During the past decade, staff turnover in child care centers nearly tripled. Some of the reasons often cited for this high turnover rate are low pay, lack of benefits, stressful working conditions, and lack of training in critical job safety skills, and child development knowledge. Under this invitational priority, the Secretary encourages each IHE to include in its application plans for a curriculum that would include a course of study leading to a two-year certificate or degree in early childhood development and care, preschool education, or violence counseling.

Earning a two-year degree can enhance the career opportunities and improve the retention for individuals working in programs serving low-income children. At the same time, institutions that offer a two-year degree, either directly or through a partnership with a community college, can attract and retain low-income individuals for whom a four-year degree may initially seem out of reach.

Invitational Priority

In addition to funding applications that include training leading to four-year and graduate degrees, the Secretary is especially interested in funding applications that include as one component of the proposed project a course of study leading to a two-year certificate or degree in early childhood development and care, preschool education, or violence counseling. The course of study could be offered either directly by the applicant institution, or through a partnership with a community college or other educational agency or training source.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide notification of the Department's specific plans and actions for this program.

(Catalog of Federal Domestic Assistance Number 84.266, Early Childhood Education and Violence Counseling Program.)

Dated: June 7, 1994.

Thomas W. Payzant,

Assistant Secretary for Elementary and Secondary Education.

[FR Doc. 94–14484 Filed 6–14–94; 8:45 am]

BILLING CODE 4000–01–P

CFDA No: 84.266

Training in Early Childhood Education and Violence Counseling

AGENCY: Department of Education.

ACTION: Notice Inviting Applications for New Awards for Fiscal Year (FY) 1994.

Note to Applicants: This notice is a complete application package. Together with the statute authorizing the program and the Education Department General Administrative Regulations (EDGAR), the notice contains all of the information, application forms, and instructions needed to apply for a grant under this competition.

Purpose of Program: To enable institutions of higher education to establish innovative programs to recruit and train students for careers in: (1) Early childhood development and care or preschool programs; or (2) providing counseling to young children from birth to six years of age who have been affected by violence and to adults who work with such young children.

Eligible Applicants: Institutions of higher education.

Deadline for Transmittal of Applications: July 27, 1994.

Deadline for Intergovernmental Review: September 25, 1994.

Available Funds: $9,040,000.

Range of Awards: Minimum $500,000; maximum $1,000,000 for each year of the project. Applicants must request awards within this range.

Estimated Average Size of Awards: $750,000.

Estimated Number of Awards: 12.

Note: This Department is not bound by any estimates in this notice.

Project Period: 3–5 years.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants to Institutions of Higher Education, Hospitals, and Nonprofit Organizations), Part 75 (Direct Grant Programs), Part 77 (Definitions that Apply to Department Regulations), Part 79 (Intergovernmental Review of Department of Education Programs and Activities), Part 82 (New Restrictions on Lobbying), Part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)), and Part 86 (Drug-Free Schools and Campuses).

Description of Program: Section 596 of the Higher Education Amendments of 1992 (Pub. L. 102–325) authorizes grants to institutions of higher education (IHEs) to enable them to establish innovative programs to recruit and train students for careers in one or both of the following:

(1) Early childhood development and care or preschool programs; or

(2) Providing counseling to young children from birth to six years of age who have been affected by violence and to adults who work with these children.

Applications: A grant may be made only to an IHE that submits an application to the Secretary. The application must—

(1) Describe the activities and services for which assistance is sought;

(2) Contain a comprehensive plan for the recruitment, retention, and training of students for careers in early childhood development or violence counseling;

(3) Demonstrate that the institution has the capacity to implement the plan; and

(4) Provide assurances that the plan was developed in consultation with agencies and organizations that will assist the institutions in carrying out the plan.

The comprehensive plan must include a description of—

(1) Specific strategies for reaching students at secondary schools, community colleges, undergraduate institutions, or other agencies and institutions from which students are to be drawn for participation in the program, including any partnerships with the institutions;

(2) Specific strategies for retaining students in the program such as summer sessions, internships, mentoring, or other activities;

(3) Methods that will be used to ensure that students trained pursuant to the plan will find employment in early childhood education, development and care, or violence counseling;

(4) The goals, objectives, and timelines to be used in assessing the success of the plan and the activities assisted under the grant award;

(5) The curriculum and training leading to the degree or credential that prepares students for the careers described in the plan;

(6) The special plan, if any, to ensure that students trained pursuant to the plan will be prepared for serving in economically disadvantaged areas; and

(7) Sources of financial aid to ensure that the training program is available to all qualified students.

Priorities

The priorities in the notice of final priorities for this program, as published elsewhere in this issue of the **Federal Register**, apply to this competition.

Selection Criteria

(a)(1) The Secretary uses the following selection criteria to evaluate applications for grants under this competition.

(2) The maximum score for all of these criterion is 100 points.

(3) The maximum score for each criterion is indicated in parentheses.

The regulations in 34 CFR 75.210 (a) and (c) provide that the Secretary may award up to 100 points for the selection criteria including distribution of an additional 15 points among the criteria in 34 CFR 75.210(b). For this competition the Secretary distributes the additional 15 points as follows: 5 points to selection criterion 34 CFR 75.210(b)(2) (Extent of need for the project) for a possible total of 25 points; 5 points to selection criterion 34 CFR 75.210(b)(3) (Plan of operation) for a possible total of 20 points); and 5 points to selection criterion 34 CFR 75.210(b)(6) (Evaluation) for a possible total of 10 points).

(b) *The criteria.*—(1) *Meeting the purposes of the authorizing statute.* (30 points) The Secretary reviews each application to determine how well the project will meet the purpose of section 596 of the Higher Education Amendments of 1992, including consideration of—

(i) The objectives of the project; and

(ii) How the objectives of the project further the purposes of the authorizing statute.

(2) *Extent of need for the project.* (25 points) The Secretary reviews each application to determine the extent to which the project meets specific needs recognized in the authorizing statute, including consideration of—

(i) The needs addressed by the project;

(ii) How the applicant identified those needs;

(iii) How those needs will be met by the project; and

(iv) The benefits to be gained by meeting those needs.

(3) *Plan of operation.* (20 points) The Secretary reviews each application to determine the quality of the plan of operation for the project, including—

(i) The quality of the design of the project;

(ii) The extent to which the plan of management is effective and ensures proper and efficient administration of the project;

(iii) How well the objectives of the project relate to the purpose of the program;

(iv) The quality of the applicant's plan to use its resources and personnel to achieve each objective;

(v) How the applicant will ensure that project participants who are otherwise eligible to participate are selected without regard to race, color, national origin, gender, age, or handicapping condition; and

(vi) For grants under a program that requires the applicant to provide an opportunity for participation of students enrolled in private schools, the quality of the applicant's plan to provide that opportunity.

(4) *Quality of key personnel.* (7 points) (i) The Secretary reviews each application to determine the quality of key personnel the applicant plans to use on the project, including—

(A) The qualifications of the project director (if one is to be used);

(B) The qualifications of each of the other key personnel to be used in the project;

(C) The time that each person referred to in paragraphs (b)(4)(i) (A) and (B) will commit to the project; and

(D) How the applicant, as part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or handicapping condition.

(ii) To determine personnel qualifications under paragraphs (b)(4)(i) (A) and (B), the Secretary considers—

(A) Experience and training in fields related to the objectives of the project; and

(B) Any other qualifications that pertain to the quality of the project.

(5) *Budget and cost effectiveness.* (5 points) The Secretary reviews each application to determine the extent to which—

(i) The budget is adequate to support the project; and

(ii) Costs are reasonable in relation to the objectives of the project.

(6) *Evaluation plan.* (10 points) The Secretary reviews each application to determine the quality of the evaluation plan for the project, including the extent to which the applicant's methods of evaluation—

(i) Are appropriate to the project; and

(ii) To the extent possible, are objective and produce data that are quantifiable.

(Cross-reference: See 34 CFR 75.590 Evaluation by the grantee.)

(7) *Adequacy of resources.* (3 points) The Secretary reviews each application to determine the adequacy of the resources that the applicant plans to devote to the project, including facilities, equipment, and supplies.

Intergovernmental Review of Federal Programs

This program is subject to the requirements of Executive Order 12372 (Intergovernmental Review of Federal Programs) and the regulations in 34 CFR part 79.

The objective of the Executive order is to foster an intergovernmental partnership and to strengthen federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

Applicants must contact the appropriate State Single Point of Contact to find out about, and to comply with, the State's process under Executive Order 12372. Applicants proposing to perform activities in more than one State should immediately Contact the Single Point of Contact for each of those States and follow the procedure established in each State under the Executive order. If you want to know the name and address of any State Single Point of Contact, see the list published in the **Federal Register** on May 3, 1994 (59 FR 22904–22905).

In States that have not established a process or chosen a program for review, State, areawide, regional, and local entities may submit comments directly to the Department.

Any State Process Recommendation and other comments submitted by a State Single Point of Contact and any comments from State, areawide, regional, and local entities must be mailed or hand-delivered by the date indicated in the notice to the following address: The Secretary, E.O. 12372, U.S. Department of Education, Room 4161, 400 Maryland Avenue, SW., Washington, DC 20202–0125.

Proof of mailing will be determined on the same basis as for applications (see 34 CFR 75.102). Recommendations or comments may be hand-delivered until 4:30 p.m. (Washington, DC time) on the date indicated in this notice.

Please Note That the Above Address Is Not the Same Address as the One to Which the Applicant Submits Its Completed Application. *Do Not Send Applications to the Above Address. Instructions for Transmittal of Applications:*

(a) If an applicant wants to apply for a grant, the applicant shall—

(1) Mail the original and two copies of the application on or before the deadline date to:

U.S. Department of Education,
Application Control Center,
Attention: (CFDA #84.266),
Washington, DC 20202–4725

or

(2) Hand deliver the original and two copies of the application by 4:30 p.m. (Washington, DC time) on the deadline date to:

U.S. Department of Education,
Application Control Center,
Attention: (CFDA # 84.266), Room #3633, Regional Office Building #3, 7th and D Streets, SW., Washington, DC.

(b) An applicant must show one of the following as proof of mailing:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary.

(c) If an application is mailed through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing:

(1) A private metered postmark.

(2) A mail receipt that is not dated by the U.S. Postal Service.

Notes: (1) The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

(2) The Application Control Center will mail a Grant Application Receipt Acknowledgment to each applicant. If an applicant fails to receive the notification of application receipt within 15 days from the date of mailing the application, the applicant should call the U.S. Department of Education Application Control Center at (202) 708–9494.

(3) The applicant *must* indicate on the envelope and—if not provided by the Department—in Item 10 of the Application for Federal Assistance (Standard Form 424) the CFDA number—and suffix letter, if any—of the competition under which the application is being submitted.

Application Instructions and Forms

The appendix to this application is divided into three parts plus a statement regarding estimated public reporting burden and various assurances and certifications. These parts and additional materials are organized in the same manner that the submitted application should be organized. The parts and additional materials are as follows:

Part I—Application for Federal Assistance (Standard Form 424 (Rev. 4–88)) and instructions.

PART II—BUDGET INFORMATION—NON-CONSTRUCTION PROGRAMS (STANDARD FORM 424A) AND INSTRUCTIONS

PART III—Application Narrative

Additional Materials

Estimated Public Reporting Burden.

Assurances—Non-Construction Programs (Standard Form 424B).

Certifications regarding Lobbying; Debarment, Suspension, and Other Responsibility Matters; and Drug-Free Workplace Requirements (ED 80–0013).

Certification regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion: Lower Tier Covered Transactions (ED 80–0014, 9/90) and instructions. (NOTE: ED 80–0014 is intended for the use of grantees and should not be transmitted to the Department.)

Disclosure of Lobbying Activities (Standard Form LLL) (if applicable) and instructions; and Disclosure of Lobbying Activities Continuation Sheet (Standard Form LLL–A).

An applicant may submit information on a photostatic copy of the application and budget forms, the assurances, and the certifications. However, the application form, the assurances, and the certifications must each have an original signature. No grant may be awarded unless a completed application form has been received.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Alexander, Compensatory Education Programs, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue, S.W., Room 4400, Portals Building, Washington, D.C. 20202–6132. Telephone: (202) 260–0994. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

Information about the Department's funding opportunities, including copies of application notices for discretionary grant competitions, can be viewed on the Department's electronic bulletin board (ED Board), telephone (202) 260–9950; or on the Internet Gopher Server at GOPHER.ED.GOV (under Announcements, Bulletins, and Press Releases). However, the official application notice for a discretionary grant competition is the notice published in the **Federal Register**.

Program Authority: Public Law 102–325, Higher Education Amendments of 1992, section 596.

Dated: June 7, 1994.

Thomas W. Payzant,

Assistant Secretary for Elementary and Secondary Education.

Standard Form 424 (REV 4-88)
Prescribed by OMB Circular A-102

Authorized for Local Reproduction

INSTRUCTIONS FOR THE SF 424

This is a standard form used by applicants as a required facesheet for preapplications and applications submitted for Federal assistance. It will be used by Federal agencies to obtain applicant certification that States which have established a review and comment procedure in response to Executive Order 12372 and have selected the program to be included in their process, have been given an opportunity to review the applicant's submission.

Item: Entry:

1. Self-explanatory.
2. Date application submitted to Federal agency (or State if applicable) & applicant's control number (if applicable).
3. State use only (if applicable).
4. If this application is to continue or revise an existing award, enter present Federal identifier number. If for a new project, leave blank.
5. Legal name of applicant, name of primary organizational unit which will undertake the assistance activity, complete address of the applicant, and name and telephone number of the person to contact on matters related to this application.
6. Enter Employer Identification Number (EIN) as assigned by the Internal Revenue Service.
7. Enter the appropriate letter in the space provided.
8. Check appropriate box and enter appropriate letter(s) in the space(s) provided:
   - "New" means a new assistance award.
   - "Continuation" means an extension for an additional funding/budget period for a project with a projected completion date.
   - "Revision" means any change in the Federal Government's financial obligation or contingent liability from an existing obligation.
9. Name of Federal agency from which assistance is being requested with this application.
10. Use the Catalog of Federal Domestic Assistance number and title of the program under which assistance is requested.
11. Enter a brief descriptive title of the project. If more than one program is involved, you should append an explanation on a separate sheet. If appropriate (e.g., construction or real property projects), attach a map showing project location. For preapplications, use a separate sheet to provide a summary description of this project.

Item: Entry:

12. List only the largest political entities affected (e.g., State, counties, cities).
13. Self-explanatory.
14. List the applicant's Congressional District and any District(s) affected by the program or project.
15. Amount requested or to be contributed during the first funding/budget period by each contributor. Value of in-kind contributions should be included on appropriate lines as applicable. If the action will result in a dollar change to an existing award, indicate *only* the amount of the change. For decreases, enclose the amounts in parentheses. If both basic and supplemental amounts are included, show breakdown on an attached sheet. For multiple program funding, use totals and show breakdown using same categories as item 15.
16. Applicants should contact the State Single Point of Contact (SPOC) for Federal Executive Order 12372 to determine whether the application is subject to the State intergovernmental review process.
17. This question applies to the applicant organization, not the person who signs as the authorized representative. Categories of debt include delinquent audit disallowances, loans and taxes.
18. To be signed by the authorized representative of the applicant. A copy of the governing body's authorization for you to sign this application as official representative must be on file in the applicant's office. (Certain Federal agencies may require that this authorization be submitted as part of the application.)

INSTRUCTIONS FOR THE SF-424A

General Instructions

This form is designed so that application can be made for funds from one or more grant programs. In preparing the budget, adhere to any existing Federal grantor agency guidelines which prescribe how and whether budgeted amounts should be separately shown for different functions or activities within the program. For some programs, grantor agencies may require budgets to be separately shown by function or activity. For other programs, grantor agencies may require a breakdown by function or activity. Sections A,B,C, and D should include budget estimates for the whole project except when applying for assistance which requires Federal authorization in annual or other funding period increments. In the latter case, Sections A,B, C, and D should provide the budget for the first budget period (usually a year) and Section E should present the need for Federal assistance in the subsequent budget periods. All applications should contain a breakdown by the object class categories shown in Lines a-k of Section B.

Section A. Budget Summary
Lines 1-4, Columns (a) and (b)

For applications pertaining to a *single* Federal grant program (Federal Domestic Assistance Catalog number) and *not requiring* a functional or activity breakdown, enter on Line 1 under Column (a) the catalog program title and the catalog number in Column (b).

For applications pertaining to a *single* program *requiring* budget amounts by multiple functions or activities, enter the name of each activity or function on each line in Column (a), and enter the catalog number in Column (b). For applications pertaining to multiple programs where none of the programs require a breakdown by function or activity, enter the catalog program title on each line in *Column* (a) and the respective catalog number on each line in Column (b).

For applications pertaining to *multiple* programs where one or more programs *require* a breakdown by function or activity, prepare a separate sheet for each program requiring the breakdown. Additional sheets should be used when one form does not provide adequate space for all breakdown of data required. However, when more than one sheet is used, the first page should provide the summary totals by programs.

Lines 1-4, Columns (c) through (g.)

For new applications, leave Columns (c) and (d) blank. For each line entry in Columns (a) and (b), enter in Columns (e), (f), and (g) the appropriate amounts of funds needed to support the project for the first funding period (usually a year).

Lines 1-4, Columns (c) through (g.) (continued)

For continuing grant program applications, submit these forms before the end of each funding period as required by the grantor agency. Enter in Columns (c) and (d) the estimated amounts of funds which will remain unobligated at the end of the grant funding period only if the Federal grantor agency instructions provide for this. Otherwise, leave these columns blank. Enter in columns (e) and (f) the amounts of funds needed for the upcoming period. The amount(s) in Column (g) should be the sum of amounts in Columns (e) and (f).

For supplemental grants and changes to existing grants, do not use Columns (c) and (d). Enter in Column (e) the amount of the increase or decrease of Federal funds and enter in Column (f) the amount of the increase or decrease of non-Federal funds. In Column (g) enter the new total budgeted amount (Federal and non-Federal) which includes the total previous authorized budgeted amounts plus or minus, as appropriate, the amounts shown in Columns (e) and (f). The amount(s) in Column (g) should not equal the sum of amounts in Columns (e) and (f).

Line 5 — Show the totals for all columns used.

Section B Budget Categories

In the column headings (1) through (4), enter the titles of the same programs, functions, and activities shown on Lines 1-4, Column (a), Section A. When additional sheets are prepared for Section A, provide similar column headings on each sheet. For each program, function or activity, fill in the total requirements for funds (both Federal and non-Federal) by object class categories.

Lines 6a-i — Show the totals of Lines 6a to 6h in each column.

Line 6j – Show the amount of indirect cost.

Line 6k – Enter the total of amounts on Lines 6i and 6j. For all applications for new grants and continuation grants the total amount in column (5), Line 6k, should be the same as the total amount shown in Section A, Column (g), Line 5. For supplemental grants and changes to grants, the total amount of the increase or decrease as shown in Columns (1)-(4), Line 6k should be the same as the sum of the amounts in Section A, Columns (e) and (f) on Line 5.

INSTRUCTIONS FOR THE SF-424A *(continued)*

Line 7 – Enter the estimated amount of income, if any, expected to be generated from this project. Do not add or subtract this amount from the total project amount. Show under the program narrative statement the nature and source of income. The estimated amount of program income may be considered by the federal grantor agency in determining the total amount of the grant.

Section C. Non-Federal-Resources

Lines 8-11 – Enter amounts of non-Federal resources that will be used on the grant. If in-kind contributions are included, provide a brief explanation on a separate sheet.

Column (a) – Enter the program titles identical to Column (a), Section A. A breakdown by function or activity is not necessary.

Column (b) – Enter the contribution to be made by the applicant.

Column (c) – Enter the amount of the State's cash and in-kind contribution if the applicant is not a State or State agency. Applicants which are a State or State agencies should leave this column blank.

Column (d) – Enter the amount of cash and in-kind contributions to be made from all other sources.

Column (e) – Enter totals of Columns (b), (c), and (d).

Line 12 — Enter the total for each of Columns (b)-(e). The amount in Column (e) should be equal to the amount on Line 5, Column (f), Section A.

Section D. Forecasted Cash Needs

Line 13 – Enter the amount of cash needed by quarter from the grantor agency during the first year.

Line 14 – Enter the amount of cash from all other sources needed by quarter during the first year.

Line 15 – Enter the totals of amounts on Lines 13 and 14.

Section E. Budget Estimates of Federal Funds Needed for Balance of the Project

Lines 16 - 19 – Enter in Column (a) the same grant program titles shown in Column (a), Section A. A breakdown by function or activity is not necessary. For new applications and continuation grant applications, enter in the proper columns amounts of Federal funds which will be needed to complete the program or project over the succeeding funding periods (usually in years). This section need not be completed for revisions (amendments, changes, or supplements) to funds for the current year of existing grants.

If more than four lines are needed to list the program titles, submit additional schedules as necessary.

Line 20 – Enter the total for each of the Columns (b)-(e). When additional schedules are prepared for this Section, annotate accordingly and show the overall totals on this line.

Section F. Other Budget Information

Line 21 – Use this space to explain amounts for individual direct object-class cost categories that may appear to be out of the ordinary or to explain the details as required by the Federal grantor agency.

Line 22 – Enter the type of indirect rate (provisional, predetermined, final or fixed) that will be in effect during the funding period, the estimated amount of the base to which the rate is applied, and the total indirect expense.

Line 23 – Provide any other explanations or comments deemed necessary.

INSTRUCTIONS FOR PART III APPLICATION NARRATIVE:

Before preparing the Application Narrative an applicant should read carefully the description of the program, the information regarding priorities, and the selection criteria the Secretary uses to evaluate applications.

The narrative should encompass each function or activity for which funds are being requested and should--

1. Begin with an Abstract; that is, a summary of the proposed project;

2. Describe the proposed project in light of each of the selection criteria in the order in which the criteria are listed in this application; and

3. Include any other pertinent information that might assist the Secretary in reviewing the application.

'The Secretary strongly requests the applicant to limit the Application Narrative to no more than 20 double-spaced, typed (on one side only) pages, although the Secretary will consider applications of greater length. The Department has found that successful applications for similar programs generally meet this page limit.

INSTRUCTIONS FOR ESTIMATED PUBLIC REPORTING BURDEN

Under terms of the Paperwork Reduction Act of 1980, as amended, and the regulations implementing that Act, the Department of Education invites comment on the public reporting burden in this collection of information. Public reporting burden for this collection of information is estimated to average 90 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. You may send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Education, Information Management and Compliance Division, Washington, D.C. 20202-4651; and to the Office of Management and Budget, Paperwork Reduction Project OMB control number 1810-0562, Washington, D.C. 20503.

(Information collection approved under OMB control number 1810-0562; Expiration date: 4/30/96).

OMB Approval No. 0348-0040

ASSURANCES — NON-CONSTRUCTION PROGRAMS

Note: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of the project described in this application.

2. Will give the awarding agency, the Comptroller General of the United States, and if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.

3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.

4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.

5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§ 4728-4763) relating to prescribed standards for merit systems for programs funded under one of the nineteen statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).

6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§ 1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C.§§ 6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§ 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.

7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.

8. Will comply with the provisions of the Hatch Act (5 U.S.C. §§ 1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§ 276a to 276a-7), the Copeland Act (40 U.S.C. § 276c and 18 U.S.C. §§ 874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 327-333), regarding labor standards for federally assisted construction subagreements.

10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program andto purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.

11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§ 1451 et seq.); (f) conformity of Federal actions to State (Clear Air) Implementation Plans under Section 176(c) of the Clear Air Act of 1955, as amended (42 U.S.C. § 7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended, (P.L. 93-523); and (h) protection of endangered species under the Endangered Species Act of 1973, as amended, (P.L. 93-205).

12. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§ 1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.

13. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. 469a-1 et seq.).

14. Will comply with P.L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.

15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89-544, as amended, 7 U.S.C. 2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.

16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§ 4801 et seq.) which prohibits the use of lead based paint in construction or rehabilitation of residence structures.

17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act of 1984.

18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations and policies governing this program.

SF 424B (4-88) Back

CERTIFICATIONS REGARDING LOBBYING; DEBARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS; AND DRUG-FREE WORKPLACE REQUIREMENTS

Applicants should refer to the regulations cited below to determine the certification to which they are required to attest. Applicants should also review the instructions for certification included in the regulations before completing this form. Signature of this form provides for compliance with certification requirements under 34 CFR Part 82, "New Restrictions on Lobbying," and 34 CFR Part 85, "Government-wide Debarment and Suspension (Nonprocurement) and Government-wide Requirements for Drug-Free Workplace (Grants)." The certifications shall be treated as a material representation of fact upon which reliance will be placed when the Department of Education determines to award the covered transaction, grant, or cooperative agreement.

1. LOBBYING

As required by Section 1352, Title 31 of the U.S. Code, and implemented at 34 CFR Part 82, for persons entering into a grant or cooperative agreement over $100,000, as defined at 34 CFR Part 82, Sections 82.105 and 82.110, the applicant certifies that:

(a) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the making of any Federal grant, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal grant or cooperative agreement;

(b) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal grant or cooperative agreement, the undersigned shall complete and submit Standard Form - LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions;

(c) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subgrants, contracts under grants and cooperative agreements, and subcontracts) and that all subrecipients shall certify and disclose accordingly.

2. DEBARMENT, SUSPENSION, AND OTHER RESPONSIBILITY MATTERS

As required by Executive Order 12549, Debarment and Suspension, and implemented at 34 CFR Part 85, for prospective participants in primary covered transactions, as defined at 34 CFR Part 85, Sections 85.105 and 85.110 –

A. The applicant certifies that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not within a three-year period preceding this application been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State, or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and

(d) Have not within a three-year period preceding this application had one or more public transactions (Federal, State, or local) terminated for cause or default; and

B. Where the applicant is unable to certify to any of the statements in this certification, he or she shall attach an explanation to this application.

3. DRUG-FREE WORKPLACE (GRANTEES OTHER THAN INDIVIDUALS)

As required by the Drug-Free Workplace Act of 1988, and implemented at 34 CFR Part 85, Subpart F, for grantees, as defined at 34 CFR Part 85, Sections 85.605 and 85.610 –

A. The applicant certifies that it will or will continue to provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing an on-going drug-free awareness program to inform employees about–

(1) The dangers of drug abuse in the workplace;

(2) The grantee's policy of maintaining a drug-free workplace;

(3) Any available drug counseling, rehabilitation, and employee assistance programs; and

(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will–

(1) Abide by the terms of the statement; and

(2) Notify the employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

(e) Notifying the agency, in writing, within 10 calendar days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Employers of convicted employees must provide notice, including position title, to: Director, Grants and Contracts Service, U.S. Department of Education, 400 Maryland Avenue, S.W. (Room 3124, GSA Regional Office

Building No. 3), Washington, DC 20202-4571. Notice shall include the identification number(s) of each affected grant;

(f) Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted--

(1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or

(2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e), and (f).

B. The grantee may insert in the space provided below the site(s) for the performance of work done in connection with the specific grant:

Place of Performance (Street address, city, county, state, zip code)

_____

_____

_____

Check ☐ if there are workplaces on file that are not identified here.

DRUG-FREE WORKPLACE
(GRANTEES WHO ARE INDIVIDUALS)

As required by the Drug-Free Workplace Act of 1988, and implemented at 34 CFR Part 85, Subpart F, for grantees, as defined at 34 CFR Part 85, Sections 85.605 and 85.610 --

A. As a condition of the grant, I certify that I will not engage in the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance in conducting any activity with the grant; and

B. If convicted of a criminal drug offense resulting from a violation occurring during the conduct of any grant activity, I will report the conviction, in writing, within 10 calendar days of the conviction, to: Director, Grants and Contracts Service, U.S. Department of Education, 400 Maryland Avenue, S.W. (Room 3124, GSA Regional Office Building No. 3), Washington, DC 20202-4571. Notice shall include the identification number(s) of each affected grant.

As the duly authorized representative of the applicant, I hereby certify that the applicant will comply with the above certifications.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion -- Lower Tier Covered Transactions

This certification is required by the Department of Education regulations implementing Executive Order 12549, Debarment and Suspension, 34 CFR Part 85, for all lower tier transactions meeting the threshold and tier requirements stated at Section 85.110.

Instructions for Certification

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below.

2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

4. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations.

5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.

6. The prospective lower tier participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion--Lower Tier Covered Transactions," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List.

8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

Certification

(1) The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

(2) Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

Instructions for Completion of SF–LLL, Disclosure of Lobbying Activities

This disclosure form shall be completed by the reporting entity, whether subawardee or prime Federal recipient, at the initiation or receipt of a covered Federal action, or a material change to a previous filing, pursuant to title 31 U.S.C. section 1352. The filing of a form is required for each payment or agreement to make payment to any lobbying entity for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a covered Federal action. Use the SF–LLL–A Continuation Sheet for additional information if the space on the form is inadequate. Complete all items that apply for both the initial filing and material change report. Refer to the implementing guidance published by the Office of Management and Budget for additional information.

1. Identify the type of covered Federal action for which lobbying activity is and/or has been secured to influence the outcome of a covered Federal action.

2. Identify the status of the covered Federal action.

3. Identify the appropriate classification of this report. If this is a followup report caused by a material change to the information previously reported, enter the year and quarter in which the change occurred. Enter the date of the last previously submitted report by this reporting entity for this covered Federal action.

4. Enter the full name, address, city, state and zip code of the reporting entity. Include Congressional District, if known. Check the appropriate classification of the reporting entity that designates if it is, or expects to be, a prime or subaward recipient. Identify the tier of the subawardee, e.g., the first subawardee of the prime is the 1st tier. Subawards include but are not limited to subcontracts, subgrants and contract awards under grants.

5. If the organization filing the report in item 4 checks "Subawardee", then enter the full name, address, city, state and zip code of the prime Federal recipient. Include Congressional District, if known.

6. Enter the name of the Federal agency making the award or loan commitment. Include at least one organizational level below agency name, if known. For example, Department of Transportation, United States Coast Guard.

7. Enter the Federal program name or description for the covered Federal action (item 1). If known, enter the full Catalog of Federal Domestic Assistance (CFDA) number for grants, cooperative agreements, loans, and loan commitments.

8. Enter the most appropriate Federal identifying number available for the Federal action identified in item 1 (e.g., Request for Proposal (RFP) number; Invitation for Bid (IFB) number; grant announcement number, the contract, grant, or loan award number; the application/proposal control number assigned by the Federal agency). Include prefixes, e.g., "RFP–DE–90–001."

9. For a covered Federal action where there has been an award or loan commitment by the Federal agency, enter the Federal amount of the award/loan commitment for the prime entity identified in item 4 or 5.

10. (a) Enter the full name, address, city, state and zip code of the lobbying entity engaged by the reporting entity identified in item 4 to influence the covered Federal action.

(b) Enter the full names of the individual(s) performing services, and include full address if different from 10 (a). Enter Last Name, First Name, and Middle Initial (MI).

11. Enter the amount of compensation paid or reasonably expected to be paid by the reporting entity (item 4) to the lobbying entity (item 10). Indicate whether the payment has been made (actual) or will be made (planned). Check all boxes that apply. If this is a material change report, enter the cumulative amount of payment made or planned to be made.

12. Check the appropriate box(es). Check all boxes that apply. If payment is made through an in-kind contribution, specify the nature and value of the in-kind payment.

13. Check the appropriate box(es). Check all boxes that apply. If other, specify nature.

14. Provide a specific and detailed description of the services that the lobbyist has performed, or will be expected to perform, and the date(s) of any services rendered. Include all preparatory and related activity, not just time spent in actual contact with Federal officials. Identify the Federal official(s) or employee(s) contacted or the officer(s), employee(s), or Member(s) of Congress that were contacted.

15. Check whether or not a SF–LLL–A Continuation Sheet(s) is attached.

16. The certifying official shall sign and date the form, print his/her name, title, and telephone number.

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, search existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348–0046), Washington, DC 20503.

Important Notice to Prospective Participants in USDE Contract and Grant Programs

Grants

Applicants for grants from the U.S. Department of Education (USDE) have to compete for limited funds.

Deadlines assure all applicants that they will be treated fairly and equally, without last minute haste.

For these reasons, USDE must set strict deadlines for grant applications. Prospective applicants can avoid disappointment if they understand that—

Failure to meet a deadline will mean that an applicant will be rejected without any consideration whatever.

The rules, including the deadline, for applying for each grant are published, individually, in the **Federal Register.** A one-year subscription to the **Register** may be obtained by sending $340.000 to: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20202–9371. (Send check or money order only, no cash or stamps.)

The instructions in the **Federal Register** must be followed exactly. Do not accept any other advice you may receive. No USDE employee is authorized to extend any deadline published in the **Register.**

Questions regarding submission of applications may be addressed to:

U.S. Department of Education, Application Control Center, Washington, DC 20202–4725

Contracts

Competitive procurement actions undertaken by the USDE are governed by the Federal Procurement Regulations and implementing ED Procurement Regulations.

Generally, prospective competitive procurement actions are synopsized in the Commerce Business Daily (CBD). Prospective offerors are therein advised of the nature of the procurement and where to apply for copies of the Request for Proposals (RFP).

Offerors are advised to be guided solely by the contents of the CBD synopsis and the instructions contained in the RFP. Questions regarding the submission of offers should be addressed to the Contracting Specialist identified on the face page of the RFP.

Offers are judged in competition with others, and failure to conform with any substantive requirements of the RFP will result in rejection of the offer without any consideration whatever.

Do not accept any advice you receive that is contrary to instructions contained in either the CBD synopsis or the RFP. No USDE employee is authorized to consider a proposal which is non-responsive to the RFP.

A subscription to the CBD is available for $208.00 per year via second class mailing or $261.00 per year via first class mailing. Information included in the Federal Acquisition Regulations is contained in Title 48, Code of Federal Regulations, Chapter 1 ($49.00). The forgoing publication may be obtained by sending your check or money order only, no cash or stamps, to:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402–9371.

In an effort to be certain this important information is widely disseminated, this notice is being included in all USDE mail to the public. You may, therefore, receive more than one notice. If you do, we apologize for any annoyance it may cause you.

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

H.R. 3863/P.L. 103–265

To designate the Post Office building located at 401 E. South Street in Jackson, Mississippi, as the "Medgar Wiley Evers Post Office". (June 10, 1994; 108 Stat. 712; 1 page)

Last List June 7, 1994

INFORMATION ABOUT THE SUPERINTENDENT OF DOCUMENTS' SUBSCRIPTION SERVICE

Know when to expect your renewal notice and keep a good thing coming. To keep our subscription prices down, the Government Printing Office mails each subscriber *only one renewal notice*. You can learn when you will get your renewal notice by checking the number that follows month/year code on the top line of your label *as shown in this example*:

A renewal notice will be sent approximately 90 days before this date.

```
AFR  SMITH212J                DEC94 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

A renewal notice will be sent approximately 90 days before this date.

```
AFRDO  SMITH212J              DEC94 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402–9372 with the proper remittance. Your service will be reinstated.

To change your address: Please SEND YOUR MAILING LABEL, along with your new address to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To inquire about your subscription service: Please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9375.

To order a new subscription: Please use the order form provided below.

The United States Government Manual 1993/94

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected. $24.00 per year.

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references. $22.00 per year.

Briefing on How To Use the Federal Register
For information on a briefing in Washington, DC, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. It is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. The annual subscription fee for a single workstation is $375. Six-month subscriptions are available for $200 and one month of access can be purchased for $35. Discounts are available for multiple-workstation subscriptions. To subscribe, Internet users should telnet to wais.access.gpo.gov and login as newuser (all lower case); no password is required. Dial in users should use communications software and modem to call (202) 512–1661 and login as wais (all lower case); no password is required; at the second login prompt, login as newuser (all lower case); no password is required. Follow the instructions on the screen to register for a subscription for the **Federal Register** Online via *GPO Access*. For assistance, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov, or a fax to (202) 512–1262, or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $444, or $490 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $403. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $6.00 for each issue, or $6.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 59 FR 12345.

THE FEDERAL REGISTER

WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations

WHO: The Office of the Federal Register

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: June 23 at 9.00 am

WHERE: Office of the Federal Register
Conference Room, 800 North Capitol Street NW., Washington, DC (3 blocks north of Union Station Metro)

RESERVATIONS: 202–523–4538

Rules and Regulations

Federal Register
Vol. 59, No. 115
Thursday, June 16, 1994

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

MERIT SYSTEMS PROTECTION BOARD

5 CFR Part 1201

Practices and Procedures

AGENCY: Merit Systems Protection Board.

ACTION: Final rule.

SUMMARY: The Board is amending its practices and procedures to identify the evidence which an agency must provide to show compliance with an interim relief order and to provide for enforcement of interim relief in circumstances where the sanction of dismissing the agency's petition for review is ineffective. This amendment revises the Board's regulation to more precisely reflect the language of the Whistleblower Protection Act of 1989, 5 U.S.C. 7701(b)(2)(A).

EFFECTIVE DATE: June 16, 1994.

FOR FURTHER INFORMATION CONTACT: Robert Taylor, (202) 653–7200.

SUPPLEMENTARY INFORMATION: Under 5 U.S.C. 7701(k), the Board is authorized to prescribe regulations to carry out the purpose of 5 U.S.C. 7701(b)(2). An appellant who is the prevailing party in an initial decision under 5 U.S.C. 7701(b)(1) may be entitled to interim relief pending the outcome of any petition for review under 5 U.S.C. 7701(e). In *Ginocchi v. Department of the Treasury*, 53 M.S.P.R. 62, 68 n.4 (1992), the Board ruled that it would not entertain motions for compliance with an order of interim relief and that the appellant's remedy for an agency's failure to provide the ordered interim relief would be a motion to dismiss the agency's petition for review. However, this sanction is an ineffective means to obtain compliance in cases where the appellant or an intervenor petitions for review of a decision entitling the appellant to interim relief, such as a decision mitigating the penalty imposed by the agency. The new § 1201.115(c) implements the Board's determination that in such cases the appropriate enforcement mechanism is the Board's authority to order withholding of the salary of the agency official responsible for complying with the interim relief order.

Under § 1201.115(b)(1), a petition for review or cross petition for review by the agency must be accompanied by evidence that the agency has provided any interim relief ordered (or by the evidence relating to an "undue disruption" determination which is specified in § 1201.115(b)(2)). New § 1201.116(a) implements *Ginocchi, supra*, by providing that the appellant may request dismissal of the agency's petition for failure to provide the required interim relief (or the required alternative evidence). It clarifies that dismissal may be sought in either the appellant's response to the agency's petition or in a later motion to dismiss provided the latter is based on information not readily available before the time limit for responding to the agency's petition for review. New § 1201.116(b) provides for petitions for enforcement of interim relief when such relief is still due after issuance of the final decision (e.g., a final pay check or a lump sum payment of unused annual leave earned during the interim period) and the relief sought is not available through a petition for enforcement of the final decision because the appellant is not the prevailing party.

The Board is publishing this rule as a final rule pursuant to 1204(h).

List of Subjects in 5 CFR Part 1201

Administrative practice and procedure, Government employees.

Accordingly, the Merit Systems Protection Board amends 5 CFR part 1201 as follows:

PART 1201—[AMENDED]

1. The authority citation for part 1201 continues to read as follows:

Authority: 5 U.S.C. 1204 and 7701 unless otherwise noted.

2. In § 1201.115, paragraph (c) is redesignated as paragraph (d) and paragraphs (b)(1) and (b)(2) are revised and a new paragraph (c) is added to read as follows:

§ 1201.115 Contents of petition for review.

* * * * *

(b)(1) If the appellant was the prevailing party in the initial decision, and the decision granted the appellant interim relief, any petition for review or cross petition for review filed by the agency must be accompanied by evidence that the agency has provided the interim relief required, except when the agency has made a determination as described in paragraph (b)(2) of this section. The agency may comply by submitting an SF 50 or SF 52, a letter from an agency official directing the appellant to return to work and informing the appellant of his or her reinstatement as of the date of the initial decision, or an affidavit or declaration specifying the manner of the agency's compliance. The interim relief must be effected retroactively to the date of the initial decision. Cancellation of the appealed action or relief effected retroactively to the date of the action will result in dismissal of the agency's petition for mootness.

(2) Under 5 U.S.C. 7701(b)(2), if the initial decision provides interim relief which requires that the appellant be returned to his or her place of employment pending the outcome of any petition for review and the agency determines that the return or presence of the appellant will be unduly disruptive to the work environment, the agency must notify both the appellant and the judge in writing. The agency must also provide evidence of such notification to the Board at the time of filing a petition or cross petition for review. The evidence must show that the agency has provided that the appellant will receive appropriate pay, compensation, and all other benefits as terms and conditions of employment from the date of the initial decision until a final decision is issued.

* * * * *

(c) If an appellant or an intervenor files a petition or cross petition for review of an initial decision ordering interim relief, upon order of the Clerk of the Board the agency must submit evidence that it has provided the interim relief required (or, where applicable, the evidence specified in paragraph (b)(2) of this section), *and* it must submit the name of the official responsible for compliance. The agency's failure to submit acceptable evidence of compliance with the interim relief order is a basis for the Board to order the withholding of the salary of

the responsible official pursuant to 5 U.S.C. 1204(e)(2)(A) and 5 CFR 1201.183(c). This sanction is in addition to the dismissal of an agency petition or cross petition for review provided for in paragraph (b)(4) of this section.

* * * * *

3. Sections 1201.116 through 1201.119 are redesignated as §§ 1201.117 through 1201.120, and a new § 1201.116 is added to read as follows:

§ 1201.116 Appellant requests for enforcement of interim relief.

(a) *Before a final decision is issued.* If the agency files a petition for review or a cross petition for review and has not provided required interim relief, the appellant may request dismissal of the agency's petition. Any such request must be filed with the Clerk of the Board within 25 days of the date of service of the agency's petition. A copy of the response must be served on the agency at the same time it is filed with the Board. The agency may respond with evidence and argument to the appellant's request to dismiss within 15 days of the date of service of the request. If the appellant files a motion to dismiss beyond the time limit, the Board will dismiss the motion as untimely unless the appellant shows that it is based on information not readily available before the close of the time limit.

(b) *After a final decision is issued.* If the appellant is not the prevailing party in the final Board order, and if the appellant believes that the agency has not provided full interim relief, the appellant may file an enforcement petition with the regional office under § 1201.182. The appellant must file this petition within 20 days of learning of the agency's failure to provide full interim relief. If the appellant prevails in the final Board order, then any interim relief enforcement motion filed will be treated as a motion for enforcement of the final decision. Petitions under this subsection will be processed under § 1201.183

Dated: June 10, 1994

Robert E. Taylor,

Clerk of the Board

[FR Doc. 94-14590 Filed 6-15-94; 8:45 am]

BILLING CODE 7400-01-M

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 272 and 273

[Amendment No. 355]

RIN 0584-AB79

Food Stamp Program: Utility Reimbursement Exclusion

AGENCY: Food and Nutrition Service, USDA.

ACTION: Interim Rule and request for comments.

SUMMARY: This action excludes certain utility reimbursements made by the Department of Housing and Urban Development (HUD) and Farmers Home Administration (FmHA) from income consideration in determining Food Stamp Program eligibility and benefits. This action will result in increased benefits to households that receive the reimbursements, a consistent nationwide policy, greater consistency in the treatment of housing and energy assistance payments, and more consistency with the Aid to Families with Dependent Children (AFDC) Program.

DATES: This rule is effective and must be implemented no later than August 1, 1994. Comments must be received on or before August 15, 1994 to be assured of consideration.

ADDRESSES: Comments should be submitted to Judith M. Seymour, Eligibility and Certification Regulation Section, Certification Policy Branch, Program Development Division, Food and Nutrition Service, USDA, 3101 Park Center Drive, Alexandria, Virginia, 22302. Comments may also be datafaxed to the attention of Ms. Seymour at (703) 305-2454. All written comments will be open for public inspection at the office of the Food and Nutrition Service during regular business hours (8:30 a.m. to 5 p.m., Monday through Friday) at 3101 Park Center Drive, Alexandria, Virginia, Room 720.

FOR FURTHER INFORMATION CONTACT: Questions regarding the proposed rulemaking should be addressed to Ms. Seymour at the above address or by telephone at (703) 305-2496.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12866

The Food and Nutrition Service is issuing this interim rule in conformance with Executive Order 12866 and it has been designated "economically significant."

Executive Order 12372

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the final rule in 7 CFR part 3015, Subpart V and related Notice (48 FR 29115), this Program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Regulatory Flexibility Act

This rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (5 U.S.C. 601-612). Ellen Haas, the Assistant Secretary for Food and Consumer Services, has certified that this rule does not have a significant economic impact on a substantial number of small entities. State and local welfare agencies will be the most affected to the extent that they administer the Program.

Paperwork Reduction Act

This rule does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Regulatory Impact Analysis

Need for Action

This rule is required to eliminate inconsistent policies resulting from litigation, promote equity in the treatment of housing and energy assistance, and increase consistency with the Aid to Families with Dependent Children program.

Benefits

This action increases benefits to low-income households responsible for paying utility expenses separately from their rent who receive utility reimbursements from HUD and FmHA.

Costs

It is estimated that this action will increase the cost of the Food Stamp Program by approximately $13 million for each month of its implementation in FY 1994 and $160 million in FY 1995.

Executive Order 12778

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule is intended to have preemptive effect with respect to any State or local laws, regulations or policies which conflict with its provisions or which would otherwise impede its full implementation. This rule is not intended to have retroactive

effect unless so specified in the "Effective Date" paragraph of this preamble. Prior to any judicial challenge to the provisions of this rule or the application of its provisions, all applicable administrative procedures must be exhausted. In the Food Stamp Program the administrative procedures are as follows: (1) For Program benefit recipients—State administrative procedures issued pursuant to 7 U.S.C. 2020(e)(1) and 7 CFR 273.15; (2) for State agencies—administrative procedures issued pursuant to 7 U.S.C. 2023 set out at 7 CFR 276.7 (for rules related to non-quality control (QC) liabilities) or Part 284 (for rules related to QC liabilities); (3) for Program retailers and wholesalers—administrative procedures issued pursuant to 7 U.S.C. 2023 set out at 7 CFR 278.8.

Public Participation and Effective Date

The provisions of this rulemaking are required to be effective and implemented no later than August 1, 1994. Because of the need to establish a consistent nationwide policy with respect to the treatment of the specified utility reimbursements, Ellen Haas, Assistant Secretary for Food and Consumer Services, has determined, pursuant to 5 U.S.C. 553, that public comment on this rulemaking prior to implementation is impracticable. However, because we believe that the administration of the rule may be improved by public comment, comments are solicited on this rule for 60 days. All comments will be analyzed, and any appropriate changes to the rule will be incorporated in the subsequent publication of a final rule.

Background

The HUD utility reimbursements excluded from Food Stamp Program (Program) income consideration by this rule are provided pursuant to the United States Housing Act of 1937 (the Housing Act), 42 U.S.C. 1437, to comply with a provision of the Housing Act (42 U.S.C. 1437a(a)(1)) that requires HUD to limit the shelter costs of tenants in Federally assisted housing to 30 percent of their income. In calculating a tenant's rent payment, HUD has interpreted the term "rent" to include the cost of utilities and other services, including electricity, gas, heating fuel, water and sewerage, and trash and garbage collection (24 CFR 813.102, 965.472, 965.476). In some housing, utilities are included in the tenant's rent. In units in which the utilities are paid directly by the tenant, HUD permits a deduction to be made from the rent paid to the owner on account of the separate payment being made to the utility supplier. This deduction, provided for in 24 CFR 813.102 and 913.102, for the estimated value of utilities and charges for other housing services payable directly by the family is called a "utility allowance." The amount of the utility allowance is based, not on an individual family's expenses, but on a community-wide standard. Therefore, the tenant's actual utility costs may be more or less than the allowance.

For most tenants, the amount of the utility allowance is less than the amount they are required to pay toward their rent including utilities. In most cases, the utility allowance involves no direct payment to the household, but is merely a credit reducing the household's contribution to the landlord. If the utility allowance exceeds the rent that can be charged for a dwelling, the excess is paid in the form of a "utility reimbursement" or rebate to the household.

Similar reimbursements are made to some rural low-income households by the Farmers Home Administration (FmHA) of the Department of Agriculture as part of its Rental Assistance Program which provides, pursuant to 7 CFR pt. 1930, subpt. C; pt. 1944, subpt. E, loans for housing in rural areas. Under the FmHA Program, the borrower (the owner of the property) may apply for Rental Assistance for each tenant in the project who meets the eligibility criteria. The Rental Assistance payment equals the difference between 30 percent of the household's income and the sum of the rent plus the utility allowance for the project. If the tenant pays the utilities, the total Rental Assistance payment from FmHA is made to the owner, who is obligated to pass on to the tenant the portion allocated to utilities. When FmHA's utility allowance is more than 30 percent of the household's adjusted income, the landlord is obligated to forward the difference to the tenant as a utility reimbursement.

Under section 5(d) of the Food Stamp Act of 1977 (7 U.S.C. 2014(d)), any income received by the household directly or indirectly must be counted in determining the household's eligibility and benefits, except for the exclusions listed in the Act. Neither the Food Stamp Act nor current regulations specifically address the treatment of HUD and FmHA utility reimbursements. It is clear that Federal energy assistance payments are excluded by section 5(d)(11) of the Food Stamp Act. However, the HUD and FmHA reimbursements are not provided specifically for energy assistance alone. Current policy requires counting these HUD utility reimbursements as income. This policy is applicable nationwide except in jurisdictions in which the reimbursements are excluded by judicial decision.

In the past, it was our policy that utility reimbursements did not qualify as energy assistance. In response to questions concerning the payments, we issued Policy Memo 90–6 addressing HUD payments and Policy Memo 3–91–04 regarding FmHA payments. Policy Memo 90–6 provides that any amount paid by HUD directly to the household as a utility reimbursement or indirectly to the utility provider must be counted as income to the household. Under Policy Memo 3–91–04, the utility reimbursement paid by the landlord to the tenant is counted as income to the household.

This policy has been maintained over several years and has been successfully defended in court on a number of occasions. While we believe the current policy is a permissible interpretation of the statute, we believe it is not in the best interest of the Program to continue to litigate this issue. In reexamining the policy, we have determined that there are several compelling reasons to change the policy so as to exclude the utility reimbursements in the future.

First, although the HUD and FmHA utility reimbursements are not provided specifically for energy assistance, a substantial portion of a household's utility expense is for heating and cooling. A change in policy to exclude the utility reimbursements is not inconsistent with the specific exclusion in section 5(d)(11) of the Food Stamp Act and 7 CFR 273.9(c)(11) for Federal energy assistance. Excluding the utility reimbursements under the existing regulatory provision would achieve consistency in the treatment of Federal energy assistance.

Second, the current policy is inconsistent with the policy of the Aid to Families with Dependent Children (AFDC) Program in most States. Increasing consistency between the Food Stamp and AFDC Programs is a Department priority because it makes the Programs simpler to administer and more understandable to households.

Maintaining the current policy also causes inconsistent treatment of households in subsidized housing between those in traditional housing whose utilities are included in their rent and households who are responsible for paying their own utility expenses. Excluding the utility reimbursements would provide greater consistency in treatment of various forms of housing assistance.

Finally, a change in policy eliminates the need to maintain at least two distinct and conflicting policies for the foreseeable future because courts in some jurisdictions have affirmed the current policy and others have found it insupportable.

Therefore, this rule amends 7 CFR 273.9(c)(11) to provide that payments or allowances made for the purpose of providing energy assistance under any Federal law, including HUD and FmHA reimbursements, are excluded from income. We are making a conforming amendment to 7 CFR 273.10(d)(1)(i) to provide that a utility expense which is reimbursed or paid by an excluded payment, including HUD or FmHA utility payments, shall not be deductible. In accordance with Section 5(e) of the Act, 7 U.S.C. 2014(e), households that receive these payments will be entitled to use a standard utility allowance that includes a heating or cooling component only if they incur heating or cooling costs that exceed the amount of the excluded payment.

Implementation

This rule is effective and must be implemented no later than August 1, 1994. For quality control purposes, any variances resulting from the implementation of the rule shall be excluded from error analysis for 120 days from the required implementation date, in accordance with 7 CFR 275.12(d)(2)(vii), as modified by section 13951(c)(2) of Pub. L. 103-66. Section 13951(c)(2) extended the variance exclusion period of Section 16(c)(3)(A) of the Act, 7 U.S.C. 2025 (c)(3)(A), from a maximum of 90 days to 120 days. The provisions must be implemented for all households that newly apply for Program benefits on or after the required implementation date. The current caseload shall be converted to these provisions at household request, at the time of recertification, or when the case is next reviewed, whichever occurs first, and the State agency must provide restored benefits back to the required implementation date. If for any reason a State agency fails to implement on the required implementation date, restored benefits shall be provided, if appropriate, back to the required implementation date or the date of application, whichever is later.

List of Subjects

7 CFR Part 272

Alaska, Civil rights, Food stamps, Grant programs—social programs, Reporting and recordkeeping requirements.

7 CFR Part 273

Administrative practice and procedure, Aliens, Claims, Food stamps, Fraud, Grant programs—social programs, Penalties, Records, Reporting and recordkeeping requirements, Social Security, Students.

Accordingly, 7 CFR parts 272 and 273 are amended as follows:

1. The authority citation for Parts 272 and 273 continues to read as follows:

Authority: 7 U.S.C. 2011–2032.

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

2. In § 272.1, a new paragraph (g)(134) is added to read as follows:

§ 272.1 General terms and conditions.

* * * * *

(g) *Implementation.* * * *

(134) *Amendment No. 355.* The provisions of Amendment No. 355 are effective and must be implemented on August 1, 1994. Any variance resulting from implementation of the provisions of this amendment shall be excluded from error analysis for 120 days from this required implementation date in accordance with 7 CFR 275.12(d)(2)(vii) as modified by section 13951(c)(2) of Pub. L. 103–66. The provisions must be implemented for all households that newly apply for Program benefits on or after the required implementation date. The current caseload shall be converted to these provisions at household request, at the time of recertification, or when the case is next reviewed, whichever occurs first, and the State agency must provide restored benefits back to the required implementation date. If for any reason a State agency fails to implement on the required implementation date, restored benefits shall be provided, if appropriate, back to the required implementation date or the date of application, whichever is later.

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

§ 273.9 [Amended]

3. In 273.9, the first sentence of paragraph (c)(11) introductory text is amended by adding the words ", including utility reimbursements made by the Department of Housing and Urban Development and the Farmers Home Administration" before the period.

4. In 273.10, paragraph (d)(1)(i) is amended by adding a sentence at the end of the paragraph to read as follows:

§ 273.10 Determining household eligibility and benefit levels.

* * * * *

(d) *Determining deductions.*

* * *

(1) *Disallowed expenses.*

(i) * * * A utility expense which is reimbursed or paid by an excluded payment, including HUD or FmHA utility reimbursements, shall not be deductible.

* * * * *

Dated: June 13, 1994.

Ellen Haas,

Assistant Secretary for Food and Consumer Services.

[FR Doc. 94–14713 Filed 6–15–94; 8:45 am]

Agricultural Marketing Service

7 CFR Parts 915 and 944

[Docket Nos. FV93–915–2FR and FV91–288–FR]

Avocados Grown in South Florida and Imported Avocados; Changes to Maturity and Reporting Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule revises minimum maturity requirements and suspends certain reporting requirements for avocados grown in South Florida. This rule is designed to ensure that only mature fruit is shipped to the fresh market, thereby improving grower and importer returns and promoting orderly marketing conditions. For avocados imported into the United States, this final rule reinstates maturity requirements with certain revisions; adds an exemption for certain avocado varieties; removes the exemption for avocados grown in the southern hemisphere; and adds exemptions from maturity requirements for avocados imported for certain uses. This rule is needed so that imported avocados meet the same minimum size and color maturity requirements as those established for avocados under the Federal marketing order covering Florida avocados, consistent with section 8e of the Agricultural Marketing Agreement Act of 1937.

EFFECTIVE DATE: June 20, 1994.

FOR FURTHER INFORMATION CONTACT: Caroline C. Thorpe, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2523–S, Washington, DC 20090–6456; telephone: 202–720–5127; or Aleck J. Jonas, Southeast Marketing Field Office, USDA/AMS, P.O. Box 2276, Winter Haven, Florida 33883; telephone: 813–299–4770

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement No. 148 and Order No. 915 (7 CFR part 915), as amended, regulating the handling of avocados grown in South Florida, hereinafter referred to as the order. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This rule is also issued under section 8e of the Act, which requires the Secretary of Agriculture to issue grade, size, quality, or maturity requirements for certain listed commodities, including avocados, imported into the United States that are the same as, or comparable to, those imposed upon the domestic commodities, under Federal marketing orders. The Secretary has determined that the maturity requirements for imported avocados should be the same as those established for avocados grown in South Florida under the order.

The Department is issuing this rule in conformance with Executive Order 12866.

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. This final rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 8c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing, the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling. There are no administrative procedures which must be exhausted prior to any judicial challenge to the provisions of the import rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility. Import regulations issued under the Act are based on those established under Federal marketing orders.

There are about 65 avocado handlers subject to regulation under the marketing order covering avocados grown in Florida and about 95 avocados producers in South Florida. There are about 20 avocado importers who will be subject to the avocado import maturity requirements. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those whose annual receipts are less than $500,000, and small agricultural service firms, which include avocado handlers and importers, have been defined by the Small Business Administration as those having annual receipts of less than $5,000,000. The majority of the Florida avocado handlers and producers, and avocado importers may be classified as small entities.

This rule finalizes two proposed rules: the first proposed revisions in the maturity and reporting requirements for avocados grown in Florida; the second proposed reinstatement and revision of maturity requirements for imported avocados. Both proposed rules were published in the April 4, 1994, **Federal Register** [59 FR 15658 and 15661] and provided 30 days to interested persons to file comments. No comments were received. However, several typographical and printing errors were identified in both proposed rules as published. This final rule corrects the errors in Table I of both rules: (1) For the Booth 8 variety after October 10, the minimum diameter is changed from 3 3/16 to 3 1/16 inches; (2) for the Chica variety after October 3, the minimum diameter is changed from 3 1/16 to 3 3/16 inches.

The Avocado Administrative Committee (committee) works with the Department in administering the order, and it meets prior to and during each season to consider recommendations for modification, suspension, or termination of the regulatory requirements for Florida avocados.

The committee met December 8, 1993, and unanimously recommended that the shipping schedules for avocados be revised and that certain reporting requirements be temporarily suspended. Committee meetings are open to the public and interested persons may express their views at these meetings. The Department reviews committee recommendations, information submitted by the committee and other information, and determines whether modification, suspension, or termination of the regulatory requirements would tend to effectuate the declared policy of the Act.

Maturity requirements for avocados grown in Florida, based on minimum weights, diameters, and skin color, are specified in § 915.322 [7 CFR 915.322], and are in effect on a continuous basis. These maturity requirements specify minimum weights and diameters for specific shipping periods for some 60 varieties of avocados, and color specifications for those varieties which turn red or purple when mature. The maturity requirements for the various varieties of avocados are different, because each variety has different characteristics. The maturity requirements for each avocado variety are based on maturity test results.

These maturity requirements are designed to prevent shipments of immature avocados to the fresh market, especially during the early part of the harvest season for each variety. Providing fresh markets with mature fruit is an important aspect of creating consumer satisfaction and is in the interest of both producers and consumers. Fresh shipments of Florida avocados usually begin with light shipments of early varieties in May, and they continue until the following March or April, with heaviest shipments occurring from July through December.

This final rule revises the shipping schedules for the avocado varieties specified in Table I of paragraph (a)(2) of § 915.322 (7 CFR part 915.322) to synchronize those schedules with any calendar year. The previous schedules needed to be adjusted to each new year to ensure that dates and weekdays conformed to each new year. The schedules in Table I are similar to previous calendars, except that the maturity schedules have fixed dates, which become effective on the Monday nearest the date specified in Table I. The new schedules are expected to conform more closely to the needs of the industry. This final rule also exempts from maturity requirements the Hass, Fuerte, Zutano, and Edranol varieties of avocados, since these varieties of avocados are not commercially grown in the production area in Florida.

A minimum grade requirement of U.S. No. 2 currently in effect on a continuous

basis for avocados grown in Florida under § 915.306 (7 CFR part 915.306), and for avocados imported into the United States under § 944.28 (7 CFR part 944.28) remains in effect unchanged by this action.

Florida avocado handlers may ship, exempt from the minimum grade, size, and maturity requirements effective under the order, up to 55 pounds of avocados during any one day under a minimum quantity provision, and up to 20 pounds of avocados as gift packs in individually addressed containers. Also, avocados grown in Florida utilized for commercial processing are not subject to the grade, size, and maturity requirements under the order.

Paragraph (d) of § 915.150 (7 CFR part 915.150), currently requires that each handler, at the end of the day's operation, report to the committee the number of containers (¼ Bushel, ½ Bushel, and ⅘ Bushel) of avocados sold and delivered within the State of Florida. This final action suspends paragraph (d) of § 915.150 for the next two seasons, through March 31, 1996. This temporarily suspends the requirement that handlers file the "Avocado Handler Daily Size Report Form" which takes about 0.083 hours to complete for each report. The committee has determined that information needed for operations, marketing policies, and compliance, could sufficiently be obtained from inspection certificates collected on a daily basis by program staff, and that information collected on the "Avocado Handler Daily Size Report Form" will not be needed for the next two seasons. Further, Hurricane Andrew reduced avocado production by almost half, and this has reduced assessment collections, resulting in a need to reduce staff and administration costs.

This rule is also issued under section 8e of the Act, which requires the Secretary of Agriculture to issue grade, size, quality, or maturity requirements for certain listed commodities imported into the United States, including avocados, that are the same as, or comparable to, those imposed upon the domestic commodities under Federal marketing orders.

Minimum size (weight and diameter) and skin color maturity requirements for imported avocados in § 944.31 (7 CFR 944.31) were continuously in effect for several years prior to their suspension by a final rule issued May 15, 1991 (56 FR 23009, May 20, 1991). The avocado import maturity requirements were temporarily suspended to provide the United States Trade Representative (USTR) adequate time to review contemplated changes in those requirements, as required by section 8e of the Act. Suspension of the avocado import maturity requirements became necessary when the Florida avocado maturity requirements in § 915.332 (7 CFR 915.332), upon which the avocado import maturity requirements were based, were revised on May 15, 1991 (56 FR 23005, May 20, 1991). This revision was finalized on September 4, 1991 (56 FR 46224, September 11, 1991). Section 915.332 was most recently amended to make calendar date adjustments in the shipping schedule for several varieties of Florida avocados on June 29, 1993 (58 FR 34684, June 29, 1993), and that rule was finalized on October 4, 1993 (58 FR 46759, September 3, 1993).

Prior to suspension, the avocado import maturity requirements were based on minimum weights and diameters applied to avocados grown in all foreign countries, except for those grown in southern hemisphere countries. Such requirements were applied to each variety for a specific time period during the first part of the shipping period. The minimum weights or diameters were not applied to avocados grown in southern hemisphere countries, such as Chile, where practically all imported southern hemisphere avocados have originated in recent years, because the southern hemisphere's avocado growing season and various shipping periods differ from those in Florida. The import maturity requirements based on minimum weights or diameters were applied to avocados grown in northern hemisphere countries, such as those in the Bahamas and the Dominican Republic, where practically all northern hemisphere imported avocados have originated in recent years, because their growing season and various shipping periods are similar to those in Florida.

The avocado import maturity requirements based on skin color for certain varieties of avocados which turn red, purple or black when mature were applied to avocados imported from all foreign countries in both the southern and northern hemispheres. Such requirements applied to all avocados grown in both hemispheres, because all such avocados turn color when mature regardless of where they are grown.

This final rule also reinstates the minimum size (weight and diameter) requirements for avocados and the skin color maturity requirements for avocados imported from all foreign countries by lifting the suspended provisions of § 944.31. However, this final rule exempts the Hass, Fuerte, Zutano, and Edranol varieties of avocados from such import maturity requirements, because such varieties are not grown in commercial quantities in Florida and regulated under the Florida avocado maturity requirements in § 915.332.

This final rule obviates the need for exempting avocados imported from the southern hemisphere, since the major varieties imported from the southern hemisphere are the Hass, Fuerte, Zutano, and Edranol varieties.

This final rule also adds language to § 944.31 to cite the minimum size (weight and diameter) and skin color maturity requirements, and define the term "diameter".

This final rule also exempts imported avocados under § 944.31 from minimum weight, diameter, and color maturity requirements if they are to be used in certain specified outlets. Similar exemptions from grade requirements established for imported avocados under § 944.28 were implemented by an interim final rule published in the **Federal Register** [58 FR 69182, December 30, 1993], with an effective date of January 1, 1994.

The avocado import maturity regulation [7 CFR 944.31] is based on the maturity requirements in effect for avocados grown in Florida under the order throughout the year. Under the order, any person may handle avocados without regard to established grade, size, quality, or maturity requirements provided that such avocados are handled for (1) consumption by charitable institutions; (2) distribution by relief agencies; (3) commercial processing into products; (4) seed; or (5) individual shipments of up to 55 pounds. Prior to issuance of this rule, the only exemption allowed under the avocado import regulation was that for individual shipments of up to 55 pounds. Thus, this final rule adds consumption by charitable institutions, distribution by relief agencies, seed, and commercial processing into products to the list of exemptions allowed under the avocado import regulation.

To ensure that imported avocados exempt from the maturity requirements are utilized in exempt outlets, this rule states that such avocados be subject to the safeguard procedures for imported fruit established in § 944.350 [58 FR 69182, December 30, 1993].

Under these procedures, an importer wishing to import avocados covered herein for uses in other than regulated commercial channels, must complete in triplicate, prior to importation, an "Importer's Exempt Commodity Form." One copy will notify the Marketing Order Administration Branch (MOAB) of the Fruit and Vegetable Division, AMS, and the second copy will notify the U.S. Customs Service of the importer's intent to import a commodity under an exemption. The third copy will accompany the exempt lot to the receiver.

The form may be obtained from either the inspection or customs offices serving the port of entry. The form may also be obtained from the MOAB in Washington, DC or from its Marketing Field Offices in Fresno, California; Portland, Oregon; McAllen, Texas; or Winter Haven, Florida.

The form must be completed at the time the commodity enters the United States. Copies are to be returned to the U.S. Customs Service at the time the commodity is offered for importation and to MOAB within 15 days after completion of the form. Information called for on the "Importer's Exempt Commodity Form" includes:

(1) The commodity and the variety (if known) being imported,
(2) The date and place of inspection, if applicable,
(3) Identifying marks or numbers on the containers,
(4) Identifying numbers on the railroad car, truck or other transportation vehicle transporting product to the receiver,
(5) The name and address of the importer,
(6) The place and date of entry,
(7) The quantity imported,
(8) the name and address of the intended receiver (eg. processor, feeder, charity, or other exempt receiver),
(9) Intended use of the exempt commodity,
(10) The U.S. Customs Service entry number and harmonized tariff code number, and
(11) Such other information as may be necessary to ensure compliance with this regulation.

For purposes of this regulation, a lot is considered to be imported when it is released by the Customs Service for entry into commercial markets or other channels. Lots that are exempt from maturity requirements of the import regulations are not subject to the inspection and certification requirements in such regulations. An imported lot intended for normal commercial channels, or any portion of such a lot, that fails established maturity requirements, could be disposed of in exempt outlets, as specified in the pertinent avocado import requirements.

The third copy of the form will accompany the exempt lot to its intended destination. The receiver will then certify that the lot has been received and it will be utilized in an exempt outlet. After the certification is signed by the receiver, the form is to be returned to MOAB by the receiver, within 15 days of receipt of the lot.

The information collection requirements contained in this final rule have been previously approved by the Office of Management and Budget (OMB) in accordance with the Paperwork Reduction Act of 1980 [44 U.S.C. Chapter 35], and have been assigned OMB numbers 0581–0078 for avocados grown in South Florida and 0581–0167 for imported avocados.

In accordance with section 8e of the Act, the USTR has concurred with the issuance of this final rule.

This final rule reflects the committee's and the Department's appraisal of the need to make the specified changes. The Department's view is that this action will have a beneficial impact on producers and handlers since it will help ensure that only mature avocados are shipped to fresh markets. The committee considers that maturity requirements for Florida grown avocados are necessary to improve grower returns and promote orderly marketing conditions. Although compliance with these maturity requirements will affect costs to handlers, these costs will be offset by the benefits of providing the industry and consumers with mature avocados.

This final rule also reflects the Department's appraisal of the need to reinstate the suspended avocado import maturity requirements, with the specified revisions, as hereinafter set forth, in accordance with section 8e of the Act.

Based on the above, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, the information and recommendations submitted by the committee, and other information, it is found that this final rule as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) The shipping season for South Florida avocados is expected to begin in late May; (2) avocado handlers are aware of this action which was unanimously recommended by the committee; (3) notice of the proposed rules were published in the **Federal Register**, and no comments were received during the 30-day comment period.

List of Subjects in 7 CFR Part 915

Avocados, Marketing agreements, Reporting and recordkeeping requirements.

List of Subjects in 7 CFR Part 944

Avocados, Food grades and standards, Grapefruit, Grapes, Imports, Kiwifruit, Limes, Olives, Oranges.

For the reasons set forth in the preamble, 7 CFR parts 915 and 944 are amended as follows:

1. The authority citation for 7 CFR parts 915 and 944 continues to read as follows:

Authority: 7 U.S.C. 601–674.

PART 915—AVOCADOS GROWN IN SOUTH FLORIDA

2. Section 915.332 is revised to read as follows:

§ 915.332 Florida avocado maturity regulation.

(a) No handler shall handle any variety of avocados, except Hass, Fuerte, Zutano, and Edranol, grown in the production area unless:

(1) Any portion of the skin of the individual avocados has changed to the color normal for that fruit when mature for those varieties which normally change color to any shade of red or purple when mature, except for the Linda variety; or

(2) Such avocados meet the minimum weight or diameter requirements for the Monday nearest each date specified, through the Sunday immediately prior to the nearest Monday of the specified date in the next column, for each variety listed in the following TABLE I: *Provided*, that avocados may not be handled prior to the earliest date specified in column A of such table for the respective variety; *Provided further*, There are no restrictions on size or weight on or after the date specified in column D; *Provided further*, That up to a total of 10 percent, by count to the individual fruit in each lot may weigh less than the minimum specified or be less than the specified diameter, except that no such avocados shall be over 2 ounces lighter than the minimum weight specified for the variety: *Provided further*, That up to double such tolerance shall be permitted for fruit in an individual container in a lot.

[1] Avocados of the West Indian type varieties and seedlings not listed elsewhere in Table I.
[2] Avocados of the Guatemalan type varieties and seedlings, hybrid varieties and seedlings, and unidentified seedlings not listed elsewhere in Table I.

(b) The term diameter means the greatest dimension measured at a right angle to a straight line from the stem to the blossom end of the fruit.

PART 944—FRUITS; IMPORT REGULATIONS

3. The suspension of § 944.31 is removed and the section is revised to read as follows:

§ 944.31 Avocado import maturity regulation.

(a) Pursuant to section 8e [7 U.S.C. 608e–1] of the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C 601–674], and Part 944—Fruits; Import Regulations, the importation into the United States of any avocados, except the Hass, Fuerte, Zutano, and Edranol varieties, is prohibited unless:

(1) any portion of the skin of the individual avocados has changed to the color normal for that fruit when mature for those varieties which normally change color to any shade of red or purple when mature, except for the Linda variety; or

(2) Such avocados meet the minimum weight or diameter requirements for the Monday nearest each date specified, through the Sunday immediately prior to the nearest Monday of the specified date in the next column, for each variety listed in the following Table I: Provided, that avocados may not be handled prior to the earliest date specified in column A of such table for the respective variety; Provided further, There are no restrictions on size or weight on or after the date specified in column D; Provided further, That up to a total of 10 percent, by count to the individual fruit in each lot may weigh less than the minimum specified or be less than the specified diameter, except that no such avocados shall be over 2 ounces lighter than the minimum weight specified for the variety: Provided further, That up to double such tolerance shall be permitted for fruit in an individual container in a lot.

[1] Avocados of the West Indian type varieties and seedlings not listed elsewhere in Table 1.
[2] Avocados of the Guatemalan type varieties and seedlings, hybrid varieties and seedlings, and unidentified seedlings not listed elsewhere in Table I.

(b) The term diameter means the greatest dimension measured at a right angle to a straight line from the stem to the blossom end of the fruit.

(c) The term importation means release from custody of the United States Customs Service. The term commercial processing into products means the manufacture of avocado product which is preserved by any recognized commercial process, including canning, freezing, dehydrating, drying, the addition of chemical substances, or by fermentation.

(d) Any person may import up to 55 pounds of avocados exempt from the requirements specified in this section.

(e) The Federal or Federal-State Inspection Service, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, is designated as the governmental inspection service for certifying the grade, size, quality, and maturity of avocados imported into the United States. Inspection by the Federal or Federal-State Inspection Service with evidence thereof in the form of an official inspection certificate, issued by the respective service, applicable to the particular shipment of avocados, is required on all such imports. The inspection and certification services will be available upon application in accordance with the Regulations Governing Inspection, Certification and Standards of Fresh Fruits, Vegetables, and Other Products (7 CFR part 51), and in accordance with the regulation designating inspection services and procedure for obtaining inspection and certification (7 CFR 944.400).

(f) Any avocados which fail to meet the import requirements prior to or after reconditioning and which are not being imported for purposes of consumption by charitable institutions, distribution by relief agencies, seed, or commercial processing into products may be reconditioned or exported, or disposed of under the supervision of the Federal or Federal-State Inspection Service with the costs of certifying the disposal of such avocados borne by the importer.

(g) The size, weight, diameter, and color maturity requirements of this section shall not be applicable to avocados imported for consumption by charitable institutions, distribution by relief agencies, seed, or commercial processing into products, but shall be subject to the safeguard provisions contained in § 944.350.

Dated: June 9, 1994.

Eric M. Forman,

Deputy Director, Fruit and Vegetable Division.

7 CFR Part 926

[Docket No. FV94–926–1IFR]

Tokay Grapes Grown in San Joaquin County, California; Expenses and Assessment Rate for 1994–95 Fiscal Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This interim final rule authorizes expenditures and establishes an assessment rate for the Tokay Grape Industry Committee (committee) under Marketing Order (M.O.) No. 926 for the 1994–95 fiscal year. Authorization of this budget enables the committee to incur expenses that are reasonable and necessary to administer this program. Funds to administer this program are derived from assessments on handlers.

DATES: Effective beginning April 1, 1994, through March 31, 1995. Comments received by July 18, 1994, will be considered prior to issuance of a final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this interim final rule. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2523–S, Washington, D.C. 20090–6456. Fax # (202) 720–5698. Comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Britthany Beadle, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2523–S, Washington, D.C. 20090–6456, telephone:(202) 720–5127; or Peter I. Parks, California Marketing Field Office, Fruit and Vegetable Division, AMS, USDA, 2202 Monterey Street, Suite 102 B, Fresno, California 93721, telephone: (209) 487–5901.

SUPPLEMENTARY INFORMATION: This interim final rule is issued under Marketing Agreement and Order No. 926 [7 CFR Part 926] regulating the handling of Tokay grapes grown in San Joaquin County, California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C. 601–674], hereinafter referred to as the Act.

The Department of Agriculture (Department) is issuing this rule in conformance with Executive Order 12866.

This interim final rule has been reviewed under Executive Order 12778, Civil Justice Reform. Under the marketing order provisions now in effect, Tokay grapes grown in California are subject to assessments. It is intended that the assessment rate specified herein

will be applicable to all assessable Tokay grapes handled during the 1994–95 fiscal year, beginning April 1, 1994, through March 31, 1995. This interim final rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are three handlers of Tokay grapes regulated under the marketing order each season and approximately 15 Tokay grape producers in San Joaquin County, California. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.601] as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $5,000,000. The majority of these handlers and producers may be classified as small entities.

The Tokay grape marketing order, administered by the Department, requires that the assessment rate for a particular fiscal year apply to all assessable grapes handled from the beginning of such year. Annual budgets of expenses are prepared by the committee, the agency responsible for local administration of this marketing order, and submitted to the Department for approval. The members of the committee are grape handlers and producers. They are familiar with the committee's needs and with the costs for goods, services, and personnel in their local area, and are thus in a position to formulate appropriate budgets. The committee's budget is formulated and discussed in a public meeting. Thus, all directly affected persons have an opportunity to participate and provide input.

The assessment rate recommended by the committee is derived by dividing the anticipated expenses by expected shipments of grapes. Because that rate is applied to actual shipments, it must be established at a rate which will provide sufficient income to pay the committee's expected expenses.

The committee met on April 29, 1994, and unanimously recommended total expenditures of $5,150 with an assessment rate of $0.07 per carton for the 1994–95 fiscal year. In comparison, the expenditure amount and the assessment rate are remaining unchanged from the 1993–94 fiscal year.

Funds in the reserve at the end of the 1994–95 fiscal year, estimated at $4,500, will be within the maximum permitted by the order of one fiscal year's expenses.

While this action will impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs should be significantly offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, including the information and recommendations submitted by the committee and other available information, it is hereby found that this rule as hereinafter set forth will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined upon good cause that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule into effect and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) The committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis; (2) the fiscal year for the committee began April 1, 1994, and the marketing order requires that the rate of assessment for the fiscal year apply to all assessable grapes handled during the fiscal year; (3) handlers are aware of this action which was unanimously recommended by the committee at a public meeting and which is similar to budgets issued in past years; and (4) this interim final rule provides a 30-day comment period, and all comments timely received will be considered prior to finalization of this action.

List of Subjects in 7 CFR Part 926

Grapes, Marketing agreements, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR Part 926 is amended as follows:

PART 926—TOKAY GRAPES GROWN IN SAN JOAQUIN COUNTY, CA

1. The authority citation for 7 CFR Part 926 continues to read as follows:

Authority: 7 U.S.C. 601–674

2. A new § 926.233 is added to read as follows:

Note: This section will not appear in the annual Code of Federal Regulations.

§ 926.233 Expenses and assessment rate.

Expenses of $5,150 by the Tokay Grape Industry Committee are authorized and an assessment rate of $0.07 per carton of assessable grapes is established for the fiscal year ending March 31, 1995. Unexpended funds may be carried over as a reserve.

Dated: June 9, 1994

Eric M. Forman,

Deputy Director, Fruit and Vegetable Division

7 CFR Part 932

[Docket No. FV93–932–4FIR]

Olives Grown in California; Expenses and Assessment Rate for 1994 Fiscal Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture (Department) is adopting as a final rule, without change, the provisions of the interim final rule that authorized expenditures and established an assessment rate for the California

Olive Committee (Committee) under Marketing Order (M.O.) No. 932 for the 1994 fiscal year. Authorization of this budget enables the Committee to incur expenses that are reasonable and necessary to administer this program. Funds to administer this program are derived from assessments on handlers.

EFFECTIVE DATE: January 1, 1994, through December 31, 1994.

FOR FURTHER INFORMATION CONTACT: Britthany Beadle, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2523–S, Washington, DC 20090–6456, telephone: (202) 720–5127; or Terry Vawter, California Marketing Field Office, Fruit and Vegetable Division, AMS, USDA, 2202 Monterey Street, Suite 102 B, Fresno, California 93721, telephone: (209) 487–5901.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Agreement No. 148 and Marketing Order No. 932 (7 CFR Part 932), as amended, regulating the handling of olives grown in California. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

The Department is issuing this rule in conformance with Executive Order 12866.

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. Under the marketing order provisions now in effect, olives grown in California are subject to assessments. It is intended that the assessment rate specified herein will be applicable to all assessable olives handled during the 1994 fiscal year, beginning January 1, 1994, through December 31, 1994. This final rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 5 handlers of olives regulated under the marketing order each season and approximately 1,350 olive producers in California. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $5,000,000. None of the handlers may be classified as small entities. The majority of the producers may be classified as small entities.

The marketing order, administered by the Department, requires that the assessment rate for a particular fiscal year apply to all assessable olives handled from the beginning of such year. Annual budgets of expenses are prepared by the Committee, the agency responsible for local administration of this marketing order, and submitted to the Department for approval. The members of the Committee are handlers and producers of California olives. They are familiar with the Committee's needs and with the costs for goods, services, and personnel in their local area, and are thus in a position to formulate appropriate budgets. The Committee's budget is formulated and discussed in a public meeting. Thus, all directly affected persons have an opportunity to participate and provide input.

The assessment rate recommended by the Committee is derived by dividing the anticipated expenses by expected shipments of olives. Because that rate is applied to actual shipments, it must be established at a rate which will provide sufficient income to pay the Committee's expected expenses.

The California Olive Committee met on December 14, 1993, and unanimously recommended a total expense amount of $3,748,290, for its 1994 budget. This is $928,530 more in expenses than the previous year. The increase is primarily due to additional funding for market development.

The Committee also unanimously recommended an assessment rate of $27.21 per ton for the 1994 fiscal year, which is $1.46 more in the assessment rate from the 1993 fiscal year. The assessment rate, when applied to anticipated shipments of 101,000 tons, would yield $2,748,210 in assessment income. This, along with approximately $1,000,000 from the Committee's authorized reserves will be adequate to cover estimated expenses.

Major expense categories for the 1994 fiscal year include $1,150,000 for the market expansion program, $990,860 for consumer affairs, and $173,730 for salaries. Funds in the reserve at the end of the fiscal year, estimated at $300,000 will be within the maximum permitted by the order of one fiscal year's expenses.

While this action will impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs should be significantly offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

An interim final rule was published in the **Federal Register** (59 FR 12526, March 17, 1994) and provided a 30-day comment period for interested persons. No comments were received.

It is found that the specified expenses for the marketing order covered in this rule are reasonable and likely to be incurred and that such expenses and the specified assessment rate to cover such expenses will tend to effectuate the declared policy of the Act.

It is further found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553) because the Committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis. The 1994 fiscal year for the program began January 1, 1994. The marketing order requires that the rate of assessment apply to all assessable olives handled during the fiscal year. In addition, handlers are aware of this action which was recommended by the Committee at a

public meeting and published in the **Federal Register** as an interim final rule. No comments were received concerning the interim final rule that is adopted in this action as a final rule without change.

List of Subjects in 7 CFR Part 932

Marketing agreements, Olives, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR Part 932 is amended as follows:

PART 932—OLIVES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 932 continues to read as follows:

Authority: 7 U.S.C. 601–674.

Accordingly, the interim final rule adding § 932.227 which was published at 59 FR 12526, is adopted as a final rule without change.

Dated: June 9, 1994.

Eric M. Forman,

Acting Director, Fruit and Vegetable Division.

[FR Doc. 94–14585 Filed 6–15–94; 8:45 am]

BILLING CODE 3410–02–P

Food Safety and Inspection Service

9 CFR Parts 317 and 381

[Docket No. 94–018N]

Nutrition Labeling of Meat and Poultry Products

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice of extension of compliance date.

SUMMARY: The Food Safety and Inspection Service (FSIS) is announcing an extension of the date for enforcing compliance with its nutrition labeling regulations. The effective date of the final nutrition labeling regulations published on January 6, 1993, will remain July 6, 1994. However, FSIS will not take enforcement action on such meat and poultry product labeling until August 8, 1994. In addition, FSIS is providing notice that temporary label approvals, granted by the Food Labeling Division in conjunction with the July 6, 1994, rule, will now expire on August 8, 1994.

DATES: Although the effective date of the final nutrition labeling regulations remain July 6, 1994, FSIS will not take enforcement action on such meat and poultry product labeling until August 8, 1994.

FOR FURTHER INFORMATION CONTACT: Charles Edwards, Director, Product Assessment Division, Regulatory Programs, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 254–2565.

SUPPLEMENTARY INFORMATION: On January 6, 1993, FSIS published in the **Federal Register** a final rule titled "Nutrition Labeling of Meat and Poultry Products" (58 FR 638). Corrections and technical amendments to this final rule were published on August 18, 1993 (58 FR 43787), and on September 10, 1993 (59 FR 47624), respectively. The technical amendments, which were issued as an interim final rule, were confirmed as final on March 16, 1994 (59 FR 12157). The effective date of the final rule is July 6, 1994.

The final rule amends the Federal meat and poultry products inspection regulations to permit voluntary nutrition labeling on single-ingredient, raw meat and poultry products, and establishes a mandatory nutrition labeling program for all other meat and poultry products, with certain exceptions. FSIS's nutrition labeling regulations are designed to parallel, to the extent possible, the nutrition labeling regulations issued by the Food and Drug Administration (FDA) for all other foods. Both agencies cooperated closely in the development and timeframe for implementation of their respective rules.

FDA's final nutrition labeling regulations became effective on May 8, 1994. However, Congress recently amended the Nutrition Labeling and Education Act of 1990 (NLEA) to extend the compliance date for certain FDA-regulated food products packaged prior to August 8, 1994, to comply with the nutrition labeling requirements. The legislation (S. 2087) was passed by both houses of Congress, and signed into law by the President on May 27, 1994. Although it is not subject to the NLEA, FSIS has decided not to take any enforcement action on nutrition labeling of meat and poultry products until August 8, 1994. FSIS believes that this date is reasonable and practical, and reflects its continued cooperation with FDA on nutrition labeling issues. FSIS also believes that the extended timeframe further minimizes the cost of complying with the regulations and allows for a more orderly and uniform compliance implementation for nutrition labeling of all foods.

In anticipation of the July 6, 1994, effective date, the Food Labeling Division has granted temporary label approvals under 9 CFR 317.4(d) and 381.132(b) of the regulations. These temporary approvals were granted for labels which comply with current regulations, but which would not comply with the regulations when the final rule issued on January 6, 1993, is effective. These temporary approvals are automatically extended until August 8, 1994.

FSIS encourages manufacturers to revise their labels as soon as possible. On and after August 8, 1994, products with labeling that does not comply with the nutrition labeling regulations will be misbranded and subject to enforcement action by FSIS.

Dated: June 10, 1994.

William J. Hudnall,

Acting Administrator, Food Safety and Inspection Service.

BILLING CODE 3410–DM–P

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 914

Indiana Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule; approval of amendment.

SUMMARY: OSM is announcing the approval of a proposed program amendment to the Indiana permanent regulatory program (hereinafter referred to as the Indiana program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment (Program Amendment 93–5) consists of changes to the Indiana Administrative Code (IAC) rules at 310 IAC 12. The proposed amendment pertains to definitions of terms used in the Indiana program. The amendment is intended to revise the Indiana program to be consistent with the corresponding Federal regulations.

EFFECTIVE DATE: June 16, 1994.

FOR FURTHER INFORMATION CONTACT: Mr Roger W. Calhoun, Director, Indianapolis Field Office, Office of Surface Mining Reclamation and Enforcement, Minton-Capehart Federal Building, 575 North Pennsylvania Street, room 301, Indianapolis, IN 46204, Telephone (317 226–6166.

SUPPLEMENTARY INFORMATION:

I. Background on the Indiana Program
II. Submission of Amendment
III. Director's Findings.
IV. Summary and Disposition of Comments

V. Director's Decision.
VI. Procedural Determinations.

I. Background on the Indiana Program

On July 29, 1982, the Indiana program was made effective by the conditional approval of the Secretary of the Interior. Information pertinent to general background on the Indiana program, including the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Indiana program can be found in the July 26, 1982, **Federal Register** (47 FR 32071). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 914.10, 914.15, and 914.16.

II. Submission of the Amendment

By letter dated July 2, 1993 (Administrative Record Number IND–1272), the Indiana Department of Natural Resources (IDNR) submitted proposed program amendment number 93–5. Program amendment 93–5 consists of proposed changes to the Indiana program definitions at 310 IAC 12–0.5.

OSM announced receipt of the proposed amendment in the August 5, 1993, **Federal Register** (58 FR 41669), and, in the same notice, opened the public comment period and provided opportunity for a public hearing on the adequacy of the proposed amendment. The comment period closed on September 7, 1993. The scheduled public hearing was not held as no one requested an opportunity to provide testimony.

III. Director's Findings

Set forth below, pursuant to SMCRA and the Federal regulations at 30 CFR 732.15 and 732.17 are the Director's findings concerning the proposed amendment to the Indiana program. Revisions not specifically discussed below concern nonsubstantive wording changes, or revised cross-references and paragraph notations to reflect organizational changes resulting from this amendment.

A. Revisions to Indiana's Rules That Are Substantively Identical to the Corresponding Federal Regulations

State regulation	Subject	Federal counterpart
310 IAC 12–0.5–23	Coal Mine Waste	30 CFR 701.5
310 IAC 12–0.5–55	Half-Shrub	30 CFR 701.5
310 IAC 12–0.5–64	Impounding Structure	30 CFR 701.5
310 IAC 12–0.5–104	Reference Area	30 CFR 701.5

Because the above proposed revisions are identical in meaning to the corresponding Federal regulations, the Director finds that Indiana's proposed rules are no less effective than the Federal regulations.

B. Revisions to Indiana's Rules That Are Not Substantively Identical to the Corresponding Federal Regulations

1. 310 IAC 12–0.5–6 Affected Area

In the introductory paragraph, Indiana has deleted the word "each" and added the word "any" in its place. With this change, Indiana has clarified that "affected area" means any one or more of the specified examples at subsection 6 (1) through (7). The Director finds that the proposed change is substantively identical to the counterpart Federal regulations at 30 CFR 701.5 concerning the definition of "affected area." The Director notes that the Indiana definition of "affected area" continues to be the subject of a required program amendment codified at 30 CFR 914.16(n) (see 58 FR 43260, August 16, 1993).

2. 310 IAC 12–0.5–53 Ground Cover

The term *ground cover* is defined to mean the area of ground which is covered by the combined aerial parts of vegetation and the litter that is produced naturally onsite, expressed as percentage of the total area of measurement. At least 95 percent of the species present must be species listed in the revegetation plan.

The first sentence of the proposed definition is substantively identical to the Federal definition of "ground cover" at 30 CFR 701.5. Indiana added the second sentence to establish a standard guideline for all to follow. The Director finds that the second sentence is not inconsistent with SMCRA and the Federal regulations.

3. 310 IAC 12–0.5–139 Valid Existing Rights (VER)

Indiana has proposed the following language for the definition of VER:

(a) *Valid existing rights* means, for the purposes of 310 IAC 12–1–1, 310 IAC 12–2–1, and 310 IAC 12–2–5 the following:

(1) Except for haul roads:

(A) Those property rights in existence on August 3, 1977, that were created by a legally binding conveyance, lease, deed, contract, or other document which authorized the applicant to conduct surface coal mining operations; and

(B) The person proposing to conduct surface coal mining operations on such lands:

(i) Had been validly issued or exercised good faith effort to obtain, on or before August 3, 1977, all state and federal permits necessary to conduct operations on those lands;

(ii) Can demonstrate to the director that the coal is both needed for and immediately adjacent to, an ongoing surface mining operation for which all permits were obtained prior to August 3, 1977; or

(iii) Can demonstrate that the operation was in existence or operation at the time an area became protected under IC 13–4.1–14–1 or at the time of the coming into existence, within the prohibited distance of a structure, road, cemetery, or other activity listed in IC 13–4.1–14–1.

(2) For haul roads:

(A) A recorded right-of-way, recorded easement, or a permit for a coal haul road recorded as of August 3, 1977;

(B) Any other road in existence as of August 3, 1977; or

(C) Any haul road that was in existence or operating at the time an area became protected under IC 13–4.1–14–1, or at the time of the coming into existence, within the prohibited distance of a structure, road, cemetery, or other activity listed in IC 13–4.1–14–1.

(b) The interpretation of the terms of a document used to establish a valid existing right is based upon the common law concerning the interpretation of documents conveying mineral rights. If there is no applicable common law, the interpretation is based upon the following:

(1) The usage and custom at the time and place where a document came into existence.

(2) A showing by the applicant that the parties to the document contemplated the right to conduct the same underground or surface activities for which the applicant claims a valid existing right.

(c) "Valid existing rights" does not mean the mere expectation of a right to conduct surface coal mining operations or the right to conduct underground coal mining. Examples of rights which alone do not constitute valid existing rights include, but are not limited to, coal exploration permits or licenses, applications or bids for leases, or where a person has only applied for a federal or state permit.

(d) If an area comes under the protection of IC 13–4.1–14–1 after August 3, 1977, valid existing rights are present if a validly authorized surface coal mining operation exists on that area on the date the protection comes into existence.

The Federal definition of VER at 30 CFR 761.5 has been affected by judicial decision and parts have been suspended by OSM (see 51 FR 41954, November 20, 1986). Specifically, 30 CFR 761.5 paragraphs (a) and (c) are suspended, and subparagraph (d)(2) is suspended insofar as it incorporates the takings test of suspended paragraph (a). Additionally, OSM has proposed that the Federal VER definition be amended (see 56 FR 33152, July 18, 1991).

In the November 20, 1986, **Federal Register** notice which suspended 30 CFR 761.5(a), OSM stated that the suspension of 30 CFR 761.5(a) has the effect of undoing that provision and leaving in its place the VER test in use before the suspended language was promulgated (the 1979 test) (51 FR 41954). That 1979 test consists of language approved on March 13, 1979 (44 FR 15342). A suspension and interpretation of the 1979 test was published in the August 4, 1980, **Federal Register** (45 FR 51547). This suspension resulted from judicial review of the 1979 test, wherein the court remanded to the Secretary that portion of the 1979 test which required the property owner to have obtained all permits necessary to mine ("all permits" test, 30 CFR 761.5(a)(2)(i)). [In Re: Permanent Surface Mining Regulation Litigation, No. 79–1144 (D.D.C. 1980)]. Specifically, the court indicated that a good faith attempt to obtain all permits before the August 3, 1977, cut-off date should suffice for meeting the "all permits" test. In Re: Permanent (I), Mem. op. at 20. To comply with the court's 1980 opinion, OSM suspended the definition only insofar as it required that to establish VER, all permits must have been obtained prior to August 3, 1977. (45 FR 51547, 51548, August 4, 1980)

The November 20, 1986, notice of suspension restated OSM's position that, pending further rulemaking, OSM would interpret the regulation as including the court's suggestion that a good faith effort to obtain all permits would establish VER. Consequently, in Federal program States and on Indian lands, OSM will make VER determinations on a case-by-case basis, and will consider property rights in existence on August 3, 1977, the owner of which by that date had made a good faith effort to obtain all permits, as one class of circumstances which would invariably entitle the property owner to VER. This is referred to as the 1980 test. VER would also exist when there are property rights in existence on August 3, 1977, the owner of which can demonstrate that the coal is both needed for and immediately adjacent to a mining operation in existence prior to August 3, 1977 (51 FR 41954, 41955).

Indiana's proposed VER language at subsection 139(a)(1)(A) and (B)(i) and (ii) is substantively identical to the two classes of VER contained in the 1979 rule, at former 30 CFR 761.5(a)(1) and (2). Because these portions of the 1979 rule, including the "good faith, all permits" interpretation of the "all-permits test" contained in former 30 CFR 761.5(a)(2)(i) have been upheld by the court, the Director is approving the proposed language at subsection 139(a)(1)(A) and (B)(i) and (ii).

The proposed language at subdivision 139(a)(1)(B)(iii) is substantively identical to the Federal language at 30 CFR 761.5(d)(1). The Director notes, however, that the proposed language at subdivision 139(a)(1)(B)(iii) duplicates the intent of the proposed language at subdivision 139(d). In response to a comment from OSM about this duplication, Indiana stated the duplicative language at subdivision 139(a)(1)(B)(iii) will be deleted at the next available opportunity. The Director agrees that, for clarity, the duplicative language should be removed at Indiana's earliest opportunity. The Director finds that the proposed language at subdivision 139(A)(1)(B)(iii), while duplicative, is no less effective than the Federal regulations.

The Director finds the proposed provisions for haulroads at subdivisions 139(a)(2) (A) and (B) are substantively identical to and no less effective than the counterpart Federal regulations at 30 CFR 761.5(b) (1) and (2). The proposed provision at subdivision 139(a)(2)(C) does not have a direct Federal counterpart. The Director finds the Indiana language to be consistent with the Federal provision at 30 CFR 761.5(d)(1) which provides for VER if, on the date an area comes under protection pursuant to section 522(e) of SMCRA, a validly authorized surface coal mining operation exists on that area. The Director is, therefore, approving the proposed language at subdivision 139(a)(2).

The proposed Indiana language at subdivisions 139(b) and (b)(1) is similar to the counterpart Federal language at 30 CFR 761.5(e). The Federal language, however, provides that the interpretation of the terms of the document relied upon to establish the VER shall be based on either applicable State statutory or case law concerning interpretation of documents conveying mineral rights. Also, the Federal language provides that where no applicable State law exists, the interpretation of the terms of the document relied upon to establish VER shall be based upon the usage and custom at the time and place that it came into existence. The counterpart Indiana language at subdivision 139(b) is silent concerning applicable State statutory law. The proposed language only provides that if there is no applicable common law the provisions at subdivisions 139(b) (1) and (2) apply. Therefore, the Director finds the proposed language at subdivision 139(b) no less effective than the counterpart Federal regulations at 30 CFR 761.5(e) except to the extent that the proposed Indiana rule is silent concerning the applicability of State statutory law. In addition, the Director is requiring that Indiana further amend 310 IAC 12–0.5–139(b) to provide that the interpretation of the terms of the document used to establish a valid existing right shall be based either upon applicable State statutory or case law concerning interpretation of documents conveying mineral rights, or where no applicable State statutory or common law exists, the interpretation is based upon the provisions at subdivisions 139(b) (1) and (2).

Proposed subdivision 139(b)(2), concerning a required showing by the applicant that the parties to the document contemplated the right to conduct the same mining activities for which the applicant claims VER, has no direct Federal counterpart.

The proposed language, however, is not inconsistent with the Federal requirements contained in the 1979 VER rule, at former 30 CFR 761.5(c) and is, therefore, approved.

Proposed subsection 139(c) has no direct Federal counterpart. The Director finds the proposed language to be a valuable clarification of VER and not inconsistent with SMCRA and the Federal VER regulations. In addition, the language is substantively identical to the language contained in the 1979 VER rule at former 30 CFR 761.5(d)

Therefore, proposed subsection 139(c) is approved.

Proposed subsection 139(d) is substantively identical to the counterpart Federal regulations at 30 CFR 761.5(d)(1) and is, therefore, approved.

The Director finds the proposed definition of VER, except as discussed above, to be consistent with an no less effective than the Federal regulations at 30 CFR 761.5 and the 1980 test (the 1979 VER rule with the "good faith, all permits test" interpretation) as discussed in the November 20, 1986, **Federal Register** (51 FR 41954).

C. Revisions to Indiana's Regulations With No Corresponding Federal Regulations

1. 310 IAC 12–0.5–72 Litter

The term *litter* is defined to mean the detached recognizable portions of the plants under evaluation that cover the ground surface. The Federal regulations use the term *litter* in definition of *ground cover*, but a Federal definition of the term *litter* is not provided. In its submittal of this amendment, Indiana stated that its definition of the term *litter* is based on the terms *litter* and "crop residue found in the "Resource Conservation Glossary," Third edition, Soil Conservation Society of America, 1982, page 188, and the needs and conditions of the Indiana program. The Director finds the proposed definition to be consistent with and no less effective than the Federal use of the term *litter* as it appears in the definition of "ground cover" at 30 CFR 701.5.

2. 310 IAC 12–0.5–111 Shelter Belt

This term is defined to mean an area used for protection from wind or snow and which is subject to proof-of-productivity standards for fish and wildlife habitat. In its submittal of this definition, Indiana stated that its definition of the term *shelter belt* is modeled after the definition of the same term as found in the "Resource Conservation Glossary," Third edition, Soil Conservation Society of America, 1982, page 145. There is no direct Federal counterpart to this definition. However, the Federal regulations at 30 CFR 816/817.116(b)(3) use the term "shelter belts" in the regulations for the standards for success for postmining land use of fish and wildlife habitat. The Director finds the proposed definition to be consistent with and no less effective than the Federal use of the term "shelter belts" at 30 CFR 816/817.116(b)(3).

3. 310 IAC 12–0.5–116 Soil Productivity

This term is defined to mean the capacity of a soil for producing a specified plant or sequence of plants under a physically defined set of management practices. In its submittal of this definition, Indiana stated that its definition of the term "soil productivity" is modeled after the definition of the same term as found in the "Resource Conservation Glossary," Third edition, Soil Conservation Society of America, 1982, page 159. There is no direct Federal counterpart to this definition. However, the Federal regulations at 30 CFR 823.15 use the term soil productivity in the regulations on prime farmland revegetation and restoration. The Director finds the proposed definition to be consistent with the Federal use of the term "soil productivity" at 30 CFR 823.15.

IV. Summary and Disposition of Comments

Agency Comments

Pursuant to section 503(b) of SMCRA and 30 CFR 732.17(h)(11)(i), comments were solicited from various interested Federal agencies. No agency comments were received on the proposed amendments.

Public Comments

The public comment period and opportunity to request a public hearing was announced in the August 5, 1993, **Federal Register** (58 FR 41669). The comment period closed on September 7, 1993. No comments were received during the comment period, and no one requested an opportunity to testify at the scheduled public hearing so no hearing was held.

V. Director's Decision

Based on the above findings, and except as noted below, the Director is approving Indiana's proposed amendment 93–5 as submitted by Indiana on July 2, 1993. As discussed in Finding B–3, the Director is approving 310 IAC 12–0.5–139(b) except to the extent that the proposed language is silent concerning the applicability of State statutory law. In addition, the Director is requiring that Indiana further amend 310 IAC 12–0.5–139(b) to provide that the interpretation of the terms of the document used to establish a valid existing right shall be based either upon applicable State statutory or case law concerning interpretation of documents conveying mineral rights, or where no applicable State statutory or common law exists, the interpretation is based upon the provisions at subdivisions 139(b)(1) and (2).

The Federal regulations at 30 CFR 914 codifying decisions concerning the Indiana program are being amended to implement this decision. This final rule is being made effective immediately to expedite the State program amendment process and to encourage the State to conform its program with the Federal standards without delay. Consistency of State and Federal standards is required by SMCRA.

Effect of Director's Decision

Section 503 of SMCRA provides that a State may not exercise jurisdiction under SMCRA unless the State program is approved by the Secretary. Similarly, 30 CFR 732.17(a) requires that any alteration of an approved State program be submitted to OSM for review as a program amendment. Thus, any changes to the State program are not enforceable until approved by OSM. The Federal regulations at 30 CFR 732.17(g) prohibit any unilateral changes to approved State programs. In his oversight of the Indiana program, the Director will recognize only the statutes, regulations and other materials approved by him, together with any consistent implementing policies, directives and other materials, and will require the enforcement by Indiana of only such provisions.

Environmental Protection Agency (EPA) Concurrence

Under 30 CFR 732.17(h)(11)(ii), the Director is required to obtain the written concurrence of the Administrator of the Environmental Protection Agency (EPA) with respect to any provisions of a State program amendment that relate to air or water quality standards promulgated under the authority of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or the Clean Air Act (42 U.S.C. 7401 *et seq.*). The Director has determined that this amendment contains no provisions in these categories and that EPA's concurrence is not required.

VI. Procedural Determinations

Executive Order 12866

This final rule is exempted from review by the Office of Management and Budget under Executive Order 12866.

Executive Order 12778

The Department of the Interior has conducted the reviews required by section 2 of Executive Order 12778 and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory

programs and program amendments since each such program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and 30 CFR 730.11, 732.15 and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR Parts 730, 731, and 732 have been met.

National Environmental Policy Act

No environmental impact statement is required for this rule since section 702(d) of SMCRA [30 U.S.C. 1292(d)] provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by the Office of Management and Budget under the Paperwork Reduction Act, 44 U.S.C. 3507 *et seq.*

Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq*). The State submittal which is the subject of this rule is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Hence, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

List of Subjects in 30 CFR Part 914

Intergovernmental relations, Surface mining, Underground mining.

Dated: March 9, 1994.

Robert J. Biggi,

Acting Assistant Director, Eastern Support Center.

For the reasons set forth in the preamble, title 30, chapter VII, subchapter T of the Code of Federal Regulations is amended as set forth below:

PART 914—INDIANA

1. The authority citation for part 914 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

2. 30 CFR 914.15, is amended by adding a new paragraph (zz) to read as follows:

§ 914.15 Approval of regulatory program amendments.

* * * * *

(zz) The following amendment (Program Amendment Number 93–5) submitted to OSM on July 2, 1993, is approved, except as noted below, effective June 16, 1994: Definitions to the Indiana program at 310 IAC 12–0.5–6 concerning *affected area*; 310 IAC 12–0.5–23 concerning *coal mine waste*; 310 IAC 12–0.5–53 concerning *ground cover*; 310 IAC 12–0.5–55 concerning *half-shrub*; 310 IAC 12–0.5–64 concerning *impounding structure*; 310 IAC 12–0.5–72 concerning *litter*; 310 IAC 12–0.5–104 concerning *reference area*; 310 IAC 12–0.5–111 concerning *shelter belt*; 310 IAC 12–0.5–116 concerning *soil productivity*; and 310 IAC 12–0.5–139 concerning *valid existing rights* except to the extent that subdivision 139(b) is silent concerning the applicability of State statutory law.

3. In section 914.16, paragraph (ee) is added to read as follows:

§ 914.16 Required program amendments.

* * * * *

(ee) By July 1, 1994, Indiana shall amend 310 IAC 12–05.–139(b) to provide that the interpretation of the terms of the document used to establish a valid existing right shall be based either upon applicable State statutory or case law concerning interpretation of documents conveying mineral rights, or where no applicable State statutory or common law exists, the interpretation is based upon the provisions at subdivisions 139(b) (1) and (2).

BILLING CODE 4310–05–M

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 214

FRA Docket No. ROS–2, Notice No. 4

RIN 2130–AA91

Bridge Worker Safety Rules

AGENCY: Federal Railroad Administration (FRA), DOT.

ACTION: Final Rule; correction and petition for reconsideration.

SUMMARY: On June 24, 1992, FRA published safety standards for the protection of those who work on railroad bridges (49 CFR Part 214). FRA now corrects certain sections of that regulation, and changes or clarifies certain requirements in response to a petition for reconsideration filed by the Association of American Railroads (AAR). First, three sections have been corrected by adding citations to reflect the most recent American National Standards Institute (ANSI) standards for personal protective equipment. Second, the rule now sets forth conditions under which employees specially-designated as bridge inspectors may work without fall protection. Third, the rule no longer requires toeboards on walkways, and in certain instances permits work without fall protection on roadways attached to a railroad bridge. Finally, FRA clarifies that railroads and their contractors must require the use of protective footwear, but need not necessarily furnish it, which reflects current practice in the railroad, construction, and other industries where such equipment is necessary.

DATES: *Effective Date:* The effective date of this regulation is on July 18, 1994. The incorporation by reference of certain publications listed in this regulation is approved by the Director of the Federal Register as of July 18, 1994.

ADDRESSES: Any petition for reconsideration should be submitted to the Docket Clerk, Office of Chief Counsel, FRA, 400 Seventh Street, SW. Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: William O'Sullivan, Chief, Office of Safety Track Division, 400 Seventh Street, SW., Washington, DC 20590 (Telephone: 202–366–0499), Gordon Davids, Office of Safety Enforcement, FRA, 400 Seventh Street, SW., Washington, DC 20590 (Telephone: 202–366–0499), or Christine Beyer, Trial Attorney, Office of Chief Counsel, FRA, 400 Seventh Street, SW., Washington, DC 20590 (Telephone: 202–366–0621).

SUPPLEMENTARY INFORMATION: On June 24, 1992, FRA published the Bridge Worker Safety Rules (57 FR 28116) that established requirements for the protection of those railroad and railroad contractor employees who work on railroad bridges. The rule included provisions for personal fall arrest systems, safety nets, personal protective equipment (head, face, eye, and foot equipment), contingencies for working adjacent to water, and standards for walkways, railings, and scaffolds. The regulations went into effect on September 24, 1992. However, in order to provide the industry additional time to obtain complying equipment and adequately train workers, FRA suspended the effective date of the sections requiring fall protection (*i.e.*, sections 214.103 and 214.105) until November 24, 1992. (57 FR 45326.)

On August 10, 1992, the AAR filed a petition seeking reconsideration (petition) of the bridge worker safety rules. In that petition, the AAR sought reconsideration of 49 CFR 214.101(d), 214.103(b), and 214.103(c). After careful consideration and for the reasons set forth below, FRA denied the AAR's request with respect to section 214.101(d), partially granted the request with respect to section 214.103(b), and granted the request with respect to section 214.103(c). (FRA formally responded to the petition by letter to the AAR dated January 11, 1993, a copy of which is in the docket of this matter.)

The AAR petition first suggests that section 214.101(d) violates the Rail Safety Improvement Act of 1988 (RSIA) and the Administrative Procedure Act (APA), and therefore should be withdrawn. Section 214.101(d) states that "[A]ny working conditions involving the protection of railroad employees working on railroad bridges not within the subject matter addressed by this Chapter" shall be governed by the regulations of the Occupational Safety and Health Administration (OSHA). This section is merely a restatement of the law as it stands with respect to occupational safety and health matters in the railroad environment, and was added to the final rule in order to alleviate the jurisdictional confusion expressed by rail labor and management prior to promulgation of the rule. FRA has explained the complementary jurisdiction it shares with OSHA with respect to health and safety matters in the railroad industry in its Statement of Policy (Policy Statement) (43 FR 10583) published in 1978, more recently in the Notice of Proposed Rulemaking (NPRM) (56 FR 3434) in this proceeding, and on numerous other occasions. However, a discussion of the statutory jurisdiction each agency possesses and the exercise of that authority is necessary to explain the basis for FRA's response to this aspect of the AAR's petition.

The Occupational Safety and Health Act (OSH Act) vests OSHA with responsibility for promulgating and enforcing workplace safety and health standards. However, in recognition that other Federal agencies possess parallel, industry-specific authority over occupational safety and health, section 4(b)(1) provides that no OSHA rules

> shall apply to working conditions of employees with respect to which other Federal agencies . . . exercise statutory authority to prescribe or enforce standards or regulations affecting occupational safety or health.

29 U.S.C. § 653(b)(1). The exercise of authority contemplated by this provision is one that results in a Federal regulation for on-the-job protection of worker safety or health or a determination that a particular form of regulation is not appropriate.

The Federal Railroad Safety Act of 1970 ("FRSA") grants FRA broad authority to prescribe standards in "all areas of railroad safety." 45 U.S.C. § 431(a). Pursuant to that authority, in 1975, FRA published an advance notice of proposed rulemaking indicating its intention to develop its own set of occupational safety and health standards that would, *in toto*, displace OSHA's regulatory program. 40 FR 10693 (March 7, 1975). After consideration of the record developed, however, FRA reduced the scope of its efforts.

In 1976, FRA published in that docket a notice of proposed rulemaking stating its intention to issue specific occupational safety and health standards on only three subjects for railroad employees (egress from structures, general environmental controls, and fire protection) that would displace otherwise applicable OSHA standards. 41 FR 29153 (July 15, 1976). FRA also indicated its intention to incrementally issue a comprehensive code of such standards for railroad employees that would gradually displace OSHA standards. FRA contemplated that these FRA standards would apply on a territorial instead of a hazard-specific basis.

In 1978, FRA sharply changed course: it terminated the regulatory proceeding and issued a Policy Statement instead of pursuing a comprehensive code of FRA occupational safety and health standards. 43 FR 10583 (March 14, 1978). In explaining its action, FRA stated:

> * * * Written comments in response to [the 1976] proposal were received, and a public hearing was conducted. The FRA has reviewed not only these comments, but also the entire original concept as to the adoption of a comprehensive code of occupational safety and health standards for the railroad industry paralleling the existing OSHA regulations.
>
> * * * * *
>
> * * * [G]iven the present staffing level for field investigation and inspection, the FRA has determined that, at this time, it would not be in the best interests of the public and of railroad safety for this agency to become involved extensively in the promulgation and enforcement of a complex regulatory scheme covering in minute detail as do the OSHA standards, working conditions which, although located within the railroad industry, are in fact similar to those of any industrial workplace. Rather, we believe that the proper role for FRA in the area of occupational safety in the immediate future is one that will concentrate our limited resources in addressing hazardous working conditions in those traditional areas of railroad operations in which we have special competence.

Id. at 10584–85.

Thus, contrary to its original intent, FRA's determination in 1978 was generally to leave OSHA standards in place in the railroad industry.

The Policy Statement defined "railroad operations" as the "movement of equipment over rails" (*Id.*), and rejected a "territorial" approach to delineating those working conditions over which FRA would exercise its jurisdiction from those that would remain under OSHA's control. *Id.* at 10587. FRA did not want to duplicate capabilities "already possessed by OSHA" and stated:

> FRA recognizes that OSHA is not precluded from exercising jurisdiction with respect to conditions not rooted in railroad operations nor so closely related to railroad operations as to require regulation by FRA in the interest of controlling predominant operational hazards.

Id. Therefore, until FRA exercises its statutory authority with respect to given working conditions through promulgation of a standard or through an expression that regulation is unnecessary or would be counterproductive, existing OSHA standards apply in the railroad workplace.

In support of its claim to withdraw section 214.101(d), the AAR alleges that because section 19 of the RSIA requires FRA to issue rules, as necessary, for the protection of maintenance-of-way employees on railroad bridges, FRA is the exclusive Federal agency to regulate this subject matter. Also, the AAR states that FRA does not have the discretion "to delegate to OSHA a portion of its

responsibility to regulate bridge worker safety." FRA has not delegated any authority to OSHA through publication of section 214.101(d); characterizing section 214.101(d) as a delegation is simply a misstatement of FRA's relationship with OSHA and OSHA's existing authority to regulate occupational safety and health matters in every American workplace. Rather, FRA has purposefully chosen not to exercise its authority over certain working conditions that OSHA also has the authority to regulate, and over which OSHA has comprehensively exercised its authority.

The AAR also argues that FRA violated the APA by not seeking public comment on section 214.101(d), and that this section represents "a radical departure" from the NPRM and long-standing policy. On the contrary, this section accurately reflects an extensive discussion in the preamble of the NPRM and its inclusion in the rule text is in direct response to written comments submitted to the docket during the rulemaking. Clearly, those commenters knew the matter was at issue. Notice and comment would be required if section 214.101(d) represented a new regulatory scheme for the enforcement of occupational safety and health standards in the railroad workplace. Clearly, that is not the case. Section 214.101(d) is a statement of FRA's interpretation of the law and is wholly consistent with FRA's previous interpretive statements.

From as long ago as publication of the Policy Statement in 1978, FRA has stated that it will exercise authority over working conditions intrinsic to or closely related to railroad operations requiring FRA's unique expertise, and has exercised its authority in some of those areas. All other occupational safety and health matters continue to be governed by OSHA where that agency has exercised its authority over a specific working condition. The AAR concludes that the Policy Statement makes "the regulation of areas along railroad operating rights-of-way * * * exclusively the province of FRA." This conclusion is incorrect, as it embodies the very "territorial" approach to jurisdiction FRA rejected in 1978. The AAR chooses to misconstrue the functional distinction drawn by the Policy Statement as a territorial division of jurisdiction ("fixed facilities such as offices and shops" as OSHA's versus "areas along railroad operating rights-of-way" as FRA's), which it explicitly is not. For instance, as the NPRM in this proceeding clearly states (56 FR 3435), the Policy Statement divested OSHA of authority to regulate the *surfaces* on railroad bridges, such as track and signal structures, but did not oust OSHA entirely from regulating any working condition that arises on a railroad bridge, as the AAR argues. Also, the plain language of the Policy Statement left the regulation of personal protective equipment with OSHA until FRA chose to exercise its authority in that regard. 43 FR 10583, 10588 (March 14, 1978).

In promulgating the initial final rule, FRA methodically considered the hazards bridge work poses; exercised its authority to regulate the use of certain personal protective equipment; and left other working conditions (for instance, exposure to airborne toxins and attendant respirator use) under existing applicable OSHA standards. The areas left to OSHA are those in which FRA neither has, nor can quickly acquire, the expertise necessary for effective implementation of relevant standards. Were FRA to include such matters within its rule without the ability to enforce the relevant standards, it would, as a practical matter, be creating a gap in the protection of railroad workers, which it does not want to do. Moreover, but for respiratory protection, which FRA proposed to include in its rule but ultimately decided to leave to OSHA, FRA never even proposed standards on the matters section 214.101(d) specifies as being included within the areas left to OSHA (*i.e.*, hazard communications, hearing protection, welding and lead exposure standards).

Section 214.101(d) merely states the relationship between FRA's substantive standards and OSHA's; it does not impose a new substantive burden. Whatever substantive burdens OSHA's rules place on railroads are the result of OSHA's exercise of its authority prior to issuance of FRA's rule. This section only attempts to clarify which of those pre-existing standards still apply even after the issuance of FRA's final rule, which displaces some of them. Section 214.101(d) imposes no new substantive burdens and, accordingly, notice and comment was not necessary prior to issuance of this essentially interpretive rule.

Nevertheless, there can be no doubt that the NPRM invited comment on where the jurisdictional lines should be drawn and demonstrated FRA's intent to clarify it. FRA stated:

> Thus, one question is whether the occupational safety issues presented by work on railroad bridges are so inherent to the railroad environment that FRA alone should regulate them, or whether they cut across industry lines without raising special concerns in the railroad context and thus are properly addressed by general OSHA standards.

56 FR 3434. FRA noted that there was considerable confusion about which OSHA standards applied and that it had placed in the docket various legal memoranda from railroads and railroad associations on this issue. FRA then stated: "[T]he appropriate federal standards for personal protection, and the identity of the agency responsible for their enforcement, must be crystal clear." 56 FR 3435. No participant in the rulemaking can be heard to complain about FRA's having provided the clarification it promised. Therefore, although notice of this interpretive rule was not required, it was effectively provided.

Section 214.101(d) does not reverse long-standing policy or law, does not violate the RSIA or APA and, therefore, will not be withdrawn.

Second, the AAR's petition asserts that the exemption in section 214.103(b) for instances where the installation of fall protection poses a greater risk than working without protection should be expanded to include instances where the installation and use of fall protection poses a greater risk. FRA does not believe there are compelling reasons to enlarge this exception to the fall protection requirement with respect to all railroad bridge workers. The examples cited by the AAR in their petition (fire fighting, re-railing cars, working with moving equipment) as instances where the use of fall protection equipment may pose a greater risk than completing the work without fall protection are not persuasive. FRA believes that for each of these situations installation of fall protection equipment is the most difficult part of the process, and that once installed does not interfere in the work to be done. In other words, if installation can be accomplished, the duties to be performed once protection is in place can also be accomplished. The AAR states that workers need to be able to move away from these hazards quickly and easily. However, once installed, safety nets, walkways, and fall arrest systems provide ample freedom of movement. The only fall protection device that may present questions in this regard is the personal fall arrest system, and given new designs that encompass the peculiarities of railroad bridge structures and points of attachment, these devices can be installed to allow prompt and careful movement. Therefore, FRA is not willing to expand the fall protection exception set out in section 214.103(b) for all bridge workers. However, FRA does believe that this exception should be broadened to permit railroad bridge inspectors to work without installing or

using fall protection systems, so long as certain criteria are met.

Employees performing inspections of railroad bridges must climb to all points above and below the bridge deck, as well as along the deck, and must be free to reach points on the structure that are accessed infrequently and with difficulty, and then only for inspection purposes. FRA believes that in some instances the use of fall protection could heighten the chance of injury for the inspector. Also, a blanket fall protection requirement could result in incomplete bridge inspections, a fact that raises additional safety concerns for fellow employees and the public. Therefore, persons who are capable of climbing on bridges, and who have been specifically qualified and designated by the railroad or railroad contractor, may perform bridge inspections without the installation and use of fall protection required under this regulation, provided the conditions set forth below are met.

In order to qualify for the installation and use exception now set forth in section 214.103(b)(2), the railroad or contractor using the exception must have a comprehensive written program in place that addresses pertinent climbing techniques and applicable safety equipment. The employee to whom the exception applies must be trained and qualified according to that program to conduct bridge inspections. Also, this employee must be formally designated by the railroad or contractor as one who will perform bridge inspections and voluntarily accepts the designation. The reason for this requirement is to prevent an employer from maintaining an informal bridge inspection program typified by on-the-spot designations of employees who lack training and who are uncomfortable working at heights without protection. Section 214.103(b)(2)(D) requires that the employee must actually be engaged in the inspection of the bridge or its components while the exception applies. Should this employee move to another duty on the bridge, fall protection would be required. Finally, the employee to whom the exception applies must be familiar with the appropriate climbing technique needed to scale safely the structure involved, and must be provided any generic, alternative or specialized equipment needed to complete the climb efficiently and safely. For instance, some railroads are training their bridge inspectors in rock climbing techniques and systems. If rock climbing techniques are used by a bridge inspector during the inspection, the appropriate equipment must also be provided.

The AAR also requests that FRA eliminate the requirement of toeboards on bridge walkways found in section 214.103(c). In support of its request, the AAR states that toeboards are not normally found on railroad bridges, and because they would permit snow, ice, and debris to accumulate on walkways, will present tripping or falling hazards. FRA agrees, and is removing the toeboard requirement from section 214.103(c). Therefore, fall protection will no longer be required where a bridge is equipped with secure walkways and railings that meet the remaining criteria set forth in section 214.103(c). Toeboards are used traditionally as a method to prevent tools from falling rather than as a fall protection device. Recognizing that falling tools present hazards to those who work at levels below the walkway, FRA believes that the dangers created by the presence of toeboards exceed those associated with not requiring them. Also, nearly all railroad bridges equipped with secure walkways and railings do not also possess toeboards. Therefore, the substitution of walkways for personal fall arrest systems and safety nets permitted by section 214.103(c) as originally written is largely unusable.

FRA also makes a clarification with respect to walkways in section 214.103(c). Many railroad bridges now include vehicular roadways replacing second or multiple railroad tracks that have been removed. For the purposes of this rule, FRA views these roadways as walkways. These roadways are at least as stable as the typical walkway built beside track on a railroad bridge, and footing and movement on these roadways is as secure as on a walkway or on the track portion of the railroad bridge. Because of these safety factors, FRA believes that employees working or moving at least six feet from the edge of such a roadway are not at risk of falling over the side of the bridge. Therefore, where employees are six or more feet from the edge of a vehicle roadway, fall arrest systems, safety nets, railings and handrails are not required. Section 214.103(c)(2) now permits work without fall protection on roadway bridges so long as employees remain at least six feet from the edge of the roadway.

Also, FRA is clarifying the rule with respect to personal protective equipment. FRA has received questions from the regulated community concerning the interplay of sections 214.111 and 214.115. To alleviate any confusion, section 214.111 has been clarified by stating that railroads and their contractors must require the use of protective footwear, but need not necessarily furnish that equipment. As written, section 214.115 of the final rule clearly states that employers must require workers to wear foot protection, but does not contain the requirement present in the other personal protective equipment sections stating the "employees shall be provided" such equipment. Section 214.111, which sets out personal protection standards generally, appears to contradict section 214.115 by stating that the railroads and contractors "must provide and require the use of" the equipment required by Subpart B of the rule, including footwear. That contradiction is now removed. The practical difference involved here, as in other industries, is that footwear is a personal item that the employer cannot reasonably be required to retain in stock, while other safety items are easily supplied with a store of backup units should they be required. Therefore, section 214.111 is amended to exclude protective footwear from the group of personal protective devices that the railroads and their contractors must provide. This change reflects the status of protective footwear in the railroad, construction, and other industries where the equipment is needed, reiterates FRA's original intent, and does not in any way interfere with collective bargaining agreements that address who ultimately bears the expense for personal protective equipment.

Finally, FRA is correcting sections 214.113, 214.115, and 214.117 by replacing outdated ANSI references with the most recent standards for head, foot, and eye and face protection. As noted by commenters to the NPRM, these new standards were generally used in industry when the NPRM and final rule were published, but FRA erroneously printed outdated standards.

Regulatory Impact

E.O. 12866 and DOT Regulatory Policies and Procedures

This correction of the final rule has been evaluated in accordance with existing policies and procedures and is not considered significant under Executive Order 12866 or under DOT policies and procedures. The minor technical changes made in this amendment will not increase the costs or alter the benefits associated with this regulation to any measurable degree.

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires a review of rules to assess their impact on small entities. This amendment to the final rule removes a requirement originally

placed on railroads and their contractors and clarifies an existing requirement. The changes will have no new direct or indirect economic impact on small units of government, businesses, or other organizations. Therefore, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the provisions of the Regulatory Flexibility Act.

Paperwork Reduction Act

There are no paperwork requirements associated with this amendment of the final rule.

Environmental Impact

FRA has evaluated this amendment in accordance with its procedures for ensuring full consideration of the environmental impact of FRA actions, as required by the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*), other environmental statutes, Executive Orders, and DOT Order 5610.1c. The amendment meets criteria establishing this as a nonmajor action for environmental purposes.

Federalism Implications

This amendment will not have a substantial effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with Executive Order 12612, preparation of a Federalism Assessment is not warranted.

Bridges, Incorporation by reference, Occupational safety and health, Personal protective equipment, Railroad operating practices, Railroad safety, Scaffolding.

The Final Rule

In consideration of the foregoing, Part 214, Title 49, Code of Federal Regulations is amended as follows:

1. The authority for this part continues to read as follows:

Authority: 45 U.S.C. 431, 438, as amended; 49 CFR 1.49(m).

2. By amending § 214.103 to revise paragraphs (b) and (c) to read as follows:

§ 214.103 Fall protection, generally.

* * * * *

(b)(1) This section shall not apply if the installation of the fall arrest system poses a greater exposure to risk than the work to be performed. In any action brought by FRA to enforce the fall protection requirements, the railroad or railroad contractor shall have the burden of proving that the installation of such device poses greater exposure to risk than performance of the work itself.

(2) This section shall not apply to employees engaged in inspection of railroad bridges conducted in full compliance with the following conditions:

(i) the railroad or railroad contractor has a written program in place that requires training in, adherence to, and use of safe procedures associated with climbing techniques and procedures to be used;

(ii) the employee to whom this exception applies has been trained and qualified according to that program to perform bridge inspections, has been previously and voluntarily designated to perform inspections under the provisions of that program, and has accepted the designation;

(iii) the employee to whom this exception applies is familiar with the appropriate climbing techniques associated with all bridge structures the employee is responsible for inspecting;

(iv) the employee to whom this exception applies is engaged solely in moving on or about the bridge or observing, measuring, and recording the dimensions and condition of the bridge and its components; and

(v) the employee to whom this exception applies is provided all equipment necessary to meet the needs of safety, including any specialized or alternative systems required.

(c) This section shall not apply where employees are working on a railroad bridge equipped with walkways and railings of sufficient height, width, and strength to prevent a fall, provided that the employee does not work beyond the railings, over the side of the bridge, on ladders or other elevation devices, or where gaps or holes exist through which a body could fall. Where used in place of fall protection as provided for in § 214.105, this paragraph (c) is satisfied by:

(1) Walkways and railings meeting the standards set forth in the American Railway Engineering Association's Manual for Railway Engineering; and

(2) Roadways attached to railroad bridges, provided that employees on the roadway deck work or move at a distance of six feet or more from the edge of the roadway deck, or from an opening through which a person could fall

* * * * *

3. By revising § 214.111 to read as follows:

§ 214.111 Personal protective equipment, generally.

With the exception of foot protection, the railroad or railroad contractor shall provide and the employee shall use all appropriate personal protective equipment described in this subpart in all operations where there is exposure to hazardous conditions, or where this subpart indicates the need for using such equipment to reduce hazards to railroad employees. The railroad or railroad contractor shall require the use of foot protection when the potential for foot injury exists.

4. By amending § 214.113 to revise paragraph (b) to read as follows and by removing paragraph (c):

§ 214.113 Head protection.

* * * * *

(b) Helmets for the protection of railroad employees against impact and penetration of falling and flying objects, or from high voltage electrical shock and burns shall conform to the national consensus standards for industrial head protection (American National Standards Institute, American National Standard Z89.1–1986, Protective Headwear for Industrial Workers). This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the American National Standards Institute, 11 West 42nd Street, New York, NY 10036. Copies may be inspected at the Federal Railroad Administration, Docket Clerk, 400 7th Street, SW., Washington, DC, or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

5. By amending § 214.115 to revise paragraph (b) to read as follows:

§ 214.115 Foot protection.

* * * * *

(b) Safety-toe footwear for railroad employees shall conform to the national consensus standards for safety-toe footwear (American National Standards Institute, American National Standard Z41–1991, Standard for Personal Protection—Protective Footwear). This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the American National Standards Institute, 11 West 42nd Street, New York, NY 10036. Copies may be inspected at the Federal Railroad Administration, Docket Clerk, 400 7th Street, SW., Washington, DC, or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC

6. By amending § 214.117 to revise paragraph (b) to read as follows:

§ 214.117 Eye and face protection.

* * * * *

(b) Eye and face protection equipment required by this section shall conform to the national consensus standards for occupational and educational eye and face protection (American National Standards Institute, American National Standard Z87.1–1989, Practice for Occupational and Educational Eye and Face Protection). This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the American National Standards Institute, 11 West 42nd Street, New York, NY 10036. Copies may be inspected at the Federal Railroad Administration, Docket Clerk, 400 7th Street, SW., Washington, DC, or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Issued this 8th day of June, 1994.

Jolene M. Molitoris,

Administrator.

Proposed Rules

Federal Register
Vol. 59, No. 115
Thursday, June 16, 1994

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 1

Risk Assessment for Holding Company Systems

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rule; extension of comment period.

SUMMARY: On March 1, 1994, The Commodity Futures Trading Commission ("Commission") published in the **Federal Register** a request for public comment on proposed rules to implement the risk assessment provisions of the Futures Trading Practices Act of 1992. 59 FR 9689 (March 1, 1994). The original comment period, which would have expired on May 2, 1994, was extended by the Commission for a period of sixty days Thus, the extended comment period expires on July 1, 1994. 59 FR 22145 (April 29, 1994). However, in order to assure a full opportunity for comment on the issues, the Commission has determined to provide an additional sixty-day extension of the comment period with respect to those provisions of the proposed rules concerning the maintenance and filing of information concerning the futures commission merchant's ("FCM") noncustomer accounts and those provisions requiring the maintenance and reporting of financial information concerning an FCM's Material Affiliated Persons ("MAPs") required to be provided on proposed Form 1.15A.

DATES: Written comments for those provisions subject to the extension, as set forth above, must be received on or before September 1, 1994. Comments concerning all other provisions of the proposed rules must be received on or before July 1, 1994.

ADDRESSES: Comments should be sent to Jean A. Webb, Secretary of the Commission, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Reference should be made to "Proposed Risk Assessment Rules."

FOR FURTHER INFORMATION CONTACT: Lawrence B. Patent, Associate Chief Counsel, or Lawrence T. Eckert, Attorney Adviser, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Telephone: (202) 254–8955

SUPPLEMENTARY INFORMATION: The comment period on proposed rule 1.14 §§ (a)(1)(v)–(a)(1)(x), proposed rule 1.15 §§ (a)(1)(iii), (a)(2)(iii), (a)(3) and (a)(4) and proposed Form 1.15A is hereby extended for an additional sixty days, to September 1, 1994. The comment period for all other provisions of the proposed rules, including, but not limited to, the provisions concerning maintenance and filing of an FCM's organizational chart, information concerning risk management policies, procedures and systems, and consolidated and consolidating financial statements, as well as the proposed requirements with respect to providing notice to the Commission upon the occurrence of certain events, are not extended and the comment period thereon will expire on July 1, 1994.

Issued in Washington, DC, on June 10, 1994, by the Commission

Jean A. Webb,

Secretary of the Commission

BILLING CODE 6351–01–M

LEGAL SERVICES CORPORATION

45 CFR Part 1607

Governing Bodies

AGENCY: Legal Services Corporation.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed regulation would amend the Legal Services Corporation's ("LSC" or "Corporation") regulations, relating to governing bodies of recipients of LSC funds. Many of the revisions are simply intended to clarify current Corporation policy or to interrelate this part to other LSC regulations. However, a number of the proposed revisions represent changes in Corporation policy or interpretations with respect to issues that arise under the regulation. The proposal also includes a number of technical revisions to make the rule easier to apply and use.

DATES: Comments should be received by August 15, 1994.

ADDRESSES: Comments should be submitted to the Office of the General Counsel, Legal Services Corporation, 750 First Street, NE., 11th Floor, Washington, DC 20002–4250.

FOR FURTHER INFORMATION CONTACT: Victor Fortuno, General Counsel, Office of the General Counsel (202) 336–8810.

SUPPLEMENTARY INFORMATION: The Operations and Regulations Committee of the LSC Board of Directors ("Committee") held public hearings on April 15, 1994, in Washington, DC and on May 13, 1994, in Atlanta, Georgia, to consider drafts of proposed revisions to 45 CFR part 1607, LSC's regulation on recipient governing bodies. At the meeting in Atlanta, the Committee approved a draft to be published in the **Federal Register** as a proposed rule for public comment.

The Corporation is extending the customary 30-day comment period to 60 days in order to allow bar associations and other organizations with a specific interest in this rule sufficient time to comment. Bar associations play a substantial role in the appointment of recipient board members, and the Committee encourages their involvement in this rulemaking process.

The Committee recognizes that reauthorization of the Corporation is presently under consideration by Congress. Whenever Congress does reauthorize the Corporation, the Corporation's regulations will be revisited and revised accordingly.

This proposed rule is intended to amend 45 CFR part 1607 and to supersede part 1607's interpretive guideline published at 48 FR 36820 (August 15, 1983).

Section 1607.1 Purpose

No change is proposed for this section.

Section 1607.2 Definitions

Most of the changes proposed for this section are technical and clarifying in nature. The section was reordered to put the definitions in alphabetical order. Also, definitions found in other parts of the regulations, but applicable to this part are included here for easier reference. In addition, language found in other sections of this part that, in fact, constitute definitions of terms are included here both for easier reference

and to treat similar terms similarly. Some of the language has been clarified to make it consistent with past and current LSC interpretations.

Section 1607.2(a). The definition of *attorney member* was added to make it clear that national support center board members do not have to be admitted to practice in a state where the center actually provides legal assistance.

Section 1607.2(c). The definition of *eligible client member* has been changed in two principal ways. First, the language has been revised to make it clear that client board members must be eligible at the time of their appointment to each term of office. Thus, a client member who is financially eligible for services when first appointed to a recipient's board may not be reappointed to a second or subsequent term if, at the time of reappointment, the client board member is no longer financially eligible for LSC-funded services. However, nothing in the rule would require a client board member to resign during the course of a term if the client became ineligible subsequent to appointment. Second, language was added to deal with two additional, distinct issues. The proposed rule now makes it clear that the recipient should decide how client board member eligibility is determined. The proposed rule also makes it clear that the recipient should decide whether it or a particular group should make the determination, and that the recipient could decide, for some groups, the recipient will make the determination and for others it will leave the determination up to the appointing group.

The Committee considered and decided not to expand the definition of *eligible client member* to include individuals who are eligible for non-LSC-funded services provided by the recipient, because it wished to insure that the focus of the legal services program remains on the poor community.

Section 1607.2(d). The proposal revises the definition of *governing body* to clarify that, in addition to the governing bodies of recipients who have as a primary purpose the provision of legal assistance to eligible clients, it also applies to the governing bodies or policy boards created pursuant to § 1607.6(e).

Section 1607.2(e). This definition of *recipient* appears in 45 CFR part 1600, but is repeated here for clarity in interpreting this part.

Section 1607.3 Composition

Section 1607.3(a). The proposal includes general language, applicable to all categories of board membership, that requires board members to be supportive of the purposes of the LSC Act, and to be interested in and knowledgeable about the delivery of quality legal services to the poor. The current regulation does not include any similar requirement for client board members, but does include similar, although not identical, requirements for attorney and "other" board members. The proposal removes the reference to the board reflecting "the characteristics" of the client community, in part because it is not clear what that language means and in part because it could be construed to be inconsistent with diversity requirements that are included later in the rule for each category of board membership.

Section 1607.3(b). With respect to attorney board members, the proposal revises the language of the rule that is based on the requirements of the McCollum Amendment, which require a majority of the board members to be appointed by state, county and municipal bar associations. The revision clarifies that the appointments can be made by one or more such bar associations, so long as those bar associations collectively represent a majority of attorneys practicing law in the recipient's service area. If there are minority or gender-based bar associations that represent attorneys practicing in a particular locality, those bar associations may be included in the mix of bar associations that make appointments of attorneys to a recipient's board, especially if their inclusion would help to insure that there is appropriate diversity among the attorney members of the board. In addition, although the rule, consistent with the language of the McCollum Amendment, states that the appointments are to be made by the "governing bodies" of the bar associations, the Committee recognizes that different bar associations should be free to exercise their appointment responsibility in a manner consistent with their own policies, procedures and practices. The McCollum Amendment does not direct LSC to impose any particular method of appointment on a bar association.

The proposed rule also adds language which is based on part of the McCollum amendment that makes it clear that national support centers are not required to use the American Bar Association ("ABA") or a collection of all state bars to appoint their attorney members, simply because they provide service nationally. The proposed rule also recognizes that some recipients, especially Native-American or migrant programs, may have offices in one state, but also provide services in one or more adjacent or nearby states. The language is intended to permit those programs, if they so decide, to have the bar associations of the other states in which they provide service make appointments as well as the bar of the state in which their principal office is located.

In addition, the proposed rule explicitly states what is implicit in the language of the current regulation, i.e., that the additional ten percent of the board members who must be attorneys, but who are not covered by the McCollum amendment, may be selected by the recipient's governing body, if it so chooses. The proposed rule does change current law with respect to the additional ten percent of attorney board members in one respect, however. Under the current regulation, the additional attorneys must be representatives of bar associations or other legal organizations, e.g., law schools. This requirement is not contained in the LSC Act. Under the proposed regulation, the recipient may select attorneys who are not representatives of any particular bar or legal organization, or may select attorneys who are affiliated with non-legal organizations, as long as they are admitted to practice in a state within the recipient's service area, and as long as the organization has an interest in the delivery of legal services to the poor. Thus, the recipient would be able to select lawyers who represent the business community or the United Way and may be helpful in fundraising, or lawyers who provide substantial pro bono services to the client community and may be helpful in designing a recipient's private attorney involvement program.

Finally, the proposed regulation revises and relocates the section that relates to diversity among attorney board members. This provision is a variation of the language previously found in § 1607.3(c). It is revised to incorporate a more current statement of the concerns addressed by that subsection, but no substantive change is intended. While the language of the proposed rule specifically mentions race, ethnicity and gender, it also includes a reference to other factors that may be relevant in a particular legal community and population of the area served by the recipient, including, for example, age, physical abilities and religious belief.

Section 1607.3(c). The proposal includes a number of changes in the language that relates to client board members. The principal revision addresses an issue that has remained

ambiguous under the language of the current regulation and has caused problems for some LSC recipients. The proposed revision would codify the current LSC interpretation of the language to require that client board members be selected by client groups that have been designated by the recipient. This proposal also adds language that more accurately reflects the kind of groups or organizations that would be appropriate client groups for purposes of eligible client member selection. In addition, the proposal adds a diversity goal for client board members that is similar to the requirement for attorney board members.

Section 1607.3(d). With respect to the "other" board members, i.e., those that are neither attorney members nor eligible client members, the proposal makes it clear that recipient boards are permitted to fill the remaining "other" slots. This gives recipients flexibility to include board members who can help them with fundraising, community relations, coordination with other social service providers, or any other locally identified need. Law school professors who cannot count as "attorney members" because they are not admitted to practice in a state within the recipient's service area, could be selected for this category of membership. Although there is no comparable language in the current regulation, this provision is consistent with longstanding LSC interpretations. In addition, the proposal includes language that makes it clear that "other" board members should be selected with the goals of diversity in mind.

Section 1607.3(e). This proposal adds language to the "domination" provision in the current regulation to make it clear that the provision was not intended to prevent recipients from designating a single regional or statewide client council as the appointing organization for client board members, so long as that client council represents numerous smaller client groups.

Section 1607.3(f). The proposal deletes language which could be incorrectly interpreted to give LSC authority to veto particular methods of selecting local board members. In addition, the proposal states affirmatively that recipients may recommend names to and consult with bar associations and other appointing groups to insure that appropriate appointments are made. This revision recognizes that bar associations or other groups may request information on who would make a good legal services program board member and may rely on input from the recipients in making the appointments.

Section 1607.3(g). The proposed rule includes a new provision that is intended to establish standards for dealing with recipient board vacancies. It establishes a standard of reasonable and good faith efforts to insure that governing body vacancies are filled promptly, but recognizes that recipients often have no control over the appointment process other than to change the groups that they have designated to make the appointments if a particular group fails to make an appointment in a timely manner. In order to avoid the creation of vacancies, recipients, through their own by-laws or board policies, could take a number of actions when appointing organizations are slow in making appointments, refuse to make them, or are unable to make them for whatever reason. For example, a recipient's board could permit its members to hold over until replacements are appointed, or could make short-term interim appointments, if necessary, until regular appointments can be made.

Section 1607.3(h). The proposed regulation includes a new provision that grants the recipient the authority to reject an appointment of a board member when the recipient determines that the person who has been appointed does not meet the criteria set out in the regulation, including financial eligibility for client board members, or where the person appointed has a significant individual or institutional conflict of interest with the recipient or its client community. The ABA's Standards for Providers of Legal Services to the Poor states, in Standard 7.2–5, that "governing body members should not knowingly attempt to influence any decisions in which they have a conflict of interest with provider clients" and Standard 7.2–6 states that "members should not be selected by * * * any institution or agency which is in conflict with the provider or its clients." The Commentary to those standards contains discussions of both institutional and individual conflicts of interest and suggests that when such conflicts arise with respect to a sitting board member, the member and the recipient should be guided by laws of the jurisdiction regarding disclosure and recusal. While the Standards state an absolute rule prohibiting appointments by institutions or agencies that have a conflict with the recipient or its clients (e.g. a welfare department or county attorney's office should not make appointments to a recipient's board), they also note that:

> If a person is employed by or is otherwise significantly connected with an institution that is in conflict with the provider's clients, generally that person should not serve on the governing body. That person may serve, however, if there is evidence * * * that the particular individual is not in actual conflict * * *.

Thus, the question of whether it is appropriate for government attorneys or other public employees or elected officials, or attorneys representing finance companies or real estate developers, to serve on recipient governing bodies as members appointed by a bar association as its representative is a factual issue. The Commentary recognizes that:

> (c)onflicts may arise in the representation by attorney board members of institutions or individuals who are in conflict with provider clients. Concern about the risks associated with conflicts should not exclude from the governing body every person identified with an institution or individual with an adverse interest. A strict rule could exclude persons with skills and experience of benefit to the provider and could inhibit development of an effective relationship between the provider and the private bar. In rural areas particularly, where the pool of potential members is relatively small, it may be impossible to avoid all conflicts. The provider, however, should assure that the presence of members with potential conflicts does not inhibit forceful representation of clients.

The proposed provision suggests a way that, under appropriate circumstances, the recipient can assure that individuals with clear and substantial conflicts of interest do not serve on its governing body, while permitting it to seat other individuals who may have a less substantial or merely potential conflict, and leaving it to the guidance of the applicable rules of professional responsibility when actual conflicts arise.

Section 1607.4 Functions of a Governing Body

Section 1607.4(a). This proposal deletes the requirement for "effective" prior public notice, which has proven to be a difficult concept to enforce and may be very fact-specific. The Committee felt that truly effective public notice is virtually impossible to achieve, even if a recipient spent huge amounts of money on advertising. The Corporation does not wish to promote such wasteful expenditures or assume that the efforts were not "effective" simply because few members of the public showed up at a board meeting. Instead, the standard should be that of "reasonable" prior public notice, so that recipients would only be required to do

what is reasonable under the specific local circumstances.

The Committee also considered whether it should include within the regulation specific guidance as to what kinds of matters were properly discussed in executive session. Instead, it decided to recommend that recipients look to the kinds of matters described in the LSC bylaws and Sunshine Act regulation (45 CFR part 1622), state Sunshine Act provisions, or other provisions in state non-profit corporation law for guidance as to the kinds of matters that should appropriately be discussed out of the public eye. A recipient should determine, based on that review and local circumstances, how it should conduct its business.

Section 1607.4(b). The proposed regulation includes new language to make it clear that recipient governing bodies have, in addition to the specific functions described in the regulation, the authority and responsibility inherent in their status as boards of non-profit corporations. The Committee felt that the current regulatory language did not grant the governing body the general authority, for example, to hire and fire a program's executive director, and there should be language that granted such authority.

In addition, there is new language that was added to make the section consistent with ABA opinions on the role of governing bodies of legal assistance programs under the Model Rules, especially with respect to the governing bodies' interference with an attorney's representation of a client or with the conduct of any ongoing representation. The Committee wished to make clear that while Board members were prohibited from such interference, the Board as a whole should be encouraged to adopt policies to guide the executive director's actions when he or she discovers that the recipient has undertaken representation in a case that is inappropriate under the restrictions of the LSC Act or regulations.

Section 1607.4(c). This new provision is intended to make it clear that it is up to recipients to design their own bylaws. The Corporation would have authority to review a program's bylaws, as well as any revisions that are made in them, for the purpose of ensuring that they comply with the LSC Act and regulations.

Section 1607.5 Compensation

Section 1607.5(a). The proposed regulation makes two significant changes in the current rule dealing with recipient board member compensation. First, since the provision of the LSC Act that prohibits compensation applies only to attorney board members, it would be consistent with the Act to permit a recipient to pay compensation to a client or other non-attorney board member for board service or other service to the recipient. The regulation was revised to make it consistent with the restriction in the Act.

Second, this proposal reverses the policy decision made by the LSC Board in 1988, which interpreted the language of the LSC Act to prohibit a recipient board member from receiving compensation from any recipient, not just the one on whose board the member sat. The effect of the 1988 revision was to prohibit field program staff from sitting on state and national support center boards, and vice versa. It prevented support centers from being accountable through their boards to the programs that they were intended to serve. This proposed language restores and clarifies the prior LSC policy that was in existence from 1975 to 1988 and which reflects the intent of Congress. Both the Legal Services Corporation Reauthorization bill that passed the House in 1992 (H.R. 2039) and the bill that was approved by the Senate Committee on Labor and Human Resources the same year (S. 2870) would have amended the LSC Act in a manner consistent with the proposed revision.

In addition, the proposal clarifies that all board members may receive a per diem payment for expenses in lieu of actual expense reimbursements, so long as such a payment is reasonable in light of actual average costs. Such a per diem may be easier for programs to administer and may encourage board members to save money on items such as meals and lodging by setting the per diem at a relatively low rate. The last phrase of the sentence was deleted to make it clear that reimbursement could be made for expenses incurred by recipient board members, on the same terms and conditions that are applicable to non-board members when such board members are involved in other program activities not directly related to their board membership or service, e.g., attorney board members who volunteered to drive a program client to a meeting or a hearing could receive reimbursement for automobile expenses, or attorney board members who did pro bono work on behalf of the program could receive reimbursement for travel expenses for attending an out-of-town settlement conference.

Sections 1607.5 (b) and (c). The proposal includes two new provisions that clarify how the compensation prohibition relates to a recipient's private attorney involvement program. One provision makes it clear that the Corporation could partially waive the compensation prohibition for those rural programs that operate in areas where there are so few attorneys that it is difficult or impossible to find attorneys willing to serve on program boards if that means that their partners and associates are barred from participating in judicare or other compensated PAI activities. The second provision was added to clarify that attorney board members can receive referrals of fee-generating cases and participate freely in the recipient's pro bono PAI programs on the same terms as any other attorney. This is particularly important for rural areas where there are few private attorneys.

Section 1607.6 Waiver

Section 1607.6(a). There is no change in this waiver provision which was designed to cover those programs, primarily reservation-based Native-American programs, that existed prior to the creation of the Corporation and had nonattorney majorities on their boards. In lieu of attorneys, most of those programs include tribal advocates who practice in tribal courts.

Section 1607.6(b). This new provision was added to permit the Corporation president the discretion to waive the requirement of one-third client membership when the president has determined that a recipient, like the National Clearinghouse for Legal Services or the Food Research & Action Center ("FRAC"), does not have as a primary purpose the provision of legal assistance to clients. The waiver provision requires a specific determination by the Corporation president, rather than a self-determination by the recipient, and does not permit waiver of the client board member requirement so long as the recipient has as a primary purpose the provision of legal assistance to clients. Such a waiver does not conflict with the statutory provision governing client membership because that provision applies only to those recipients that are organized "solely for the provision of legal assistance to eligible clients." It is anticipated that this waiver will be used sparingly for exceptional circumstances.

Section 1607.6(c). This provision was revised to clarify that the Corporation president could waive any provisions of the regulation, as long as the waiver conforms with applicable law. It also allows partial waivers to be granted. In addition, language was added to make it clear that the nature of the legal community could be considered as a basis for a waiver, as well as

requirements of state law. The Committee recognized that there may be programs, especially in rural areas, where there are peculiar problems or situations within the legal community that may make it necessary or desirable to permit the recipient to have a governing board that varies from the normal. An example would be for those programs that serve native-American populations and practice in tribal courts. The president, through the waiver authority, could permit the recipient to substitute one or more tribal advocates for attorney board members. In addition, this provision could be used as authority for partial waiver of the compensation prohibition, to permit a recipient to adopt policies that would allow partners or associates of a board member to participate in compensated PAI activities supported by the recipient.

Section 1607.6(d). The only change made in this subsection was a reference to the previous subsection.

Section 1607.6(e). This new provision was added to permit the LSC president to require an organization that is not principally a legal assistance organization but gets an LSC grant for legal assistance activities, to set up a policy board, similar to those established for several of the Delivery Systems Study programs during the late 1970's, to govern the activities covered by the LSC grant.

Deletion of Section 1607.7 Compliance

The compliance section of the current regulation is no longer applicable, since it refers to the changes that were made in the regulation in 1983. None of the proposed revisions would require programs to change anything about their board structures in order to come into compliance, although they would permit programs to make numerous changes and still remain in compliance with the regulation. Therefore the Committee proposal deletes the provisions on compliance. The Corporation should insure compliance with the new regulation in the same manner as it insures compliance with the other regulations.

List of Subjects in 45 CFR Part 1607

Legal services.

For the reasons set forth in the preamble, LSC proposes to amend 45 CFR part 1607 as follows:

PART 1607—GOVERNING BODIES

1. The authority citation for part 1607 is revised to read as follows:

Authority: 42 U.S.C. 2996f(c).

2. Section 1607.1 is revised to read as follows:

§ 1607.1 Purpose.

This part is designed to insure that the governing body of a recipient will be well qualified to guide a recipient in its efforts to provide high-quality legal assistance to those who otherwise would be unable to obtain adequate legal counsel, and to insure that the recipient is accountable to its clients.

3. Section 1607.2 is revised to read as follows:

§ 1607.2 Definitions.

(a) *Attorney member* as used in this part means a board member who is an attorney admitted to practice in a State within the recipient's service area.

(b) *Board member* refers to a member of a recipient's governing body.

(c) *Eligible client member* as used in this part means a person who is eligible to receive legal assistance under the Act at the time of appointment to each term of office to the recipient's governing body, without regard to whether the person actually has received or is receiving legal assistance at that time. Eligibility of client members shall be determined by the recipient or, if the recipient so chooses, by the appointing organization(s) or group(s), in accordance with policies adopted by the recipient.

(d) *Governing body* refers to the board of directors or other governing policy board or body of a recipient receiving funds under section 1006(a)(1)(A) of the Act.

(e) *Recipient* refers to any grantee or contractor receiving financial assistance from the Corporation under section 1006(a)(1)(A) of the Act.

4. Section 1607.3 is revised to read as follows:

§ 1607.3 Composition.

(a) A recipient shall be incorporated in a State in which it provides legal assistance, and shall have a governing body that reasonably reflects the interests of the eligible clients in the area served and consists of members, each of whom is supportive of the purposes of the Act and has an interest in, and knowledge of, the delivery of quality legal services to the poor.

(b) At least sixty percent (60%) of a governing body shall be attorney members.

(1) A majority of the members of the governing body shall be attorney members appointed by the governing body(ies) of one or more State, county or municipal bar associations, the membership of which represents a majority of attorneys practicing law in the localities in which the recipient provides legal assistance.

(i) Appointments may be made either by the bar association which represents a majority of attorneys in the recipient's service area or by bar associations which collectively represent a majority of the attorneys practicing law in the recipient's service area.

(ii) Recipients that provide legal assistance in more than one State may provide that appointments of attorney members be made by the appropriate bar association(s) in the State(s) or locality(ies) in which the recipient's principal office is located or in which the recipient provides legal assistance.

(2) Any additional attorney members may be selected by the recipient's governing body or may be appointed by other organizations that are designated by the recipient and have an interest in the delivery of legal services to the poor.

(3) Appointments shall be made so as to insure that the attorney members reasonably reflect the diversity of the legal community and the population of the areas served by the recipient, including race, ethnicity, gender and other factors.

(c) At least one-third of the members of a recipient's governing body shall be eligible clients when appointed. The members who are eligible clients shall be appointed by a variety of appropriate groups designated by the recipient that may include, but are not limited to, client and neighborhood associations and community-based organizations which advocate for or deliver services or resources to the client community served by the recipient. Recipients shall designate groups in a manner that reflects, to the extent possible, the variety of interests within the client community, and eligible client members should be selected so that they reasonably reflect the diversity of the eligible client population served by the recipient, including race, gender, ethnicity and other factors.

(d) The remaining members of a governing body may be appointed by the recipient's governing body or selected in a manner described in the recipient's bylaws or policies, and the appointment or selection shall be made so that the governing body as a whole reasonably reflects the diversity of the areas served by the recipient, including race, ethnicity, gender and other factors.

(e) The nonattorney members of a governing body shall not be dominated by persons serving as the representatives of a single association group or organization, except that eligible client members may be selected from client organizations that are composed of coalitions of numerous

smaller or regionally based client groups.

(f) Members of a governing body may be selected by appointment, election, or other means consistent with this part and with applicable State law. Recipients may recommend candidates for governing body membership to the appropriate bar associations or other appointing groups and may consult with appointing organizations to insure that appointments are made consistent with the provisions of this part.

(g) Recipients shall make reasonable and good faith efforts to insure that governing body vacancies are filled as promptly as possible.

(h) A recipient may reject the appointment of a board member if the recipient determines that:

(1) The person does not meet the criteria for board membership set out in this part, including financial eligibility for persons appointed as eligible client members, or

(2) The person has an actual and significant individual or institutional conflict of interest with the recipient or the recipient's client community that could influence the person's ability to exercise independent judgment as a member of the recipient's governing body.

5. Section 1607.4 is revised to read as follows:

§ 1607.4 Functions of a governing body.

(a) A governing body shall have at least four meetings a year. A recipient shall give timely and reasonable prior public notice of all meetings, and all meetings shall be public except for those concerned with matters properly discussed in executive session.

(b) In addition to other powers and responsibilities that may be provided for by state law, a governing body shall establish and enforce broad policies governing the operation of a recipient, but neither the governing body nor any member thereof shall interfere with any attorney's professional responsibilities to a client or obligations as a member of the profession or interfere with the conduct of any ongoing representation.

(c) A governing body shall adopt bylaws which are consistent with State law and the requirements of this part. Recipients shall submit a copy of such bylaws to the Corporation and shall give the Corporation timely notice of any changes in such bylaws.

6. Section 1607.5 is revised to read as follows:

§ 1607.5 Compensation.

(a) While serving on the governing body of a recipient, no attorney member shall receive compensation from that recipient, but any member may receive a reasonable per diem expense payment or reimbursement for actual expenses for normal travel and other reasonable out-of-pocket expenses.

(b) Pursuant to a waiver granted under § 1607.6(c)(1), a recipient may adopt policies that would permit partners or associates of attorney members to participate in any compensated private attorney involvement activities supported by the recipient.

(c) A recipient may adopt policies that permit attorney members, subject to terms and conditions applicable to other attorneys in the service area, (1) to accept referrals of fee-generating cases under part 1609 of this chapter, (2) to participate in any uncompensated private attorney involvement activities supported by the recipient, (3) to seek and accept attorneys' fees awarded by a court or administrative body or included in a settlement in cases undertaken pursuant to paragraphs (c)(1) and (2) of this section, and (4) to receive reimbursement from the recipient for out-of-pocket expenses incurred by the attorney member as part of the activities undertaken pursuant to paragraph (c)(2) of this section.

7. Section 1607.6 is revised to read as follows:

§ 1607.6 Waiver.

(a) Upon application, the president shall waive the requirements of this part to permit a recipient that was funded under section 222(a)(3) of the Economic Opportunity Act of 1964 and, on July 25, 1974, had a majority of persons who were not attorneys on its governing body, to continue such nonattorney majority.

(b) Upon application, the president may waive § 1607.3(c) for those recipients which the president has determined do not have as a primary purpose the provision of legal assistance to clients.

(c) Upon application, the president may grant any waivers of the requirements of this part which are permitted by applicable law if a recipient demonstrates that it cannot comply with them because of (1) the nature of the population, legal community or area served, or (2) special circumstances, including but not limited to, conflicting requirements of the recipient's other major funding source(s) or State law.

(d) A recipient seeking a waiver under paragraph (c) of this section shall demonstrate that it has made diligent efforts to comply with the requirements of this part.

(e) As a condition of granting a waiver under paragraph (c) of this section, the president may require that a recipient establish a policy board or body, whose membership is selected consistent with the requirements of § 1607.3, to establish and enforce policy, consistent with the provisions of § 1607.4, with respect to the services provided under any grant or contract made under the LSC Act.

Dated: June 10, 1994

Victor M. Fortuno,

General Counsel.

BILLING CODE 7050–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 22

[CC Docket No. 94–46, FCC 94–113]

Concurrent Use of Transmitters in Common Carrier and Non-Common Carrier Service

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This rule making proceeding proposes to allow transmitters authorized under part 22 to be concurrently licensed and used for both common carrier and private carrier operations. The purpose of this proposed rule is to promote economic efficiencies for carriers in providing paging services. This proposed action will lead to more effective use of carrier resources without undermining the Commission's rules.

DATES: Comments must be submitted on or before July 11, 1994. Reply comments must be submitted on or before July 26, 1994.

FOR FURTHER INFORMATION CONTACT: Dan Abeyta, Common Carrier Bureau, Mobile Services Division, (202) 632–6450.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making and Order (NPRM and Order) in CC Docket 94–46, adopted May 13, 1994 and released June 9, 1994. The full text of Commission decisions are available for inspection and copying during normal business hours in the FCC Docket Branch (room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, Inc., (202) 857–3800, 2100 M Street NW., Washington, DC 20037.

Paperwork Reduction

The proposed action does not impose a paperwork burden on the public.

Initial Regulatory Flexibility Analysis

Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, the Commission's initial regulatory flexibility analysis follows:

Reasons for Action and Objective

This rule making proceeding is initiated to obtain comment regarding changes in the provision of common carrier and private carrier paging services through the use of a single transmitter. The purpose of the proposed rule is to promote economic efficiencies for carriers in providing paging services.

Legal Basis

The proposed action is authorized under Section 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(j), 303(r).

Reporting, Recordkeeping and Other Compliance Requirements

None.

Federal Rules Which Duplicate or Conflict With These Rules

None.

Description, Potential Impact, and Number of Small Entities Involved

A rule change in this proceeding would benefit providers of common carrier and private carrier paging services by reducing costs. A number of these providers are small entities.

Any Significant Alternative Minimizing the Impact on Small Entities Consistent with the Stated Objectives

We have determined no specific alternative. The Chief Counsel for Advocacy of the Small Business Administration will be served with a copy of this Notice of Proposed Rule Making and Order in accordance with Section 603(a) of the Regulatory Flexibility Act, 5 U.S.C. 603(a).

Synopsis of NPRM and Order

By this NPRM and Order, the Commission proposes to delete 22.119 of the Rules, which prohibits the concurrent licensing and use of transmitters for common carrier and non-common carrier purposes. In this regard, the Commission notes that several factors make it appropriate to reevaluate the § 22.119 prohibition and to propose deleting or modifying the rule. First, advances in technology, such as improved digital transmission techniques and store and forward technology, have resulted in dramatically increased capacity, thus reducing the need for a transmitter to be devoted on a full-time basis to common carrier uses. Second, licensees providing wider-area service could achieve substantial economies of scale by sharing transmitters when building out a regional or nationwide system without diminishing the licensee's current quality of service. Third, the Omnibus Budget Reconciliation Act of 1993 (1993 Budget Act) enacted by Congress amends Section 3(n) and Section 332 of the Communications Act of 1934 to create a comprehensive framework for all mobile services. The Commission has initiated several rulemakings to implement the provision of Section 3(n) and 332 of the Act, as amended by the 1993 Budget Act. Lastly, increased competition in the industry provides an assurance that service to existing customers will not suffer from joint use of transmitters when the carriers are offering distinct services on different frequencies. Because of these factors, the NPRM and Order tentatively concludes that permitting a single transmitter to operate on both common carrier and private channels will cause no disruption or impairment of service to existing part 22 subscribers. Nevertheless, the NPRM and Order seeks comment on whether the proposed rules should be limited to circumstances where the joint use will facilitate the provision of national and or regional service as an overly to local paging service or where the part 22 licensee is utilizing batched paging.

Ordering Clauses

Accordingly, *it is ordered* that pursuant to Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(j), 303(r), this Notice of Proposed Rule Making is issued.

Adoption of Rule Change

Title 47 of the Code of Federal Regulations, part 22, is proposed to be amended as follows:

PART 22—PUBLIC MOBILE SERVICE

1. The authority citation for part 22 continues to read as follows:

Authority: Sections 4 and 303 of the Communications Act of 1934, as amended. 47 U.S.C. 154 and 303.

§ 22.119 [Removed and Reserved]

2. Section 22.119 is removed and reserved.

BILLING CODE 6712–01–M

47 CFR Part 73

[MM Docket No. 94–49, RM–8446]

Radio Broadcasting Services; Commerce, Oklahoma and Neosho, MO

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition filed by KBTN, Inc. requesting the allotment of Channel 259A to Neosho, Missouri, as that community's first local FM broadcast service. The coordinates for Channel 259A are 36–46–56 and 94–23–17. There is a site restriction 10 kilometers (6.2 miles) south of the community. To accommodate Channel 259A at Neosho, KBTN, Inc. has also requested the substitution of Channel 282A for vacant Channel 259A at Commerce, Oklahoma, at coordinates 37–00–24 and 94–48–54. There is a site restriction 9.4. kilometers (5.9 miles) northeast of the community. However, if no interest is expressed in retaining a channel in Commerce during the comment cycle, the channel will be deleted.

DATES: Comments must be filed on or before August 1, 1994, and reply comments on or before August 16, 1994.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner's counsel, as follows: John M Pelkey, Haley, Bader & Potts, 4350 North Fairfax Drive, suite 900, Arlington, Virginia 22203–1633.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 94–48, adopted May 25, 1994, and released June 10, 1994. The full text of this Commission decision is available for inspection and copying during normal business hours in the Commission's Reference Center (room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the

Commission's copy contractors, International Transcription Services, Inc., 2100 M Street, NW., suite 140, Washington, DC 20037, (202) 857–3800.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 22

RIN 1018 AB81

Eagle Transportation Permits for American Indians and Public Institutions

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Fish and Wildlife Service proposes to revise the general eagle permit restrictions applicable to American Indians and public institutions. The Service proposes to issue permits of limited duration and conditions, for the transportation into and out of the United States of eagle parts, nests or eggs or articles containing such parts, nests or eggs of the bald eagle (*Haliaeetus leucocephalus*) or the golden eagle (*Aquila chrysaetos*) that are lawfully possessed by American Indians and public institutions.

The proposed regulation will provide for eagle permits to be issued only for transportation into and out of the United States when the eagle parts have religious significance or value, or are being transported by a public institution for scientific or exhibition purposes. The Service makes this proposal in order to address the concerns which have been expressed by American Indians and public institutions who have sought the Service's permission for the international travel of lawfully possessed eagle parts or other articles containing eagle parts.

DATES: Comments must be submitted on or before August 15, 1994.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Director, U.S. Fish and Wildlife Service, P.O. Box 3247, Arlington, Virginia 22203–3247. Comments and materials may be hand-delivered to the U.S. Fish and Wildlife Service, Division of Law Enforcement, 4401 N. Fairfax Drive, room 500, Arlington, Virginia, between the hours of 8 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Frank Shoemaker, Special Agent in Charge, Branch of Investigations, Division of Law Enforcement, Fish and Wildlife Service, U.S. Department of Interior, Washington, DC 20240, Telephone Number (703) 358–1949.

SUPPLEMENTARY INFORMATION:

BACKGROUND

The golden eagle and most notably the bald eagle are proud symbols of our nation's natural beauty, our democratic form of government and our national heritage. The bald eagle was selected by the Continental Congress in 1782 as our national symbol and was given special protection by Congress in the Eagle Act of June 8, 1940. The Act as originally enacted provides that the Secretary of Interior may permit the taking and possession of bald eagle specimens for the scientific or exhibition purposes of public museums, scientific societies, and zoological parks.

The Eagle Act was amended by Congress on October 24, 1962 (16 U.S.C. 668a) to include the golden eagle within its provisions and to permit the taking, possession, and transportation of eagle specimens for the religious purposes of Indian tribes.

Summary of Comments and Information Received

On Thursday, November 14, 1991, the Service published in the **Federal Register** a Notice of Intent to Review 50 CFR part 22 (56 FR 57872). In this notice the Service requested that all interested parties submit written comments. In response to this request the Service received six comments pertaining to 50 CFR part 22. The Service has carefully considered all comments received in response to the November 14, 1991, **Federal Register** notice in proposing these changes to part 22.

In making this proposal the Service has carefully considered the recommendations made by commentaries in response to the Notice of Intent to Review published on Thursday November 14, 1991, **Federal Register** (56 FR 57872). The Service invites comments on this proposed rule and on all comments pertaining to Part 22, summarized herein, submitted in response to the Notice of Intent to Review.

Comments Pertaining to Section 22.21. Permits for Scientific or Exhibition Purposes

Several comments were received on the proposed revision of Section 22.21. One recommendation was that § 22.21, Permits for Scientific or Exhibition Purposes, limiting possession of bald or golden eagles to museums, public scientific societies and zoological parks, should be amended to allow eagles to be placed in private institutions. The commenter noted that there has been an increased number of birds that are for various reasons non-releasable and hard to place into public institutions. The Service does not anticipate changing the current regulations to allow for the placement of eagles with private institutions. The Service has been successful in placing non-releasable birds in public institutions in the past and expects the availability of these types of placements to continue. Public institutions have been the placement of preference for such birds because they usually provide a greater opportunity for the citizens of the United States to enjoy the rare beauty of these birds.

Comments Pertaining to Section 22.22. Permits for Indian Religious Purposes

One commenter requested that the Service include language within the regulations that would make it easier for tribal members to obtain eagle feathers. The Service has striven to make its current procedures as fair and equitable as possible in light of the limited supply and the increasing demand for eagle feathers. The Service is working with the tribal entities to make substantive changes in its policies.

Another recommendation was that Service procedures be revised to allow American Indians who find dead eagles to have the same eagle they found returned, because of what was termed, the found eagle's "spiritual and cultural" significance to individual American Indians. The Service recognizes and has carefully considered the concern raised. The Service is presently reviewing its policies and procedures to provide for this special need and allow American Indians to pick up and keep eagles found dead on tribal lands. The Service is also making administrative changes to allocate more resources to the National Eagle Repository and to simplify the entire eagle permit process for the religious use of American Indians. The Service will continue to work with tribal entities to develop recommendations to enhance these initial efforts.

Another recommendation was to revise the applicant certification requirement and permit issuance criteria set out in § 22.22. The Service has traditionally followed, as a matter of policy, guidelines established by the Bureau of Indian Affairs (Bureau) in reviewing such matters. These same guidelines are used by the Bureau to determine the status of an individual seeking federal assistance. The Bureau's certification simply indicates that an applicant is a member of a federally-recognized tribe in good standing. The establishment of an additional set of guidelines for the sole purpose of the allocation of eagles feathers would be redundant and inconsistent with the equitable standards set out by the Bureau. The Service, therefore, will continue to defer to the Bureau's criteria and anticipates no changes in the current certification requirements.

A recommendation was also made to include language allowing tribal members who lack proper paperwork to prove that they have permission from the Service to possess eagle feathers. Under current regulations, bald eagle parts, nests, or eggs lawfully acquired prior to June 8, 1940, and golden eagles parts, nests or eggs lawfully acquired prior to October 24, 1962, may be possessed, or transported within the United States without a Federal permit. Except for the above stated exceptions, a valid permit for American Indian religious purposes is required. No change in these provisions are anticipated at this time.

Comments Pertaining to Section 22.23. Permits to Take Depredating Eagles

Another recommendation relating to part 22 was the suggestion that the Service should include within the current issuance criteria required for Permits to take depredating eagles, in § 22.23(a), an additional permit criteria requiring the applicant to provide documentation of other methods that were attempted to reduce depredations. The Service anticipates no changes in the permit criteria for permits to take depredating eagles at this time. The Service considers the factual inquiry already required under existing application criteria to be sufficient to assure the continued protection of wild eagle populations.

Comments were also received on the subject of the use of eagles in falconry. Specific comments were that the Service should relax and simplify the requirements necessary for obtaining permits for golden eagles used in falconry for falconers who want to fly eagles. The Service considers current permit requirements as generally necessary and proper in order to assure the safety and welfare of both the eagle and the falconer. In the Service's considered view, any relaxation of these standards to allow other than master class falconers to possess golden eagles for falconry could be detrimental to the bird and the handler. Therefore, no changes to this effect are anticipated within the regulation at this time.

Another commenter recommended that eagles taken under permits, pursuant to § 22.23(b)(3), Permits to take depredating eagles, should be made available for scientific purposes, including deposition in a museum. In the Service's experience, the demand for eagles and eagle parts by American Indians is greater than the supply. The Service, therefore, has an obligation to fulfill the religious needs of the American Indian before alternative depositions are considered. Therefore, the Service does not anticipate making any changes at this time.

Need for Proposed Rulemaking

The Fish and Wildlife Service proposes to amend the regulations restricting the issuance of eagle permits, in order to respond to the particular needs of American Indians and public institutions. In order to assist the legitimate needs of American Indians and public institutions for bald or golden eagle feathers and other parts, the Service currently provides for the issuance of permits to American Indians and public institutions to possess bald and golden eagle feathers or parts. Under the permit system the possession and transportation within the United States of eagle feathers and parts is legal, but they may not be imported, exported, purchased, sold, traded, bartered or offered for purchase, sale, trade or barter. The Service has established an eagle repository for eagle parts at the Clark R. Bavin National Fish and Wildlife Forensic Laboratory in Ashland, Oregon, where American Indians through the permit process may lawfully obtain feathers and other parts, nests or eggs of eagles.

American Indians and representatives of public institutions in the past have sought the Service's permission to travel internationally with their lawfully possessed bald or golden eagle feathers, parts, eggs, nests or other articles which may contain eagle parts. A change in the permit requirements was necessitated because the regulations, as they currently exist, do not authorize the transportation into or out of the United States of religiously significant bald or golden eagle parts or articles containing such parts, nests or eggs by American Indians, or the transportation into or out of the United States or bald or golden eagle parts or articles containing such parts, nests or eggs for scientific or exhibition purposes. The Service, therefore, proposes to make accommodations for the religious needs of the American Indian community and for public institutions by making changes in the eagle permit regulations that generally prohibit all imports and exports of eagle parts, nests or eggs and do not differentiate between transportation within and transportation outside the United States.

The Service proposes to amend the regulations to provide for the issuance of eagle permits when the parts are lawfully possessed by American Indians and public institutions for the transportation into and out of the United States. The intent or the end result of the transportation into and out of the United States by American Indians and public institutions shall not be, under any circumstance, for the purchase, sale, barter or trade of bald eagle or golden eagle parts, nests or eggs.

The Service proposes to provide that eagle permits of limited duration may be issued under substantially the same general requirements and conditions applicable to the domestic possession and transportation of such articles by American Indians and public institutions. The Service hopes that this revision of the regulation will facilitate the international travel of American Indians and representatives of public institutions. The Service believes that it can serve its mandate to protect and preserve the viability of bald eagle or golden eagle populations and at the same time provided for a reasonable and proper balance of regulations which address the legitimate needs of the American Indian community and public institutions. In addition to the above changes, several references within the Sections have been updated or more clearly stated.

Required Determinations

Note. This rule was not subject to Office of Management and Budget (OMB) review under Executive Order 12866. The Department of the Interior (Department) certifies that this proposed rule will not have

a significant effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This action is not expected to have significant taking implications, as per Executive Order 12630. The only effect of this rule will be to make it easier for American Indians and public institutions to travel or move internationally with lawfully possessed articles containing bald or golden eagle parts. This proposed rule does not contain any additional information collection requirements, beyond those approved under OMB approval Number 1018–0022, that would require the approval of the Office of Management and Budget under the Paperwork Reduction Act, (44 U.S.C. 3501 *et seq.*). This action does not contain any federalism impacts as described in Executive Order 12612. These proposed changes in the regulations in Part 22 are regulatory and enforcement actions which are covered by a categorical exclusion from National Environmental Policy Act procedures under 516 Departmental Manual. An Environmental Action Memorandum is on file at the U.S. Fish and Wildlife Service Office in Arlington, Virginia. The determination has been made pursuant to Section 7 of the Endangered Species Act that the proposed revision to Part 22 will not effect a federally listed species.

Civil Justice Reform—Executive Order 12778

In revising these regulations the Service has made every reasonable effort in formulating these proposals to ensure that these regulations:

(A) Have no preemptive effects upon other regulations not being revised herein.

(B) The major effects upon Federal regulations is to provide eagle permits for the transportation into and out of the United States with lawfully obtained bald and golden eagle parts, nests, and eggs, for American Indian tribe religious use and public institutions for scientific and exhibition purposes.

(C) The standards proposed in this proposed revision are intended to articulate a precise and understandable criterion of what transportation into and out of the United States is being regulated and how the affected interests may conform their activities and comply with applicable eagle permit regulations. This standard will promote regulatory simplification and burden reduction upon affected interests by providing notice:

(1) That members of American Indian tribes and public institutions may now take their lawfully obtained eagle parts, nests, eggs, or items containing such with them when they travel outside the territory of the United States;

(2) That, a Service eagle permit is required in order to transport eagle parts, nests, or eggs into or out of the United States;

(3) That the Service will issue such permits under specified permit "Issuance criteria" stated in 50 CFR 22.22(c);

(4) That permits for the transportation of eagle parts, nests, or eggs into and out of the United States will be of certain and limited duration; and

(5) That the import, export purchase, sale, barter, or trade, of eagle parts, nests, or eggs shall remain prohibited by regulation.

(D) These proposed changes to the regulations in title 50 CFR part 22 are intended to have no retroactive effect directly or indirectly.

(E) The Service Administrative procedures for permit application, issuance, revocation, denial, and appeal are set out in title 50 CFR part 13. No additional Administrative procedures are anticipated for exhaustion of remedies.

(F) All key terms have been defined within the CFR.

Regulation Promulgation

For the reasons set out in the preamble, title 50, chapter I, subschapter B of the Code of Federal Regulations is proposed to be amended as set forth below.

PART 22—[AMENDED]

1. The authority citation for part 22 continues to read as follows:

Authority: Sec. Eagle Protection Act of June 8, 1940, Chapter 278, 54 Stat. 251; Pub. L. 87–884, 76 Stat. 1246; sec 2, Pub. L. 92–535, 86 Stat 1065; sec 9, Pub. L. 95–616, 92 Stat. 3114 (16 U.S.C. 668a).

2. Section 22.1 is revised to read as follows:

§ 22.1 Purposes of regulations.

The regulations contained in this Part govern the taking possession, transportation within the United States of bald and golden eagles for scientific, educational, depredation control purposes and for the religious purposes of Indian tribes, and the transportation into and out of the United States under permit of bald and golden eagles for scientific, educational, and Indian religious purposes. The import, export, purchase, sale, or barter of bald or golden eagles, their parts, nests, or eggs is not permitted by any regulation of this subchapter B.

3. Section 22.2 is amended by revising paragraph (a) to read as follows:

§ 22.2 Scope of regulations.

(a) Bald eagles, alive or dead, or their parts, nests, or eggs lawfully acquired prior to June 8, 1940, and golden eagles, alive or dead, or their parts, nests, or eggs lawfully acquired prior to October 24, 1962, may be possessed, or transported within the United States without a Federal permit, but may not be transported into or out of the United States, imported, exported, purchased sold, traded, bartered, or offered for purchase, sale, trade, or barter; and all shipments containing such birds, parts, nests, or eggs must be marked as provided by 16 U.S.C. 3372(b) and § 14.81 of this chapter: Provided, That no exemption from any statute or regulation shall accrue to any offspring of such birds.

* * * * *

4. Section 22.3 is amended by adding in alphabetical order definitions for "export," "import," and "transportation into and out of the United States" to read as follows:

§ 22.3 Definitions.

* * * * *

Export for the purpose of this Part does not include the transportation out of the United States pursuant to a valid transportation permit.

* * * * *

Import for the purpose of this Part does not include the transportation of eagle parts into the United States pursuant to a valid transportation permit.

* * * * *

Transportation into or out of the United States means that the item or items being transported into or out of the United States do not change ownership at any time, they are not transferred from one person to another in the pursuit of gain or profit, and are being transported into or out of the United States for Indian religious purposes, or scientific or exhibition purposes.

§ 22.11 [Amended]

5. Section 22.11 is amended by removing the term "(*Aquilachrysaetos*)" and adding in its place "(*Aquila chrysaetos*)" every where it appears.

6. Section 22.12 is revised to read as follows:

§ 22.12 General restrictions.

No person shall sell, purchase, barter, trade or offer for sale, purchase, barter or trade, export or import, at any time or in any manner, any bald eagle (*Haliaeetus leucocephalus*), or any golden eagle *Aquila chrysaetos),* or the parts, nests , or eggs of such birds, and no permit will be issued to authorize such acts. Permits may be issued pursuant to the provision of this part and parts 13, 17, 21 and 23 of this chapter, however, to allow the transportation into and out of the United States of lawfully possessed parts, nests or eggs of such birds for Indian religious purposes, or for scientific or exhibition purposes, subject to the conditions of the permit.

7. Section 22.21 is amended by revising the introductory text to the Section, paragraph (a) introductory text, paragraph (b), and paragraph (c) introductory text, to read as follows:

§ 22.21 Permits for scientific or exhibition purposes.

The Director may, upon receipt of an application and in accordance with the issuance criteria of this Section, issue a permit authorizing taking, possession, transportation within the United States, or transportation into and out of the United States of bald eagles or golden eagles, or their parts, nests, or eggs for the scientific or exhibition purposes of public museums, public scientific societies, or public zoological parks.

(a) *Application procedure.* Applications for permits to take, possess, transport within the United States, or transport into and out of the United States bald or golden eagles, their parts, nets or eggs for scientific or exhibition purposes shall be submitted to the appropriate Assistant Regional Director—Law Enforcement (See: § 13.11(b) of this chapter). Each such application must contain the general information and certification required by § 13.12(a) of this chapter plus the following information:

* * * * *

(b) *Additional permit conditions.* In addition to the general conditions set forth in Part 13 of this chapter, permits to take, possess, transport within the United States, or transport into and out of the United States bald or golden eagles for scientific or exhibition purposes, shall be subject to the following condition: In addition to any reporting requirement set forth in the permit, the permittee shall submit a report of activities conducted under the permit to the Assistant Regional Director—Law Enforcement within 30 days after expiration of the permit.

(c) *Issuance criteria.* The Director shall conduct an investigation and not issue a permit to take, possess, transport within the United States, or transport into and out of the United States bald or golden eagles for scientific or exhibition purposes unless he has determined that such taking, possession, or transportation is compatible with the preservation of the bald or golden eagle. In making such determination, the Director shall consider, among other criteria, the following:

* * * * *

8. Section 22.22 is amended by revising the introductory text to the Section, paragraph (a) introductory text, paragraph (a)(5), paragraph (b) introductory text, paragraph (b)(2), paragraph (c) introductory text and paragraph (d) to read as follows:

§ 22.22 Permits for Indian religious purposes.

The Director may, upon receipt of an application and in accordance with the issuance criteria of this Section, issue a permit authorizing the taking, possession, transportation within the United States, and transportation into and out of the United States, of bald or golden eagles, or their parts, nets, or eggs for the religious use of Indians.

(a) *Application procedure.* Applications for permits to take, possess, transport within the United States, and transport into and out of the United States bald or golden eagles, their parts, nests, or eggs for the religious use of Indians shall be submitted to the appropriate Assistant Regional Director—Law Enforcement (See: § 13.11(b) of this chapter). Only applications from individual Indians will be accepted. Each such application must contain the general information and certification required by § 13.12(b) of this chapter plus the following additional information:

* * * * *

(5) Applicant must attach a certificate from the Bureau of Indian Affairs that the applicant is a member of an Indian tribe listed in the Federal Register notice published in accordance with 25 CFR 83.6(b).

* * * * *

(b) *Additional permit conditions.* In addition to the general conditions set forth in part 13 of this chapter, permits to take, possess, transport within the United States, and transport into and out of the United States bald or golden eagles, their parts, nests or eggs, for the religious use of Indians shall be subject to the following conditions:

* * * * *

(2) Permittees shall make such reports or submit inventories of eagle feathers or parts on hand as may be requested by the Assistant Regional Director—Law Enforcement.

(c) *Issuance criteria.* The Director shall conduct an investigation and not issue a permit to take, possess, and transport within the United States, and transport into and out of the United States bald or golden eagles, their parts, nests or eggs, for the religious use of Indians unless he has determined that such taking, possession, and transportation is compatible with the preservation of the bald or golden eagle. In making such determination, the Director shall consider, among other criteria, the following:

* * * * *

(d) *Tenure of permits.* Any permit issued pursuant to this Section under which the applicant is authorized to take eagles shall be valid during the period specified on the face thereof, which shall in no case be longer than 1 year from the date of issue. Any permit issued pursuant to this Part which authorizes the permittee to transport within the United States and possess eagles or their parts shall be valid for the life of the permittee unless sooner revoked. Any permit issued pursuant to this Part which authorizes the permittee to transport into or out of the United States eagle parts shall be valid for a period of 30 days or the date designated on the face of the permit unless amended or revoked.

9. Section 22.23 is amended by revising paragraph (a) introductory text, and paragraph (b)(4) to read as follows:

§ 22.23 Permits to take depredating eagles.

* * * * *

(a) *Application procedure.* Applications for permits to take depredating bald or golden eagles shall be submitted to the appropriate Assistant Regional Director—Law Enforcement (See § 13.11(b) of this chapter). Each such application must contain the general information and certification required by § 13.12(a) of this chapter plus the following additional information:

* * * * *

(b) * * *

(4) In addition to any reporting requirement set forth in the permit, the permittee shall submit a report of activities conducted under the permit to the Assistant Regional Director—Law Enforcement within 10 days following completion of the taking operations or the expiration of the permit whichever occurs first.

* * * * *

10. Section 22.25 is amended by revising paragraph (a) introductory text to read as follows:

§ 22.25 Permits to take golden eagle nests.

* * * * *

(a) *Application procedure.* Applications for permits to take golden eagle nests must be submitted to the appropriate Assistant Regional Director—Law Enforcement (see § 13.11(b) of this chapter) Applications are only accepted from persons engaged in a resource development or recovery operation, including the planning and permitting stages of an operation. Each application must contain the general information and certification required by § 13.12(a) of this chapter plus the following additional information:

* * * * *

Dated: May 9, 1994

George T. Frampton, Jr.,

Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 94–14597 Filed 6–15–94; 8:45 am]

BILLING CODE 4310–55–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 285

[Docket No. 940538–4138; I.D. 100893B]

RIN 0648–AF74

Atlantic Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes modifications to NOAA Form 370, Fisheries Certificate of Origin (FCO), to allow that form to also serve as a Bluefin Tuna Statistical Document (BSD), and proposes amendments to the regulations governing the Atlantic and Pacific bluefin tuna fisheries to require: An appropriately completed, approved BSD as a condition for import, export, or re-export of fresh or frozen bluefin tuna into or from the United States; a Federal permit for all dealers that export Pacific bluefin tuna; preparation and submission of a biweekly report on exports of Pacific bluefin tuna by permitted dealers; and affixation of an identification tag to fresh or individually frozen Pacific bluefin tuna sold for export.

The amendments would enable the United States to assist the International Commission for the Conservation of Atlantic Tunas (ICCAT) in accounting for all bluefin tuna entering into commerce or international trade and would bring the United States into compliance with the 1992 recommendation of ICCAT and the Atlantic Tunas Convention Act (ATCA).

DATES: Comments are invited and must be received by July 18, 1994.

ADDRESSES: Comments on the proposed revisions to NOAA Form 370 and on the proposed rule should be sent to, and copies of supporting documents, including an Environmental Assessment and Regulatory Impact Review, are available from, Richard H. Schaefer, Director, Office of Fisheries Conservation and Management (F/CM), NMFS, 1315 East-West Highway, Silver Spring, MD 20910. NOAA Form 370, as proposed to be revised, bluefin tuna dealer permit application, biweekly bluefin tuna dealer report, and tuna identification tags may be obtained from NMFS, Northeast Region, Fisheries Management Division, 1 Blackburn Drive, Gloucester, MA 01930–2298, or NMFS, Southwest Region, Fisheries Management Division, 501 W. Ocean Blvd. Suite 4200, Long Beach, CA 90802-4213.

FOR FURTHER INFORMATION CONTACT: Richard B. Stone, 301–713–2347; Kevin B. Foster, 508–281–9260; or Patricia J. Donley, 310–980–4033.

SUPPLEMENTARY INFORMATION: The Atlantic tuna fisheries are managed under regulations at 50 CFR part 285 issued under the authority of ATCA. ATCA authorizes the Secretary of Commerce (Secretary) to implement regulations as may be necessary to carry out the recommendations of ICCAT. The authority to implement ICCAT recommendations has been delegated from the Secretary to the Assistant Administrator for Fisheries, NOAA (AA).

Purpose

Parties to the Eighth Special Meeting of ICCAT held in Madrid, Spain, on November 8–12, 1992, adopted a recommendation to implement a statistical documentation program to collect more complete information on the catch of, and trade in, Atlantic bluefin tuna. That recommendation, which this proposed rule would implement, requires Contracting Parties to implement a statistical documentation program whereby any bluefin tuna imported into the territory of a Contracting Party or at the first entry into a regional economic organization must be accompanied by an appropriately completed BSD. The ICCAT recommendation is based on the need to improve the reliability of statistical information on worldwide harvests of bluefin tuna, particularly western Atlantic bluefin tuna, which is an overexploited stock.

Without statistical documentation and differentiation with respect to ocean area of catch, ICCAT cannot determine the total harvest of Atlantic bluefin tuna. While the primary market for bluefin tuna is Japan, which is a member country of ICCAT, the origin of all bluefin tuna on the international market cannot be ascertained without documentation of the flag state of harvesting vessels and ocean areas of catch. Some vessels that harvest bluefin tuna are registered to nations not affiliated with ICCAT and are not subject to ICCAT quota constraints; some of these nations have difficulty in obtaining information on the catches of vessels under their flag and therefore do not report catches to ICCAT.

The documentation requirement would facilitate accounting for all fresh or frozen shipments of bluefin tuna into Japan and other ICCAT countries, by both member and non-member ICCAT countries. This information would be used by ICCAT for Atlantic bluefin tuna stock assessments, to develop management policies, and to help determine compliance with its conservation program for Atlantic bluefin tuna.

In addition to the proposed BSD requirement, NMFS proposes to require a Federal permit for each dealer who exports Pacific bluefin tuna. NMFS also proposes to require these dealers to complete a biweekly report on bluefin tuna exports and to affix a tag on all fresh or individually frozen Pacific bluefin tuna sold for export. When combined with the existing permitting and reporting requirements for Atlantic bluefin tuna dealers, this would give NMFS the ability to track all bluefin tuna shipments imported into, exported, or re-exported from the United States.

NMFS has determined that these additional requirements would bring the United States into compliance with the 1992 ICCAT recommendation that all bluefin tuna (Atlantic and Pacific) imported into ICCAT countries be required to be accompanied by a BSD. ICCAT has determined that inclusion of Pacific bluefin is necessary due to the similarity of appearance of the two subspecies. Without Pacific bluefin tuna dealer permits, bi-weekly reports and tags for exports, the United States could not assure compliance with the documentation requirement for Pacific bluefin.

Bluefin Tuna Statistical Document

The proposed rule would require a completed, approved BSD as a

condition for the import, export, or re-export of all bluefin tuna shipments into or from the United States. The BSD would be required to accompany each fresh or frozen shipment along with other shipping documentation ordinarily required for international trade. Consistent with the ICCAT recommendation and subsequent agreements with Japan and Canada, the BSD would be required for all bluefin tuna beginning June 1, 1994.

The BSD would be required for all fresh or frozen bluefin tuna products that are exported from or imported into the United States and identified by Harmonized Tariff Schedule (HTS) numbers for fresh or chilled bluefin tuna, excluding fillets and other fish meat—0302.39.00.20; and frozen bluefin tuna, excluding fillets—0303.49.00.20.

Contents of Document

NMFS proposes to modify the FCO (NOAA Form 370) so that it can also serve as the BSD. Interested persons may obtain copies of the proposed combined form from NMFS (see **ADDRESSES**).

In order to be considered appropriately completed, the approved BSD accompanying each shipment would have to provide all of the required information indicated in the proposed regulatory text for § 285.202 and be certified by the exporter, importer, and government official, as applicable.

Validation

The completed, approved BSD would have to be validated by a responsible government official of the country whose flag vessel harvested the tuna regardless of where the bluefin tuna is first landed, unless the AA waives the validation requirement for that country because the AA finds, based on information from ICCAT, that: (1) All fresh or individually frozen bluefin tuna available for sale from that country are tagged, or included in an ICCAT-accepted logbook or ICCAT-accepted information retrieval system; (2) all information relating to the tag, the ICCAT-accepted logbook, or the ICCAT-accepted information retrieval system is compiled by the government of that country and includes the name of the country issuing the document, the name of the exporter and the importer, the name of the harvesting vessel and the area of harvest, the gear utilized, the type of product and total weight, and the point of export; and (3) the compiled information is provided in a timely fashion to ICCAT. Validation requirements would be waived for all but bulk-frozen shipments upon publication in the **Federal Register** of a finding and waiver by the AA.

Dolphin-Safe Tuna Designation

Under the Marine Mammal Protection and International Dolphin Conservation Acts and their implementing regulations, only dolphin-safe tuna may be purchased, sold, transported, or shipped in the United States after June 1, 1994 (16 U.S.C. 1417). All shipments of tuna and tuna products, except fresh tuna, from all countries must be accompanied by an appropriately completed FCO (NOAA Form 370). As proposed to be revised, NOAA Form 370 would serve as an FCO/BSD and appropriately completing the form would satisfy both FCO requirements and, if bluefin tuna, BSD requirements.

All fresh tuna and other fresh fish products are presumed to be captured by dolphin-safe methods and do not require an appropriately completed FCO (NOAA Form 370) for lawful importation to the United States. In addition, imports of certain fish and fish products other than tuna, except fresh fish, as specified at 50 CFR 216.24(e), from countries having registered vessels that use large-scale driftnets (no countries so designated at this time) must be accompanied by an appropriately completed FCO (NOAA Form 370). Although an FCO is not required for fresh tuna or any other fresh fish products, under the proposed rule an appropriately completed BSD (NOAA Form 370 as proposed to be revised) would be required for all bluefin tuna, fresh or frozen, that enters or exits the United States. Exhibit 1 below summarizes when a completed FCO or BSD, that is, an appropriately completed NOAA Form 370, as proposed to be revised, is required.

EXHIBIT 1.—REQUIREMENTS FOR THE PROPOSED REVISED NOAA FORM 370

Product form	Bluefin tuna	Other tunas	Certain other fish
Fresh	Imports—BSD; Exports—BSD	Not applicable	Not applicable.
Frozen	Imports—BSD/FCO; Exports—BSD.	Imports—FCO	Imports from countries using large-scale driftnets—FCO.
Canned	No HTS code for canned bluefin; requirements for other tunas apply.	Imports—FCO	Imports from countries using large-scale driftnets—FCO.
Any non-fresh form labeled "Dolphin-Safe".	Exports—FCO	Exports—FCO	Not applicable.

Responsible Parties

For the purposes of the exporter's certification, the exporter would be considered the person or company that first exported the shipment from the country where the fish is first landed.

For the purposes of the importer's certification, intermediate country importer(s) would be the person(s) or company(ies) that transship(s) the product through an intermediate country(ies). An intermediate country would be a country from which bluefin tuna or bluefin tuna products that were previously imported (i.e., not harvested or landed) by that country are exported to the United States. An intermediate country for the purposes of these proposed 50 CFR part 285 regulations is distinct from an intermediary nation as defined in section 3 of the Marine Mammal Protection Act and its implementing regulations at 50 CFR part 216. Shipments of bluefin tuna or bluefin tuna products through a nation on a through bill of lading, or in any other manner that does not enter the products into that country's customs territory as an import, would not make that country an intermediate country under this definition.

For the purposes of the importer's certification, the final destination importer would be the person or company that is the recipient of the product at its final destination (i.e., country of consumption).

Pacific Bluefin Tuna Dealer Requirements

Permit Requirements

Dealers purchasing or receiving Pacific bluefin tuna for export would be required to possess a valid bluefin tuna dealer permit and comply with all applicable reporting requirements.

Tagging Requirements

The proposed rule would require that identification tags be placed on all bluefin tuna, except bulk-frozen bluefin, landed by U.S. vessels and exported from the United States, regardless of ocean area of catch. Similar to the NMFS Northeast Region program for dealers purchasing Atlantic bluefin tuna, the Director, Southwest Region, NMFS (Regional Director) would issue numbered tags to each person receiving a dealer's permit for exporting Pacific bluefin tuna. Such tags would not be transferable. A dealer or agent would be required to affix a tag to each fresh or individually frozen Pacific bluefin tuna purchased, or received, for export, except bulk-frozen Pacific bluefin tuna, immediately upon its offloading from a vessel. The tag would be required to be affixed between the fifth dorsal finlet and the keel.

Individual Pacific bluefin tuna carcasses that are landed in bulk-frozen form would not be required to be tagged for export. A tagging requirement for individual fish frozen in bulk would be difficult to implement and enforce, and would require a drastic change in current handling practice. However, exported bulk-frozen shipments would be accompanied by a completed BSD.

A tag affixed to any Pacific bluefin tuna would have to remain on the tuna until the tuna is cut into portions, which NMFS understands may occur on occasion. If the tuna or tuna parts subsequently are packaged for transport for domestic commercial use or for export, the tag number would be required to be written legibly and indelibly on the outside of any package or container. Tag numbers would be required to be recorded on any document accompanying shipment of bluefin tuna for U.S. commercial use or export.

Reporting Requirements

Pacific bluefin tuna dealers would be exempted from the requirement at 50 CFR 285.29(a) to record and report bluefin tuna landings via the Daily Dealer Report Card. However, they would be required to submit biweekly reports on exports of bluefin tuna to the Regional Director. The report would have to be postmarked and mailed within 10 days after the end of each 2-week reporting period in which Pacific bluefin tuna were exported. The biweekly reporting periods would be defined as the first day to the fourteenth day of each month and the fifteenth day to the last day of the month. Each report would have to specify accurately and completely for each tuna or each shipment of bulk-frozen tuna exported: Date of landing or import; any tag number (if so tagged); and weight in pounds (specify if round or dressed).

Dealers would be required to allow an authorized officer, or any employee of NMFS designated by the Regional Director for this purpose, to inspect and copy any records of transfers, purchases, or receipts of Pacific bluefin tuna. Finally, the dealer would be required to maintain a copy of each biweekly report for a period of 6 months from the date on which it was submitted to the Regional Director.

Ports of Entry

To facilitate enforcement, the AA may, in the future, designate ports of entry. If ports of entry are designated, all bluefin tuna shipments entering the United States would be restricted to the designated ports of entry, which would be published in the **Federal Register**.

Enforcement

Any fresh or frozen bluefin tuna product identified by the HTS item numbers referred to previously that is unaccompanied by a completed, approved BSD would be considered unlawful for importation into the United States. If the AA has designated ports of entry for shipments of bluefin tuna or bluefin tuna products, any shipment arriving at non-designated ports of entry would be considered unlawful and the importer would be subject to penalties under ATCA.

When a bluefin tuna is presented for entry into the customs territory of the United States and is found to be without a completed, approved BSD, U.S. Customs would suspend entry authorization, notify the importer of record of the documentation deficiency, notify NMFS enforcement agents of the deficiency, and offer the importer of record the opportunity to cure the defect. If the importer of record cannot cure the defect within 8 hours (justified by perishable nature of product), the importer could withdraw the product from U.S. Customs territory (i.e., re-export within 24 hours under Customs supervision); place the product into a bonded warehouse; post a bond to release the product; or abandon the product (Customs takes custody), whereupon the product would be disposed of under Customs laws and regulations, as long as that disposition does not result in its introduction into the United States.

In the event the importer can cure the defect within 8 hours, the fish would be released for importation and no penalties would be incurred under ATCA. If, within 10 days of fish being placed into a bonded warehouse, the Regional Director notifies the District Director of Customs that complete, approved documentation for that fish has been received, the fish would be allowed to be entered into the United States; otherwise, it would be disposed of as allowed under Customs laws and regulations. If, within 10 days of fish being released under bond, the Regional Director does not receive complete, approved documentation for that fish, the importer or consignee would be notified to redeliver or cause to be redelivered to the District Director of Customs those fish that were released under bond. In the event that any such fish is not redelivered within 3 days following the notification, without impairment in value, liquidated damages would be assessed in the full amount of the bond given. The importer would remain liable for any expenses incurred in the storage and/or disposal of bluefin tuna refused admission under these regulations. In addition, if the fish is refused entry into the United States or if the importer abandons the product, the importer would be subject to the civil and criminal penalties and the forfeiture provisions provided for under ATCA.

Scenarios

The following are five examples of use of the BSD under the proposed rule in which shipments of bluefin tuna are imported into and/or exported from the United States:

1. Exports from a country for which the AA has not waived validation requirements:

A BSD from a country for which the AA has not waived validation requirements would have to be validated by a responsible government official for that country. The export, exporter certification, and description of shipment (excluding the country-issued tag number) sections on the BSD would be completed by the exporter. The exporter then would submit the original of the BSD for validation by the designated government official. A copy would be submitted to the domestic fisheries agency and the original BSD would accompany the shipment into the United States.

If the U.S. importer re-exports the fish, the import section (naming the United States as the intermediate country) and the importer's certification section of the BSD would be completed by the importer. The original BSD, with the importer's entries and certification, would accompany the shipment to the final destination, and a completed copy

would be submitted to NMFS within 24 hours of the time of re-export.

If the U.S. importer sells the fish for consumption in the domestic market, the import section (naming a United States state and city as the final point of import) and the importer's certification section of the BSD would be completed by the importer. The original BSD with the importer's entries and certification would be submitted to NMFS within 24 hours of the time of import.

2. Exports from a country for which the AA has waived validation requirements:

If the AA has waived validation requirements for a country, a BSD, except for bulk-frozen shipments, would not have to be validated by a government official of that country. The export, exporter's certification, and description of shipment (excluding the country-issued tag number) sections on the BSD would be completed by the exporter. A copy would be submitted to the domestic fisheries agency and the original BSD would accompany the shipment into the United States.

If the U.S. importer re-exports the fish, the import section (naming the United States as the intermediate country) and the importer's certification section of the BSD would be completed by the importer. The original BSD with the importer's entries and certification would accompany the shipment to the final destination, and a completed copy would be submitted to NMFS within 24 hours of the time of re-export.

If the U.S. importer sells the fish for consumption in the domestic market, the import section (naming a United States state and city as the final point of import) and the importer's certification section of the BSD would be completed by the importer. The original BSD with the importer's entries and certification would be submitted to NMFS within 24 hours of the time of import.

3. Export of U.S.-caught bluefin tuna:

Since the United States has a tagging requirement for individually exported Atlantic bluefin tuna, and this proposed rule would implement such a tagging requirement for Pacific bluefin tuna exported from the United States, the BSD would not have to be validated by a government official (except for bulk-frozen shipments, which would not be tagged and would be accompanied by a validated BSD). The export, exporter certification, and description of shipment (including the country-coded tag number) sections on the BSD would be completed by the exporter. The original BSD with the exporter's entries and certification would accompany the shipment to the final destination, and a completed copy would be submitted to NMFS within 24 hours of the time of export.

4. Import of bulk-frozen shipments to the United States:

For a bulk-frozen import, the export, exporter's certification, and description of shipment (excluding the country-issued tag number) sections on the BSD would be completed by the foreign exporter. The exporter would then submit the BSD to a responsible government official of the country of the flag vessel harvesting the tuna for validation, even if validation requirements have been otherwise waived for that country. The exporter would then submit and/or retain copies of the document as required by the regulations of the country, and the original document would accompany the shipment into the United States.

If the U.S. importer re-exports the fish, the import section (naming the United States as the intermediate country) and the importer's certification section of the BSD would be completed by the importer. The original BSD with the importer's entries and certification would accompany the shipment to the final destination, and a completed copy would be submitted to NMFS within 24 hours of the time of re-export.

If the U.S. importer sells the fish for consumption in the domestic market, the import section (naming a U.S. state and city as the final point of import) and the importer's certification section of the BSD would be completed by the importer. The original BSD with the importer's entries and certification would be submitted to NMFS within 24 hours of the time of import.

5. Export of bulk-frozen shipments from the United States:

For a bulk-frozen export, the export, exporter's certification, and description of shipment (excluding the country-issued tag number) sections on the BSD would be completed by the U.S. exporter. The exporter would submit the original to the designated NMFS official for validation, then submit a copy of the completed document to NMFS (see **ADDRESSES**) within 24 hours of the time of export. The original completed document would accompany the shipment to any intermediate countries, if applicable, and to the country of final destination.

Classification

This proposed rule is published under the authority of the ATCA, 16 U.S.C. 971 *et seq.* The AA has preliminarily determined that this proposed rule is necessary to implement the recommendation of ICCAT and is necessary for management of the bluefin tuna fisheries.

The General Counsel of the Department of Commerce has certified to the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities because the estimated annual cost to all respondents in the aggregate would be less than $56,000. Approximately 230 bluefin dealers would be affected. This proposed rule has been determined to be not significant for purposes of E.O. 12866.

This proposed rule contains new and revised collection-of-information requirements subject to review under the Paperwork Reduction Act. It modifies and renews requirements that were approved by the Office of Management and Budget (OMB) under OMB control numbers 0648–0040, 0648–0204 and 0648–0239. The public reporting burden for completing an application for a Federal permit for dealers that export or re-export Pacific bluefin tuna is estimated at 0.08 hours (5 minutes) per response. The public reporting burden for these dealers for collection-of-information on dealer reports is estimated at 0.20 hours (12 minutes) per response for the biweekly dealer reports and affixing tags, and 0.33 hours (20 minutes) per response for all bluefin tuna dealers for completing a BSD. These estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding these burden estimates or any other aspects of these collections of information, including suggestions for reducing the burden, to NMFS (see **ADDRESSES**) and the Office of Management and Budget, Paperwork Reduction Project (0648–0040), Washington, D.C. 20503.

List of Subjects in 50 CFR Part 285

Fisheries, Penalties, Reporting and recordkeeping requirements, Treaties

Dated: June 10, 1994.

Charles Karnella,

Acting Program Management Officer, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR part 285 is proposed to be amended as follows:

PART 285—ATLANTIC TUNA FISHERIES

1. The authority citation for part 285 continues to read as follows:

Authority: 16 U.S.C. 971 *et seq.*

2. In § 285.2, definitions of "bluefin tuna", "intermediate country", and "Pacific bluefin tuna" are added in alphabetical order; the definition of "Atlantic bluefin tuna" is revised; in the definition of "owner", paragraphs (a) through (c) are redesignated paragraphs (1) through (3), respectively; and in the definition of "Regional Director", paragraphs (a) and (b) are redesignated paragraphs (1) and (2), respectively, and redesignated paragraph (1) is revised to read as follows:

§ 285.2 Definitions.

* * * * *

Atlantic bluefin tuna means the subspecies of bluefin tuna *Thunnus thynnus thynnus* that is found in the Atlantic Ocean. Size classes for Atlantic bluefin tuna are defined in § 285.26.

* * * * *

Bluefin tuna means the fish species *Thunnus thynnus* that is found in any ocean area.

* * * * *

Intermediate country means a country from which bluefin tuna or bluefin tuna products that were previously imported by that nation are exported to the United States. Shipments of bluefin tuna or bluefin tuna products through a country on a through bill of lading or in another manner that does not enter the shipments into that country as an importation do not make that country an intermediate country under this definition.

* * * * *

Pacific bluefin tuna means the subspecies of bluefin tuna *Thunnus thynnus orientalis* that is found in the Pacific Ocean.

* * * * *

Regional Director means

(1) For the purposes of Atlantic bluefin dealers, the Director, Northeast Region, National Marine Fisheries Service, One Blackburn Drive, Gloucester, MA 01930–3799 and for the purposes of Pacific bluefin dealers, the Director, Southwest Region, National Marine Fisheries Service, 501 W. Ocean Blvd. Suite 4200, Long Beach, CA 90802-4213.

* * * * *

3. In § 285.30, the section heading and paragraph (d) are revised to read as follows:

§ 285.30 Tags.

* * * * *

(d) *Removal of tags.* A tag affixed to any Atlantic bluefin tuna under paragraph (c)(1) of this section or under § 285.202(a)(5)(ii) must remain on the tuna until the tuna is cut into portions. If the tuna or tuna parts subsequently are packaged for transport for domestic commercial use or for export, the tag number must be written legibly and indelibly on the outside of any package or container. Tag numbers must be recorded on any document accompanying shipment of bluefin tuna for commercial use or export.

4. In § 285.31, paragraph (a)(19) is revised to read as follows:

§ 285.31 Prohibitions.

(a) * * *

(19) Remove any tag affixed to an Atlantic bluefin tuna under § 285.30(c)(1) or under § 285.202(a)(5)(ii), before removal is allowed under § 285.30(d), or fail to write the tag number on the shipping package or container as prescribed by that section;

* * * * *

5. New subparts F and G are added to part 285 to read as follows:

Subpart F—Pacific Bluefin Tuna

Sec.

285.150 Dealer permits.

285.151 Dealer recordkeeping and reporting.

285.152 Tags.

285.153 Prohibitions.

Subpart G—Bluefin Tuna Statistical Documentation

285.200 Species subject to statistical documentation requirements.

285.201 Documentation requirements.

285.202 Contents of documentation.

285.203 Waiver of validation requirements.

285.204 Enforcement.

285.205 Ports of entry.

285.206 Prohibitions.

Subpart F—Pacific Bluefin Tuna

§ 285.150 Dealer permits.

(a) *General.* A dealer purchasing, or receiving, Pacific bluefin tuna for export must have a valid permit issued under this section.

(b) *Application.* A dealer must apply for a permit in writing on an appropriate form obtained from the Regional Director. The application must be signed by the dealer and be submitted to the Regional Director at least 30 days before the date upon which the dealer desires to have the permit made effective. The application must contain the following information: Company name, principal place of business, owner or owners' names, applicant's name (if different from owner or owners) and mailing address and telephone number, and any other information required by the Regional Director.

(c) *Issuance.* (1) Except as provided in subpart D of 15 CFR part 904, the Regional Director will issue a permit within 30 days of receipt of a completed application.

(2) The Regional Director will notify the applicant of any deficiency in the application. If the applicant fails to correct the deficiency within 15 days following the date of notification, the application will be considered abandoned.

(d) *Duration.* Any permit issued under this section is valid until December 31 of the year for which it is issued, unless suspended or revoked.

(e) *Alteration.* Any permit that is substantially altered, erased, or mutilated is invalid.

(f) *Replacement.* The Regional Director may issue replacement permits. An application for a replacement permit is not considered a new application.

(g) *Transfer.* A permit issued under this section is not transferable or assignable; it is valid only for the dealer to whom it is issued.

(h) *Inspection.* The dealer must keep the permit issued under this section at his/her principal place of business. The permit must be displayed for inspection upon request of any authorized officer, or any employee of NMFS designated by the Regional Director for such purpose.

(i) *Sanctions.* The Assistant Administrator may suspend, revoke, modify, or deny a permit issued or sought under this section. Procedures governing permit sanctions and denials are found at subpart D of 15 CFR part 904.

(j) *Fees.* The Regional Director may charge a fee to recover the administrative expenses of permit issuance. The amount of the fee is calculated, at least annually, in accordance with the procedures of the NOAA Finance Handbook for determining administrative costs of each special product or service. The fee may not exceed such costs and is specified on each application form. The appropriate fee must accompany each application. Failure to pay the fee will preclude issuance of the permit. Payment by a commercial instrument later determined to be insufficiently funded shall invalidate any permit.

(k) *Change in application information.* Within 15 days after any change in the information contained in an application submitted under this section, the dealer issued a permit must report the change to the Regional Director in writing. The permit is void if any change in information is not reported within 15 days.

§ 285.151 Dealer recordkeeping and reporting.

Any person issued a dealer permit under § 285.150:

(a) Must submit to the Regional Director a biweekly report on bluefin exports on forms supplied by NMFS.

(1) The report required by this paragraph (a) must be postmarked and mailed within 10 days after the end of each 2-week reporting period in which Pacific bluefin tuna were exported. The biweekly reporting periods are defined as the first day to the fourteenth day of each month and the fifteenth day to the last day of the month.

(2) Each report must specify accurately and completely for each tuna or each shipment of bulk-frozen tuna exported: Date of landing or import; any tag number (if so tagged); weight in pounds (specify if round or dressed); and any other information required by the Regional Director. At the top of each form, the company's name, license number, and the name of the person filling out the report must be specified. In addition, the beginning and ending dates of the 2-week reporting period must be specified by the dealer and noted at the top of the form.

(b) Must allow an authorized officer, or any employee of NMFS designated by the Regional Director for this purpose, to inspect and copy any records of transfers, purchases, or receipts of Pacific bluefin tuna.

(c) Must retain at his/her place of business a copy of each biweekly report for a period of 6 months from the date on which it was submitted to the Regional Director.

§ 285.152 Tags.

(a) *Issuance of tags.* The Regional Director will issue numbered tags to each person receiving a dealer's permit under § 285.150.

(b) *Transfer of tags.* Tags issued under this section are not transferable.

(c) *Affixing tags.* A dealer or agent must affix a tag to each fresh or individually frozen Pacific bluefin tuna purchased or received for export, except bulk-frozen Pacific bluefin tuna purchased or received for export, prior to its packaging for export. The tag must be affixed between the fifth dorsal finlet and the keel.

(d) *Removal of tags.* A tag affixed to any Pacific bluefin tuna under § 285.152(c) or under § 285.201(a)(5)(ii) must remain on the tuna until the tuna is cut into portions. If the tuna or tuna parts subsequently are packaged for transport for domestic commercial use or for export, the tag number must be written legibly and indelibly on the outside of any package or container. Tag numbers must be recorded on any document accompanying shipment of bluefin tuna for commercial use or export.

§ 285.153 Prohibitions.

It is unlawful for any person or vessel subject to the jurisdiction of the United States to:

(a) Purchase or receive Pacific bluefin tuna for export without a valid dealer permit issued under § 285.100.

(b) Fail to affix an individually numbered bluefin tuna identification tag as specified in § 285.152.

(c) Remove any tag affixed to a Pacific bluefin tuna under § 285.152(c) or under § 285.201(a)(5)(ii), before removal is allowed under § 285.152(d), or fail to write the tag number on the shipping package or container as specified in § 285.152(d).

(d) Falsify or fail to make, keep, maintain, or submit any reports or other record required by this subpart.

(e) Refuse to allow an authorized officer or employee of NMFS designated by the Regional Director to make inspections for the purpose of checking any records relating to the catching, harvesting, landing, purchase, or sale of any Pacific bluefin tuna required of this subpart.

(f) Make any false statement, oral or written, to an authorized officer or employee of NMFS designated by the Regional Director to make inspections concerning the catching, harvesting, landing, purchase, sale, or transfer of any Pacific bluefin tuna.

Subpart G—Bluefin Tuna Statistical Documentation

§ 285.200 Species subject to statistical documentation requirements.

Imports into the United States and exports or re-exports from the United States of bluefin tuna or bluefin tuna products identified by the following item numbers from the Harmonized Tariff Schedule are subject to the documentation requirements of § 285.201:

(a) Fresh or chilled bluefin tuna, excluding fillets and other fish meat, No. 0302.39.00.20.

(b) Frozen bluefin tuna, excluding fillets, No. 0303.49.00.20.

§ 285.201 Documentation requirements.

(a) Bluefin imports. (1) Dealers importing bluefin tuna into the United States beginning June 1, 1994, must obtain from the shipment of tuna upon its receipt a completed approved Bluefin Tuna Statistical Document with the information and exporter's certification specified in § 285.202(a)(1) through (7). Such information must be validated as specified in § 285.202(a)(8) by a responsible government official of the country whose flag vessel caught the tuna (regardless of where the fish are first landed), unless the Assistant Administrator has waived validation requirements for the country pursuant to § 285.203 and such shipment is not frozen in bulk but is comprised of fresh or individually frozen bluefin tuna.

(2) Bluefin tuna imported into the United States from a country requiring a tag on all such tuna available for sale must be accompanied by the appropriate tag issued by that country, and said tag must remain on any tuna until it reaches its final point of import. If the point of final import is the United States, the tag must remain on the tuna until it is cut into portions. If the tuna portions are subsequently packaged for domestic commercial use or export, the tag number and the issuing country must be written legibly and indelibly on the outside of the package.

(3) Dealers selling bluefin tuna that was previously imported into the United States for domestic commercial use in the United States must provide on the Bluefin Tuna Statistical Document the correct information and importer's certification specified in § 285.202(a)(4) and (9). The original of the completed Bluefin Tuna Statistical Document must be submitted to the Regional Director within 24 hours of the time the tuna was imported into the United States.

(b) Bluefin exports. (1) Dealers exporting bluefin tuna that was harvested by U.S. vessels and first landed in the United States must provide on the Bluefin Tuna Statistical Document the correct information and exporter certification specified in § 285.202(a)(1) through (7). If such tuna is frozen in bulk (not individually tagged pursuant to § 285.152), such information must be validated as specified in § 285.202(a)(8) by an official of the U.S. Government authorized to validate Bluefin Tuna Statistical Documents. A list of such officials may be obtained by contacting the Office of Fisheries Conservation and Management, NMFS, Silver Spring, MD (301–713–2347), or the nearest NMFS Enforcement Office. NMFS Enforcement Offices are located at: Portland, ME (207–780–3241); Otis Air Force Base, MA (508–563–5721); Brielle, NJ (908–528–3315); Atlantic Beach, NC (919–247–4549); Brunswick, GA (912–265–0108); Miami, FL (305–361–4224); St. Thomas, U.S. Virgin Islands (809–774–5226); San Juan, Puerto Rico (809–782–8686); St. Petersburg, FL (813–893–3145); St. Joseph, FL (904–227–1879); Corpus Christi, TX (512–888–3362);

Juneau, AK (907–586–7225); Anchorage, AK (907–271–5006); Dutch Harbor, AK (907–581–2061); Seattle, WA (206–526–6133); and Los Angeles, CA (310–980–4050). The original of the completed Bluefin Tuna Statistical Document must accompany the shipment of tuna to its export destination. A copy of the completed Bluefin Tuna Statistical Document must be submitted to the Regional Director within 24 hours of the time of export.

(2) U.S. dealers re-exporting bluefin tuna that was previously imported into the United States must provide on the Bluefin Tuna Statistical Document the correct information and intermediate importer's certification specified in § 285.202(a)(9). The original of the completed Bluefin Tuna Statistical Document must accompany the shipment of bluefin tuna to its re-export destination. A copy of the completed Bluefin Tuna Statistical Document must be submitted to the Regional Director within 24 hours of the time the tuna was re-exported from the United States.

(c) Dealers must retain at their place of business a copy of each Bluefin Tuna Statistical Document required to be submitted to the Regional Director pursuant to this section for a period of 6 months from the date on which it was submitted to the Regional Director.

§ 285.202 Contents of documentation.

(a) A Bluefin Tuna Statistical Document, to be deemed complete, must:

(1) Have a document number assigned by the country issuing the document;

(2) State the name of the country issuing the document, which is the country whose flag vessel harvested the bluefin tuna, regardless of where the tuna is first landed;

(3) State the exporter and point of export, which is the city, state or province, and country from which the bluefin tuna is first exported;

(4) State the importer and point of import, which is the city, state or province, and country into which the bluefin tuna is first imported;

(5) State the following specified information about the shipment:

(i) U.S. Tariff Schedule Number and species description;

(ii) The identifying tag number, if landed by vessels from countries with tagging programs;

(iii) The product type (fresh or frozen) and product form (round, dressed, fillet);

(iv) The weight of each fish (in kilograms for same product form previously specified);

(v) The ocean area where caught (by region, e.g., Western Atlantic);

(vi) The method of fishing (purse seine, trap, rod & reel, etc.);

(vii) The flag state of the vessel that harvested the bluefin;

(viii) The fishing trip dates; and

(ix) The name of the vessel that caught the fish;

(6) If frozen, have the appropriate box checked to indicate that the bluefin tuna was captured in a manner that is dolphin-safe as defined under 50 CFR part 247;

(7) State the name and license number of, and be signed and dated in the exporter's certification block by, the exporter;

(8) If applicable, state the name and title of, and be signed and dated in the government's validation block by, the responsible government official of the country whose flag vessel caught the tuna (regardless of where the tuna are first landed), with official government seal affixed, thus validating the information on the Bluefin Tuna Statistical Document; and

(9) As applicable, state the name(s) and address(es), including the name of the city and state or province of import, and the name(s) of the intermediate country(ies) or the name of the country of final destination, and license number(s) of, and be signed and dated in the importer's certification block by, each intermediate and the final importer.

(b) An approved Bluefin Tuna Statistical Document (NOAA Form 370) may be obtained from the Regional Director to accompany exports of bluefin tuna from the United States. Bluefin tuna dealers in countries that do not provide an approved Bluefin Tuna Statistical Document to exporters may obtain an approved Bluefin Tuna Statistical Document (NOAA Form 370) from the Regional Director to accompany exports to the United States.

(c) A country exporting bluefin tuna to the United States may use the approved Bluefin Tuna Statistical Document (NOAA Form 370) obtainable from the Regional Director or its own document, if that country submits a copy to the Assistant Administrator and the Assistant Administrator determines that the document meets the information requirements of this section. In such case, the Assistant Administrator will publish a finding to that effect and an approval of the document in the **Federal Register**. Effective upon the date of publication of such finding in the **Federal Register**, shipments of bluefin tuna or bluefin tuna products offered for importation from said country may be accompanied by either that country's approved Bluefin Tuna Statistical Document or by the Bluefin Tuna Statistical Document provided to the exporter by the Regional Director.

§ 285.203 Waiver of validation requirements.

(a) The approved Bluefin Tuna Statistical Document accompanying any import of bluefin tuna that is not frozen in bulk from any country, whether or not that country is a member of ICCAT, is not required to be validated by a government official from that country if the Assistant Administrator waives the validation requirement for that country. Such a waiver does not apply to shipments of tuna frozen in bulk.

(b) The Assistant Administrator shall publish such finding and waiver in the **Federal Register** upon finding that:

(1) All fresh or individually frozen bluefin tuna available for sale from a country are tagged, or included in an ICCAT-accepted logbook or ICCAT-accepted information retrieval system;

(2) All information relating to the tag, the ICCAT-accepted logbook, or the ICCAT-accepted information retrieval system is compiled by the government of that country and includes the name of the country issuing the document, the name of the exporter and the importer, the name of the harvesting vessel and the area of harvest, the gear utilized, the type of product and total weight, and the point of export; and

(3) The compiled information is provided in a timely fashion to ICCAT.

§ 285.204 Enforcement.

(a) *Bluefin tuna refused entry.* If a shipment containing bluefin tuna or bluefin tuna products is denied entry under the provisions of § 285.200, the District Director of Customs shall refuse to release the fish for entry into the United States and shall issue a notice of such refusal to the importer or consignee, and to NMFS Enforcement.

(b) *Disposition of bluefin tuna not accompanied by required documentation.* (1) Bluefin tuna that is offered for importation without the required Bluefin Tuna Statistical Document must be either:

(i) Exported under Customs supervision within 24 hours;

(ii) Released under bond as provided for in paragraph (c) of this section;

(iii) Placed in a bonded warehouse; or

(iv) Disposed of under Customs laws and regulations, as long as that disposition does not result in its introduction into the United States.

(2) The importer remains liable for any expenses incurred in the storage and/or disposal of bluefin tuna refused admission under these regulations. If, within 24 hours of fish being placed in a bonded warehouse, the Regional Director notifies the District Director of Customs that approved documentation for that fish has been received, the fish will be allowed to be entered into the United States; otherwise it will be disposed of as set out in paragraph (b)(1)(i) or paragraph (b)(1)(iv) of this section.

(c) *Release under bond.* (1) Bluefin tuna or bluefin tuna products not accompanied or covered by the required documentation or certification when offered for entry may be entered into the United States if the importer or consignee gives a bond on Customs Form 7551, 7553, or 7595 for the production of the required documentation or certification. The bond shall be in the amount required under 19 CFR 25.4(a).

(2) Within 24 hours after such Customs entry, or such additional period as the District Director of Customs may allow for good cause shown, the importer or consignee shall deliver an original or copy, as required, of the Bluefin Tuna Statistical Document to the Regional Director, who will notify the District Director of Customs that the fish is covered by an approved Bluefin Tuna Statistical Document. If such notification is not delivered to the District Director of Customs for the port of entry of such fish within 24 hours of the time of Customs entry or such additional period as may have been allowed by the District Director of Customs for good cause shown, the importer or consignee shall, by a specified date, redeliver or cause to be redelivered to the District Director of Customs those fish that were released in accordance with this paragraph (c).

(3) In the event that any such fish is not redelivered without impairment in value by the date specified in paragraph (c)(2) of this section, liquidated damages shall be assessed in the full amount of bond given on Form 7551. When the transaction has been charged against a bond given on Form 7553 or 7595, liquidated damages shall be assessed in the amount that would have been demanded under this paragraph (c)(3) under a bond given on Form 7551.

(4) Fish released for entry into the United States through use of the bonding procedure provided in this paragraph (c) shall be subject to the civil and criminal penalties and the forfeiture provisions provided for under the Act if the required Bluefin Tuna Statistical Document is not delivered to the Regional Director within 24 hours of the time of Customs entry, or such additional period as may have been allowed by the District Director of Customs for good cause shown.

(5) Fish refused entry into the United States shall also be subject to the civil and criminal penalties and the forfeiture provisions provided for under the Act.

§ 285.205 Ports of entry.

The Assistant Administrator shall monitor the importation of bluefin tuna into the United States. If the Assistant Administrator determines that the diversity of handling practices at certain ports at which bluefin tuna is being imported into the United States allow for circumvention of the Bluefin Tuna Statistical Document requirement, he/she may designate, after consultation with the U.S. Customs Service, those ports at which Pacific or Atlantic bluefin tuna may be imported into the United States. The Assistant Administrator shall announce in the **Federal Register** the names of ports so designated.

§ 285.206 Prohibitions.

It is unlawful for any person to do any of the following:

(a) Import or attempt to import any bluefin tuna into the United States without an accompanying approved Bluefin Tuna Statistical Document correctly completed with the appropriate certification.

(b) Import any bluefin tuna into the United States from a country that requires all such tuna to be tagged, without said tag accompanying the bluefin tuna.

(c) Remove a tag from any bluefin tuna imported into the United States accompanied by a tag, prior to its being cut into portions for a destination in the United States or for export.

(d) Fail to write legibly and indelibly, on the outside of any package containing a part or parts of a bluefin tuna that was imported into the United States accompanied by a tag, the tag number and the issuing country.

(e) Export or re-export from the United States any bluefin tuna without an accompanying approved Bluefin Tuna Statistical Document correctly completed with the appropriate certification.

(f) Fail to provide in a timely manner any copies of Bluefin Tuna Statistical Documents required to be submitted to the Regional Director pursuant to § 285.201.

(g) Falsify or modify any Bluefin Tuna Statistical Document required by this subpart.

(h) Fail to maintain any copies of a Bluefin Tuna Statistical Document that is required by § 285.202.

(i) Import any Pacific or Atlantic bluefin tuna at any port other than a port designated pursuant to § 285.205.

BILLING CODE 3510–22–F–P

50 CFR Part 644

[I.D. 051794D]

Atlantic Billfish Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Atlantic billfishes; notice of additional scoping meetings and extension of comment period.

SUMMARY: NMFS has previously announced scoping meetings for Atlantic billfish. The purpose of the scoping meetings is to receive comments concerning the Atlantic billfish fishery from fishery participants and other members of the public regarding: A definition of overfishing; reducing fishing mortality; reporting requirements; and other issues. This notice announces additional scoping meetings and extends the comment period for the billfish scoping meetings.

DATES: Written scoping comments must be received by August 15, 1994. The scoping meetings will be held on August 4, August 10, August 11, August 14, and August 15, 1994.

ADDRESSES: Written scoping comments should be sent to Richard B. Stone, Chief, Highly Migratory Species Management Division (F/CM4), Office of Fisheries Conservation and Management, National Marine Fisheries Service, 1315 East-West Highway, Room 14853, Silver Spring, MD 20910. Clearly mark the outside of the envelope "Atlantic Billfish Scoping Comments." Input for the issues/options statement may also be provided to the same address, or by sending a fax to C. Michael Bailey at 301–713–1035. The scoping meetings will be held in Savannah, GA; Houston, TX; New Orleans, LA; Cape May, NJ; and Morehead City, NC.

FOR FURTHER INFORMATION CONTACT: C. Michael Bailey, 301–713–2347 or fax: 301–713–1035.

SUPPLEMENTARY INFORMATION:

Scoping Meeting

Depending upon the interest of the audience, the Meeting Officer may increase the length of the meeting. Additional meetings will be announced at a later date. NMFS is also soliciting written comments on issues of concern

in this fishery. NMFS requests input at any time during the scoping process, by mail or by fax. An issues/options statement was prepared for the initial hearing and revised, based on written and oral comments, for subsequent hearings. This hearing is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Richard B. Stone by July 29, 1994 (see **ADDRESSES**). NMFS previously announced scoping meetings on February 9, 1994 (59 FR 5978), March 1, 1994 (59 FR 9720) and April 5, 1994 (59 FR 15862). The scoping meetings will be held at the following locations:

August 4, 1994, Savannah, GA, 7 to 10 p.m.

Holiday Inn MidTown
7100 Abercorn Street
Savannah, GA 31406

August 10, 1994, Houston, TX, 7 to 10 p.m.

Days Inn - Hobby Airport
8611 Airport Blvd.
Houston, TX 77061

August 11, 1994, New Orleans, LA, 7 to 10 p.m.

World Trade Center Building
Suite 1830, Crescent City Room
#2 Canal Street
New Orleans, LA 70130

August 14, 1994, Cape May, NJ, 10 a.m. to 12 noon

Canyon Club Resort Marina,
900 Ocean Highway
Cape May, NJ 08204

August 15, 1994, Morehead City, NC, 7 to 10 p.m.

Carteret Community College
Joslyn Hall
3505 Arendale Street
Morehead City, NC 28557–2989

Dated: June 9, 1994.

Federal Register
Vol. 59, No. 115
Thursday, June 16, 1994

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Programmatic Agreement for Consideration of Historic Properties in Surface Coal Mining and Reclamation Operations

AGENCY: Advisory Council on Historic Preservation.

ACTION: Notice of availability and request for comments.

SUMMARY: The Advisory Council on Historic Preservation (Council) and the Office of Surface Mining Reclamation and Enforcement (OSM), are inviting written comments from the public on a proposed Programmatic Agreement (PA) among OSM, the Council, and the National Conference of State Historic Preservation Officers (NCSHPO), that would set forth OSM procedures for taking into account the effects of surface coal mining and reclamation operations on historic properties.

The Council and OSM have jointly developed the proposed PA with NCSHPO, pursuant to § 800.13 of the Council's regulations (36 CFR part 800). The PA sets forth proposed procedures for meeting the requirements of section 106 of the National Historic Preservation Act of 1966 (Pub. L. 89–665) (NHPA or the Act) and other provisions of the Act as amended in 1992 (Pub. L. 102–575).

The Council is an independent Federal agency that advises the President and Congress on matters of historic preservation. OSM is the Federal agency within the Department of the Interior created by the Surface Mining Control and Reclamation Act of 1977 (SMCRA) to implement SMCRA's requirements concerning the regulation of surface coal mining and reclamation operations and the reclamation of abandoned mine lands. OSM's SMCRA responsibilities include conducting oversight of State administration of approved State regulatory programs in the 24 primacy States and providing regulatory grants to primacy States to administer and enforce their regulatory programs.

OSM initiated consultation with the Council in April 1993 to explore options for implementing its responsibilities under the 1992 Amendments to the NHPA, particularly in relation to State permitting actions and related activities. Over the past year, the Council, OSM, and NCSHPO have been working together to develop the proposed PA as a potential compliance mechanism for implementing OSM's responsibilities under the 1992 NHPA Amendments and the 1991 judicial decision in Indiana Coal Council, Inc. v. Lujan (744 F. Supp. 1385 (D.DC. 1991)). A PA is one of the options set forth in the Council's regulations at § 36 CFR section 800.13 for a Federal agency to tailor section 106 review procedures to meet its historic preservation obligations in lieu of the standard process set forth at 36 CFR § 800.4–6. The 1992 amendments to the Act clarified that State regulatory programs administered pursuant to a delegation or approval by a Federal agency, such as OSM's approval of State programs and delegation of surface coal mining regulation to State Regulatory Authorities (SRAs), are Federal undertakings subject to section 106 of the Act. Therefore, OSM is now responsible for ensuring that the effects on historic properties of each State permitting action are appropriately considered. Each SRA must assist OSM in fulfilling its NHPA responsibilities as a standard condition of each regulatory grant.

The proposed PA sets forth procedures for implementing OSM's NHPA section 106 responsibilities as an alternative to the standard section 106 review process. The PA covers State permitting activities in the 24 primacy States and on Federal lands in cooperative agreement States, where the States exercise regulatory jurisdiction over such lands. The PA also covers OSM permitting actions in Federal program States, and on Federal lands in non-cooperative agreement States, where OSM is the regulatory authority. The terms of the PA do not apply to OSM's regulatory activities on Indian lands or where National Historic Landmark properties may be affected. In these situations, the standard process at 36 CFR § 800.4–6, applies. In contrast to the standard section 106 review process, the PA is intended to expedite and streamline the process by granting more decisionmaking and implementation authority to the States. The proposed PA provides for Council and OSM involvement in a proposed surface coal mining permitting action only if disputes arise that are unresolvable at the State level or if a member of the public requests such involvement. The PA also encourages SRAs and State Historic Preservation Officers to develop and formalize their own State-specific procedures based on those contained in the PA. Finally, the PA establishes a monitoring and reporting system whereby OSM can ensure compliance with section 106 requirements.

Publication of this proposed PA and request for comments on its scope, efficacy, and adequacy is part of the public participation process as set forth at 36 CFR § 800.13(c) of the Council's regulations with the purpose of gathering information, comments, and suggestions on the proposed PA

FOR COPIES OF THE PROPOSED PA CONTACT: Thomas M. McCulloch, Office of Education and Preservation Assistance, Advisory Council on Historic Preservation, 1100 Pennsylvania Ave. NW., suite 803, Washington, DC 20004 (202–606–8520).

COMMENTS DUE: Written comments on the proposed PA should be submitted to the Council, at the address given above, by 5 p.m. Eastern time on the 15th of August, 1994.

FOR FURTHER INFORMATION CONTACT: Thomas M McCulloch, Office of Education and Preservation Assistance, Advisory Council on Historic Preservation, 1100 Pennsylvania Ave. NW., suite 803, Washington, DC 20004 (202–606–8520) OR Suzanne Hudak, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Ave. NW., Washington, DC 20240 (202–208–2700).

Dated: June 7, 1994.

Robert D. Bush,

Executive Director.

BILLING CODE 0000–00–M

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

June 10, 1994.

The Department of Agriculture has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extension, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection;
(2) Title the information collection:
(3) Form number(s), if applicable:
(4) How often the information is requested:
(5) Who will be required or asked to report:
(6) An estimate of the number of responses;
(7) An estimate of the total number of hours needed to provide the information:
(8) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, D.C. 20250. (202) 690–2118.

Revision

• Cooperative State Research Service
Grant Application Kit—Facilities Program
Forms CSRS–850, –851, –852, –853, –854, –860, and environmental assessment
On occasion; Annually
Non-profit institutions; 77 responses; 727 hours

Cooperative State Research Service

Forestry Research Advisory Council; Meeting

According to the Federal Advisory Committee Act of October 6, 1987 (Pub L. 92–463, 86 Stat. 770–776), U.S. Department of Agriculture announces the following meeting:

Name: Forestry Research Advisory Council.
Date: July 14–15, 1994.
Time: 8:30 a.m.–5 p.m.
Place: Room 338B & 338C Aerospace Center, 901 D Street SW., Washington, DC
Type of Meeting: Open to the public. Persons may participate in the meeting if time and space permit.
Comments: The public may file written comments before or after the meeting by contacting the person below.
Purpose: The council will be deliberating agenda topics that include: federal science planning as it relates to forestry and natural resources: implementation of the National Research Council report: Forestry Research A Mandate for Change; joint planning and priority setting by forestry research cooperators: review of the Cooperative Forestry Research Program (McIntire-Stennis); and other current research issues
Contact Person for Agenda and More Information: Peter A. Muscato, Cooperative State Research Service, Room 329, Aerospace Building, U.S. Department of Agriculture, Washington, DC 20250–2210; telephone (202) 401–4555.

Dated: June 8, 1994

John Patrick Jordan,
Administrator, Cooperative State Research Service.

BILLING CODE CSRS–3410–22M

Forest Service

Angeles National Forest; Proposed Pacific Pipeline Project EIS/SEIR; Notice of Intent

AGENCY: Forest Service, USDA.

ACTION: Notice of Intent to prepare an Environmental Impact Statement (EIS).

SUMMARY: The California Public Utilities Commission (CPUC) and the United States Forest Service, Angeles National Forest (ANF) will direct the preparation of a joint Environmental Impact Statement (EIS) and a Subsequent Environmental Impact Report (SEIR) referred to as an EIS/SEIR for the Pacific

Pipeline Project proposed by Pacific Pipeline System, Inc. (PPSI). Aspen Environmental Group, a third-party contractor, under the direction of the CPUC, as the lead California State agency, and the USFS/ANF, as the lead Federal agency will prepare a draft and final EIS/SEIR to comply with the National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA).

On October 10, 1991, PPSI filed an Application with the CPUC for authorization to issue capital stock and other indebtedness to fund development of a proposed pipeline to transport offshore Santa Barbara crude oil to Los Angeles area refineries. At the same time, PPSI submitted a Proponent's Environmental Assessment (PEA) pursuant to the provisions of CEQA. The CPUC conducted comprehensive scoping meetings and solicited public and agency comments on the scope of the EIR. The CPUC selected a third party contractor (Aspen Environmental Group) to independently prepare an Environmental Impact Report (EIR) pursuant to their responsibility as a lead agency under CEQA.

The project, as proposed at that time, was a 171-mile long, 20-inch insulated pipeline with a capacity to transport 130,000 barrels per day (bpd) of crude oil. This originally proposed pipeline would have extended from Gaviota Marine Terminal in Santa Barbara County to oil refinery destinations in the Los Angeles Basin. The pipeline would have traversed across Santa Barbara and Ventura Counties, and enter Los Angeles County near Santa Clarita. For much of its length, the proposed pipeline would have been buried in the Southern Pacific Transportation Company railroad right-of-way (ROW). In Los Angeles County the pipeline would have continued southeasterly, mostly parallel to Interstate 5(I–5) to near Glendale and then south to Watts. At the Watts Junction the pipeline would have split into two pipelines, each leading to a refinery destination. One pipeline would continue to the Chevron Refinery in El Segundo, and the other would continue south to both Texaco's Wilmington refinery and the GATX oil distribution facility. This originally proposed project also included five pump/pressure reduction stations along its route.

A comprehensive EIR was prepared for this originally proposed project. Five workshops and five public hearings were conducted and significant public comments were received on the Draft EIR and incorporated into the Final document. In addition to the comprehensive EIR, an Executive Summary was prepared and made available to the public in both English and Spanish language versions. The Final EIR (FEIR) was Certified by the CPUC in 1993, indicating that in their view, the EIR had adequately identified the potential impacts of the Proposed Project and contained the information required for making their final decision on the project, which would be reached after conducting evidentiary hearings and upon the receipt of staff recommendations. However, due to project changes announced by PPSI after certification, evidentiary hearings were not held, nor was a decision made on the Proposed Project by the CPUC.

In December of 1993, PPSI filed an Amended Application with the CPUC. Later, in early 1994, PPSI also filed this Amended Application with the ANF. This Amendment was based on an Agreement reached by major potential users of the Proposed Pipeline (Santa Barbara offshore producers) and the All American Pipeline Company (AAPL). The producers agreed that the only means of transporting their oil out of Santa Barbara County by pipeline will be through use of the existing AAPL, which can transport all produced oil in this area to Kern County, and ultimately, to Texas, if requested by producers. However, producers have informed agencies and the public that the preferred destination for the majority of their heavy offshore production is the Los Angeles area refineries. Currently there are no existing pipelines with adequate capacity to transfer crude oil from the Southern Kern County to the Los Angeles area.

Thus, PPSI proposed to modify their project to comply with recent agreements and respond to this demand.

The Amendment filed with the ANF differs from the original proposal in the following manner:

- The origination point of the pipeline would be at an existing Texaco oil facility in Emidio, Kern County, an area adjacent to the All American Pipeline, which would enable the transfer of Santa Barbara offshore crude oil from the AAPL to the Pacific Pipeline.
- From this origination point a proposed 20-inch pipeline segment will continue for 62 miles to Castaic Junction, at which point, it would join the originally proposed project as applied for by PPSI. The 62-mile pipeline ROW would be generally parallel to I–5, and will traverse through the National Forest System land administered by the ANF. This newly proposed 62 miles from Emidio to Castaic Junction would replace the 104 miles of previously proposed pipeline from the Gaviota Marine Terminal to the Castaic Junction.
- The replacement of the previously proposed Gaviota to Castaic Junction pipeline with the new 62-mile pipeline would result in the following changes in ancillary facilities:

—five of the pump/pressure reduction stations required previously in Santa Barbara, Ventura, and Los Angles Counties would be replaced by three new pump/pressure reduction stations in Kern and Los Angeles Counties

—the proposed Control Center for the pipeline would be located in Taylor Yard (Los Angeles) instead of Ventura County, as originally proposed.

- The Amendment also requires consideration of three additional refinery/terminal destinations in Los Angeles County (retaining the previous three destinations). These three destinations are:

—Unocal Refinery in Carson
—Chemoil Terminal in Carson
—Ultramar Refinery in Wilmington.

These newly proposed destinations would require installations of an additional 3.3 miles of 16-inch pipeline that was not considered in the FEIR. Considering these additional connecting lines, the total length of the proposed pipeline would be approximately 132 miles (versus 171 miles for the originally Proposed Project).

The Amended Application also refers to a future scenario in which Mobil would obtain a permit and would produce up to 40,000 bpd of oil at their Santa Barbara Clearview Project. The Applicant suggests that the previously proposed pipeline between Ellwood to Castaic Junction might be reconsidered for this potential scenario.

The cumulative impacts associated with this uncertain scenario were identified in the original FEIR. The EIS/SEIR will consider this potential scenario and alternatives to it in the alternatives analysis section of the document.

Project Alternatives

Possible alternatives to the project would include:

- No action or not constructing the pipeline.
- Any reasonable project that can achieve the objectives of the Proposed Action, with lower overall impacts to the environment.
- Route alternatives identified as a result of project scoping.

Supplementary Information

A number of documents providing general information about the ANF have already been issued. These documents include the ANF Land and Resources Management Plan, FEIS and Record of Decision. These documents allow, under certain conditions, the issuance of special use permits for pipelines.

Because of the magnitude of the changes made to the project and its potential significant impacts on the environment, an initial study was not prepared. The originally submitted and newly amended PEAs provided by PPSI in its Application, as well as the Pacific Pipeline FEIR and Executive Summary were used to determine the need for the EIS. These documents are available for review at the following locations:

California Public Utilities Commission (L.A. Office). 107 South Broadway, Los Angeles, CA, Contact: Public Advisor, (213) 897–3544

U.S. Forest Service, Angeles National Forest, 701 N. Santa Anita Ave., Arcadia, CA, Contact: Rich Borden, (818) 574–5255

Carson Regional Library, 151 East Carson Street, Carson, CA, Contact: Gilbert Acuna, (310) 830–0901

Ray D. Prueter Library, 510 Park Avenue, Port Hueneme, CA, Contact: Lori Karns, (805) 486–5460

Santa Barbara City Library, 40 East Anapamu, Santa Barbara, CA, Contact: Evelyn Rickey, (805) 962–7653

Valencia Library, 23743 Valencia Blvd., Valencia, CA, Contact: Rita Lance, (805) 259–8332

If necessary, responsible Federal agencies may request a copy of PPSI's application and/or PEA by contacting Tom Rooney at: Pacific Pipeline System, Inc., 101 South First Street, Burbank, CA 91502, (818) 556–2744

The EIS/SEIR Process

As indicated in the project description, the newly proposed segment of the pipeline traverses the National Forest System land administered by the ANF. Thus, the Applicant will require right-of-way authorization and special use permits from the ANF. In order to consider issuance of these permits, and based on potential impacts identified in the Applicant's PEA, ANF will prepare an EIS pursuant to NEPA requirements.

The Draft EIS (DEIS) is expected to be filed with the Environmental Protection Agency (EPA) and should be available for public review by November of 1994. At that time, the EPA will publish a notice of availability of the DEIS in the **Federal Register**. The comment period on the DEIS will be 60 days from the date the EPA's notice appears in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of the DEIS must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the Final EIS (FEIS), *Wisconsin Heritages, Inc.* v. *Harris* 490 F. Supp. 1334 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the comment period so that the substantive comments and objectives are made available to the Forest Service. This is to ensure that substantive comments and objections are made available when the USFS can meaningfully respond to them in the FEIS. Comments on the DEIS should be specific and should address the adequacy of the statement or the merits of the alternatives discussed (see The Council on Environmental Quality Regulations for implementing the procedural provisions of NEPA at 40 CFR 1503.3). It is also helpful if comments refer to specific pages or chapters of the DEIS.

After the end of the DEIS comment period, comments will be analyzed and considered by the USFS in preparing the FEIS. The FEIS is scheduled to be completed by April of 1995. In the FEIS the Forest Service is required to respond to the comments received (40 CFR 1503.4). The responsible official (Mike Rogers, Forest Supervisor, ANF, Arcadia, CA) will consider the comments, responses, environmental consequences discussed in the EIS, and applicable laws, regulations and policies in making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to appeal under 36 CFR part 215.

Proposed Scope of the EIS/SEIR

The EIS/SEIR will present the analysis of the environmental impacts of the proposed Pacific Pipeline Project and comparative environmental effects of the alternatives, and will identify mitigation measures for potentially significant impacts. The EIS will address the Project from Emidio to the Ultramar refinery in Wilmington. However, for the segment from Castaic to Texaco's Wilmington refinery the EIS will, primarily, rely on the existing FEIR. The joint document will contain a separate section in which the conclusions stated in the FEIR will be summarized. The potential for construction and operation of the segment of the project which was previously proposed between Santa Barbara and Castaic Junction will be considered in the alternatives analysis section of the document.

The EIS/SEIR will address all issue areas for which potential significant impacts are anticipated. These issue areas include:

- Air Quality. Construction and operation emissions and effects.
- Biological Resources. Effects on native habitats that support rare, threatened, or endangered species; impacts on sensitive habitats or species downslope from the ROW as a result of sedimentation or erosion; damage to native plant habitats due to construction; loss of habitat due to vegetation removal; and effects of noise disturbance on nesting and foraging of wildlife species.
- Cultural Resources. Construction effects on prehistoric sites, structures, regional districts or other physical evidence associated with human activity; disturbance during erosion control program excavation, illicit artifact collection by pipeline workers and construction equipment and oil spill containment encroachment in sensitive areas; Impacts on Native American values.
- Environmental Contamination. Effects of disturbance from trench excavation to contaminated sites along the ROW on pipeline workers; migration of contaminants via surface ground water runoff; and pipeline passage through oil fields with abandoned wells.
- Geology. Slope stability and seismic impacts associated with fault rupture and liquefaction/lateral spreading; and damage to above ground structures from earthquake-induced ground shaking.
- Hydrology. Flood-related impacts due to diversion of stream flows during construction; erosion and scour impacts due to pipeline rupture and oil contamination of streams;
- Land Use and Public Recreation. Construction effects on agricultural and recreational uses; disruptions to public services and access roads in residential areas; and potential for long-term safety risks to existing or planned uses in project vicinity.
- Noise. Construction effects on sensitive receptors.
- Paleonotology. Project impacts on the fossil evidence of inorganic plant

and animal remains over 11,000 years old.

■ Public Services. Effects of project construction and population growth.

■ Public Utilities and Energy. Construction disruption to utilities due to collocation accident.

■ Socioeconomics. Construction disruption to commercial sites; construction and operation effects on employment and population growth; and oil spill effects on local business, temporary housing and tourism.

■ Soils. Effects of soil corrosivity on project design; effects of expansive soils on foundations of above-ground structures; and fugitive dust emissions.

■ System Safety. Oil spill impacts from land-based oil spills, risk of oil spill ignition, and exposure to resulting fire. Impacts to creeks, riverbeds and native habitat; and effects of oil spills on sensitive receptors.

■ Transportation and Traffic. Construction effects on project study area's transportation system, traffic congestion, pedestrian circulation and emergency access.

■ Visual Resources. Construction and operation effects on visual resources resulting from presence of equipment, materials, workers, and above-ground facilities.

■ Cumulative and Growth Inducing Impacts.

Project Scoping Process

The EIS/SEIR on the Proposed Pacific Pipeline Project will focus on significant environmental effects. The process of determining the focus and content of the EIS/SEIR is known as scoping (40 CFR 1501.7). Scoping helps to identify the range of actions, alternatives, environmental effects, and mitigation measures to be analyzed in depth, and eliminates from detailed study those issues that are not pertinent to the final decision on the Proposed Project. The USFS will be seeking information, comments, and assistance from Federal, State, and local agencies, the proponent and other individuals or organizations who may be interested in, or affected by the proposed action. Significant issues may be identified through public and agency comments.

Scoping, however, is not conducted to resolve differences concerning the merits of the project or to anticipate the ultimate decision on the proposal. Rather, the purpose of scoping is to help ensure that a comprehensive and focused EIS/SEIR will be prepared that provides a firm basis for the decision-making process. The scoping process includes:

■ Identifying potential issues.

■ Identifying issues to be analyzed in depth.

■ Eliminating insignificant issues or those which have been covered by a relevant previous environmental analysis.

■ Exploring additional alternatives.

■ Identifying potential environmental effects of the proposed action and alternatives (i.e., direct, indirect, and cumulative effects and connected actions).

■ Determining potential cooperating agencies and task assignments.

Public and agency scoping sessions will be held in the following areas:

Vista Del Lago Visitor Center, Vista Del Lago Exit (ten miles north of Castaic Junction), Interstate 5, June 27, 1994, 7 p.m.

Aragon Elementary School, 1118 Aragon Avenue, Los Angeles, CA 90065, June 28, 1994, 7 p.m.

Wilmington Boys and Girls Club, Multi-Purpose Room, 1444 West "Q" Street, Wilmington, CA 90744, June 29, 1994, 7 p.m.

City of San Fernando, Council Chambers, 117 McNeil Street, San Fernando, CA 91340, June 30, 1994, 7 p.m.

Agency Comments

Notice has been sent to responsible Federal Agencies, the State, and the **Federal Register**. Also State responsible and trustee agencies and the State Clearinghouse have been notified. We need to know the views of your agency as to the scope and content of the environmental information which reflects your agency's statutory responsibilities in connection with the proposed project. Once again, responses should identify the issues to be considered in the Draft EIS/SEIR, including significant environmental issues, alternatives, mitigation measures, and whether the responding agency will be responsible State of Federal agency or a state trustee agency.

Due to the time limits mandated by State and Federal Laws, your response must be sent at the earliest possible date but no later than 30 days after publication of this notice. Please send your response to: Richard Borden (ANF), c/o Aspen Environmental Group, 30423 Canwood Street, suite 218, Agoura Hills, CA 91301.

For further information write to: Richard Borden, ANF, 701 North Santa Anita Avenue, Arcadia, CA 91006–2799, (818) 574–5255.

Dated: June 8, 1994.

Mike Wickman,

District Ranger, Saugus Ranger District, Angeles National Forest.

BILLING CODE 3410–11–M

Joseph Creek Wild and Scenic River Management Plan Environmental Assessment, Wallowa-Whitman National Forest, Wallowa County, OR

AGENCY: Forest Service, USDA.

ACTION: Notice of availability.

SUMMARY: On June 7, 1994, Wallowa-Whitman Forest Supervisor, R.M. Richmond, signed a Decision Notice which adopted into the Forest Plan the Joseph Creek Wild and Scenic River Management Plan which required an amendment to the Wallowa-Whitman Forest Plan.

This management plan outlines use levels, development levels, resource protection measures, and outlines a general management direction for the river corridor. This amendment is necessary to implement the Wild and Scenic Rivers Act which required the Forest Service to develop a management plan for Joseph Creek. Interim direction was identified in the Forest Plan as Management Area 7 (Wild and Scenic Rivers). The environmental assessment documents the analysis of alternatives to managing the Joseph Creek Wild and Scenic River in accordance with the Wild and Scenic Rivers Act.

This decision is subject to appeal pursuant to Forest Service regulations 36 CFR part 217. Appeals must be filed within 45 days from the date of publication in the Baker City Herald. Notices of Appeals must meet the requirement of 36 CFR 217.9.

The environmental assessment for the Joseph Creek Wild and Scenic River Management Plan is available for the public review at the Wallowa-Whitman National Forest Supervisor's Office in Baker City, Oregon.

EFFECTIVE DATE: Implementation of this decision shall not occur within 30 days following publication of the legal notice of the decision in the Baker City Herald

FOR FURTHER INFORMATION:

For further information, contact Steve Davis, Wallowa-Whitman National Forest, P.O. Box 907, Baker City, Oregon 97814 or phone (503) 523–1316.

Dated: June 7, 1994

Rural Electrification Administration

Municipal Interest Rates for Third Quarter of 1994

AGENCY: Rural Electrification Administration, USDA.

ACTION: Notice of municipal interest rates on advances from insured electric loans for the third quarter of 1994.

SUMMARY: REA hereby announces the interest rates for advances on municipal rate loans with interest rate terms beginning during the third calendar quarter of 1994.

DATES: These interest rates are effective for interest rate terms that commence during the period beginning July 1, 1994, and ending September 30, 1994.

FOR FURTHER INFORMATION CONTACT: Sue Arnold, Financial Analyst, Program Support Staff, U.S. Department of Agriculture, Rural Electrification Administration, room 2230-s, 14th Street & Independence Avenue SW., Washington, DC 20250–1500. Telephone: 202–720–0736. FAX: 202–720–4120.

SUPPLEMENTARY INFORMATION: Pursuant to REA regulations at 7 CFR 1714.5, the interest rates on advances of funds from municipal rate loans are based on indexes published in the "Bond Buyer" for the four weeks prior to the first Friday of the last month before the beginning of the quarter. In accordance with 7 CFR 1714.5, the interest rates are established as shown in the following table for all interest rate terms that begin any time during the third calendar quarter of 1994.

Interest rate term ends in (year)	Interest rate (0.000 percent)
2015 or later	6.125
2014	6.125
2013	6.125
2012	6.000
2011	6.000
2010	6.000
2009	5.875
2008	5.875
2007	5.750
2006	5.625
2005	5.500
2004	5.375
2003	5.375
2002	5.250
2001	5.125
2000	5.000
1999	4.875
1998	4.750
1997	4.625
1996	4.375
1995	3.750

Dated: June 10, 1994.

Wally Beyer,

Administrator.

BILLING CODE 3410–15–P

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Rhode Island Advisory Committee

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the Rhode Island Advisory Committee to the Commission will be convened at 2 p.m. and adjourn at 6 p.m. on Wednesday, July 13, 1994, at the Marriott Hotel, Washington room, Charles and Orms Streets, Providence, Rhode Island 02904. The purpose of the meeting is to update Committee members on the Commission and to plan future activities.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson Sarah A. Murphy, 401–455–3880 or John I. Binkley, Director of the Eastern Regional Office, 202–376–7533 (TDD 202–376–8116). Hearing-impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, June 8, 1994.

Carol-Lee Hurley,

Chief, Regional Programs Coordination Unit.

BILLING CODE 6335–01–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 23–94]

Foreign-Trade Zone 172—Oneida County, NY; Application for Subzone Oneida Ltd. (Tableware) Sherrill and Oneida, NY

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the County of Oneida, New York, grantee of FTZ 172, requesting special-purpose subzone status for the manufacturing facilities of Oneida Ltd. in Sherrill and Oneida, New York. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on June 7, 1994.

The Oneida facilities involve three sites in Sherrill (Oneida County) and Oneida (Madison County), New York: Site 1 (116 acres)—Main Plant, East Seneca Street and Route 5, Sherrill; Site 2 (63 acres)—Knife Plant, Kenwood Avenue, Sherrill; and Site 3 (0.5 acres)—warehouse facility (D.J. Warehouse), Wilson Street, Oneida. The facilities (2500 employees) are used to manufacture a full line of stainless steel, silverplated and sterling silver flatware (knives, forks and spoons) as well as certain hollowware (tea services, bowls, trays, cups). The facilities are also used to warehouse/package/distribute porcelain, chinaware, crystal and miscellaneous giftware. Certain finished and semi-finished items, accounting for up to 15 percent of sales, are sourced from abroad to fill out product lines. (Stainless steel mill products are sourced domestically.) Oneida is requesting to use zone procedures only for silverplating of foreign-sourced stainless steel tableware and for warehousing and packaging of finished products.

Zone procedures would exempt Oneida from Customs duty payments on foreign items that are exported. On domestic sales, the company would be able to choose the duty rates that apply to the finished silverplated products (4.5 to 6.0%). The duty rates on foreign-sourced stainless steel tableware items used in the silverplating activity range from 6 to 17 percent. The application indicates that the savings from zone procedures would help improve the plant's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is August 15, 1994. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to Tuesday, August 30, 1994).

A copy of the application and accompanying exhibits will be available for public inspection at each of the following locations:

Office of the Port Director, U.S. Customs Service, Syracuse Hancock

International Airport, Air Cargo Building, P.O. Box 7256, Syracuse, NY 13261

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, room 3716, 14th & Pennsylvania Avenue, NW., Washington, DC 20230

Dated: June 7, 1994.

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510–25–P

International Trade Administration

[A–570–827]

Notice of Preliminary Determination of Sales at Less Than Fair Value: Certain Cased Pencils From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: June 16, 1994.

FOR FURTHER INFORMATION CONTACT: Cynthia Thirumalai or Kristin Heim, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–4087 or (202) 482–3798, respectively.

PRELIMINARY DETERMINATION: We preliminarily determine that certain cased pencils (pencils) from the People's Republic of China (PRC) are being, or are likely to be, sold in the United States at less than fair value (LTFV), as provided in section 733 of the Tariff Act of 1930, as amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the initiation of this investigation on November 29, 1993 (58 FR 64548, December 8, 1993), the following events have occurred.

On December 27, 1993, the U.S. International Trade Commission (ITC) notified us of its preliminary determination that there is a reasonable indication that an industry in the United States is materially injured by reason of imports of pencils from the PRC that are alleged to be sold at less than fair value.

On January 5, 1994, we sent a survey to the PRC's Ministry of Foreign Trade and Economic Cooperation (MOFTEC) and certain companies in the PRC requesting information on production and sales of pencils exported to the United States. The names of the companies were found in the petition and in data supplied by the Port Import-Export Reporting Service (PIERS). We requested MOFTEC's assistance in forwarding the survey to all exporters and producers of pencils and submitting complete responses on their behalf. On January 14, the survey was sent to the Asia Pencil Association.

On January 31, 1994, responses to the survey were received from the China First Pencil Co., Ltd. (China First), an exporter and producer; Shanghai Foreign Trade Corp. (SFTC), an exporter; Shanghai Lansheng Corp. (Shanghai Lansheng), an exporter; Shanghai Machinery & Equipment Import & Export Corp. (Shanghai Machinery), an exporter; and Shanghai Three Star Stationery Industry Corp. (Three Star), a producer and domestic reseller. Shanghai Machinery reported that while it had exported pencils in the past, it did not make any sales to the United States during the POI.

On February 9, 1994, four more companies responded to our survey: Songnan Pencil Factory, a producer; Xinbang Joint Venture Factory, a producer; Guangdong Provincial Stationery & Sporting Goods Import & Export Corp. (Guangdong), an exporter; and Anhui Stationery Company (Anhui), a producer.

On February 16, 17, and 23, 1994, all PRC producers and exporters identified in the course of this proceeding, *i.e.*, through the petition, in PIERS data, in letters of appearance and as provided by MOFTEC, for which we had addresses were sent full questionnaires. During the month of March, in response to our questionnaire, we received letters from a number of companies stating that they either did not export cased pencils to the United States during the POI or acted merely as freight forwarders.

On March 8, 1994, we postponed the preliminary determination in this investigation (see 59 FR 10784, March 8, 1994).

SFTC requested on March 24, 1994, that it not be required to submit sales and factors of production information for certain pencils it exported to the United States during the POI. On April 4, 1994, SFTC amended its request. Because the sales and factor of production information covered a small percentage of SFTC's sales to the United States, we granted SFTC's amended request (see Memorandum from E. Graham to B. Stafford, April 7, 1994, on file in the Central Records Unit in room B–099 of the Main Commerce Building).

On May 10, 11, and 25, 1994, petitioner submitted information concerning the costs of certain raw materials which are used in the production of pencils but that were not specifically addressed in the petition. Petitioner also requested that the Department recalculate the petition margins based on the information in its submission of May 25, 1994.

Between June 3, 1994, and this preliminary determination, respondents submitted updated and additional information. Given the late dates on which this information was provided, we found it administratively infeasible to use this information (with the exception of company-specific conversion factors) in our preliminary determination.

Scope of Investigation

The products covered by this investigation are certain cased pencils of any shape or dimension which are writing and/or drawing instruments that feature cores of graphite or other materials encased in wood and/or man-made materials, whether or not decorated and whether or not tipped (*e.g.*, with erasers, etc.) in any fashion, and either sharpened or unsharpened. The pencils subject to this investigation are classified under subheading 9609.10.00 of the Harmonized Tariff Schedule of the United States ("HTSUS").

Specifically excluded from the scope of this investigation are mechanical pencils, cosmetic pencils, pens, non-cased crayons (wax), pastels, charcoals, or chalks.

Although the HTSUS subheading is provided for convenience and customs purposes, our written description of the scope of this investigation is dispositive.

Class or Kind of Merchandise

At the time of our initiation, we solicited comments from interested parties on whether all cased pencils constitute one class or kind of merchandise. Respondents have argued that raw pencils/pencil blanks and semi-finished pencils constitute a separate class or kind of merchandise apart from finished pencils. Based on the information provided, we find that these products do not constitute a separate class or kind of merchandise. (See memorandum from E. Graham to B. Stafford, April 15, 1994.) In a submission dated June 2, 1994, respondents argued that the merchandise subject to this investigation comprises four separate classes or kinds of merchandise. While this argument was made too late to be considered for our preliminary determination, we will address this in our final determination.

The Asia Pencil Association argued that specialty pencils (*e.g.*, carpenter and art pencils) should constitute a separate class or kind of merchandise. However, the information submitted in support of their claim was insufficient to allow us to make a determination that specialty pencils are a separate class or kind of merchandise.

Period of Investigation

The POI is June 1, 1993, through November 30, 1993.

Separate Rates

China First, Guangdong, SFTC, and Shanghai Lansheng have each requested a separate rate. Guangdong's and SFTC's business licenses each indicate that they are owned "by all the people." As stated in the *Final Determination of Sales at Less than Fair Value: Silicon Carbide from the People's Republic of China* (59 FR 22585, 22586 (May 2, 1994)) (*"Silicon Carbide"*) "ownership of a company by all the people does not require the application of a single rate." Accordingly, Guangdong and SFTC are eligible for consideration for separate rates.

Shanghai Lansheng has reported that, for the majority of the POI, it was owned "by all the people" and that it was later reorganized as a shareholding company. It has indicated that its shares are traded on the Shanghai stock exchange. In the *Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination: Certain Paper Clips from the People's Republic of China* (*"Paper Clips"*) (59 FR 25885, 25887, May 18, 1994) the Department stated that "a 'municipal government' owns 70 percent of [Shanghai Lansheng's] shares." There is no evidence on the record that this municipality controls other exporters of cased pencils that made sales to the United States during the POI. We will, however, evaluate this issue carefully during verification.

Since ownership by all the people (the situation applicable to Shanghai Lansheng during the majority of the POI) "does not require the application of a single rate" and there was no central government ownership during the later part of the POI, Shanghai Lansheng is eligible for consideration for a separate rate.

China First has reported that it is a shareholding company and has provided a list of its shareholders. According to China First, the shareholders elect the board of directors which, in turn, appoints the general manager. Its questionnaire response states that there are three types of shares: A shares held by Chinese legal persons, B shares held by non-Chinese legal persons and Enterprise shares. We do not have on the record any information addressing the similarities or differences in rights accruing to the various types of shares.

Based on our examination of the information provided regarding the shareholder identities and the ownership structure of China First, we have determined that we do not have enough information on the record to grant it a separate rate at this time. Due to the proprietary nature of the information, we are not able to discuss the ownership structure of China First in further detail in this notice; however, there is a proprietary decision memorandum regarding this issue on the record (see Decision Memorandum of June 8, 1994). We are assigning China First the PRC country-wide rate for purposes of this preliminary determination.

To establish whether a firm is sufficiently independent to be entitled to a separate rate, the Department analyzes each exporting entity under a test arising out of the *Final Determination of Sales at Less Than Fair Value: Sparklers from the People's Republic of China* (56 FR 20588, May 6, 1991) (*"Sparklers"*) and amplified in *Silicon Carbide*. Under the separate rates criteria, the Department assigns separate rates only where respondents can demonstrate the absence of both *de jure* and *de facto* governmental control over export activities.

1. Absence of De Jure Control

Three PRC laws that have been placed on the record in this proceeding indicate that the responsibility for managing enterprises "owned by all of the people" is with the enterprises themselves and not with the government. These are the "Law of the People's Republic of China on Industrial Enterprises Owned by the Whole People," adopted on April 13, 1988 (*"1988 Law"*); "Regulations for Transformation of Operational Mechanism of State-Owned Industrial Enterprises," approved on August 23, 1992 (*"1992 Regulations"*); and the "Temporary Provisions for Administration of Export Commodities," approved on December 21, 1992 (*"Export Provisions"*).

The *1988 Law* and *1992 Regulations* shifted control from the government to the enterprises themselves. The *1988 Law* provides that enterprises owned "by the whole people" shall make their own management decisions, be responsible for their own profits and losses, choose their own suppliers and purchase their own goods and materials. The *1988 Law* also has other provisions which indicate that enterprises have management independence from the government. The *1992 Regulations* provide that these same enterprises can, for example, set their own prices (Article IX); make their own production decisions (Article XI); use their own retained foreign exchange (Article XII); allocate profits (Article II); sell their own products without government interference (Article X); make their own investment decisions (Article XIII); dispose of their own assets (Article XV); and hire and fire their employees without government approval (Article XVII).

The *Export Provisions* list those products subject to direct government control. Pencils do not appear on the *Export Provisions* list and are not, therefore, subject to the export constraints.

The existence of these laws indicates Guangdong, SFTC and Shanghai Lansheng are not *de jure* subject to central government control. However, there is some evidence that the provisions of the above-cited laws and regulations have not been implemented uniformly among different sectors and/or jurisdictions in the PRC (see "PRC Government Findings on Enterprise Autonomy," in *Foreign Broadcast Information Service—China–93–133* (July 14, 1993). Therefore, the Department has determined that an analysis of *de facto* control is critical to determining whether respondents are, in fact, subject to governmental control

2. Absence of De Facto Control

The Department typically considers four factors in evaluating whether each respondent is subject to *de facto* government control of its export functions: (1) Whether the export prices are set by or subject to the approval of a governmental authority; (2) whether the respondent has authority to negotiate and sign contracts and other agreements; (3) whether the respondent has autonomy from the government in making decisions regarding the selection of management; and (4) whether the respondent retains the proceeds of its export sales and makes independent decisions regarding disposition of profits or financing of losses (*see Silicon Carbide*).

Guangdong, SFTC and Shanghai Lansheng have each asserted that (1) it establishes its own export prices; (2) it negotiates contracts without guidance from any governmental entities or organizations; (3) its management operates with a high degree of autonomy and there is no information on the record that suggests central government

control over selection of management; and (4) it retains the proceeds of its export sales, and has the authority to sell its assets and to obtain loans. In addition, company-specific pricing during the POI does not suggest any coordination among exporters (*i.e.*, the prices for comparable products appear to differ among companies). This information supports a preliminary finding that there is a *de facto* absence of governmental control of export functions.

Consequently, Guangdong, SFTC and Shanghai Lansheng have preliminarily met the criteria for the application of separate rates. We will examine this issue in detail at verification and determine whether the questionnaire responses are supported by verifiable documentation.

There is an additional issue relating to governmental control that we will consider further for purposes of our final determination. Guangdong and SFTC have indicated that the appointments of their general managers are subject to approval by the local Commission on Foreign Trade and Economic Cooperation (COFTEC) office. While the significance of this is unclear, the evidence cited above indicates that the COFTEC offices do not control the key functions of the enterprises. However, we will examine at verification the precise nature of the authority that the COFTEC offices exercise over the enterprises.

Nonmarket Economy

The PRC has been treated as a nonmarket economy (NME) in past antidumping investigations. (See, *e.g.*, *Final Determination of Sales at Less than Fair Value: Sebacic Acid from the People's Republic of China* (54 FR 28053 (May 31, 1994)). No information has been provided in this proceeding that would lead us to overturn our former determinations. Therefore, in accordance with 771(18)(c) of the Act, we have treated the PRC as an NME for purposes of this investigation.

Where the Department is investigating imports from an NME, section 772(c)(1) of the Act directs us to base FMV on the NME producers' factors of production, valued in a comparable market economy that is a significant producer of the merchandise. Section 773(c)(2) of the Act alternatively provides that where available information is inadequate for using the factors of production methodology, FMV may be based on the export prices for comparable merchandise from market economy countries at a comparable level of economic development.

In this investigation, the respondents have urged the Department to make use of the alternative methodology provided in section 773(c)(2) of the Act. In particular, they have argued that the primary input into PRC pencils, lindenwood, cannot be valued elsewhere. Petitioner has also questioned the Department's ability to value certain inputs using publicly available published information (PAPI) from India, as Indian input statistics cover broader product categories. Petitioner does not request that the Department use the alternative methodology for FMV. Instead, it suggests that U.S. producers' costs be used to value these inputs.

For purposes of the preliminary determination, we have relied on the methodology provided by section 773(c)(1) of the Act to determine FMV. The sources of individual factor prices are discussed under the FMV section, below. However, as a result of the comments made by petitioner and respondents on the relevance of factor prices in India, we will be seeking additional data on factor values and on export prices that could also be used under the alternative methodology provided in section 773(c)(2) of the Act for possible use in our final determination.

Surrogate Country

As discussed above, section 773(c)(4) of the Act requires the Department to value the NME producers' factors of production, to the extent possible, in one or more market economy countries that are at a level of economic development comparable to that of the nonmarket economy country, and that are significant producers of comparable merchandise. The Department has determined that India and Pakistan are the countries most comparable to the PRC in terms of overall economic development. (*See* memorandum from the Office of Policy to the file, dated March 18, 1994.) In addition, there is evidence on the record that pencils are produced in India.

Although India is the preferred surrogate country for purposes of valuing the factors of production used in producing the subject merchandise, we have resorted to Pakistan and Indonesia for certain surrogate values where Indian values were either unavailable or significantly outdated. We have obtained and relied upon PAPI wherever possible.

Fair Value Comparisons

To determine whether sales of pencils from the PRC to the United States by Guangdong and Shanghai Lansheng were made at less than fair value, we compared the United States price (USP) to the foreign market value (FMV), as specified in the "United States Price" and "Foreign Market Value" sections of this notice.

Because all of SFTC's responses were not received in time for consideration in this preliminary determination and, therefore, we had only partial information for calculating FMV, we have based SFTC's margin on the best information available (BIA). (*See* "Best Information Available" section of this notice.)

United States Price

We based USP on purchase price, in accordance with section 772(b) of the Act, because the subject merchandise was sold directly by the Chinese exporters to unrelated parties in the United States prior to importation into the United States.

For those exporters that responded to the Department's questionnaire and were found to be eligible for a separate rate, we calculated purchase price based on packed, FOB foreign-port prices to unrelated purchasers in the United States. We made deductions for containerization, loading, port handling expenses and foreign inland freight valued in a surrogate country.

Foreign Market Value

We calculated FMV based on factors of production reported by the factories which produced the subject merchandise for the three exporters. The factors used to produce pencils include materials, labor, and energy. We made adjustments to materials costs for the resale of scrap materials, where applicable.

In determining which surrogate value to use for valuing each factor of production, we selected, where possible, the PAPI value which was: (1) An average non-export value; (2) representative of a range of prices within the POI if submitted by an interested party, or most contemporaneous with the POI; (3) product-specific; and (4) tax-exclusive.

We used surrogate transportation rates to value inland freight between the source of the production factor and the pencil factories, and between factories, where appropriate. In those cases where a respondent failed to provide any information on transportation distances and modes, we applied, as best information available, the most expensive distance/modes combination (*i.e.*, the longest truck rates) that was available from the surrogate information we had selected. For two modes of transportation (man-drawn carts, inland

water transport), we were unable to obtain PAPI or cable information in time for this preliminary determination. To value these two modes of transportation, we assumed that these forms competed effectively with an alternate form of transportation over similar distances and used the applicable rates for the alternate form.

To value the raw materials and packing materials, we used PAPI. Our sources included: Indian Import Statistics for 1989, 1991 and 1992; and Indonesian Import Statistics for 1989.

To value wood slats, we used the Asian market price for jelutong wood in the sawn form during the POI as reported in the Market News Service Report for Tropical Timber and Timber Products dated November 1993. To value wood logs, we used Indian import statistics for a group of woods in rough form which included jelutong wood. The record in this proceeding shows that jelutong wood is used in pencil production and is similar to lindenwood, the input used by the PRC producers. For ferrules we used Indian import statistics for a basket aluminum category and for paint we used the import statistics category identified by respondents.

To value electricity, we used PAPI from the Asian Development Bank. To value coal and natural gas, we used Indian Import Statistics for 1992 and the Monthly Statistics of Mineral Production, Indian Bureau of Mines dated November 1992, respectively. To value water, we used a public cable from the U.S. consulate in Pakistan which was originally provided in the investigation of *Sulfanilic Acid From the PRC* because we could not locate a value for water in any Indian or Pakistani publication.

For all material and energy prices that were for a period prior to the POI, we adjusted the factor values to account for inflation between the time period in question and the POI using wholesale price indices published in *International Financial Statistics (IFS)* by the International Monetary Fund.

To value labor amounts, we used the International Labor Office's *1993 Yearbook of Labor Statistics*. To determine the number of hours in an Indian workday, we used the *Country Reports: Human Rights Practices for 1990*. We adjusted the factor values to account for inflation between the time period in question and the POI using the consumer price indices published in *IFS*.

To value factory overhead, we calculated percentages based on elements of industry group income statements from *The Reserve Bank of India Bulletin (RBI)*, December 1992. We based our overhead percentage calculations on the RBI data, adjusted to reflect an energy-exclusive overhead percentage. For selling, general and administrative (SG&A) expenses, we calculated percentages based on the RBI data. We used the calculated SG&A percentages because they were greater than the ten percent statutory minimum. We also used the calculated profit percentage because it was greater than the statutory minimum of eight percent of materials, labor, factory overhead, and SG&A expenses.

We made no adjustments for selling expenses. We added surrogate freight costs for the delivery of packing materials to the factories producing pencils.

Best Information Available

Because information has not been presented to the Department to prove otherwise, any PRC companies not participating in this investigation are not entitled to separate dumping margins. Potential exporters identified by the Ministry of Foreign Trade and Economic Cooperation (MOFTEC) have failed to respond to our questionnaire. In the absence of responses from these and other PRC exporters during the POI, we are basing the PRC country-wide rate on BIA. As discussed above, we are also applying BIA to SFTC.

In determining what to use as BIA, the Department follows a two-tiered methodology, whereby the Department normally assigns lower margins to those respondents that cooperated in an investigation and more adverse margins for those respondents which did not cooperate in an investigation. As outlined in the *Preliminary Determination of Sales at Less Than Fair Value: Certain Cold-Rolled Carbon Steel Flat Products From Argentina ("Argentina Steel")*, 58 FR 7066, 7069, 7070 (February 4, 1993), when a company refuses to provide the information requested in the form required, or otherwise significantly impedes the Department's investigation, it is appropriate for the Department to assign to that company the higher of (a) the highest margin alleged in the petition, or (b) the highest calculated rate of any respondent in the investigation. Here, since some PRC exporters failed to respond to our questionnaire, we are assigning to them the highest margin in the petition, as recalculated by the Department for the initiation and for this determination using petitioner's updated information submitted May 1994. This rate applies to all exporters other than those responding exporters which have shown their independence from central government control.

Since SFTC has been cooperative in this proceeding, and since we have preliminarily determined it is eligible for a separate rate, we are assigning a margin based on the highest calculated rate for any respondent in the investigation (see *Argentina Steel*).

Verification

As provided in section 776(b) of the Act, we will verify all information determined to be acceptable for use in making our final determination.

Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the Customs Service to suspend liquidation of all entries of pencils from the PRC that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a bond equal to the estimated amount by which the FMV exceeds the USP as shown below. These suspension of liquidation instructions will remain in effect until further notice.

The weighted-average dumping margins are as follows:

Manufacturer/producer/exporter	Weighted-average margin percentage
Guangdong	58.34
SFTC	100.98
Shanghai Lansheng	100.98
PRC country-wide rate*	107.63

*Including China first.

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Public Comment

In accordance with 19 CFR 353.38, case briefs or other written comments in at least ten copies must be submitted to the Assistant Secretary for Import Administration no later than August 8, 1994, and rebuttal briefs, no later than August 12, 1994. In accordance with 19 CFR 353.38(b), we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the hearing will be

held at 10 a.m. on August 15, 1994, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

Interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, Room B–099, within ten days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. In accordance with 19 CFR 353.38(b), oral presentations will be limited to issues raised in the briefs. If this investigation proceeds normally, we will make our final determination by August 22, 1994.

This determination is published pursuant to section 733(f) of the Act and 19 CFR 353.15(a)(4).

Dated: June 8, 1994.

Susan G. Esserman,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

[A–549–808]

Preliminary Determination of Sales at Less Than Fair Value: Certain Cased Pencils From Thailand

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: June 16, 1994.

FOR FURTHER INFORMATION CONTACT: Vincent Kane or Thomas McGinty, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC, 20230; telephone (202) 482–2815 or 482–5055.

PRELIMINARY DETERMINATION: We preliminarily determine that imports of certain cased pencils from Thailand are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the initiation of this investigation on November 30, 1993, (58 FR 64548, December 8, 1993), the following events have occurred:

On December 27, 1993, the U.S. International Trade Commission (ITC) issued an affirmative preliminary injury determination in this case (Investigation Nos.–731–TA–669–670 (Preliminary) (Publication 2713).

On January 5, 1994, the Department of Commerce (the Department) delivered antidumping duty questionnaires to Aruna Company, Ltd. (Aruna) and Nan Mee Industry Co., Ltd. (Nan Mee). At the time a questionnaire was sent to Nan Mee, we did not know that Aruna accounted for over 60 percent of exports of the subject merchandise to the United States. On January 14, 1994, Nan Mee informed the Department that it had no sales for export to the United States during the period of investigation (POI). Based on import statistics obtained from the U.S. Customs Service, we determined that Aruna accounted for at least 60 percent of exports of the subject merchandise to the United States during the period of investigation (POI). These statistics also confirmed that Nan Mee had no exports to the United States during the POI. On January 28, 1994, Aruna notified the Department that it would not participate in this investigation. No questionnaire response was filed by Aruna.

On March 29, 1994, at the request of petitioner, the Department postponed the preliminary determination until June 8, 1994, in accordance with section 733 of the Act.

Scope of Investigation

The products covered by these investigation are certain cased pencils of any shape or dimension which are writing and/or drawing instruments that feature cores of graphite or other materials encased in wood and/or man-made materials, whether or not decorated and whether or not tipped (*e.g.*, with erasers, etc.) in any fashion, and either sharpened or unsharpened. The pencils subject to these investigations are classified under subheading 9609.10.00 of the Harmonized Tariff Schedule of the United States ("HTSUS").

Specifically excluded from the scope of this investigation are mechanical pencils, cosmetic pencils, pens, non-cased crayons (wax), pastels, charcoals, or chalks.

Although the HTSUS subheading is provided for convenience and customs purposes, our written description of the scope of this investigation is dispositive.

Period of Investigation

The period of investigation is June 1, 1993, through November 30, 1993.

Best Information Available

Because Aruna failed to respond to our questionnaire, we based our preliminary determination on best information available (BIA) in accordance with section 776(c) of the Act. Section 776(c) states that the Department may use BIA where a company has refused to provide information requested in the form required, or has otherwise significantly impeded the Department's investigation.

In determining what rate to use as BIA when a party refuses to provide requested information, the Department follows a two-tiered methodology. *See, Final Determination of Sales at Less than Fair Value: Certain Hot-Rolled Carbon Steel Flat Products, Certain Cold-Rolled Carbon Steel Flat Products, and Certain Cut-to-Length Carbon Steel Plate from Belgium*, 58 FR 37083, (July 9, 1993). Under this methodology, the Department uses as BIA the higher of (1) the margin alleged in the petition; or (2) the highest calculated rate of any respondent in the investigation. Since there is no calculated rate in this investigation, we have assigned to Aruna and all other exporters the highest rate contained in the petition with one adjustment. Petitioner based the highest rate on a comparison of average U.S. prices from import statistics with the highest of four home market price quotes as the basis for foreign market value (FMV). Rather than use the highest home market price quote as FMV, we have used an average of the four home market price quotes. We have made this adjustment because the petitioner used an average price derived from import statistics as U.S. price. On this basis we have calculated a BIA rate of 48.3 percent.

Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of certain cased pencils from Thailand that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a bond equal to the estimated preliminary dumping margin, as shown below. The suspension of liquidation will remain in effect until further notice.

Producer/Manufacturer/Exporter	Margin percentage
All companies	48.3

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. If our final determination is affirmative, the ITC will determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry before the later of 120 days after the date of this preliminary determination or 45 days after our final determination.

Public Comment

In accordance with 19 CFR 353.38, case briefs or other written comments in at least ten copies must be submitted to the Assistant Secretary for Import Administration no later than July 1, 1994, and rebuttal briefs, no later than July 8, 1994. In accordance with 19 CFR 353.38(b), we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the hearing will be held on July 12, 1994, at 10:00 a.m. at the U.S. Department of Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

Interested parties who wish to request a hearing or to participate if one is requested, must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, room B–099, within ten days of the publication of this notice. Requests should contain (1) the party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. In accordance with 19 CFR 353.38(b), oral presentations will be limited to issues raised in the briefs. If this investigation proceeds normally, we will make our final determination by August 22, 1994.

This determination is published pursuant to section 733(f) of the Act and 19 CFR 353.15(a)(4).

Dated: June 8, 1994.

Susan G. Esserman,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

Travel and Tourism Administration

Travel and Tourism Advisory Board; Notice of Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. (App. 1976) notice is hereby given that the Travel and Tourism Advisory Board of the U.S. Department of Commerce will meet on July 19, 1994, at 9 a.m. at the Boston Back Bay Hilton, 40 Dalton Street, Boston, Massachusetts.

Established March 19, 19982, the Travel and Tourism Advisory Board consists of 15 members, representing the major segments of the travel and tourism industry and state tourism interests, and includes one member of a travel labor organization, a consumer advocate, an academician and a financial expert.

Members advise the Secretary of Commerce on matters pertinent to the Department's responsibilities to accomplish the purpose of the International Travel Act, as amended, and provide guidance to the Under Secretary for Travel and Tourism.

Agenda items are as follows:

I. Call to Order
II. Roll Call
III. Administrative Details
IV. Current Legislative Issues
V. Tourism Policy Council and White House Conference on Tourism
VI. USA Marketing Council Report
VII. USTTA Program Planning
VIII. Miscellaneous
IX. Adjournment

A very limited number of seats will be available to observers from the public and the press. To assure adequate seating, individuals intending to attend should notify the Committee Control Officer in advance. The public will be permitted to file written statements with the Committee before or after the public forum and meeting. To the extent time is available, the presentation or oral statements will be allowed.

Karen M. Cardran, Committee Control Officer, United States Travel and Tourism Administration, room 1860, U.S. Department of Commerce, Washington, DC 20230 (telephone 202–482–1904) will respond to public requests for information about the meeting.

Greg Farmer,

Under Secretary of Commerce for Travel and Tourism.

BILLING CODE 3510–11–M

International Trade Administration

Brandeis University, et al.; Notice of Consolidated Decision on Application for Duty-Free Entry of Scientific Instrument

This is a decision consolidated pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C.

Docket Number: 93–129. *Applicant:* Brandeis University, Waltham, MA 02254-9110. *Instrument:* Safe Start Xenon Arc Lamp, Model HB 4060. *Manufacturer:* Applied Photophysics Ltd., United Kingdom. *Intended Use:* See notice at 58 FR 59012, November 5, 1993. *Advice Received From:* National Institutes of Health, March 31, 1994.

Docket Number: 93–140. *Applicant:* Rutgers University, Piscataway, NJ 08854. *Instrument:* High Intensity Light Source Attachment. *Manufacturer:* Hi-Tech Scientific Limited, United Kingdom. *Intended Use:* See notice at 58 FR 65157, December 13, 1993. *Advice Received From:* National Institutes of Health, April 21, 1994.

Docket Number: 93–156. *Applicant:* University of Arizona, Tucson, AZ 85721. *Instrument:* Automated Microvolume Inlet System. *Manufacturer:* Finnigan MAT GmbH, Germany. *Intended Use:* See notice at 59 FR 5178, February 3, 1994. *Advice Received From:* National Institutes of Health, April 21, 1994.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instruments, for the purposes for which the instruments are intended to be used, is being manufactured in the United States. *Reasons:* These are compatible accessories for instruments previously imported for the use of the applicants. In each case, the instrument and accessory were made by the same manufacturer. The National Institutes of Health advises that the accessories are pertinent to the intended uses and that it knows of no comparable domestic accessories.

We know of no domestic accessories which can be readily adapted to the previously imported instruments.

Pamela Woods,

Acting Director, Statutory Import Programs Staff.

Mount Sinai Medical Center, et al.; Notice of Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C.

Docket Number: 93–136. *Applicant:* Mount Sinai Medical Center, New York, NY 10029. *Instrument:* Cytovision Ultra Analysis System. *Manufacturer:* Applied Imaging International, United Kingdom. *Intended Use:* See notice at 58 FR 63924, December 3, 1993. *Reasons:* The foreign instrument provides: (1) combined automated karyotyping and fluorescence in-situ hybridization (FISH) analysis and (2) high resolution monochrome CCD camera. *Advice Received From:* National Institutes of Health, April 21, 1994.

Docket Number: 94–007. *Applicant:* Occidental College, Los Angeles, CA 90041. *Instrument:* Multi-Mixing Rapid Kinetics Accessory with Pneumatic Attachment, Model SFA-12MX. *Manufacturer:* Hi-Tech, United Kingdom. *Intended Use:* See notice at 59 FR 6621, February 11, 1994. *Reasons:* The foreign instrument provides customized compatibility with the flow cell holder and the data system of a Hitachi F4500 spectrofluorimeter. *Advice Received From:* National Institutes of Health, May 6, 1994.

Docket Number: 94–015. *Applicant:* Rice University, Houston, TX 77005. *Instrument:* Mass Spectrometer, Model MAT 95. *Manufacturer:* Finnigan, Germany. *Intended Use:* See notice at 59 FR 12893, March 18, 1994. *Reasons:* The foreign instrument provides: (1) resolution to 60 000, (2) mass range to 17 500 amu and (3) scan rate to 0.1 second per decade. *Advice Received From:* National Institutes of Health, May 6, 1994.

Docket Number: 94–016. *Applicant:* Penn State University, Hershey, PA 17033. *Instrument:* Rapid Kinetics Spectrometer Accessory, Model RX 1000. *Manufacturer:* Applied Photophysics, United Kingdom. *Intended Use:* See notice at 59 FR 12893, March 18, 1994. *Reasons:* The foreign instrument may be used with a circular dichroism spectrometer. *Advice Received From:* National Institutes of Health, May 6, 1994.

The National Institutes of Health advises in its memoranda that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) they know of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to any of the foreign instruments.

Pamela Woods,

Acting Director, Statutory Import Programs Staff

Texas A&M University, Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Docket Number: 94–020. *Applicant:* Texas A&M University, College Station, TX 77843. *Instrument:* Isotope Ratio Mass Spectrometer with Accessories, Model MAT 252 GC. *Manufacturer:* Finnigan MAT, Germany. *Intended Use:* See notice at 59 FR 12893, March 18, 1994. *Reasons:* The foreign instrument provides: (1) an absolute sensitivity of 1000 molecules CO_2 per mass 44 ion at the collector and (2) an internal precision of 0.005 per mil for 3 bar µl samples of CO_2.

This capability is pertinent to the applicant's intended purpose and we know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Pamela Woods,

Acting Director, Statutory Import Programs Staff.

BILLING CODE 3510–DS–F

Minority Business Development Agency

Business Development Center Applications; San Jose, CA

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: In accordance with Executive Order 11625 and 15 U.S.C. 1512, the Minority Development Agency (MBDA) is soliciting competitive applications under its Minority Business Development Center (MBDC) Program. The total cost of performance for the first budget period (12 months) from November 1, 1994 to October 31, 1995, is estimated at $333,125. The application must include a minimum cost-share of 15% of the total project cost through non-Federal contributions. Cost-sharing contributions may be in the form of cash contributions, clients fees, in-kind contributions or combinations thereof. The MBDC will operate in the San Jose, California Geographic Service Area.

The funding instrument for this project will be a cooperative agreement. Competition is open to individuals, non-profit and for-profit organizations, state and local governments, American Indian tribes and educational institutions.

The MBDC program provides business development services to the minority business community to help establish and maintain viable minority businesses. To this end, MBDA funds organizations to identify and coordinate public and private sector resources on behalf of minority individuals and firms; to offer a full range of management and technical assistance to minority entrepreneurs; and to serve as a conduit of information and assistance regarding minority business.

Applications will be evaluated on the following criteria: the experience and capabilities of the firm and its staff in addressing the needs of the business community in general and, specifically, the special needs of minority businesses, individuals and organizations (50 points); the resources available to the firm in providing business development services (10 points); the firm's approach (techniques and methodologies) to performing the work requirements included in the application (20 points); and the firm's estimated cost for providing such assistance (20 points). An application must receive at least 70% of the points assigned to each evaluation criteria category to be considered programmatically acceptable and responsive. Those applications determined to be acceptable and responsive will then be evaluated by the Director of MBDA. Final award selections shall be based on the number of points received, the demonstrated responsibility of the applicant, and the determination of those most likely to further the purpose of the MBDA program. Negative audit findings and recommendations and unsatisfactory performance under prior Federal awards may result in an application not being considered for award. The applicant with the highest point score will not necessarily receive the award.

MBDCs shall be required to contribute at least 15% of the total project cost through non-Federal contributions. To assist in this effort, the MBDCs may charge client fees for management and technical assistance (M&TA) rendered. Based on a standard rate of $50 per hour, the MBDC will charge client fees at 20% of the total cost for firms with gross sales of $500,000 or less, and 35% of the total cost for firms with gross sales of over $500,000.

Quarterly reviews culminating in year-to-date evaluations will be conducted to determine if funding for the project should continue. Continued funding will be at the total discretion of MBDA based on such factors as an MBDC's performance, the availability of funds and Agency priorities.

DATES: The closing date for applications is July 25, 1994.

Applications must be postmarked on or before July 25, 1994. The mailing address for submission is: San Francisco Regional Office, Minority Business Development Agency, U.S. Department of Commerce, 221 Main Street, room 1280, San Francisco, California 94105, 415/744–3001.

A pre-application conference to assist all interested applicants will be held at the following address and time: San Francisco Regional Office, Minority Business Development Agency, U.S. Department of Commerce, 221 Main Street, room 1280, San Francisco, California 94105, July 1, 1994 at 10 a.m.

FOR FURTHER INFORMATION CONTACT: Melda Cabrera, Regional Director, San Francisco Regional Office at 415/744–3001.

SUPPLEMENTARY INFORMATION: Anticipated processing time of this award is 120 days. Executive Order 12372, "Intergovernmental Review of Federal Programs," is not applicable to this program. The collection of information requirements for this project have been approved by the Office of Management and Budget (OMB) and assigned OMB control number 0640–0006. Questions concerning the preceding information can be answered by the contact person indicated above, and copies of application kits and applicable regulations can be obtained at the above address.

Pre-Award Costs

Applicants are hereby notified that if they incur any costs prior to an award being made, they do so solely at their own risk of not being reimbursed by the Government. Notwithstanding any verbal assurance that an applicant may have received, there is no obligation on the part of the Department of Commerce to cover pre-award costs.

Awards under this program shall be subject to all Federal laws, and Federal and Departmental regulations, policies, and procedures applicable to Federal financial assistance awards.

Outstanding Account Receivable

No award of Federal funds shall be made to an applicant who has an outstanding delinquent Federal debt until either the delinquent account is paid in full, a repayment schedule is established and at least one payment is received, or other arrangements satisfactory to the Department of Commerce are made.

Name Check Policy

All non-profit and for-profit applicants are subject to a name check review process. Name checks are intended to reveal if any key individuals associated with the applicant have been convicted of or are presently facing criminal charges such as fraud, theft, perjury, or other matters which significantly reflect on the applicant's management, honesty or financial integrity.

Award Termination

The Departmental Grants Officer may terminate any grant/cooperative agreement in whole or in part at any time before the date of completion whenever it is determined that the award recipient has failed to comply with the conditions of the grant/cooperative agreement. Examples of some of the conditions which can cause termination are unsatisfactory performance of MBDC work requirements, and reporting inaccurate or inflated claims of client assistance. Such inaccurate or inflated claims may be deemed illegal and punishable by law.

False Statements

A false statement on an application for Federal financial assistance is

grounds for denial or termination of funds, and grounds for possible punishment by a fine or imprisonment as provided in 18 U.S.C. 1001.

Primary Applicant Certifications

All primary applicants must submit a completed Form CD–511, "Certifications Regarding Debarment, Suspension and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying."

Nonprocurement Debarment and Suspension

Prospective participants (as defined at 15 CFR part 26, section 105) are subject to 15 CFR part 26, "Nonprocurement Debarment and Suspension" and the related section of the certification form prescribed above applies.

Drug-Free Workplace

Grantees (as defined at 15 CFR part 26, section 605) are subject to 15 CFR part 26, subpart F, "Governmentwide Requirements for Drug-Free Workplace (Grants)" and the related section of the certification form prescribed above applies.

Anti-Lobbying

Persons (as defined at 15 CFR part 28, section 105) are subject to the lobbying provisions of 31 U.S.C. 1352, "Limitation on use of appropriated funds to influence certain Federal contracting and financial transactions," and the lobbying section of the certification form prescribed above applies to application/bids for grants, cooperative agreements, and contracts for more than $100,000.

Anti-Lobbying Disclosures

Any applicant that has paid or will pay for lobbying using any funds must submit an SF–LLL, "Disclosure of Lobbying Activities," as required under 15 CFR part 28, appendix B.

Lower Tier Certifications

Recipients shall require applications/bidders for subgrants, contracts, subcontracts, or other lower tier covered transactions at any tier under the award to submit, if applicable, a completed Form CD–512, "Certifications Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transactions and Lobbying" and disclosure form, SF–LLL, "Disclosure of Lobbying Activities." Form CD–512 is intended for the use of recipients and should not be transmitted to DOC. SF–LLL submitted by any tier recipient or subrecipient should be submitted to DOC in accordance with the instructions contained in the award document.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Amendment of an Import Limit for Certain Man-Made Fiber Textile Products Produced or Manufactured in Indonesia

June 10, 1994.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs increasing a limit.

EFFECTIVE DATE: June 17, 1994.

FOR FURTHER INFORMATION CONTACT: Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–6704. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The United States Government has agreed to increase the Designated Consultation Level for Category 669–P for the current agreement period.

A description of the textile and apparel categories in terms of HTS numbers is available in the Correlation: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 58 FR 62645, published on November 29, 1993). Also see 58 FR 31190, published on June 1, 1993.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Dated: June 13, 1994

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

June 10, 1994.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on May 25, 1993, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Indonesia and exported during the twelve-month period which began on July 1, 1993 and extends through June 30, 1994.

Effective on June 17, 1994, you are directed to amend further the directive dated May 25, 1993 to increase the limit for Category 669–P [1] to 1,250,000 kilograms.[2]

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 94–14682 Filed 6–15–94; 8:45 am]

BILLING CODE 3510–DR–M

COMMODITY FUTURES TRADING COMMISSION

Financial Products Advisory Committee; Meeting

This is to give notice, pursuant to section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. App. 2 section 10(a) and 41 CFR 101–6.1015(b), that the Commodity Futures Trading Commission's Financial Products Advisory Committee will conduct a public meeting in the Lower Level Hearing Room (B–1) at the Commission's Washington, DC headquarters located at 2033 K Street, NW., Washington, DC 20581, on July 14, 1994, beginning at 1:30 p.m. and lasting until 5 p.m. The agenda will consist of:

Agenda

1. Presentation by GAO staff on the GAO Derivatives Report;

2. Panel Discussion by the staff of the Senate and House Committee on Agriculture of OTC Derivatives Issues and GAO Report;

3. Presentation/Discussion of Financial Accounting Standards Board (FASB) Exposure Draft on Disclosure of Derivative Financial Instruments;

4. Panel Discussion of OTC Derivatives Issues from the Perspective of End-Users; and

5. Wrap-up; discussion of other committee business and future agenda items.

The purpose of this meeting is to solicit the views of the Committee on these agenda matters. The Advisory Committee was created by the Commodity Futures Trading Commission for the purpose of advising the Commission on the assessment of issues concerning individuals and industries interested in or affected by financial markets regulated by the Commission. The purposes and objectives of the Advisory Committee are more fully set forth in the April 23, 1993 Charter of the Advisory Committee.

The meeting is open to the public. The Chairman of the Advisory Committee, CFTC Commissioner Shelia C. Bair, is empowered to conduct the meeting in a fashion that will, in her judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Advisory Committee should mail a copy of the statement to the attention of: the Commodity Futures Trading Commission Financial Products Advisory Committee, c/o Kristyn H. Burnett, 2033 K Street NW., Washington, DC 20581, before the meeting. Members of the public who wish to make oral statements should also inform Ms. Burnett in writing at the foregoing address at least three business days before the meeting. Reasonable provision will be made, if time permits, for an oral presentation of no more than five minutes each in duration.

[1] Category 669–P: only HTS numbers 6305.31.0010, 6305.31.0020 and 6305.39.0000.

[2] The limit has not been adjusted to account for any imports exported after June 30, 1993.

Issued by the Commission in Washington, DC., on June 10, 1994.

Jean A. Webb,

Secretary of the Commission.

BILLING CODE 6351–01–M

DEPARTMENT OF DEFENSE

Office of the Secretary

Assistance to Local Educational Agencies (LEAs)

AGENCY: Office of the Secretary, DoD.

ACTION: Notice of a program for providing financial assistance to LEAs.

SUMMARY: Pursuant to section 386 of Public Law No. 102–484, as amended by section 373 of Public Law 103–160, the "National Defense Authorization Act for Fiscal Year 1994," November 30, 1993, notice is hereby given of a program to provide financial assistance to eligible LEAs. Section 386(b) of Public Law No. 102–484, as amended, requires DoD to assist an LEA that cannot, without such aid, "provide [its]students . . . with a level of education that is equivalent to the minimum level of education available in schools of the other local educational agencies of the same State," provided that the LEA meets one of the three criteria established by section 386(c). For the purpose of this notice, the term "military dependent student" has the same meaning as in section 386(h)(2) of Public Law 102–484, as amended. In making the necessary determination under section 386(b), the Secretary of Defense must consult the Secretary of Education.

DATES: June 16, 1994.

ADDRESSES: Deputy Assistant Secretary of Defense (Personnel Support, Families & Education), room 3E784, The Pentagon, Washington, DC 20301–4000.

FOR FURTHER INFORMATION CONTACT: Dr. Hector O. Nevarez or Mr. John B. Shaver, Section 6 Schools, 4040 North Fairfax Drive, Arlington, VA 22203–1635; telephone (703) 696–4354 or 4361; facsimile number (703) 696–8920.

SUPPLEMENTARY INFORMATION: During fiscal year (FY) 1994, the Department of Defense shall provide 40 million dollars to assist LEAs that meet criteria in section 386 of Public Law 102–484, as amended. (For the purposes of this program, DoD shall rely on data from the Department of Education).

Pursuant to subsection 386(c)(1) of Public Law No. 102–484, as amended, an LEA is eligible for assistance under this program if it satisfies subsection 386(b) and "at least 30 percent (as rounded to the nearest whole percent) of the students in average daily attendance in the schools of that agency in that fiscal year are military dependent students counted under subsection (a) or (b) of section 3 of the Act of September 30, 1950 (Pub. L. 874, Eighty-first Congress; 20 U.S.C. 238)."

Pursuant to subsection 386(c)(2) of Public Law No. 102–484, as amended, an LEA is eligible for assistance under this program if it satisfies subsection 386(b) and its average daily attendance (ADA) of military dependent students increased by at least 300 or more students from FY 1993 to FY 1994 as a result of "a relocation of Armed Forces personnel or civilian employees of the Department of Defense or as a result of a realignment of one or more military installations." Such 300 or more students must equal an increase in the ADA of military dependent students of at least 10 percent or more from FY 1993 to FY 1994.

An alternate way of achieving eligibility for assistance is prescribed under subsection 386(c)(3) of Public Law No. 102–484, as amended. To qualify, the LEA must satisfy subsection 386(b) and "by reason of consolidation or reorganization of local educational agencies be a successor of [an LEA] that for fiscal year 1992," was eligible to receive payments under DoD Instruction 1342.18, dated June 3, 1991 (32 CFR part 240, 56 FR 28821), and satisfy the requirements in subsection 386(a)(1) or subsection 386(c)(2).

For the purposes of this program, the following definitions are applicable:

(a) Applicant. Any LEA requesting assistance under this notice.

(b) Current Expenditures. "[E]xpenditures for free public education, including expenditures for administration, instruction, attendance and health services, pupil transportation services, operation and maintenance of plant, fixed charges, and expenditures to cover deficits for food services and student body activities. The term does not include expenditures for community services, capital outlay, debt service, or any expenditures made from funds granted for the purpose of chapter 1 and 2 of title I of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2701–2976). An expenditure for the replacement of equipment is considered to be either a current expenditure or capital outlay, whichever is in accordance with State accounting guidelines, law, or practice." 34 CFR § 222.3.

(c) DoD Contribution. The amount of financial assistance an applicant shall receive under this notice.

(d) Federal Property. Real property that because of Federal law, agreement, or policy is exempt from taxation by a State or political subdivision of a State and that the United States owns in fee simple or leases from another party.

(e) Local Education Agency (LEA). A public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or such combination of school districts or counties as are recognized in a State as an administrative agency for its public elementary or secondary schools. Such term includes any other public institution or agency having administrative control and direction of a public elementary or secondary school.

(f) Military Dependent Student. A student that is a dependent child of a member of the Armed Forces or a dependent child of a civilian employee of the Department of Defense.

(g) Military Personnel. Members of the Armed Forces serving on active duty.

(h) Military 3(a) Student. A child who attends the school(s) of a LEA that provides free public education and who while attending such school(s) of the LEA, resides on Federal property and has a parent who is on active duty in the Armed Forces (as defined in section 101(4) of 10 U.S.C.).

(i) Military 3(b) Student. A child who attends the schools of a LEA that provides a free public education and who, while attending such school(s), has a parent who is on active duty in the Armed Forces (as defined in 10 U.S.C. 101(4)) but such child does not reside on Federal property.

(j) Parent. The biological father or mother of a child; a person who, by order of a court of competent jurisdiction, has been declared the father or mother of a child by adoption, the legal guardian of a child; or a person in whose household a child resides, provided that such person stands in loco parentis to that child and contributes at least one-half of the child's support.

(k) Per-Pupil Expenditure (PPE). The average current expenditure for an individual student.

The Department of Defense shall provide 40 million dollars to assist the LEAs that satisfy the requirements of this notice This money shall be used only to supplement funding for the eligible LEAs operating schools that provide free public education to military dependent students for whom:

(1) For the prior and current FYs, the LEA has applied for and received, or shall receive, financial assistance from all regular Federal and State educational aid programs available to it, including the Impact Aid Program (Pub. L. No. 81–874, section 3, as amended); (2) the eligibility of the LEA under State law for State aid for free public education and the amount of that aid are no different than the eligibility and amounts received by LEAs in that State without military dependent students; and (3) the LEA files with the Under Secretary of Defense for Personnel and Readiness (USD(P&R)) a letter of application (see Sample Letter at the end of this notice) and a copy of an independently audited financial report of the applicant LEA for the second preceding FY.

The eligible LEAs under this notice insofar as it implements subsection 386(c)(1) and subsection 386(c)(2) shall receive financial assistance for military dependent students. The eligible LEAs under this notice insofar as it implements subsection 386(c)(3) shall receive financial assistance only for military section 3(a) students. Applications for financial assistance must be received no later than June 30, 1994.

The amount of assistance (the DoD contribution) for the eligible LEAs under this notice may not exceed the amount derived from the following formula:

(1) Of the 40 million dollars available:

(i) Amounts of 27,000,000 dollars shall be obligated for military section 3(a) students to those eligible LEAs whose per-pupil expenditure (PPE) for the second preceding FY was less than the average PPE in the State for the second preceding FY.

(ii) Amounts of 2,250,000 dollars shall be obligated for military section 3(b) students and for those students who are the dependent children of civilian employees of the Department of Defense to those eligible LEAs, whose PPE for the second preceding FY was less than the average PPE in the State for the second preceding FY.

(iii) Amounts of 9,000,000 dollars shall be obligated for military section 3(a) students to those eligible LEAs whose PPE for the second preceding FY was equal to, or greater than the average PPE in the State for the second preceding FY.

(iv) Amounts of 750,000 dollars shall be obligated for military section 3(b) students and for those students who are the dependent children of civilian employees of the Department of Defense to those eligible LEAs whose PPE for the second preceding FY was equal to, or greater than the average PPE in the State for the second preceding FY.

(v) Amounts of 1,000,000 dollars shall be obligated to those eligible LEAs whose ADA of military dependent students increased by 300 or more students from FY 1993 to FY 1994 as a result of "a relocation of Armed Forces personnel or civilian employees of the Department of Defense or as a result of a realignment of one or more military installations."

(2) For military section 3(a) students in those eligible LEAs, whose average PPE for the second preceding FY was less than the average PPE in the State for the second preceding FY, the LEA shall receive an amount, as follows:

(i) Equal to the LEA's military section 3(a) ADA for SY 1993–1994.

(ii) Multiplied by the quotient of the funds available to those LEAs, whose PPE for the second preceding FY was less than the average PPE in the State for the second preceding FY (27,000,000 dollars).

(iii) Divided by the sum of the ADAs for SY 1993–1994 of military section 3(a) students of those same eligible LEAs.

(3) For military section 3(b) students and for those students who are the dependent children of civilian employees of the Department of Defense in those eligible LEAs whose average PPE for the second preceding FY was less than the average PPE in the State for the second preceding FY, the LEA shall receive an amount, as follows:

(i) Equal to the LEA's military section 3(b) and dependent children of a civilian employee of the Department of Defense ADA for SY 1993–1994.

(ii) Multiplied by the quotient of the funds available to those LEAs whose PPE for the second preceding FY was less than the average PPE in the State for the second preceding FY (2,250,000 dollars).

(iii) Divided by the sum of the ADAs for SY 1993–1994 of military section 3(b) and dependent children of civilian employees of the Department of Defense students of those same eligible LEAs.

(4) For military section 3(a) students in those eligible LEAs whose PPE for the second preceding FY was equal to, or greater than the average PPE in the State for the second preceding FY, the LEA shall receive an amount, as follows:

(i) Equal to the LEA's military section 3(a) ADA for SY 1993–1994.

(ii) Multiplied by the quotient of the funds available to those LEAs whose PPE for the second preceding FY was less than the average PPE in the State for the second preceding FY (9,000,000 dollars).

(iii) Divided by the sum of the ADAs for SY 1993–1994 of military section 3(a) students of those same eligible LEAs.

(5) For military section 3(b) students and for the students who are the dependent children of civilian employees of the Department of Defense in those eligible LEAs whose PPE for the second preceding FY was equal to, or greater than the average PPE in the State for the second preceding FY, the LEA shall receive an amount, as follows:

(i) Equal to the LEA's military section 3(b) and dependent children of a civilian employee of the Department of Defense ADA for SY 1993–1994.

(ii) Multiplied by the quotient of the funds available to those LEAs whose PPE for the second preceding FY was less than the average PPE in the State for the second preceding FY (750,000 dollars).

(iii) Divided by the sum of the ADAs for SY 1993–1994 of military section 3(b) students and dependent children of civilian employees of the Department of Defense of those same eligible LEAs.

(6) For those military dependent students in those eligible LEAs whose ADA of military dependent students increased by 300 or more students from FY 1993 to FY 1994 as a result of "a relocation of Armed Forces personnel or civilian employees of the Department of Defense or as a result of a realignment of one or more military installations," the LEA shall receive an amount, as follows:

(i) Equal to the LEA's military dependent student ADA for SY 1993–1994.

(ii) Multiplied by the quotient of the funds available to those LEAs (1,000,000 dollars).

(iii) Divided by the sum of the ADAs for SY 1993–1994 of military dependent students of those same LEAs.

The USD(P&R) shall calculate the proposed contribution. The contribution may be used for all students in the LEA, at the discretion of the appropriate officials in the LEA. The USD(P&R) shall ensure the implementation of these policies and procedures and provide assistance, as required, to the potentially eligible LEAs. The General Counsel of the Department of Defense shall provide legal advice for the implementation of this program.

An applicant requesting assistance under this notice shall submit a letter of application (see sample letter at end of this notice) and a copy of an independently audited financial report of the applicant LEA for the second preceding FY, requesting a DoD contribution and assuring the USD(P&R) that the LEA has applied for, has received or shall receive all financial assistance from other sources for which it is qualified. Letters of application must be addressed as follows: Under Secretary of Defense (Personnel and Readiness), 4000 Defense Pentagon, Washington, DC 20301–4000.

The applicant shall also file a copy of the letter of application for financial assistance and required supportive information with the State educational agency (SEA). The SEA may submit comments on the LEA's application to the Department of Defense (at the above address) by July 8, 1994. Such comments shall be considered when applications are reviewed by the OSD. The LEA's application and all required supporting information must reach the USD(P&R) no later than June 30, 1994.

Sample Letter of Application for Financial Assistance

Under Secretary of Defense,
(Personnel and Readiness), 4000 Defense Pentagon, Washington, DC 20301–4000.

Dear Mr. Under Secretary: Pursuant to this "Notice of a Program for Providing Financial Assistance to LEAs," _____ **Federal Register** _____ (_____, 1994), the (name of the local educational agency (LEA)) requests financial assistance for the LEA for school year 1993–1994. We certify that the LEA has applied for financial assistance from all sources, including the State/Commonwealth of (name). We understand that funds available for that purpose shall be paid on a per-pupil basis for military section 3(a) and military section 3(b) students and for those students who are the dependent children of civilian employees of the Department of Defense, as these terms are defined in the "Notice of a Program for Providing Financial Assistance to LEAs." Enclosed find a copy of our independent audit "(Title)" prepared by (name of firm or agency). We have submitted a complete and timely application for section 3 impact aid assistance to the Secretary of Education. A copy of this letter, with the above supporting information, is being submitted to the State educational agency.

Sincerely,

(Authorized LEA Official)

Dated: June 13, 1994.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Department of the Army

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of Committee: Army Science Board (ASB).

Date of Meeting: 29 June 1994.

Time of Meeting: 1200–1500 (classified).

Place: Pentagon, Washington, DC.

Agenda: The Threat Team III of the Army Science Board's 1994 Summer Study on "Capabilities Needed to Counter Current and Evolving Threat" will meet to receive an Analytical Efforts Status Report. This meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., appendix 2, subsection 10(d). The unclassified and classified matters to be discussed are so inextricably intertwined so as to preclude opening all portions of the meeting. The ASB Administrative Officer Sally Warner, may be contacted for further information at (703) 695–0781.

Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement for the Proposed Sandstone Project, Carbon County, WY

AGENCY: U.S. Army Corps of Engineers, Omaha District.

SPONSOR: Wyoming Water Development Commission, Cheyenne, Wyoming.

ACTION: Notice of intent to prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY: 1. The proposed action is to construct a roller compacted concrete dam on Savery Creek, with a storage capacity of 23,000 acre-feet. The project would provide late season irrigation water to approximately 12,000 acres of lands in the Little Snake River Valley. The project would also provide secondary recreation benefits. The proposed project is located in Carbon County, Wyoming, approximately 10 miles north of Savery, Wyoming.

2. Alternatives being evaluated by the applicant include:

a. Construction of a new reservoir (several alternate sites).

b. Use of groundwater resources.

c. Conservation.

d. No action.

Alternatives available to the Corps of Engineers include:

a. Approve the permit application

b. Denial of the permit.

c. Approve the permit with some modification.

3. Other applicable and pertinent environmental review and consultation requirements will be undertaken

simultaneously with the NEPA process, including requirements of the National Historic Preservation Act, the Endangered Species Act, the Fish and Wildlife Coordination Act, section 404 of the 1977 Clean Water Act, Clean Air Act, Executive Order 11988 on flood plains, and Executive Order 11990 on wetlands.

4. A public scoping meeting for the DEIS will be held on Wednesday, July 13, 1994, at 7 p.m. at the Little Snake River School at Meeker & High Streets, Baggs, Wyoming. The participation of the public and all interested Government agencies is invited.

5. The Omaha District estimates that the DEIS will be released for public review in June 1995.

ADDRESS: Questions about the proposed action, DEIS, or scoping meetings should be directed to Richard Gorton; Chief, Environmental Analysis Branch; Planning Division, U.S. Army Corps of Engineers, 215 North 17th Street, Omaha, Nebraska 68102–4978. Telephone: 402–221–4598.

Dated: June 7, 1994.

Kenneth S. Cooper,

Chief, Planning Division Omaha District.

BILLING CODE 3710–62–M

DELAWARE RIVER BASIN COMMISSION

Notice of Commission Meeting and Public Hearing

Notice is hereby given that the Delaware River Basin Commission will hold a public hearing on Wednesday, June 22, 1994. The hearing will be part of the Commission's regular business meeting which is open to the public and scheduled to begin at 2:00 p.m. in the Flying Bridge Room of the Harbour League Club at 800 Hudson Square, Camden, New Jersey.

The subjects of the hearing will be as follows:

Applications for Approval of the Following Projects Pursuant to Article 10.3, Article 11, and/or Section 3.8 of the Compact

1. *Delaware County Solid Waste Disposal Authority D–89–18 CP.* An application for construction of an on-site wastewater treatment facility to process up to 0.08 million gallons per day (mgd) of sanitary landfill leachate and non-hazardous liquid waste generated by facilities within the Delaware River Basin. After tertiary treatment, the effluent will be conveyed by pipeline from the existing Colebrookdale Landfill and discharged to Manatawny Creek in Oley Township, Berks County, Pennsylvania. The existing landfill project has no on-site treatment facilities and has been trucking collected leachate off-site for processing and disposal at two municipal sanitary treatment plants. The site is located along Schenkel Road in Earl Township, Berks County, Pennsylvania.

2. *American Telephone and Telegraph (AT&T) D–91–79.* AT&T proposes to expand the rating of its existing 3.0 mgd capacity industrial wastewater treatment plant (IWTP) to handle approximately 3.6 mgd. In addition, AT&T has requested a determination of the allowable limit for the concentration of total dissolved solids in the treated effluent, which will continue to discharge to Spring Run, a tributary of the Lehigh River. The project IWTP serves only the AT&T's electronic components manufacturing operation located at the plant site just north of Union Boulevard and east of the Lehigh River, in the City of Allentown, Lehigh County, Pennsylvania.

3. *Hoffmann-LaRoche Inc. D–93–7.* A project to improve the treatment capability of the applicant's existing 3.0 mgd capacity IWTP by constructing an additional secondary clarifier. The IWTP is located approximately 3000 feet north of the Town of Belvidere in White Township, Warren County, New Jersey. The IWTP will continue to serve the applicant's vitamin production facilities and discharge to the Delaware River via its existing outfall in Water Quality Zone 1D.

4. *Borough of Woodstown D–93–17 CP.* An application for approval of a ground water withdrawal project to supply up to 8.9 million gallons (mg)/30 days of water to the applicant's distribution system from new Well No. 4, and to increase the existing withdrawal limit of 12 mg/30 days from all wells to 18.1 mg/30 days. The project is located in Woodstown Borough, Salem County, New Jersey.

5. *E. I. DuPont deNemours and Company, Inc. D–93–19.* An application for approval of numerous ground water projects and a surface water withdrawal project to supply up to 540.14 mg/30 days of water from 14 production wells and 14 ground water remediation wells, and to supply up to 892.8 mg/30 of water for production purposes from the Salem Canal. The purpose is to consolidate the applicant's numerous existing and new withdrawals from the ground water and the Salem Canal for production and remediation purposes into one comprehensive docket. The project is located in Carneys Point Township, Salem County, New Jersey.

6. *GROWS Inc. D–94–17.* A project to withdraw up to 0.4 mgd on an average monthly basis from the tidal portion of the Delaware River to provide water primarily for dust control at the Eastern Expansion of the applicant's landfill facilities. The withdrawal will be located southeast of the GROWS landfill and across from Newbold Island on the Delaware River in Falls Township, Bucks County, Pennsylvania.

7. *Moyer Packing Co. D–94–20.* An application for approval of an expanded ground water withdrawal project to supply up to 1.51 mg/30 days of water from existing Well No. 1, and 5.4 mg/30 days from existing Well No. 2 to the applicant's Souderton Rendering (Division 1) Facility, and to limit the withdrawal from all wells to 6.57 mg/30 day. The project is located in Franconia Township, Montgomery County, in the Southeastern Pennsylvania Ground Water Protected Area.

Documents relating to these items may be examined at the Commission's offices. Preliminary dockets are available in single copies upon request. Please contact George C. Elias concerning docket-related questions. Persons wishing to testify at this hearing are requested to register with the Secretary prior to the hearing.

Dated: June 7, 1994.

Susan M. Weisman,

Secretary.

BILLING CODE 6360–01–P

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Acting Director, Information Resources Management Service, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: Interested persons are invited to submit comments on or before July 18, 1994.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Dan Chenok: Desk Officer, Department of Education, Office of Management and Budget, 725 17th Street, NW., room 3208, New Executive Office Building, Washington, DC 20503.

Requests for copies of the proposed information collection requests should be addressed to Patrick J. Sherrill, Department of Education, 400 Maryland Avenue, SW., room 5624, Regional Office Building 3, Washington, DC 20202–4651.

FOR FURTHER INFORMATION CONTACT: Patrick J. Sherrill (202) 708–8196. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Acting Director of the Information Resources Management Service, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Frequency of collection; (4) The affected public; (5) Reporting burden; and/or (6) Recordkeeping burden; and (7) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Patrick J. Sherrill at the address specified above.

Dated: June 10, 1994.

Mary P. Liggett,

Acting Director, Information Resources Management Service.

Office of Postsecondary Equation

Type of Review: Extension.
Title: Certification of Project Costs for College Facilities Programs.
Frequency: One time.
Affected Public: Non-profit institutions.
Reporting Burden: Responses: 50. *Burden Hours:* 50.
Recordkeeping Burden: Recordkeepers: 0. *Burden Hours:* 0.

Abstract: The collected information is used to determine the eligibility of costs claimed in conjunction with construction projects supported by the various college facilities construction programs. Without this information, the federal government cannot appropriately limit the amount of legitimate costs incurred under these programs. The information is necessary to determine the final approval amount of the loan or grant to protect the federal interest.

Office of Postsecondary Education

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP94–292–000]

Riverside Gas Storage Co.; Intent To Prepare an Environmental Assessment for the Proposed Riverside Gas Storage Field Project and Request for Comments on Environmental Issues

June 10, 1994.

The staff of the Federal Energy Regulatory Commission (FERC or the Commission) will prepare an environmental assessment (EA) that will discuss environmental impacts of the construction and operation of facilities proposed in the Riverside Gas Storage Field Project.[1] This EA will be used by the Commission in its decision-making process to determine whether an environmental impact statement is necessary and whether or not to approve the project.

Summary of the Proposed Project

Riverside Gas Storage Company (Riverside) wants Commission

[1] Riverside Gas Storage Company's (Riverside) application was filed with the Commission under section 7 of the Natural Gas Act and Part 157 of the Commission's regulations.

authorization to construct and operate a new underground natural gas storage field in Greene and Fayette Counties, Pennsylvania. Riverside proposes to convert a nearly depleted gas field to gas storage use. The proposed storage facility would have 5.1 billion cubic feet (BCF) of storage capacity (3.1 BCF working gas capacity). To develop the Riverside Gas Storage Field, Riverside would:

- Recomplete 21 existing wells as injection/withdrawal wells;
- Recomplete one existing well as an observation well;
- Plug and abandon 9 existing gas wells (all remaining wells in field);
- Construct 3.42 miles of 12-inch-diameter gathering pipeline;
- Construct 2.44 miles of 6-inch-diameter pipeline (22 segments of various lengths to attach wells to the gathering pipeline);
- Construct a new 3,150-horsepower compressor station; and
- Construct ancillary facilities at the compressor station including meters, dehydrator trains, storage tanks for oil and glycol, access roads, and water and electric utilities.

The general location of these facilities is shown in appendix 1.[2]

Land Requirements for Construction

Riverside would use 101.3 acres of land for the Riverside Gas Storage Field Project. Of this total, 10 acres would be used for the compressor station, 43.4 acres would be associated with well pads (1.4 acres per well) and 47.9 acres would be associated with the right-of-way for the storage pipelines.

Following completion of construction, approximately 12.6 acres associated with the nine plugged and abandoned wells would be allowed to revert to the land use desired by the property owner.

Riverside proposes to use a an 85-foot-wide construction right-of-way for its 12-inch-diameter pipeline and a 50-foot-wide construction right-of-way for its 6-inch-diameter pipeline. Riverside proposes to use an 85 to 100-foot-wide right-of-way for construction across streams.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us to discover and address concerns the public may have about proposals. We call this "scoping". The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission requests public comments on the scope of the issues it will address in the EA. All comments received are taken into account during the preparation of the EA.

The EA will discuss impacts that *could* occur as a result of the construction and operation of the proposed project under these general headings:

- Geology and soils;
- Water resources;
- Vegetation and wildlife;
- Pipeline safety;
- Land use;
- Cultural resources;
- Air quality and noise.

We will also evaluate possible alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

Our independent analysis of the issues will be in the EA. Depending on the comments received during the scoping process, the EA may be published and mailed to Federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we recommend that the Commission approve or not approve the project.

Currently Identified Environmental Issues

We have already identified several environmental issues that we think deserve attention based on a preliminary review of the proposed facilities and the information provided by Riverside. Keep in mind that this is a preliminary list. The list of issues will be added to, subtracted from, or changed based on your comments and our analysis.

The list of environmental issues:

- Riverside would recomplete 22 existing wells in Greene and Fayette Counties, Pennsylvania: one observation well and 21 injection/withdrawal wells. These wells and drilling operations have potential groundwater impacts.
- Riverside may affect up to five wetlands in the project area while constructing its pipelines.
- There may be noise concerns at residences surrounding Riverside's new compressor station.
- There may be federally listed threatened or endangered species in the project area.
- The Pennsylvania State Historic Preservation Officer indicated there is potential cultural resources sites in the project area and requested a survey.
- Existing and future coal mining operations and the Riverside Gas Storage Field Project may affect each other.

Public Participation

You can make a difference by sending a letter addressing your specific comments or concerns about the project. You should focus on the potential environmental effects of the proposal, alternatives to the proposal (including alternative routes), and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be.

Please follow the instructions below to ensure that your comments are received and properly recorded:

- Address your letter to: Lois Cashell, Secretary, Federal Energy Regulatory Commission, 825 North Capitol St. NE., Washington, DC 20426;
- Reference Docket No. CP94–292–000;
- Send a copy of your letter to: Mr. Steven G. Grape, EA Project Manager, Federal Energy Regulatory Commission, 825 North Capitol St. NE., room 7312, Washington, DC 20426; and
- Mail your comments so that they will be received in Washington, DC on or before July 11, 1994.

If you wish to receive a copy of the EA, you should request one from Mr. Grape at the above address.

Becoming an Intervenor

In addition to involvement in the EA scoping process, you may want to become an official party to the proceeding or become an "intervenor". Among other things, intervenors have the right to receive copies of case-related Commission documents and filings by other intervenors. Likewise, each intervenor must provide copies of its filings to all other parties. If you want to become an intervenor you must file a Motion to Intervene according to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214) attached as appendix 2.

The date for filing timely motions to intervene in this proceeding has passed. Therefore, parties now seeking to file late interventions must show good cause, as required by Section 385.214(b)(3), why this time limitation should be waived. Environmental issues have been viewed as good cause for late intervention. You do not need intervenor status to have your scoping comments considered.

Additional Questions?

Additional information about the proposed project is available from Mr. Steven G. Grape, EA Project Manager, at (202) 208–1046.

Lois D. Cashell,

Secretary.

[2] The appendices referenced in this notice are not being printed in the **Federal Register**. Copies are available from the Commission's Public Reference Branch, room 3104, 941 North Capitol Street NE., Washington, DC 20426, or call (202) 208–1371. Copies of the appendices were sent to all those receiving this notice in the mail.

[Docket No. CP94–329–000, et al.]

El Paso Natural Gas Company, et al.; Natural Gas Certificate Filings

June 9, 1994.

Take notice that the following filings have been made with the Commission:

1. El Paso Natural Gas Company

[Docket No. CP94–329–000]

Take notice that a technical conference has been scheduled in the above-captioned proceeding for 10 a.m. on August 11, 1994, at the offices of the Federal Energy Regulatory Commission, 810 First Street NE., Washington, DC 20426. The purpose of the conference is to discuss matters of interest and concern relating to El Paso Natural Gas Company's (El Paso) proposal to construct and operate the North/South Transfer Project. All interested parties are invited to attend. For additional information, interested parties may call Whit Holden at (202) 208–1118.

2. Natural Gas Pipeline Company of America

[Docket No. CP94–577–000]

Take notice that on June 1, 1994, Natural Gas Pipeline Company of America (Applicant), 701 East 22nd Street, Lombard, Illinois, 60148, filed in Docket No. CP94–577–000 an application pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for authorization of the abandonment of facilities, and the construction and operation of new facilities. This proposal is part of Applicant's Amarillo Upgrade program, which began in 1982.

According to applicant the purpose of the Amarillo Upgrade Program is to increase the reliability of Applicant's services and reduce operating costs by eliminating or replacing parts of the system that are obsolete and require high operation and maintenance costs.

Specifically, Applicant requests authority to abandon the following:

(1) 8.57 miles of the original 24-inch Amarillo No. 1 mainline in Hutchinson County, Texas;

(2) One 12,000 HP engine at intermediate Compressor Station 196 in Otoe County, Nebraska;

(3) One 12,000 HP engine at intermediate Compressor Station 198 in Marion County, Iowa.

Applicant also seeks authority to construct and operate the following:

(1) 7.27 miles of 30-inch pipeline loop in Hutchinson County, Texas;

(2) 3.16 miles of 36-inch loop in Edwards County, Kansas;

(3) 10.64 miles of 36-inch pipeline loop in Jefferson County, Nebraska;

(4) One 5,500 HP compressor at Compressor Station 102 in Beaver, County, Oklahoma;

(5) One 14,500 HP compressor (by means of retrofitting an existing 12,000 HP engine to 14,500) at Compressor Station 196;

(6) One 14,500 HP compressor (by means of retrofitting an existing 12,000 HP engine to 14,500 HP at Compressor Station 198.

The total cost of construction is estimated to be $36,657,000. Abandonment is estimated to cost $998,000.

Comment date: June 30, 1994, in accordance with Standard Paragraph F at the end of this notice.

3. National Fuel Gas Supply Corporation

[Docket No. CP94–581–000]

Take notice that on June 2, 1994, National Fuel Gas Supply Corporation (National), 10 Lafayette Square, Buffalo, New York 14203, filed in Docket No. CP94–581–000, an application pursuant to section 7(b) of the Natural Gas Act for an order granting permission and approval to abandon certain underground natural gas storage field facilities at two locations in Pennsylvania, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

In its application, National proposes to abandon Well 2314 and its Well Line Q–W2314 located in National's Queen Storage Field in Hickory Township, Forest County, Pennsylvania. National states that after the field was converted to gas storage, Well 2314 was used as a storage observation well and that its present condition is such that it must be reworked or plugged. National proposes to abandon Well 2314 at an estimated total cost of $20,000.

National also proposes to abandon Wells 412–P, 413–P and 415–P, and Well Lines S–W413, S–W415, S–W416 and S–W418, all located in National's Swede Hill Storage Field in Hamilton Township, McKean County, Pennsylvania. National states that these wells and lines are located in a poor deliverability area of the Swede Hill reservoir and are no longer being utilized. National estimates the total cost of this abandonment to be $75,000.

National states that services to its customers and the performance of these storage fields would not be diminished by these abandonments.

Comment date: June 30, 1994, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or to make any protest with reference to said application should, on or before the comment date, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and/or permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be

unnecessary for applicant to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–P

[Docket No. RP94–284–000]

Algonquin Gas Transmission Company; Proposed Changes in FERC Gas Tariff

June 10, 1994.

Take notice that on June 8, 1994, Algonquin Gas Transmission Company (Algonquin) tendered for filing as part of its FERC Gas Tariff, Fourth Revised Volume No. 1, the following revised tariff sheet, with an effective date of July 1, 1994:

First Revised Sheet No. 97A

Algonquin states that the purpose of this filing is to provide for the recovery of certain transition costs associated with upstream capacity retained by Algonquin. Specifically, Algonquin seeks to recover gas supply realignment costs billed to Algonquin by Texas Eastern Transmission Corporation (Texas Eastern). Algonquin requests that the Commission waive § 154.22 of the Commission's regulations to the extent that may be necessary to place the tariff sheet into effect as requested.

Algonquin states that copies of this filing were mailed to all customers of Algonquin and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules of Practice and Procedure, 18 CFR 385.214 and 385.211 1993. All such motions or protests should be filed on or before June 17, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to becoming a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

BILLING CODE 6717–01–M

[Project No. 11303–000 Pennsylvania]

Beltzville Hydro Associates; Surrender of Preliminary Permit

June 10, 1994.

Take notice that Beltzville Hydro Associates, permittee for the Beltzville Project No. 11303, located on the Pohopoco Creek, Carbon County, Pennsylvania, has requested that its preliminary permit be terminated. The preliminary permit was issued on October 13, 1992, and would have expired on September 30, 1995. The permittee states that the project would be economically infeasible.

The permittee filed the request on June 7, 1994, and the preliminary permit for Project No. 11303 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007, in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR part 4, may be filed on the next business day.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. ER–1319–000]

Delmarva Power & Light Co.; Notice of Filing

June 10, 1994.

Take notice that on May 16, 1994 Delmarva Power & Light Company (Delmarva) tendered for filing a rate schedule providing for Partial Requirements Service to Old Dominion Electric Cooperative (ODEC). Delmarva states that the rate schedule is being filed to accommodate ODEC's termination of full requirements service and its purchase of a portion of its capacity and energy from Public Service Electric and Gas Company (PSE&G). Delmarva states that, consistent with the Settlement Agreement with ODEC in Docket No. ER93–96–000, the non-fuel revenues under the Partial Requirements rate schedule are no greater than the non-fuel revenues under the superseded Full Requirements rate schedules.

Delmarva requests that the Partial Requirements rates become effective on July 15, 1994 and suspended until January 1, 1995, when ODEC is scheduled to begin purchasing power and energy from PSE&G.

Delmarva states that a copy of the filing has been posted as required by the Commission's regulations, and a copy has been mailed to each of the customers affected by the proposed changes and to the Public Service Commissions of the States of Delaware and Maryland and the Virginia State Corporation Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before June 20, 1994. Protests will be

considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. GT94–50–000]

East Tennessee Natural Gas Company; Filing of Refund Report

June 10, 1994.

Take notice that on June 7, 1994 East Tennessee Natural Gas Company (East Tennessee) filed its report of refunds reflecting refunds to jurisdictional customers. East Tennessee states that the purpose of these refunds was to flow through to its jurisdictional customers refunds received from its former upstream supplier, Tennessee Gas Pipeline Company (Tennessee). East Tennessee received on June 3, 1994 from Tennessee a refund of amounts paid under its former CD–1 and SS contracts with Tennessee. Tennessee effectuated the refund pursuant to Article I of the Stipulation and Agreement (Stipulation) filed on June 2, 1993, as approved by the Federal Energy Regulatory Commission's (Commission or FERC) order issued on April 5, 1994 in Docket No. RP91–203 et al.

On June 3, 1994, East Tennessee states that it commenced disbursement of the refunds to its jurisdictional customers totaling $8,233,226.

East Tennessee states that copies of the filing have been mailed to all affected customers and state regulatory commissions.

Any person desiring to be heard or to make any protest with reference to said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with sections 211 and 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.211 and 385.214. All such petitions or protests should be filed on or before June 17, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to this proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file and available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 94–14605 Filed 6–15–94; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP94–283–000]

Gas Research Institute; Annual Application

June 10, 1994.

Take notice that on June 8, 1994, Gas Research Institute (GRI) filed an application requesting advance approval of its 1995–1999 Five-Year Research, Development and Demonstration (RD&D) Plan, 1995–1996 RD&D Program, and the funding of its R&D activities for 1995, pursuant to the Natural Gas Act and the Commission's Regulations, particularly 18 CFR 154.38(d)(5).

In its application, GRI proposes to increase its contract obligations to $210.4 million in 1995, an increase of 4.3% over the authorized 1994 obligations budget. GRI seeks to collect $191,688,000 through jurisdictional rates and charges during the twelve months ending December 31, 1995. This $191.7 million, plus additional funds collected on intrastate transactions, will provide the necessary cash to fund the 1995 RD&D program.

GRI proposes to fund the first year of the 1995–1996 R&D program through the following surcharges: (1) A demand/reservation surcharge on two-part rates of 21.8 cents/Dth-mo. for "high load factor customers"; (2) a demand/reservation surcharge on two-part rates of 13.4 cents/Dth-mo. for "low load factor customers"; (3) a volumetric commodity/usage surcharge of 0.85 cents for firm services involving two-part rates, and for one-part interruptible rates; (4) a special "small customer" surcharge of 2.0 cents/Dth; and (5) a surcharge of 1.57 cents/Dth-mo. for one-part, firm service outside the "small customer" class. GRI asserts that these surcharges comply with the Commission's March 22, 1993 "Order on Contested Settlement" approving, without modification, the "Stipulation and Agreement concerning Post-1993 GRI Funding Mechanism".

The Commission Staff will analyze GRI's application and prepare a Commission Staff Report. This Staff Report will be served on all parties and filed with the Commission as a public document by July 28, 1994. Comments on the Staff Report and GRI's application by all parties, except GRI, must be filed with the Commission on or before August 12, 1994. GRI's reply comments must be filed on or before August 26, 1994.

Any person desiring to be heard or to protest GRI's application, except for GRI members and state regulatory commissions, who are automatically permitted to participate in the instant proceedings as intervenors, should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with the Commission's Rules and Regulations. All such motions or protests should be filed on or before June 24, 1994. All comments and protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to this proceeding. Any person wishing to become a party, other than a GRI member or a state regulatory commission, must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

[Docket No. GT94–40–000]

Transcontinental Gas Pipe Line Corporation; Refund Report

June 10, 1994

Take notice that on May 4, 1994 Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing with the Federal Energy Regulatory Commission (Commission) a Refund Report showing a refund received from Penn-York Energy Corporation (Penn-York) and flowed through to its LSS customers in accordance with section 4 of Transco's Rate Schedule LSS. The report states that on April 29, 1994, Transco refunded $65,835.04, including $462.00 in interest, due its LSS customers for the period December 1, 1992 through November 30, 1993. The report summarizes Transco's computation of the refund pursuant to the requirements of Subsection 17.1(c) of Penn-York's FERC Gas Tariff, Third Revised Volume No. 1 dated December 1, 1992 in Docket No. RP91–68–017.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission 825 North Capitol Street, NE., Washington, DC 20426, in accordance

with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before June 17, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

Transcontinental Gas Pipe Line Corporation; Refund Report

June 10, 1994.

Take notice that on May 4, 1994, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing with the Federal Energy Regulatory Commission (Commission) a Refund Report showing a refund received from Penn-York Energy Corporation (Penn-York) and flowed through to its SS–2 customers in accordance with section 4 of Transco's Rate Schedule SS–2. The report states that on April 29, 1994, Transco refunded $144,130.54, including $1,011.65 in interest, due its SS–2 customers for the period December 1, 1992 through November 30, 1993. The report summarizes Transco's computation of the refund pursuant to the requirements of Subsection 17.1(c) of Penn-York's FERC Gas Tariff, Third Revised Volume No. 1 dated December 1, 1992 in Docket No. RP91–68–017.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before June 17, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[Docket No. RP94–285–000]

Williston Basin Interstate Pipeline Company; Tariff Revisions

June 10, 1994.

Take notice that on June 6, 1994, Williston Basin Interstate Pipeline Company (Williston Basin), tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following revised tariff sheets:

First Revised Sheet No. 249
Second Revised Sheet No. 250
Original Sheet No. 250A

Based on its experience since implementing Order No. 636 on its pipeline system, Williston Basin is submitting the above tariff sheets which reflect revised language relaxing the tolerance levels for its variance penalties.

Williston Basin respectfully requests that the above tariff sheets be made effective July 1, 1994.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before June 17, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding must file a motion to intervene. Copies of the filing are on file with the Commission and are available for public inspection.

[Docket No. QF94–112–000]

Yale University; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

June 10, 1994.

On June 2, 1994, Yale University (Applicant), of 20 Ashmun Street, New Haven, Connecticut 06520–8297, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

According to the applicant, the topping-cycle cogeneration facility will be located on the campus of Yale University in New Haven, Connecticut, and will consist of 3 combustion turbine generators and heat recovery boilers, 5 diesel generators and boilers. Steam recovered from the facility will be used in the campus. The primary energy source will be natural gas. The maximum net electric power production capacity of the facility will be approximately 21 MW. Installation of the facility began in July 1, 1993.

Any person desiring to be heard or objecting to the granting of qualifying status should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed within 30 days after the date of publication of this notice in the **Federal Register** and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[FRL 5000–6]

Notice and Open Meeting of the Negotiated Rulemaking Advisory Committee for Small Nonroad Engine Regulations

AGENCY: Environmental Protection Agency.

ACTION: FACA Committee Meeting—Negotiated Rulemaking on Small Nonroad Engine Regulations.

SUMMARY: As required by section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), EPA is giving notice of the next meeting of the Advisory Committee to negotiate a rule to reduce air emissions from small nonroad engines. The meeting is open to the public without advance registration. Agenda items for the meeting include reports from the 3 task groups and discussions of engine classification, air toxics data, and the small engine industry, and review of a draft "single text" strawman.

DATES: The committee will meet on July 26, 1994, from 11 a.m. to 6 p.m., and on July 27, 1994, from 8 a.m. to 4 p.m.

ADDRESSES: The location of the meeting will be the South Wing Conference Center, Kentucky Fair and Exposition Center, 937 Phillips Lane, Louisville, KY, 40209, (502) 367–5000.

FOR FURTHER INFORMATION CONTACT: Persons needing further information on the substantive matters of the rule should contact Betsy McCabe, National Vehicle and Fuel Emissions Laboratory, 2565 Plymouth Rd., Ann Arbor, Michigan 48105, (313) 668–4344. Persons needing further information on committee procedural matters should call Deborah Dalton, Consensus and Dispute Resolution Program, Environmental Protection Agency, 401 M Street SW. Washington, DC 20460, (202) 260–5495, or the Committee's facilitator's, Lucy Moore or John Folk-Williams, Western Network, 616 Don Gaspar, Santa Fe, New Mexico, 87501, (505) 982–9805.

Dated: June 13, 1994.

Deborah Dalton,

Designated Federal Official.

[FRL–5000–4]

Risk Assessment and Management Commission

ACTION: Notice of open meetings.

Pursuant to the Federal Advisory Committee Act, Public Law 92–463, notice is hereby given that the Risk Assessment and Management Commission, established as a Presidential Advisory Committee under section 303 of the Clean Air Act Amendments of 1990, will meet on the following dates: June 30; July 29; September 9, 1994. The June 30 and July 29 meetings will be held at the Hyatt Regency Hotel at 400 New Jersey Avenue, Washington, DC 20001. For the September 9 meeting location, please call Joanna Foellmer, 202–260–5881. The meetings are open at the public, and will begin at 9 a.m. and end no later than 5:30 p.m. Seating at the meeting will be on a first come basis.

Background

The Risk Assessment and Management Commission held its first meeting on May 16, 1994 (**Federal Register** 59/FR22615/Vol. 59, No. 83, May 2, 1994.) The Commission was established by Congress to make a full investigation of the policy implications and appropriate uses of risk assessment and risk management in regulatory programs under various Federal laws to prevent cancer and other chronic human health effects which may result from exposure to hazardous substances

It is expected that the Commission members will review and discuss the National Academy of Sciences/National Research Council/Committee on Risk Assessment of Hazardous Air Pollutants report entitled Science and Judgment in Risk Assessment (1994) during the next three meetings. If you would like a copy of this document, please write to Dr. James Reisa at the National Academy of Sciences, 2101 Constitution Avenue, NW., Washington, DC 20007. The Commission will address its scope of work, its relevance to various agencies and statutes, and various organizational matters.

For information about the Commission and copies of the agenda, please call Joanna Foellmer at 202–260–5881.

Dated: June 9, 1994.

Mary D. Nichols,

Assistance Administrator, Office of Air and Radiation.

[FRL–4999–7]

Notice of a Final List of Water Quality Limited Waterbodies in the State of Minnesota

AGENCY: Environmental Protection Agency.

ACTION: Notice of a final Clean Water Act section 303(d) list for the State of Minnesota.

SUMMARY: The purpose of this notice is to announce the United States Environmental Protection Agency's (USEPA) final decision with respect to the list required of the State of Minnesota, under section 303(d) of the Clean Water Act (CWA). On December 8, 1993, the USEPA published (58 FR 64584) a proposed list of waterbodies, subsequent to its disapproval, on August 9, 1993, of portions of the list prepared by the State of Minnesota. A total of 72 waterbodies have been identified as appropriate waterbodies for the development of total maximum daily loads (TMDLs), pursuant to section 303(d), 40 CFR part 130, and USEPA guidance, as resources permit. An additional number of waterbodies have been identified, for which implementation of a TMDL will be dependent on a variety of events or actions outside the control of the State of Minnesota. Copies of the lists may be obtained at the address provided in the addresses section.

ADDRESSES: Persons wishing to obtain a copy of the lists may do so by contacting Mr. Robert F. Pepin, U.S. Environmental Protection Agency, Region 5, Water Division, 77 West Jackson Boulevard, Chicago, Illinois 60604, telephone (312) 886–1505; or Mr. Greg Gross, Division of Water Quality, Minnesota Pollution Control Agency, 520 Lafayette Road, St Paul, Minnesota 55155, telephone (612) 296–7213.

FOR FURTHER INFORMATION CONTACT: Mr Robert F. Pepin or Mr. Greg Gross at the above addresses or telephone numbers

SUPPLEMENTARY INFORMATION: Section 303(d) of the CWA requires that the States identify lists of waterbodies for which TMDL development is appropriate. Further, section 303(d) requires that the lists developed by the States be submitted to the USEPA for review and approval or disapproval. To the extent that the USEPA disapproves a State submittal, section 303(d) of the CWA requires that the USEPA develop and publish the list. The USEPA must also assure that public participation in the formulation of a list of waterbodies is consistent with 40 CFR part 25, and may publicly notice a State submittal for that purpose as well.

The State of Minnesota had prepared several lists for the USEPA review, and had submitted and subsequently withdrawn several of these. On July 6, 1993, the USEPA received from Minnesota, a proposed list, which contained some, but not all of the waterbodies which the USEPA believed should be included on the list applicable to the State of Minnesota. As a result, the USEPA issued, on August 9, 1993, a partial approval of the list submitted by the State, approving the list to the extent that it did include waterbodies which were appropriately included on the list, but disapproving the submission in that it did not include all waterbodies which would be subject to the requirements of section 303(d).

Subsequently, USEPA developed a list of additional waterbodies which it believed were subject to the requirements of section 303(d), and published a notice to that effect on December 8, 1993 (58 FR 64584). The USEPA received written comments from

four commenters, including the Minnesota Pollution Control Agency (MPCA). These comments are available for public inspection at the address listed above.

(A) Responses to Comments

In making its final determination, the USEPA has carefully considered all comments received, and has revised its lists accordingly. In particular, changes have been made based upon the following.

(1) The MPCA commented that 23 stream segments were not identified on the proposed list, and should be included.

In alternate years, the State of Minnesota, pursuant to section 305(b) of the CWA, provides a report to Congress, on the health of waters within the State. In its 1992 report, Minnesota had identified the 23 stream segments in question, as impaired, however, the USEPA had not included these segments on its proposed list, believing the data to be old and somewhat unreliable. Upon further review, however, it is apparent that these segments are contiguous with other waterbodies included upon the USEPA's proposed list, and that these other waterbodies are scheduled for TMDL development within the next few years. As MPCA intends to develop these TMDLs for the whole waterbody, the MPCA believes that the 23 segments the USEPA had originally proposed to exclude should also be listed. The USEPA agrees.

(2) The MPCA commented that 65 segments that were identified by the USEPA in the proposed list should not be included because the data used to support listing does not reflect current conditions.

The information provided by the commenter indicates that of the 65 segments, remedial actions have been taken on 51 segments. In addition, exceedences of water quality standards were infrequent for five of the 65 segments, and did not support a conclusion that the waterbodies were impaired. Finally, the impairment determination for nine segments was based on data that were typically five to 10 years of age, and was not thought to be indicative of current conditions. The USEPA agrees that these waterbodies should not be listed pursuant to section 303(d).

(3) The MPCA commented that nine waterbodies that were identified in the proposed list should not be listed because the stated impairment is due to ubiquitous metals, for which there is no evidence, based upon biological sampling, that designated uses are impaired.

For each of these waterbodies, the MPCA provided documentation that the impairments described were based upon one or more of the following: Rare excursions of the water quality standards; ambient levels of the various constituents higher than expected for the ecoregion, but no water quality standards exceedences measured; or misinterpretation by the USEPA of the data provided in the 305(b) report. The USEPA agrees with the MPCA that cause does not exist for listing these waterbodies.

(4) The MPCA commented that approximately 245 segments of waterbodies which were included on the proposed USEPA list, should be excluded for a variety of reasons.

All of the identified segments are segments which were listed because of the presence of a fish consumption advisory for mercury or polychlorinated biphenyls (PCBs). The MPCA commented that the sole, or primary source of mercury or PCBs to these waterbodies is airborne deposition, and that where control of these sources is outside the State, the State is unable to develop a TMDL. These segments, therefore, are not appropriate candidates for TMDL development at this time. The USEPA agrees that technology based standards imposed under the Clean Air Act which affect sources external to the State of Minnesota may obviate the future need for TMDL development in these waterbodies. A separate list of these waterbody segments can be obtained by contacting the USEPA at the address provided above.

It is important to note that not all waterbodies for which fish consumption advisories exist fall into the category discussed above. There are certain waterbodies with fish consumption advisories, and for which TMDLs have been, or can be successfully developed at this time. These are not included in the 245 waterbodies on which the MPCA provided comments.

(5) Two other commenters believed that the proposed list is inadequate because it fails to identify all water quality limited segments within the State of Minnesota. Where the State has failed to do so, one of the commenters stated there is a mandatory duty to identify all water quality-limited segments, and include them on the list of waterbodies for which TMDL development is appropriate.

The USEPA interprets section 303(d) to require the identification of water quality-limited waterbodies for which TMDLs are appropriate. Such identification is to be based on existing and readily available data (40 CFR 130.7(b)(5)); consequently, there are no requirements within the Statute for additional monitoring or analysis. Since 40 CFR 130.7(d)(1) requires the biennial submission of revised section 303(d) lists to the USEPA for approval, this provision recognizes, that information will become available in the future, which can be used to revise and update the decisions made under section 303(d). This provision supports the USEPA's position that current listings should be based on currently available information. The submission every 2 years of a section 303(d) list addresses this issue by allowing changes to the lists to reflect additional identification of impaired waterbodies, and allows for removal of waterbodies once standards are attained or TMDLs developed.

Pursuant to section 305(b) of the CWA, States must prepare, on a biennial basis, a report to Congress which assesses the status of State waters. 40 CFR 130.7(b)(5) explicitly states that the section 305(b) report should be considered when developing the section 303(d) list. In preparation of the December 8, 1993, proposed list, Minnesota's 1992 305(b) report was extensively used. All waterbodies listed as impaired in Appendix 1 of that report were considered for listing. For reasons provided in the December 8, 1992, FR notice, specific comments received in response to that notice, and elsewhere in this notice some waterbodies that were listed as impaired in the Fiscal Year 1992 section 305(b) report were not included in today's list.

(6) One commenter stated that even if the only available data are older than five years, if those data indicate water quality impairments, then the subject waterbodies should be listed on the section 303(d) list.

Throughout its regulations and guidance the USEPA has consistently stated that all information should be used to develop a section 303(d) list. In using available information, however, it is imperative to consider its accuracy in order to assure that technically defensible determinations can be developed. The USEPA believes that data that are older than five years, or impairment assessments based on a subjective analysis, carry a large degree of uncertainty as to whether the impairment is still valid. As such information of this kind must be considered in light of all available information and cannot represent a prima facie basis for listing.

(7) One commenter stated that the USEPA must actively solicit all interested parties for information on which to develop a section 303(d) list.

Regulations governing the solicitation of public comment may be found at 40 CFR part 25. The USEPA believes that the publication of the proposed list in the December 8, 1993, FR notice fulfilled those requirements, and served as adequate solicitation of comment of all interested parties. In response to that publication the USEPA received four comment letters, one by a State agency and three by public interest groups. These comments have been thoroughly considered in the development of the final list.

(8) One commenter stated that the proposed list does not meet the requirements of section 303(d) because it does not contain specific, calculated TMDLs for each waterbody listed.

Section 303(d)(1)(A) requires the development of a list of waterbodies for which technology-based effluent limits are not stringent enough to achieve water quality standards. Section 303(d)(1)(C) requires the development of TMDLs for the waters listed pursuant to section 303(d)(1)(A). The USEPA has interpreted the Act to require the development of the section 303(d) list prior to actually establishing TMDLs. The USEPA believes that to delay listing until the TMDLs are all completed would either lead to deceptively short lists of waterbodies, or would delay the process indefinitely. Because TMDL development can be a complex activity, involving many years of effort particularly in cases where specific stream conditions must be analyzed, or model development and calibration must be achieved, only a few TMDLs can be developed at any particular time. Even so, it is also recognized that remedial actions can take place before a TMDL is developed, therefore the Agency believes that the listing process should go forward as the initial step in order to encourage action even though actual TMDL development may take place later. It is reasonable, therefore, to conclude that development of individual TMDLs must follow list development.

(9) One commenter stated that the proposed list does not contain any schedule for TMDL development for the next two years, and that the criteria by which the USEPA prioritized waters on the proposed list should focus on the protection human health.

The December 8, 1993, Federal Register notice announced as being available for public review and comment a proposed section 303(d) list for Minnesota consisting of 447 water quality-limited segments. The notice further provided that the priority for TMDL development reflects that contained in the September 16, 1993, section 303(d) list submitted by the Minnesota Pollution Control Agency. In that submittal, the TMDLs identified for development through April 1994 were the Minnesota River and the Redwood River. These waterbodies continue to be listed as high priority for TMDL development. Because the prioritization of TMDLs as well as the resources and personnel to develop them are largely under the control of the State, the USEPA believes it is appropriate to defer to this State prioritization. It should be noted that these priorities are subject to annual review by the USEPA and the State in the annual program planning process under 40 CFR part 130 and as a result of the biennial updates of the 305(b) lists required under 40 CFR part 131 and section 305(b) of the CWA.

(10) One commenter stated that the Mississippi River from the Minneapolis/St. Paul metropolitan area downstream to the Iowa border should be listed as high priority.

The USEPA agrees that this waterbody is an important resource. In compliance with requirements of an National Pollutant Discharge Elimination System permit issued to the Metropolitan Waste Control Commission (MWCC), studies of phosphorus, the identified pollutant of concern, are being conducted by both the MWCC and the Minnesota Pollution Control Agency on the waterbody to define better the sources of the impairments and to ascertain needed remedial actions. Current information suggests that much of the loading of phosphorus is originating in the Minnesota River basin, which is high priority for TMDL development. It is anticipated that remedial actions in the Minnesota River basin will have significant positive impact on magnitude of impairments in the Mississippi River. It is anticipated that upon the completion of the studies and implementation of additional controls required through the NPDES permit and the results of the TMDL being developed for the Minnesota River, downstream impacts on the Mississippi River will be reduced such that this portion of the River does not meet the requirements for listing under section 303(d). Therefore, this waterbody continues to be listed as low priority on the section 303(d) list.

(11) One commenter questioned why only two waterbodies were listed on the section 303(d) list.

In the December 8, 1993, FR notice, USEPA proposed a list of 447 waterbody segments. This was in addition to the two waterbodies which the State of Minnesota has identified as appropriate for TMDL development. While the USEPA agrees with the State of Minnesota, that those two waterbodies warrant listing pursuant to 303(d), the USEPA also believes, that additional waterbodies should be listed, and for that reason has proceeded with today's notice.

(12) One commenter recommended that the following waterbodies be listed on the section 303(d) list as high priority for TMDL development.

—All Minnesota Outstanding Resource Value Waters
—All Minnesota designated trout streams and trout lakes
—All Minnesota designated canoe trails
—All Federal or Minnesota designated wild, scenic, and recreational rivers
—All waterbodies within any National Wildlife Refuge
—The entire length of the Mississippi River (presumed to include sections both upstream and downstream of the Minneapolis/St. Paul metropolitan area
—Lake Superior

As stated above, the resources and personnel necessary to develop TMDLs are largely under the control of the State. In addition, the State's proximity to its public allows it to evaluate priorities in light of the public need more readily than USEPA. Consequently the USEPA believes it is appropriate to defer to the State in the matter of prioritization of waterbodies for TMDL development.

(B) Revisions to the Proposed Notice

As a result of the public comments received and continuing review of the proposed notice by the USEPA, the following changes have been made to the final identification of the section 303(d) water quality-limited segments for the State of Minnesota:

(1) The final list of waterbodies for which TMDL development would be appropriate has been revised to include the 23 additional steam segments which the State has requested be included on the list, due to proximity to, and influence upon, other waterbodies for which TMDLs are being developed

(2) Waterbodies for which fish consumption advisories exist, and for which remedial measures lie outside the control of the State of Minnesota have been separately identified.

(3) The final list of waterbodies for which TMDL development is appropriate excludes 65 stream segments included in the proposed list, for which the State has provided documentation that the information leading to the USEPA's decision to include these segments on the proposed

list was not based on the most current information, and the more current information reveals that TMDLs are no longer appropriate.

(4) The final list excludes nine stream segments identified in the State's comments which were described as meeting the designated uses, since the exceedences of numeric water quality criteria noted by the USEPA as the basis for our proposal to include these segments on the 303(d) list were due to naturally occurring background concentrations.

(C) Final Notice

This notice is being issued pursuant to section 303(d)(2) of the CWA. Under this section, the USEPA is required to publish an identification of water quality-limited segments if a state submission is disapproved. The disapproval of the Minnesota submission occurred on August 9, 1993.

This notice identifies 72 water quality limited waterbodies for which TMDL development is appropriate and further identifies three waterbodies for which TMDL development is scheduled to be initiated over the next two years. This notice further identifies 245 waterbodies for which TMDL development is not feasible at this time. This constitutes USEPA's final determination.

Dated: June 2, 1994.

David A. Ullrich,

Acting Regional Administrator.

[FR Doc. 94–14536 Filed 6–15–94; 8:45 am]

BILLING CODE 6050–60–P

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirements Submitted to Office of Management and Budget for Review

June 9, 1994.

The Federal Communications Commission has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of these submissions may be purchased from the Commission's copy contractor, International Transcription Service, Inc., 2100 M Street NW., Suite 140, Washington, DC 20037, (202) 857–3800. For further information on these submissions contact Judy Boley, Federal Communications Commission, (202) 632–0276. Persons wishing to comment on these information collections should contact Timothy Fain, Office of Management and Budget, Room 3221 NEOB, Washington, DC 20503, (202) 395–3561.

OMB Number: None.

Title: Section 76.922, Rates for the basic service tier and cable programming services tiers.

Action: Existing collection in use without OMB approval.

Respondents: State or local governments, and businesses or other for-profit (including small businesses).

Frequency of Response: On occasion reporting requirement.

Estimated Annual Burden: 300 responses; 12 hours average burden per response; 3,600 hours total annual burden.

Needs and Uses: Section 76.922 provides: (1) An eligible small system that elects to use the streamline rate reduction process must implement the required rate reduction and provide written notice of such reductions to local subscribers, the local franchising authority and the Commission; (2) the system must notify the franchising authority and its subscribers in writing that it is electing to set its regulated rates by the streamlined rate reduction process; (3) the system must provide a one month notice; (4) the rates must be implemented within thirty days after the written notification has been provided to subscribers and the local franchising authority; (5) if a complaint has been filed against the small system, they must provide a written notice stating the required rate reductions; and (6) a small system is required to give written notice of, and to implement, the rates that are produced by the streamlined rate reduction process only once. The information will be used by the Commission to determine whether or not small systems are eligible to use the streamlined rate reduction process and if so that they are in compliance with the rules and regulations of the FCC.

OMB Number: None.

Title: Section 76.934(d), Petition for extension of time.

Action: Existing collection in use without an OMB control number.

Respondents: State or local governments, businesses or other for-profit (including small businesses).

Frequency of Response: On occasion reporting requirement.

Estimated Annual Burden: 100 responses; 4 hours average burden per response; 400 hours total annual burden.

Needs and Uses: Section 76.934(d) states that small systems may obtain an extension of time to establish compliance with rate regulations provided they can demonstrate that timely compliance would result in severe economic hardship. The information will be used by the FCC and local franchise authorities to grant temporary relief to small systems who demonstrate a need for an extension of time to come into compliance with rate regulation.

OMB Number: None.

Title: Section 76.958, Notice to Commission of rate change while complaint pending.

Action: Existing collection in use without an OMB control number.

Respondents: State or local governments, businesses or other for-profit (including small businesses).

Frequency of Response: On occasion reporting requirement.

Estimated Annual Burden: 2,560 responses; .30 hours average burden per response; 768 hours total annual burden.

Needs and Uses: Section 76.958 states that a regulated cable operator that proposes to change any rate while a cable service tier complaint is pending before the Commission shall provide the Commission at least thirty days notice of the proposed change. The information will be used by FCC staff to determine whether or not a regulated cable operator carried out the correct procedures to propose change in any rate while a cable service their complaint is pending before the Commission.

OMB Number: None.

Title: Section 76.964(b), Notice to subscribers.

Action: Existing collection in use without an OMB control number.

Respondents: State or local governments, businesses or other for-profit (including small businesses).

Frequency of Response: On occasion reporting requirement.

Estimated Annual Burden: 400 responses; 1 hour average burden per response; 400 hours total annual burden.

Needs and Uses: Section 76.964(b) requires cable systems: (1) To give a thirty day written notice to both subscribers and local franchising authorities before implementing any rate or service change; (2) a notice stating the precise amount of any rate change and briefly explain in readily understandable fashion the cause of the rate change; (3) in addition to or deleting channels, each channel must be separately identified and a notice must be sent to subscribers informing them of their rights to file complaints about changes in cable programming service tier rates and services to the Commission within forty-five days. The information will be used by FCC staff to determine whether or not cable systems

are in compliance with the rules and regulations before implementing any rate or service change.

OMB Number: None.

Title: Section 76.986, "A la carte" offerings.

Action: Existing collection in use without an OMB control number.

Respondents: State or local governments, businesses or other for-profit (including small businesses).

Frequency of Response: On occasion reporting requirement.

Estimated Annual Burden: 44,800 responses; 1 hour average burden per response; 44,800 hours total annual burden.

Needs and Uses: Section 76.986 (1) that local franchising authorities may make initial decisions addressing whether a collective offering of "a la carte" channels will be treated as an unregulated service or a regulated tier. (2) franchising authority may make this initial decision within the thirty day period established for review of basic cable rates and equipment costs or within the first sixty days of an extended 120 day period; (3) franchising authority shall provide notice of its decision to the cable system and shall provide public notice of its initial decision within seven days pursuant to local procedural rules for public notice and; (4) operators or consumers may make an interlocutory appeal of the initial decision to the Commission within 14 days of the initial decisions. The information will be used by FCC staff and local franchising authorities to determine which channels a cable operator is offering on an individual, unregulated basis.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

BILLING CODE 6712–01–M

Schedule for en banc Hearing Children's Television Programming

June 9, 1994.

The schedule for the Commission's June 28, 1994, *en banc* hearing on Children's Television, MM Docket No. 93–48, is as follows:

The moderator for all of the panels is Linda Ellerbee, host of Nick News.

9:00–9:15 a.m. *Opening Statements By Commissioners*

9:15–10:45 a.m. *Panel 1: Educational & Informational Programming: Will We Know It When We See It?*

Children's Television Workshop—David Britt and Sheldon Turnipseed
Capital Cities/ABC, Inc.—Jeanette Trias
Children Now—James Steyer
Walt Disney Television—Ken Werner and Bill Nye
Fox Children's Network—Margaret Loesch
National Broadcasting Company, Inc.—Dr. Karen Hill-Scott
National Education Association—Dr. Gary Watts
World Africa Network—Phyllis Jackson
National PTA—Catherine Belter

11:00 a.m.–12:30 p.m. *Panel 2: Educational & Informational Programming: How Much Is Enough?*

American Psychological Association—Dr. Dale Kunkle
National Association of Broadcasters—Paul La Camera
Peggy Charren, Founder of ACT
Millicient Green—Correspondent for Children's Express
Interfaith Broadcasting Commission—Dr. Richard McCartney
Maryland Campaign For Kid's TV—Charlene Hughins Uhl
National Association of Television Program Executives—Bruce Johansen
Rushnell Communications and Publishing—Squire Rushnell

12:30–1:45 p.m. Lunch Break

1:45–3:15 p.m. *Panel 3: The Economics Of Providing Educational & Informational Programming For Children*

KIDSNET—Karen Jaffe
CBS, Inc.—Jonathan Rodgers
Center For Media Education—Dr. Kathryn Montgomery
Corporation For Public Broadcasting—Sheila Tate
Hastings College—Dr. Ronald Davis & Dr. James Wiest
Association of Independent Television Stations—Peter Walker
Nickelodeon—Geraldine Laybourne
Shari Lewis—Producer and Entertainer
Univision Network—Jaime Davila

The hearing will take place in the Commission Meeting Room (Room 856), Federal Communications Commission, 1919 M Street NW., Washington, DC 20554, and is open to the public. George Mason University's Microwave Television, "The Capitol Connection," will carry the hearing in its entirety beginning at 9 a.m. The hearing will also be available via satellite on Telestar 302 located at 85 degrees west: The downlink frequency is 4140 MHz and the transponder is 11 horizontal which is channel 22. Further inquiries should be directed to Ms. Julia Morelli, "The Capitol Connection," at (703) 323–3585. For the hearing impaired, an ASL interpreter will translate the hearing and the video feed will be closed captioned. Video tapes and written transcripts of the hearing will be available for a fee.

For further information about the hearing, please contact Larry Miller at (202) 418–1600. The contacts for media coverage are Maureen Peratino and Audrey Spivack at (202) 418–0500.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

First Alliance Bancorp, Inc.; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than July 11, 1994.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. First Alliance Bancorp, Inc., Marietta, Georgia; to acquire 80 percent of Interim Alliance Corporation D/B/A Alliance Finance, Smyrna, Georgia, and thereby engage in consumer finance activities pursuant to § 225.25(b)(1)(i) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, June 10, 1994.

Jennifer J. Johnson,

Associate Secretary of the Board.

[FR Doc. 94–14632 Filed 6–15–94; 8:45 am]

BILLING CODE 6210–01–F

Thomas Luther Lovett; Change in Bank Control Notice; Acquisition of Shares of Banks or Bank Holding Companies

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notice is available for immediate inspection at the Federal Reserve Bank indicated. Once the notice has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for the notice or to the offices of the Board of Governors. Comments must be received not later than July 6, 1994.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. Thomas Luther Lovett, Wrightsville, Georgia; to retain an additional 0.6 percent of the voting shares of Wrightsville Bancshares, Inc., Wrightsville, Georgia, for a total of 13.05 percent, and thereby indirectly acquire Bank of Wrightsville, Wrightsville, Georgia.

Board of Governors of the Federal Reserve System, June 10, 1994.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

SouthTrust Corporation, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than July 11, 1994.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. SouthTrust Corporation, Birmingham, Alabama, and SouthTrust of Mississippi, Inc., Birmingham, Alabama; to merge with First Jefferson Corporation, Biloxi, Mississippi, and thereby indirectly acquire The Jefferson Bank, Biloxi, Mississippi.

B. Federal Reserve Bank of Dallas (Genie D. Short, Vice President) 2200 North Pearl Street, Dallas, Texas 75201-2272:

1. Citizens State Bank Employee Stock Ownership Plan, Buffalo, Texas; to become a bank holding company by acquiring 38.1 percent of the voting shares of Citizens State Bank, Buffalo, Texas.

Board of Governors of the Federal Reserve System, June 10, 1994

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Announcement 485]

Improving Performance in Physicians' Office Laboratories

Introduction

The Centers for Disease Control and Prevention (CDC) announces the availability of fiscal year (FY) 1994 funds for a cooperative agreement to improve the quality of laboratory testing in physicians' office laboratories (POLs). The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of "Healthy People 2000," a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the priority area of Clinical Preventive Services. (For ordering a copy of "Healthy People 2000," see the section "WHERE TO OBTAIN ADDITIONAL INFORMATION.")

Authority

This program is authorized under section 317(k)(2)(D) of the Public Health Service Act [42 U.S.C. 247b(k)(2)(D)], as amended.

Smoke-Free Workplace

The Public Health Service strongly encourages all grant recipients to provide a smoke-free workplace and promote the non-use of all tobacco products. This is consistent with the PHS mission to protect and advance the physical and mental health of the American people.

Eligible Applicants

Eligible applicants are limited to non-profit professional clinical or laboratory organizations whose focus is to improve the quality of laboratory testing in POLs. Applicants must be able to demonstrate that:

1. They are laboratory medicine oriented;
2. A goal of their organization is to improve the quality of laboratory testing in POLs;
3. They have a long-standing interest in improving the performance of laboratory testing; and
4. They have a strong, specific interest in providing professional information to private practitioners with laboratories, thereby striving to improve the quality of laboratory testing in POLs

Availability of Funds

Approximately $100,000 is available in FY 1994 to fund one cooperative agreement. It is expected that the award will begin on or about September 1, 1994, and will be made for a 12-month budget period within a project period of up to three years. Funding estimates may vary and are subject to change. Continuation awards within the project period may be made on the basis of satisfactory progress and the availability of funds.

Purpose

The purpose of this cooperative agreement is to develop and provide professional and technical information and education to private practitioners with POLs, thereby helping improve the quality of laboratory testing available to the American public.

Program Requirements

In conducting the activities to achieve the purpose of the program, the recipient will be responsible for those activities listed under A. (Recipient Activities), and CDC will be responsible for those activities under B. (CDC Activities).

A. Recipient Activities

1. Nationally, provide to POL physicians training that has been designed to improve laboratory performance. In the first budget year develop training modules related to the standards as set forth in the Clinical Laboratory Improvement Amendments (CLIA), designed to train POL staff.
2. Develop and implement mechanisms for communicating information directly to POLs relating to CLIA. These communications will provide accurate, concise, and rapid information that will give physicians access to new and/or revised CLIA regulatory provisions. In the first budget year, using the laboratory test categorization computerized database established by CDC, develop an interactive software program which is user friendly and can be queried by physicians for specific tests.

B. CDC Activities

1. Provide scientific and technical expertise related to distance-based training and provide technical assistance in the development of training modules and courses related to the CLIA standards.
2. Collaborate in the development of mechanisms to communicate current and updated information relating to CLIA to POLs.
3. Provide scientific and technical assistance relating to the test categorization database and laboratory standards, and collaborate in the development of more user friendly and interactive databases for use by POLs.

Evaluation Criteria

The application will be reviewed and evaluated according to the following criteria:

1. Responsiveness to the objectives of the cooperative agreement including: (a) Applicant's understanding of the objectives of the proposed cooperative agreement; and (b) the relevance of the proposal to the stated objectives. (25 points)
2. Ability to provide staff, knowledge, and other resources required to perform the applicant's responsibilities in this project. The qualifications and time allocations of key personnel to be assigned to this project and the facilities, equipment, and other resources available for performance of this project. (25 points)
3. Methods to be used in carrying out the responsibilities of this project. Steps to be taken in planning and implementation of this project. (20 points)
4. Schedule for accomplishing the activities to be carried out in this project and methods for evaluating the accomplishments. (20 points)
5. Percentage of the U.S. POL community that can be reached by the applicant organization. (10 points)
6. Budget evaluation to the extent that it is reasonable, clearly justified, and consistent with the intended use of funds. (Not scored)

Executive Order 12372 Review

This program is not subject to the Executive Order 12372 review.

Public Health System Reporting Requirements

This program is not subject to the Public Health System Reporting Requirements.

Catalog of Federal Domestic Assistance Number

The Catalog of Federal Domestic Assistance number is 93.283.

Application Submission and Deadline

The original and two copies of the application, PHS Form 5161–1 (Revised 7.92, OMB Control Number 0937–0189), must be submitted to Elizabeth M. Taylor, Grants Management Officer,

Grants Management Branch, Procurement and Grants Office, Centers for Disease Control and Prevention (CDC), 255 East Paces Ferry Road, NE., room 300, Mailstop E16, Atlanta, Georgia 30305, on or before July 15, 1994.

1. *Deadline:* Applications shall be considered as meeting the deadline if they are:

A. Received on or before the deadline date, or

B. Sent on or before the deadline date and received in time for submission to the independent review committee. (Applicants must request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or the U.S. Postal Service. Private metered postmarks will not be acceptable as proof of timely mailing.)

2. *Late Applications:* Applications that do not meet the criteria in 1.A. or 1.B. are considered late applications. Late applications will not be considered in the current competition and will be returned to the applicant.

Where to Obtain Additional Information

If you are interested in obtaining additional information regarding this project, please refer to Announcement Number 485 and contact Manuel Lambrinos, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control and Prevention (CDC), 255 East Paces Ferry Road, NE., room 300, Mailstop E16, Atlanta, Georgia 30305, telephone (404) 842–6777, for business management technical assistance. Programmatic technical assistance may be obtained from Katherine A. Kelley, Dr.P.H., Chief, Training Branch, Centers for Disease Control and Prevention (CDC), Public Health Practice Program Office, Division of Laboratory Systems, 4770 Buford Highway, NE., Mailstop A16, Atlanta, Georgia 30341–3724, telephone (404) 488–7675.

A copy of "Healthy People 2000" (Full Report, Stock No. 017–001–00474–0) or "Healthy People 2000" (Summary Report, Stock No. 017–001–00473–1) referenced in the "Introduction" may be obtained through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325, telephone (202) 783–3238.

Dated: June 10, 1994.

Ladene H. Newton,

Acting Associate Director for Management and Operations, Centers for Disease Control and Prevention (CDC).

[FR Doc. 94–14628 Filed 6–15–94, 8:45 am]

BILLING CODE 4163–18–P

Food and Drug Administration

Request for Nominations for Voting Members on Public Advisory Panels or Committees

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is requesting nominations for voting members to serve on certain device panels of the Medical Devices Advisory Committee and on the Technical Electronic Product Radiation Safety Standards Committee in the Center for Devices and Radiological Health. Nominations will be accepted for current vacancies and for those that will or may occur through February 28, 1995.

FDA has a special interest in ensuring that women, minority groups, and individuals with disabilities are adequately represented on advisory committees and, therefore, extends particular encouragement to nominations for appropriately qualified female, minority, and physically disabled candidates.

DATES: Because scheduled vacancies occur on various dates throughout each year, no cutoff date is established for the receipt of nominations. However, when possible, nominations should be received at least 6 months before the date of scheduled vacancies for each year, as indicated in this notice.

ADDRESSES: All nominations and curricula vitae for the panels should be sent to Nancy J. Pluhowski, Center for Devices and Radiological Health (HFZ–400), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850.

All nominations and curricula vitae for the Technical Electronic Product Radiation Safety Standards Committee should be sent to Kay A. Levin (address below).

FOR FURTHER INFORMATION CONTACT: Kay A. Levin, Center for Devices and Radiological Health (HFZ–10), Food and Drug Administration, 12720 Twinbrook Pkwy., Rockville, MD 20857, 301–443–9422.

SUPPLEMENTARY INFORMATION: FDA is requesting nominations of voting members for vacancies listed below.

1. *Anesthesiology and Respiratory Therapy Devices Panel:* Six vacancies immediately, one vacancy occurring November 30, 1994; general anesthesiologists, anesthesiologists with a specialty in regional anesthesia, physicians having expertise in ventilatory support, or nurse anesthetist.

2. *Clinical Chemistry and Clinical Toxicology Devices Panel:* Three vacancies immediately, one vacancy occurring February 28, 1995; doctors of medicine or philosophy with experience in clinical chemistry, clinical toxicology, clinical pathology, clinical laboratory medicine, or oncology.

3. *Dental Products Panel.* One vacancy immediately, two vacancies occurring October 31, 1994; individuals with expertise in lasers for dental use, dental endosseous implants, temporomandibular joint implants, or bone physiology as it applies to the oral and maxillofacial area.

4. *Ear, Nose, and Throat Devices Panel:* One vacancy occurring October 31, 1994; audiologist, otolaryngologist, neurophysiologist, statistician, or electrical or biomedical engineer.

5. *Gastroenterology and Urology Devices Panel:* Three vacancies immediately, one vacancy occurring December 31, 1994; gastroenterologists, nephrologists, or urologists with expertise in pediatrics or lithotripsy, or experience in diagnosis and treatment of impotence, incontinence, and prostatism.

6. *General and Plastic Surgery Devices Panel:* Two vacancies occurring August 31, 1994; general surgeons.

7. *General Hospital and Personal Use Devices Panel:* One vacancy immediately; experts in pediatrics, internal medicine, neonatology, gerontology, infection control, or biomedical engineering.

8. *Hematology and Pathology Devices Panel:* One vacancy immediately, three vacancies occurring February 28, 1995; cytopathologists.

9. *Immunology Devices Panel:* One vacancy immediately, two vacancies occurring February 28, 1995; oncologists, medical or surgical oncologists with experience with tumor markers, or clinical immunologists.

10. *Microbiology Devices Panel:* One vacancy occurring February 28, 1995; an infectious disease clinician or expert in antimicrobial susceptibility testing devices, and/or virology testing devices, and/or biotechnology; or clinical oncologist with experience with tumor markers.

11. *Neurological Devices Panel:* Seven vacancies immediately; neurologists, biomedical engineers, interventional neuroradiologists, neurosurgeons with interest in medical devices, or persons experienced with neurological devices

with a strong background in biostatistics.

12. *Obstetrics and Gynecology Devices Panel*: Four vacancies immediately, two vacancies occurring January 31, 1995; experts in endoscopy, electrosurgery, laser surgery, and assisted reproductive technologies, contraception, and/or instrumentation used during these procedures, or reproductive endocrinology.

13. *Orthopedic and Rehabilitation Devices Panel*: One vacancy occurring August 31, 1994; orthopedic surgeon with expertise in joint structure and function, prosthetic ligament devices, joint biomechanics and implants, or spinal instrumentation; physical therapist with expertise in spinal cord injuries, neurophysiology, electrotherapy, and joint biomechanics; rheumatologist; or biomedical engineer.

14. *Radiological Devices Panel*: Four vacancies immediately, two vacancies occurring January 31, 1995; physicians and scientists with expertise in nuclear medicine, diagnostic or therapeutic radiology, mammography, thermography, transillumination, hyperthermia, bone densitometry, magnetic resonance, computed tomography, or ultrasound.

15. *Technical Electronic Product Radiation Safety Standards Committee*: One vacancy immediately, three vacancies occurring December 31, 1994; employees of governmental agencies, including State or Federal Government.

Functions

Medical Device and Dental Products Panels

The functions of the panels are to: (1) Review and evaluate available data concerning the safety and effectiveness of marketed and investigational devices; (2) advise the Commissioner of Food and Drugs regarding recommended classification of these devices into one of three regulatory categories; (3) recommend the assignment of a priority for the application of regulatory requirements for devices classified in the standards or premarket approval category; (4) advise on any possible risks to health associated with the use of devices; (5) advise on formulation of product development protocols and review premarket approval applications for those devices classified in the premarket approval category; (6) review classification of devices to recommend changes in classification as appropriate; (7) recommend exemption of certain devices from the application of portions of the Federal Food, Drug, and Cosmetic Act; (8) advise on the necessity to ban a device; and (9) respond to requests from the agency to review and make recommendations on specific issues or problems concerning the safety and effectiveness of devices.

The Dental Products Panel will also function at times as a drug advisory panel. As such, the panel reviews and evaluates available data concerning the safety and effectiveness of active ingredients, and combinations thereof, of various currently marketed dental drug products for human use, the adequacy of their labeling, and advises the Commissioner of Food and Drugs on the promulgation of monographs establishing conditions under which these drugs are generally recognized as safe and effective and not misbranded. The panel also evaluates and recommends whether various prescription drug products should be changed to over-the-counter status. The panel also evaluates data and makes recommendations concerning the approval of new dental drug products for human use.

Technical Electronic Product Radiation Safety Standards Committee

The function of the Technical Electronic Product Radiation Safety Standards Committee is to provide advice and consultation on the technical feasibility, reasonableness, and practicability of performance standards for electronic products to control the emission of radiation from such products. The committee may recommend electronic product radiation safety standards for consideration.

Qualifications

Medical Device and Dental Products Panels

Persons nominated for membership on the panels shall have adequately diversified experience appropriate to the work of the panel in such fields as clinical and administrative medicine, engineering, biological and physical sciences, statistics, and other related professions. The nature of specialized training and experience necessary to qualify the nominee as an expert suitable for appointment may include experience in medical practice, teaching, and/or research relevant to the field of activity of the panel. The particular needs at this time for each panel are shown above. The term of office is up to 4 years, depending on the appointment date.

Technical Electronic Product Radiation Safety Standards Committee

Persons nominated for the Technical Electronic Product Radiation Safety Standards Committee must be technically qualified by training and experience in one or more fields of science or engineering applicable to electronic product radiation safety. The particular needs for this committee are identified above. The term of office is up to 4 years, depending on the appointment date.

Nomination Procedures

Any interested person may nominate one or more qualified persons for membership on one or more of the advisory panels or committees. Self-nominations are also accepted. Nominations shall include a complete curriculum vitae of each nominee, current business address and telephone number, and shall state that the nominee is aware of the nomination, is willing to serve as a member, and appears to have no conflict of interest that would preclude membership. FDA will ask the potential candidates to provide detailed information concerning such matters as financial holdings, employment, and research grants and/or contracts to permit evaluation of possible sources of conflict of interest.

This notice is issued under the Federal Advisory Committee Act (5 U.S.C. app. 2) and 21 CFR part 14 relating to advisory committees.

Dated: June 10, 1994.

Linda A. Suydam,

Interim Deputy Commissioner for Policy.

[FR Doc. 94–14647 Filed 6–15–94; 8:45 am]

BILLING CODE 4160–01–F

Request for Nominations for Representatives of Consumer and Industry Interests on Public Advisory Panels or Committees

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is requesting nominations for consumer representatives and an industry representative to serve on certain device panels of the Medical Devices Advisory Committee and consumer representatives for the Technical Electronic Product Radiation Safety Standards Committee in the Center for Devices and Radiological Health. Nominations will be accepted for current vacancies and for those that will or may occur through February 28, 1995.

FDA has a special interest in ensuring that women, minority groups, individuals with disabilities, and small businesses are adequately represented on advisory committees and, therefore,

extends particular encouragement to nominations for appropriately qualified female, minority, and physically disabled candidates, and nominations from small businesses that manufacture medical devices subject to the regulations.

DATES: Nominations should be received by August 15, 1994 for vacancies listed in this notice.

ADDRESSES: All nominations and curricula vitae for consumer representatives for the medical device panels should be sent to Susan Meadows (address below).

All nominations and curricula vitae (which includes nominee's office address and telephone number) for the industry representative for the Obstetrics and Gynecology Devices Panel and the consumer representatives for the Technical Electronic Product Radiation Safety Standards Committee should be sent to Kay Levin (address below).

FOR FURTHER INFORMATION CONTACT:

Regarding consumer interests for the medical device panels: Susan K. Meadows, Office of Consumer Affairs (HFE–20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–5006.

Regarding industry interests for the Obstetrics and Gynecology Devices Panel and the consumer interests for the Technical Electronic Product Radiation Safety Standards Committee: Kay A. Levin, Food and Drug Administration, Center for Devices and Radiological Health (HFZ–10), 12720 Twinbrook Pkwy Rockville, MD 20857, 301–443–9422.

SUPPLEMENTARY INFORMATION: FDA is requesting nominations for members representing consumer and industry interests for the vacancies listed below

Committee or Panel	Approximate Date Representative is Needed	
	Consumer	Industry
Circulatory System	July 1, 1994	NV
Gastroenterology and Urology	Jan. 1, 1995	NV
General Hospital and Personal Use	Jan. 1, 1995	NV
Immunology	Mar. 1, 1995	NV
Obstetrics and Gynecology	NV	Feb. 1, 1995
Technical Electronic Product Radiation Safety Standards	IMMED (3)	NV
	Jan. 1, 1995 (1)	NV

NV = No vacancy
IMMED = Immediate vacancy

Functions

Medical Device Panels

The functions of the medical device panels are to: (1) Review and evaluate data on the safety and effectiveness of marketed and investigational devices; (2) advise the Commissioner of Food and Drugs regarding recommended classification of these devices into one of three regulatory categories; (3) recommend the assignment of a priority for the application of regulatory requirements for devices classified in the standards or premarket approval category; (4) advise on any possible risks to health associated with the use of devices; (5) advise on formulation of product development protocols and review premarket approval applications for those devices classified in the premarket approval category; (6) review classification of devices to recommend changes in classification as appropriate; (7) recommend exemption to certain devices from the application of portions of the Federal Food, Drug, and Cosmetic Act (the act); (8) advise on the necessity to ban a device; and (9) respond to requests from the agency to review and make recommendations on specific issues or problems concerning the safety and effectiveness of devices.

Technical Electronic Product Radiation Safety Standards Committee

The function of the Technical Electronic Product Radiation Safety Standards Committee is to provide advice and consultation on technical feasibility, reasonableness, and practicability of performance standards for electronic products to control the emission of radiation from such products. The committee may recommend electronic product radiation safety standards for consideration.

Consumer and Industry Representation

Medical Device Panels

Section 513 of the act, as amended by the Medical Device Amendments of 1976 (21 U.S.C. 360c), provides that each medical device panel include as members one nonvoting representative of consumer interests and one nonvoting representative of interests of the medical device manufacturing industry.

Technical Electronic Product Radiation Safety Standards Committee

Section 534(f) of the act, as amended by the Safe Medical Devices Act of 1990 (21 U.S.C. 360kk(f)), provides that the Technical Electronic Product Radiation Safety Standards Committee include five members from governmental agencies, including State or Federal Governments, five members from the affected industries, and five members from the general public, of which at least one shall be a representative of organized labor.

Nomination Procedures

Consumer Representatives

Any interested person may nominate one or more qualified persons as a member of a particular advisory committee or panel to represent consumer interests as identified in this notice. Self-nominations are also accepted. To be eligible for selection, the applicant's experience and/or education will be evaluated against Federal civil service criteria for the position to which the person will be appointed.

Nominations shall include a complete curriculum vitae of each nominee and shall state that the nominee is aware of the nomination, is willing to serve as a member, and appears to have no conflict of interest that would preclude membership. FDA will ask the potential candidates to provide detailed information concerning such matters as financial holdings, employment, and research grants and/or contracts to permit evaluation of possible sources of conflict of interest. The nomination should state whether the nominee is interested only in a particular advisory committee or panel or in any advisory committee or panel. The term of office is up to 4 years, depending on the appointment date.

Industry Representative for the Obstetrics and Gynecology Devices Panel

Any organization in the medical device manufacturing industry (industry interests) wishing to participate in the selection of an appropriate member of a particular panel may nominate one or more qualified persons to represent industry interests. Persons who nominate themselves as industrial representatives for the panels will not participate in the selection process. It is, therefore, recommended that all nominations be made by someone with an organization, trade association, or firm who is willing to participate in the selection process.

Nominees shall be full-time employees of firms that manufacture products that would come before the panel, or consulting firms that represent manufacturers. Nominations shall include a complete curriculum vitae of each nominee. The term of office is up to 4 years, depending on the appointment date.

Selection Procedures

Consumer Representatives

Selection of members representing consumer interests is conducted through procedures which include use of a consortium of consumer organizations which has the responsibility for recommending candidates for the agency's selection. Candidates should possess appropriate qualifications to understand and contribute to the committee's work.

Industry Representative for the Obstetrics and Gynecology Devices Panel

Regarding nominations for members representing the interests of industry on the Obstetrics and Gynecology Devices Panel, a letter will be sent to each person that has made a nomination, and to those organizations indicating an interest in participating in the selection process, together with a complete list of all such organizations and the nominees. This letter will state that it is the responsibility of each nominator or organization indicating an interest in participating in the selection process to consult with the others in selecting a single member representing industry interests for the panel within 60 days after receipt of the letter. If no individual is selected within 60 days, the agency will select the nonvoting member representing industry interests.

This notice is issued under the Federal Advisory Committee Act (5 U.S.C. app. 2) and 21 CFR part 14 relating to advisory committees.

Dated: June 10, 1994.

Health Care Financing Administration

Public Information Collection Requirements Submitted to the Office of Management and Budget (OMB) for Clearance

AGENCY: Health Care Financing Administration, HHS.

The Health Care Financing Administration (HCFA), Department of Health and Human Services (HHS), has submitted to OMB the following proposals for the collection of information in compliance with the Paperwork Reduction Act (Pub. L. 96–511).

1. *Type of Request:* New; *Title of Information Collection:* Evaluation of Medicare SELECT Amendments; *Form No.:* HCFA–R–164; *Use:* This is a telephone survey of Medicare beneficiaries in six states, some of whom have purchased Medicare SELECT policies. There is also a mail survey of non-SELECT Medigap insurers in the 15 States where Medicare SELECT policies may be sold; *Frequency:* One time data collection; *Respondents:* Businesses or other for-profit; *Estimated Number of Responses:* 10,288; *Average Hours Per Response:* 15 minutes (telephone interview) 30 minutes (questionnaire); *Total Estimated Burden Hours:* 4035.

2. *Type of Request:* Revision; *Title of Information Collection:* Hospital and Hospital Health Care Complex Cost Report; *Form No.:* HCFA–2552; *Use:* This form is used by Hospital Health Care Complexes to report their Health Care costs to determine amounts reimbursable for the services furnished to Medicare Beneficiaries; *Frequency:* Annually; *Respondents:* Businesses or other for-profit, Nonprofit institutions, Small businesses or organizations; *Estimated Number of Responses:* 380,560; *Average Hours Per Response:* 1 hr; *Total Estimated Burden Hours:* 380,560 (reporting) 4,053,000 (recordkeeping) 4,433,560.

Additional Information or Comments: Call the Reports Clearance Office on (410) 966–5536 for copies of the clearance request packages. Written comments and recommendations for the proposed information collections should be sent within 30 days of this notice directly to the OMB Desk Officer designated at the following address: OMB Human Resources and Housing Branch, Attention: Allison Eydt, New Executive Office Building, Room 3001, Washington, DC 20503

Dated: June 10, 1994.

John A. Streb,

Director, Management Planning and Analysis Staff, Office of Financial and Human Resources, Health Care Financing Administration.

National Institutes of Health

National Institute on Drug Abuse; Notice of Meetings

Pursuant to Public Law 92–463, notice is hereby given of the meetings of the review committees of the National Institute on Drug Abuse for July 1994.

These meetings will be open to the public for approximately one-half hour at the beginning of the first day of the meeting for announcements and reports of administrative, legislative, and program development. Attendance by the public will be limited to space available.

As indicated below in accordance with provisions set forth in section 552b(c)(4) and 552b(c)(6), title 5, U.S.C. and section 10(d) of Public Law 92–463, these meetings will be closed to the public for the review, discussion, and evaluation of individual grant applications on the dates indicted below. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Summaries of the meetings and rosters of committee members may be obtained from: Ms. Camilla L. Holland, NIDA Committee Management Officer, National Institutes of Health, Parklawn Building, room 10–42, 5600 Fishers Lane, Rockville, MD 20857 (Telephone: 301/443–2755).

Substantive program information may be obtained from the contacts whose names, room numbers, and telephone numbers are listed below.

Committee Name: Biobehavioral/Clinical Subcommittee, Drug Abuse AIDS Research Review Committee.

Meeting Date: July 12–13, 1994.

Place: Hyatt Regency Bethesda, One Bethesda Metro Center, Bethesda, Maryland 20814.

Open: July 12, 9 a.m. to 9:30 a.m.

Closed: 9:30 a.m., July 12, to adjournment on July 13.

Contact: Mary Custer, Ph.D., room 10–42, Parklawn Building, Telephone (301) 443–2620.

Committee Name: Sociobehavioral Subcommittee, Drug Abuse AIDS Research Review Committee.

Meeting Date: July 12–14, 1994.

Place: Hyatt Regency Bethesda, One Bethesda Metro Center, Bethesda, Maryland 20814.

Open: July 12, 9 a.m. to 9:30 a.m.

Closed: 9:30 a.m., July 12, to adjournment on July 14.

Contact: H. Noble Jones, room 10–22, Parklawn Building, Telephone (301) 443–9042.

Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contract the contact persons named above in advance of the meeting.

(Catalog of Federal Domestic Assistance Program Numbers: 93.277, Drug Abuse Research Scientist Development and Research Scientist Awards; 93.278, Drug Abuse National Research Service Awards for Research Training; 93.279, Drug Abuse Research Programs)

Dated: June 10, 1994.

Susan K. Feldman,

Committee Management Officer, NIH.

BILLING CODE 4140–01–M

National Institute on Drug Abuse; Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Extramural Science Advisory Board, National Institute on Drug Abuse on July 18–19, 1994, from 9 a.m. to 5 p.m. at the Marriott Suites Hotel, 6711 Democracy Blvd., Bethesda, Maryland 20817.

The Extramural Science Advisory Board will discuss NIDA's program areas and extramural programs. This meeting will be open to the public on the dates indicated above; however, attendance by the public will be limited to space available.

A summary of the meeting and a roster of committee members may be obtained from Ms. Camilla L. Holland, NIDA Committee Management Officer, National Institutes of Health, Parklawn Building, room 10–42, 5600 Fishers Lane, Rockville, Maryland 20857 (301/443–2755).

Substantive program information may be obtained from Ms. Jacqueline P. Downing, room 10A–55, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301/443–1056).

Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact the contact person named above in advance of the meeting.

Dated: June 10, 1994.

Susan K. Feldman,

Committee Management Officer, NIH.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N–94–3791]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments must be received within thirty (30) days from the date of this notice. Comments should refer to the proposal by name and should be sent to: Joseph F. Lackey, Jr., OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Kay F. Weaver, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708–0050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Ms. Weaver.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35).

The notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: June 6, 1994.

John T. Murphy,

Director, IRM Policy and Management Division.

Submission of Proposed Information Collection to OMB

Proposal: Floodplain Management (FR–865).

Office: Community Planning and Development.

Description of the Need For the Information and Its Proposed Use: 24 CFR part 55 prescribes decisionmaking procedures that applicants and grantees in certain programs must comply with before HUD assistance can be used for projects that may effect floodplains. Records must be kept and maintained by the recipients to document compliance of projects with the Executive Orders.

Form Number: None.

Respondents: State or Local Governments.

Frequency of Submission: Recordkeeping.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Recordkeeping	3,200		1		.40		1,280

Total Estimated Burden Hours: 1,280.
Status: New.

Submission of Proposed Information Collection to OMB

Proposal: Analysis of Proposed Main Construction Contract.

Office: Public and Indian Housing.

Description of the Need For the Information and Its Proposed Use: Form HUD–52396 is a comparison of actual bid cost on a conventionally developed public housing project to the approved pre-bid estimates. The form is prepared by the PHA and submitted to HUD when requesting approval for the award of the construction contract.

Form Number: HUD–52396.

Respondents: State or Local Governments and Non-Profit Institutions.

Frequency of Submission: Annually and Recordkeeping.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Annual Reporting	96		1.15		2		220
Recordkeeping	110		1		.25		28

Total Estimated Burden Hours: 248.

Status: Reinstatement, no changes.

Contact: William C. Thorson, HUD, (202) 708–4703, Joseph F. Lackey, Jr., OMB, (202) 395–7316.

Dated: June 2, 1994.

Proposal: HOME Program Evaluation—Round II Data Collection.

Office: Policy Development and Research.

Description of the Need For the Information and Its Proposed Use: The evaluation will identify the effects of the HOME program's requirements on its implementation, including how the program is being administered and which housing units, households, and neighborhoods are being assisted. This second phase of data collection will involve telephone interviews to state and local participating jurisdictions and to non-profit participants, and will focus on the use of Community-based Housing Development Organizations (CHDOs) in the HOME program.

Form Number: None.

Respondents: State or Local Governments and Non-Profit Institutions.

Frequency of Submission: One-Time.

Reporting Burden:

	Number of respondents	×	Freuency of response	×	Hours per response	=	Burden hours
Evaluation	530		1		.75		398

Total Estimated Burden Hours: 398.

Status: New.

Contact: Ruth Alahydian, HUD, (202) 708–0574, Joseph F. Lackey, Jr., OMB, (202) 395–7316.

Dated: June 2, 1994.

Proposal: Characteristics of Good HUD Multifamily Management Agents.

Office: Inspector General.

Decription of the Need For the Information and Its Proposed Use: HUD seeks to identify measurable or quantifiable characteristics of good multifamily management agents. HUD would use any identified characteristics to approve and monitor agents who manage HUD-insured and HUD held multifamily projects.

Form Number: None.

Respondents: Businesses or Other For-Profit and Small Businesses or Organizations.

Frequency of Submission: One-Time

Reporting Burden:

	Number of respondents	×	Freuency of response	×	Hours per response	=	Burden hours
Information Collection	80		1		.5		40

Total Estimated Burden Hours: 40.

Status: New.

Contact: Robert G. King, HUD, (602) 379–4681, Joseph F. Lackey, Jr., OMB, (202) 395–7316.

Dated: May 27, 1994.

Proposal: Recertification of Family Income and Composition—section 235 (b).

Office: Housing.

Description of the Need For the Information and Its Proposed Use: The forms are submitted by homeowners to mortgagees to determine their continued eligibility for assistance and to determine the amount of assistance a homeowner is to receive. The forms are also used by mortgagees to report statistical and general program data to HUD.

Form Number: HUD–93101 and 93101–A.

Respondents: Individuals or Households and Businesses or Other For-Profit.

Frequency of Submission: On Occasion and Monthly.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
HUD–93101	50,000		1.25		1		187,500
HUD–93101–A	962		12		.17		1.962

Total Estimated Burden Hours: 189,462.

Status: Extension, no changes.

Contact: Theodore Green, HUD (202) 708–1719, Joseph F. Lackey, Jr., OMB, (202) 395–7316.

Dated: May 27, 1994.

Proposal: Definition of Income, Rents and Recertification of Family Income for the Rent Supplement, section 236 and section 8 Special Allocation Programs.

Office: Housing.

Description of the Need For the Information and Its Proposed Use: The information will be used by the project owners to advise HUD and request approval of new utility allowances when the utility rate change results in a cumulative increase of 10 percent or more. If periodic adjustments to the utility allowance are not made, tenants would be required to pay a larger total tenant payment than is permissible.

Form Number: None.

Respondents: State or Local Governments, Businesses or Other For—Profit, and Non-Profit Institutions.

Frequency of Submission: On Occasion.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Periodic requests	1,200		1		0.5		500

Total Estimated Burden Hours: 600.

Status: Extension, no changes.

Contact: James J. Tahash, HUD, (202) 708–3944, Joseph F. Lackey, Jr., OMB, (202) 395–7316.

Dated: May 23, 1994.

Proposal: Preservation—Sales and Resident Homeownership.

Office: Housing.

Description of the Need for the Information and Its Proposed Use: The form will assist grant recipients in receiving grant funds through the Department's automated Line of Credit System. The form will also assist HUD in reviewing and verifying payment of grant funds.

Form Number: HUD–9739.

Respondents: Non-Profit Institutions.

Frequency of Submission: On Occasion.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
HUD–9739	25		5		.25		31

Total Estimated Burden Hours: 31.

Status: New.

Contact: Arlene Halfon, HUD, (202) 708–1142, Joseph F. Lackey, Jr., OMB, (202) 395–7316.

Dated: May 23, 1994.

Proposal: Previous Participation Certificate Joint HUD and USDA-Farmer's Home Administration Forms.

Office: Housing.

Description of the Need for the Information and Its Proposed Use: The information collected will be used to evaluate the feasibility of applications for multifamily projects with respect to previous track and experience records of the applicants as owners, managers, consultants, general contractors, and nursing home operators and administrators.

Form Number: HUD–2503 and USDA Farmer's Home 1944–37.

Respondents: Individuals or Households and Businesses or Other For-Profit.

Frequency of Submission: On Occasion.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Information Collection	11,250		1		0.6197		6.972

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AK–962–4230–05–P; AA–6677–A]

Alaska Native Claims Selection; Notice for Publication

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(a), will be issued to Koniag, Inc., Regional Native Corporation for 140.00 acres. The lands involved are in the vicinity of Larsen Bay, Alaska.

U.S. Survey No. 9458, Alaska

A notice of the decision will be published once a week, for four (4) consecutive weeks, in the Kodiak Daily Mirror. Copies of the decision may be obtained by contacting the Alaska State Office of the Bureau of Land Management, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513–7599 ((907) 271–5960).

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government or regional corporation, shall have until July 18, 1994, to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management at the address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E, shall be deemed to have waived their rights.

Terry R. Hassett,
Chief, Branch of Gulf Rim Adjudication.

Notice of Intent To Prepare an Environmental Impact Statement

AGENCY: Department of Interior, Bureau of Land Management.

ACTION: Notice of Intent to prepare an environmental impact statement; Cyprus Bagdad Copper Mine, Bagdad, Arizona.

SUMMARY: The Bureau of Land Management, Phoenix District Office, is preparing an Environmental Impact Statement for the construction of a tailings facility expansion and south waste rock disposal facility for the existing open pit copper mine at Cyprus Bagdad. The mine is located near the Town of Bagdad, in Yavapai County, Arizona. Cyprus Bagdad Copper Corporation has submitted a proposed Mine Plan of Operations to the Bureau of Land Management, as required under the Code of Federal Regulations and title V of the Federal Land and Policy Management Act (FLPMA) of 1976. The Bureau of Land Management has responsibility for analysis, review, and approval of the mining plan. Preparation of the Environmental Impact Statement will follow the Code of Federal Regulations, title 40, subpart 1500.

The mine plan proposes the expansion of the existing Mammoth tailings impoundment, the development of the Upper Mammoth tailings impoundment, and the expansion of the south waste rock disposal facility to continue mineral and mining operations at Cyprus Bagdad. The public is invited to participate in the NEPA process beginning with scoping and the identification of issues in July 1994.

DATES: Public Scoping Meetings to identify issues will be held as follows:

Tuesday, July 12 (7–9 p.m.)
Holiday Inn
3100 Andy Devine
Meeting room C
Kingman, AZ

Wednesday, July 13 (7–9 p.m.)
Yavapai College
1100 E. Sheldon St.
Bldg. 3, room 133
Prescott, AZ

Written comments relating to the identification of issues will be accepted until August 13, 1994.

ADDRESSES: Send comments to: Bureau of Land Management, Phoenix District Office, Attn: Mary Johnson, 2015 W. Deer Valley Road, Phoenix, Arizona 85027.

FOR FURTHER INFORMATION CONTACT: Mary Johnson, Project Manager, Bureau of Land Management, Phoenix District Office, 2015 W. Deer Valley Road, Phoenix, Arizona 85027 (Phone: (602) 780–8090).

SUPPLEMENTARY INFORMATION: Cyprus Bagdad Copper Mine is located near the Town of Bagdad, about 60 miles northwest of Wickenburg on State Highway 96. The existing mine is an open pit copper mine with flotation mill

tailings, low grade dump leaching, and a solvent extraction-electro winning plant.

Two tailings facilities currently contain mill wastes. The current tailings facilities are nearing capacity and will need to be closed and expanded in two years.

The expansion of the Mammoth tailings would disturb approximately 410 additional acres. The Upper Mammoth tailings impoundment would disturb approximately 1,440 acres. The south waste rock disposal area would be located in Bevering Gulch and its tributaries, and the south fork of Mineral Creek, and disturb approximately 660 acres. Planned activities would take place on a combination of lands including public and private surface and mineral lands. The proposed action involves a total of approximately 305 acres of federal surface overlying federal minerals lands, and 705 acres of state surface overlying federal minerals lands.

Potential issues include surface and groundwater quality, air quality, cultural resources, biological resources, visual resources, and mine reclamation.

The Environmental Impact Statement (EIS) will be developed by a third party contractor who has been approved by the Bureau of Land Management. The contractor will use an interdisciplinary team to develop the document. The Bureau of Land Management will have the responsibility for the review of the EIS.

Complete records of all phases of the environmental documentation process will be available for public review at the Bureau of Land Management, Phoenix District Office, 2015 W. Deer Valley Road, Phoenix, Arizona 85027, and at the Bureau of Land Management, Kingman Resource Area, 2475 Beverly Ave., Kingman, Arizona 86401.

Dated: June 9, 1994.

David J. Miller,

Acting District Manager.

Availability of An Environmental Assessment for the Land Tenure Amendment to the Safford District Resource Management Plan, Safford District, AZ

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability of environmental assessment.

SUMMARY: The Safford District, United States Department of Interior, Bureau of Land Management has prepared an Environmental Assessment of a proposed amendment to the Safford District Resource Management Plan. The amendment proposes the following changes: 1. Modify the land tenure decisions for public lands within the District made in the Safford District Resource Management Plan. Specifically this amendment will identify additional lands for potential disposal, lands for retention, lands desired for acquisition and delete some lands previously identified for acquisition. 2. Incorporate and/or modify decisions in the Phoenix District Resource Management Plan, pertaining to lands transferred to Safford District, into the Safford District Resource Management Plan. 3. Include land tenure decisions for lands in the proposed Cienega Creek Long Term Management Area. 4. Consolidate and update decisions made in the Safford and Phoenix District RMPs concerning right-of-ways, access, communication sites, utility corridors, public land withdrawals, and hazardous materials.

DATES: Comments on the environmental assessment will be accepted until July 18, 1994.

ADDRESSES: 711 14th Avenue, Safford, Arizona 85546.

FOR FURTHER INFORMATION CONTACT: Mike McQueen, Planning and Environmental Coordinator, Safford District Office, 711 14th Avenue, Safford, Arizona 85546. Telephone (602) 428–4040.

SUPPLEMENTARY INFORMATION: The need for this amendment to the Safford District Resource Management Plan is generated by the creation of a third resource area, changes in District boundaries, adjustment of resource area boundaries, designation of wilderness areas, consideration of rivers and streams for Wild and Scenic designation and tentative proposals by the private sector to acquire or exchange lands within the District.

Dated: June 8, 1994.

Melanie J. Rohrer,

Acting District Manager.

Notice of Proposed Reinstatement of Terminated Oil and Gas Lease

June 9, 1994.

Pursuant to the provisions of 30 U.S.C. 188(d) and (e), and 43 CFR 3108.2–3(a) and (b)(1), a petition for reinstatement of oil and gas lease WYW113114 for lands in Sweetwater County, Wyoming, was timely filed and was accompanied by all the required rentals accruing from the date of termination. The lessee has agreed to the amended lease terms for rentals and royalties at rates of $10.00 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessee has paid the required $500 administrative fee and $125 to reimburse the Department for the cost of the **Federal Register** notice. The lessee has met all the requirements for reinstatement of the lease as set out in Section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease WYW113114 effective October 1, 1993, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Pamela J. Lewis,

Supervisory Land Law Examiner.

BILLING CODE 4310–22–M

[CA–010–4212–14, CACA 34312]

Realty Action; Direct Sale of Public Land, Placer County, CA

SUMMARY: The following described public land is being considered for direct sale pursuant to Section 203 of the Federal Land Policy and Management Act of October 21, 1976 (43 U.S.C. 1713):

Placer County, California

T. 14N., R. 10E, M.D.M.,
Sec. 23: all Federal land (includes lots 16, 17, and 18);
Sec 34: lot 4 and all Federal land in N½N½.

Comprising 49-acres, more or less.

The above tracts are a irregularly-shaped remnants of public land that lack public access and are difficult to manage in Federal ownership; they are surrounded entirely by private land and would be sold to adjacent landowner Donald Ryan *et al* at fair market value. An additional $50.00 non-returnable mineral conveyance processing fee is required.

The tract would be transferred subject to a reservation to the United States for a right-of-way for ditches and canals. Also any rights-of-way of record would be identified as prior existing rights. All necessary clearances including clearances for archeology and for rare plants and animals would be completed prior to any conveyance of title by the United States. The proposal is consistent with the Bureau's land use

plans that support the disposal of small difficult to manage tracts.

The above described land is hereby segregated from settlement, location and entry under the public land laws and the mining laws for a period of 270 days from the date of publication of this notice in the Federal Register.

ADDRESSES: Interested parties may submit comments to the District Manager, c/o Folsom Resource Area Manager, 63 Natoma Street, Folsom, California 95630; comments must be received within 45 days from publication of this notice in the Federal Register.

FOR ADDITIONAL INFORMATION: Contact Mike Kelley at the above address or by phone at (916) 985–4474.

D.K. Swickard,

Area Manager.

BILLING CODE 4310–40–M

[NV–930–03–4210–05; N–53092]

Notice of Realty Action, Direct Sale of Public Land, Pershing County, NV

SUMMARY: The following described land has been found suitable for direct sale under sections 203 and 209 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1713 and 1719), at not less than fair market value:

Mount Diablo Meridian, Nevada

T. 28 N., R. 38 E.,
Sec. 1, S½S½NE¼, N½S½SE¼, SE¼SE¼NW¼, NE¼NE¼SW¼.
T. 28 N., R. 39 E.,
Sec. 5, Lot 4;
Sec. 6, Lots 8, 13, and 14, S½NW¼NE¼, S½NW¼NE¼.
T. 29 N., R. 39 E.,
Sec. 32, S½SW¼SW¼, S½NW¼SW¼, NE¼SW¼SW¼.

Containing approximately 319.86 acres.

The lands are not required for Federal purposes. Disposal is consistent with the Bureau's planning for this area and would be in the public's interest. This land is being offered by direct sale to Mr. Robert Vesco. It has been determined that the subject parcel contains no known mineral values, except geothermal steam and related geothermal resources and oil and gas. Acceptance of a direct sale offer will constitute an application for conveyance of those mineral interests having no known value. The applicant will be required to pay a $50.00 non-refundable filing fee for conveyance of the said mineral interests.

The land will not be offered for sale until at least 60 days after publication of this notice in the Federal Register.

FOR FURTHER INFORMATION CONTACT: Ken Detweiler, Realty Specialist, 705 East 4th Street, Winnemucca, NV 89445, telephone (702) 623–1500.

SUPPLEMENTARY INFORMATION: The public lands are being offered to Mr. Robert Vesco for agricultural purposes. Part of the subject lands are adjoining Mr. Vesco's private land and the subject lands are contiguous. The soils have been determined to be suitable for agricultural purposes. Mr. Vesco has applied to the State Water Engineer for excess surface water to irrigate the subject parcels.

The above described land is hereby segregated from appropriation under the public land laws, including the mining laws, but not from sale under the above cited statutes, for 270 days from the date of publication of this notice, or until title transfer is completed or the segregation is terminated by publication in the Federal Register, whichever occurs first.

A patent, when issued, will contain the following reservations to the United States:

1. A right-of-way thereon for ditches or canals constructed by the authority of the United States pursuant to the Act of August 30, 1890 (43 U.S.C. 945).
2. The geothermal steam, oil and gas in the land so patented.

And will be subject to:

Those rights for highway purposes granted to Pershing County for Crass Valley Road, N–53032, under the authority of Revised Statute 2477 (43 U.S.C. 932). For a period of 45 days from the date of publication of this notice in the Federal Register, interested parties may submit comments to the District Manager, Winnemucca District Office, Bureau of Land Management, 705 East 4th Street, Winnemucca, NV 89445. In the absence of timely objections, this proposal shall become the final determination of the Department of the Interior.

Dated: June 7, 1994.

Robert J. Neary,

Acting District Manager.

Reality Action; Proposed Exchange; Oregon

June 7, 1994

United States Department of the Interior, Bureau of Land Management, Salem District Office, Santiam Resource Area, 1717 Fabry Road SE, Salem, Oregon 97306.

Notice is hereby given that the Bureau of Land Management is considering a proposal to exchange lands pursuant to section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716), as amended. The exchange has been proposed by Seneca Jones Timber Company, P.O. Box 10265, Eugene, OR 97440.

The following-described public lands are being considered for transfer out of Federal ownership (the "Selected Land"):

Tsp.	Rng	Sec	Subdivision	Acres
12 S.	3 E	23	SE¼SW¼, SW¼SE¼	80.00
12 S.	3 E	27	N½NW¼SE¼, SW¼NW¼SE¼	30.00

In exchange, the United States would acquire the following-described lands from Seneca Jones Timber Company (the "Offered Land"):

Tsp.	Rng.	Sec.	Subdivision	Acres
12 S.	3 E.	33	N½NE¼;	80.00
12 S.	3 E.	34	NW¼ (portion);	50.00

Subject to valid existing rights, the above-described public lands have been segregated from appropriation under the public land laws and mineral laws for a period of five years beginning June 2, 1994.

More detailed information concerning the proposed exchange may be obtained from John Radosta, Realty Specialist,

Bureau of Land Management, Salem District Office, 1717 Fabry Road SE., Salem, OR (telephone: (503) 375–5664)

Interested parties may submit comments concerning the proposed exchange to the Santiam Area Manager at the above address. In order to be considered in the environmental assessment of the proposal, comments must be in writing to the Area Manager and be postmarked or delivered by July 29, 1994.

Paul Jeske,

Santiam Area Manager

Withdrawal of Application for the Conveyance of Federally-Owned Mineral Interests; Washington

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This action informs the public of the voluntary withdrawal of an application filed for the conveyance of the Federally-owned mineral estate by the surface estate owner and terminates the segregative effect as to the mineral interests from appropriation under the public land laws including the mining laws. The application was published in the **Federal Register** on February 25, 1994 (59 FR 9237).

EFFECTIVE DATE: July 22, 1994.

FOR FURTHER INFORMATION CONTACT: Pamela Chappel, BLM Oregon/Washington State Office, P.O. Box 2965, Portland, Oregon 97208, 503–280–7170.

SUPPLEMENTARY INFORMATION: Notice is hereby given that Willene E. Minnier, surface owner, Kettle Falls, Washington, has voluntarily withdrawn her application to purchase the Federally-owned mineral estate in the land described below:

Willamette Meridian

T. 33 N., R. 38 E.,
Sec. 7, lots 14–16.

The areas described aggregate 32.10 acres in Stevens County, Washington.

At 8:30 a.m., on July 22, 1994, the mineral interests described above will be open to appropriation under the public land laws including the mining laws.

Dated: June 7, 1994.

Robert D. DeViney, Jr.,

Acting Chief, Branch of Lands and Minerals Operations.

[CA–065–94–4333–04]

Rand Mountains—Fremont Valley Management Plan and Environmental Assessment in the California Desert District—Ridgecrest Resource Area Kern County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of the final approval, availability and implementation of the Rand Mountains—Fremont Valley Management Plan in eastern Kern County, California.

SUMMARY: Notice is hereby given that the Rand Mountains—Fremont Valley Management Plan has been approved by the Bureau of Land Management (BLM), California Department of Fish and Game (CDFG) and U.S. Fish and Wildlife Service (USFWS). This plan covers a 65,020 acre area in eastern Kern County which is important habitat for the federally listed threatened desert tortoise. This plan was necessitated by the requirements of the Endangered Species Act (EPA) to protect a threatened species in an area subject to conflicting uses.

The plan has 88 major management decisions which put restrictions on all uses in the area for the purpose of protecting the native desert tortoise population, its habitat and the area's ecosystem. These plan use restrictions include restricting off-highway vehicle (OHV) use to a maximum of 129 miles of designated vehicular routes, restricting overnight camping to designated campsites, prohibiting all competitive OHV events and restricting use of firearms except for the lawful taking of upland game birds within an area identified for such use. The existing West Rand ACEC area will be expanded by 13,120 acres and changed from a Moderate to a Limited Multiple-Use Class under the California Desert Plan. A total of 32,590 acres of the plan area will be withdrawn from mineral entry. The plan designates 44,800 acres as category 1 desert tortoise habitat. USFWS consultations will be required pursuant to section 7 of the ESA when processing any new project proposals allowed under the plan which could impact the desert tortoise.

This plan covers all public lands in the Rand Mountains-Fremont Valley Management Area which is generally bounded by the community of Randsburg, CA and U.S. Highway 395 on the east, the Garlock and Randsburg-Red Rock Roads on the north, the western edge of Koehn Dry Lake and the Desert Tortoise Natural Area on the west, and private lands encompassed by the incorporated city limites of California City, CA on the south.

ORDER: Notice is hereby given that effective July 18, 1994, the following use restrictions will be in effect on public lands in the Rand Mountains-Fremont Valley Management Area.

1. No person may use, drive or otherwise operate a motorized vehicle except on those designated routes of travel that are identified by open route signs.

2. No person may discharge a firearm at any time except shotguns and then only from September 1 through January 31st for the lawful taking of upland game birds in the upland and mountains portion of the area as identified in the plan.

3. Camping is prohibited except in the eastern portion of the management area at sites identified in the plan.

Exemptions to this order include any otherwise authorized activity or as approved by the California Desert District Manager or the Ridgecrest Area Manager. Maps identifying the plan area, plan use restrictions, and the network of designated vehicular routes of travel are available from the Ridgecrest Resource Area office.

Authority for these plan restrictions is found in 43 CFR 8364.1. Violation of these restrictions is punishable by a fine not to exceed $1,000 and/or 12 months in jail.

SUPPLEMENTARY INFORMATION: The purpose of this plan and use restrictions is to provide increased protection for the desert tortoise populations and its habitat in an important part of its range. The desert tortoise was listed as a threatened species under the ESA in 1989 and is afforded increased protection under terms of the Act and this plan. During the interim while this plan was developed, the Bureau initiated a 14 month temporary closure for the plan area and then reopened the area on November 22, 1990 to restricted use pending approval of the final plan. Since November 22, 1990, Bureau personnel along with a large group of California Off-Road Vehicle Association volunteers have worked to implement the plan decisions on an interim basis as approved through a consultation with the USFWS and January 23, 1991 **Federal Register** notice. This interim FR notice will expire upon publication of this FR notice.

A formal section 7 consultation on this plan was conducted with the USFWS and a non-jeopardy biological opinion was issued on March 10, 1993. This opinion provided additional terms and Conditions which were incorporated into the plan. The opinion

determined that this plan would result in management actions that would greatly reduce the existing magnitude of adverse impacts to the desert tortoise and its habitat.

A 10 member volunteer Technical Review Team (TRT) was instrumental in the development of this plan. Team members represented all primary interest groups, the CDFG and California City. They met regularly for three years to evaluate available data and made management recommendations for the plan. The TRT is continuing to assist in reviewing procedures for implementing the plan decisions and evaluating the plan effectiveness in protecting the plan areas desert tortoise populations.

EFFECTIVE DATE: The decision is effective July 18, 1994. This decision may be appealed to the Interior Board of Land Appeals, Office of the Secretary, in accordance with the regulations contained 43 CFR, part 4. If an appeal is taken, your notice must be filed at the Ridgecreat Resource Area office (address below) within 30 days from receipt of this decision. The appellant has the burden of showing that the decision they have appealed is in error.

FOR FURTHER INFORMATION: Copied of the final Rand Mountains-Fremont Valley Management Plan and Environmental Assessment are available from the Bureau of Land Management, Ridgecrest Resource Area, 300 South Richmond Road, Ridgecrest, CA 93555, 619–375–7125. Specific questions concerning this plan should be directed to Staff Chief Steve Smith.

Dated: June 2, 1994.

Henri R. Bisson,

District Manager.

Mount Diablo Meridian, T. 38 N., R. 12 W., sec. 9, SE¼NE¼, NE¼NE¼SE¼, N½NW¼NE¼SE¼.

The area described contains 55.00 acres in Siskiyou County.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed continuation of withdrawal may present their views in writing to the California State Director of the Bureau of Land Management.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and the Congress, who will determine whether or not the withdrawal will be continued and, if so, for how long. The final determination on the continuation of the withdrawal will be published in the **Federal Register**. The existing withdrawals will continue until such final determination is made.

Nancy J. Alex,

Chief, Lands Section.

BILLING CODE 4310–40–P

[MT–930–4210–06–P; MTM 924, MTM 27963, MTM 83069]

Proposed Withdrawal; Opportunity for Public Meeting; Extended Comment Period for Previously Proposed Withdrawals; MT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service, proposes to withdraw 1,800.10 acres of National Forest System lands for 20 years to protect the Cave Mountain Research Natural Area (RNA). This notice closes the lands for up to 2 years from location and entry under the United States mining laws. The lands will remain open to all other uses which may be made of National Forest System lands. This notice also provides an additional 60 days in which to comment on previously filed withdrawal applications for Cottonwood Creek RNA, Trapper Creek Charcoal Kilns, and Canyon Creek Charcoal Kilns.

DATES: Comments and requests for a public meeting relating to the Cave Mountain RNA should be received on or before September 14, 1994. Comments and requests for a public meeting relating to Cottonwood Creek RNA, Trapper Creek Charcoal Kilns, and Canyon Creek Charcoal Kilns should be received on or before August 15, 1994.

ADDRESSES: Comments and meeting requests should be sent to the Montana State Director, BLM, P.O. Box 36800, Billings, Montana 59107.

FOR FURTHER INFORMATION CONTACT: Sandra Ward, BLM Montana State Office, 406–255–2949.

SUPPLEMENTARY INFORMATION:

1. On May 27, 1994, the Department of Agriculture filed an application to withdraw the following described National Forest System lands from location and entry under the United States mining laws (30 U.S.C. Ch. 2), subject to valid existing rights:

Principal Meridian, Montana

Beaverhead National Forest—Cave Mountain RNA

T. 10 S., R. 1 W.,
Sec. 31, lots 3 and 4, E½ and S½SW¼;
Sec. 32, NE¼, W½, NE¼SE¼, and W½SE¼.
T. 11 S., R. 1 W.,
Sec. 5, W½NE¼ and NW¼;
Sec. 6, N½ and N½S½.

The areas described aggregate 1,800.10 acres in Madison County.

The purpose of this withdrawal is to protect a study plot for vegetative research.

2. The comment periods are being extended for an additional 60 days for three previously filed Department of Agriculture withdrawal applications for the public lands described in the Notices of Proposed Withdrawal published December 1, 1966, in 31 FR 15098, and April 10, 1974, in 39 FR 13902.

3. For a period of 90 days from the date of publication of this notice for lands described in paragraph 1 and 60 days from the date of publication of this notice for lands described in paragraph 2, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal in may present their views in writing to the Montana State Director of the Bureau of Land Management.

4. Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawals. All interested persons who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the Montana State Director within 90 days from the date of publication of this notice for lands described in paragraph 1 and 60 days from the date of publication of this notice for lands described in paragraph 2. Upon determination by the authorized officer that a public meeting will be held, a notice of time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meeting.

5. The application will be processed in accordance with the regulations set forth in 43 CFR 2300.

6. For a period of 2 years from the date of publication of this notice in the **Federal Register**, the lands described in paragraph 1 will be segregated as specified above unless the application is denied or canceled or the withdrawal is approved prior to that date. The temporary uses which will be permitted during this segregative period are those currently allowed on the existing study plot.

Dated: June 7, 1994

Dee L. Baxter,

Chief, Lands Adjudication Section.

BILLING CODE 4310–DN–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–706 (Preliminary)]

Canned Pineapple Fruit From Thailand; Import Investigations

AGENCY: United States International Trade Commission.

ACTION: Institution and scheduling of a preliminary antidumping investigation.

SUMMARY: The Commission hereby gives notice of the institution of preliminary antidumping investigation No. 731–TA–706 (Preliminary) under section 733(a) of the Tariff Act of 1930 (19 U.S.C. section 1673b(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Thailand of canned pineapple fruit,[1] provided for in subheading 2008.20.00 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value. The Commission must complete preliminary antidumping investigations in 45 days, or in this case by July 25, 1994.

For further information concerning the conduct of this investigation and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

EFFECTIVE DATE: June 8, 1994.

FOR FURTHER INFORMATION CONTACT: Brad Hudgens (202–205–3189), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. Information can also be obtained by calling the Office of Investigations' remote bulletin board system for personal computers at 202–205–1895 (N,8,1).

[1] For purposes of this investigation, canned pineapple fruit is defined as pineapple, otherwise prepared or preserved, that is cored and sliced into one of several product forms, including rings, pieces, chunks, tidbits, and crushed, and is packed into metal cans; either pineapple juice or sugar (heavy) syrup is added.

SUPPLEMENTARY INFORMATION:

Background

This investigation is being instituted in response to a petition filed on June 8, 1994, by Maui Pineapple Company, Ltd.; Kahului, Hawaii.

Participation in the Investigation and Public Service List

Persons (other than petitioners) wishing to participate in the investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in sections 201.11 and 207.10 of the Commission's rules, not later than seven (7) days after publication of this notice in the **Federal Register**. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance.

Limited Disclosure of Business Proprietary Information (BPI) Under An Administrative Protective Order (APO) and BPI Service List

Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in this preliminary investigation available to authorized applicants under the APO issued in the investigation, provided that the application is made not later than seven (7) days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference

The Commission's Director of Operations has scheduled a conference in connection with this investigation for 9:30 a.m. on June 29, 1994, at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. Parties wishing to participate in the conference should contact Brad Hudgens (202–205–3189) not later than June 27, 1994, to arrange for their appearance. Parties in support of the imposition of antidumping duties in this investigation and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the conference.

Written Submissions

As provided in sections 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before July 5, 1994, a written brief containing information and arguments pertinent to the subject matter of the investigation. Parties may file written testimony in connection with their presentation at the conference no later than three (3) days before the conference. If briefs or written testimony contain BPI, they must conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules.

In accordance with sections 201.16(c) and 207.3 of the rules, each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: This investigation is being conducted under authority of title VII, the Tariff Act of 1930, as amended. This notice is published pursuant to section 207.12 of the Commission's rules.

By order of the Commission.

Issued: June 13, 1994.

Donna R. Koehnke,

Secretary.

BILLING CODE 7020–02–P

[332–355]

North American Free-Trade Agreement: Probable Economic Effect on U.S. Industries and Consumers of Accelerated Elimination of U.S. Tariffs on Certain Articles From Mexico and Canada

AGENCY: United States International Trade Commission.

ACTION: Institution of investigation and scheduling of public hearing.

SUMMARY: Following receipt on May 26, 1994, of a request from the U.S. Trade Representative (USTR), the Commission instituted investigation No. 332–355 under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)) to advise the President, with respect to each dutiable article listed in Annex I of the USTR's notice published in the **Federal Register** of May 23, 1994 (59 FR 26686), as further identified in the supplemental document prepared by USTR, of its judgment as to the probable economic effect of the immediate elimination of the U.S. tariff, under the North American Free-Trade Agreement (NAFTA), on domestic industries producing like or directly competitive articles, and on consumers.

USTR asked that the Commission provide its advice not later than 90 days after the Commission received the request, or in this case by August 24, 1994. USTR has indicated that it may classify all or part of the Commission's report.

EFFECTIVE DATE: June 10, 1994.

FOR FURTHER INFORMATION CONTACT: The project leader, Mr. Carl Seastrum (202–205–3493), Minerals, Metals, and Miscellaneous Manufactures Division, Office of Industries, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. For information on legal aspects of the investigation contact Mr. William Gearhart of the Commission's Office of the General Counsel (202–205–3091). The media should contact Ms. Peg O'Laughlin, Director of Public Affairs (202–205–1819). For information on a product basis, contact the appropriate member of the Commission's Office of Industries, as follows:

(1) Agricultural and forest products, Mr. Rick Rhodes (202–205–3322)
(2) Chemical, energy-related, textile, apparel, and footwear products, Mr. Lee Cook (202–205–3471)
(3) Machinery and transportation, Ms. Kathy Lahey (202–205–3409)
(4) Minerals, metals, and miscellaneous manufactures, Ms. Gail Burns (202–205–2501)
(5) Electronic products, Mr. Andrew Malison (202–205–3391)

Hearing-impaired persons can obtain information on this study by contacting our TDD terminal on (202–205–1810).

Background: The USTR stated in his letter that the Governments of the United States, Mexico, and Canada have agreed to enter into consultations to consider acceleration of the elimination of the import duty on certain articles. The USTR further stated that the President is authorized by section 201(b) of the North American Free Trade Agreement Implementation Act of 1993, subject to the consultation and lay-over requirements of section 103 of the Act, to proclaim any accelerated schedule for duty elimination that may be agreed to by the United States, Mexico, and Canada under Article 302(3) of the NAFTA. One of the requirements set out in section 103 is that the President obtain advice regarding the proposed action from the United States International Trade Commission.

Public Hearing: A public hearing in connection with the investigation will be held in the Commission Hearing Room, 500 E Street SW., Washington,

DC, beginning at 9:30 a.m. on July 27, 1994, and continuing, as required, on July 28. All persons will have the right to appear by counsel or in person, to present information, and to be heard. Persons wishing to appear at the public hearing should file requests to appear not later than July 15, 1994. Prehearing briefs (original and 14 copies) should also be filed with the Secretary, United States International Trade Commission, 500 E Street, SW., Washington, DC 20436, not later than 5 p.m., July 18, 1994. Any post-hearing briefs must be filed by August 2, 1994.

Written Submissions: Interested persons are invited to submit written statements concerning the investigation. Written statements should be received by the close of business on August 2, 1994. Commercial or financial information which a submitter desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of section 201.6 of the Commission's Rules of Practice and Procedure (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. All submissions should be addressed to the Secretary at the Commission's office in Washington, DC.

Issued: June 13, 1994.

By order of the Commission.

Donna R. Koehnke,

Secretary.

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–6 (Sub-No. 360X)]

Burlington Northern Railroad Company—Abandonment Exemption—in Buffalo County, NE

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission exempts from the prior approval requirements of 49 U.S.C. 10903–10904 the abandonment by Burlington Northern Railroad Company of 3.86 miles of rail line extending between milepost 20.53 and milepost 24.39 near Kearney in Buffalo County, NE, subject to standard labor protective conditions and a public use condition. Interim trail use has been approved.

DATES: Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on July 16, 1994. Formal expressions of intent to file an offer [1] of financial assistance under 49 CFR 1152.27(c)(2) must be filed by June 24, 1994; petitions to stay must be filed by July 1, 1994; and petitions to reopen must be filed by July 11, 1994.

ADDRESSES: Send pleadings referring to Docket No. AB–6 (Sub-No. 360X) to: (1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423, and (2) Sarah J. Whitley, Burlington Northern Railroad Company, 3800 Continental Plaza, 777 Main Street, Forth Worth, TX 76102–5384.

FOR FURTHER INFORMATION CONTACT: Beryl Gordon, (202) 927–5610. [TDD for hearing impaired: (202) 927–5721.]

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289–4357/4359. (Assistance for the hearing impaired is available through TDD services (202) 927–5721.)

Decided: June 10, 1994.

By the Commission, Chairman McDonald, Vice Chairman Phillips, Commissioners Simmons and Morgan.

Sidney L. Strickland, Jr.

Secretary.

DEPARTMENT OF JUSTICE

Notice of Consent Judgment Pursuant to the Clean Air Act

In accordance with Departmental Policy, 28 CFR § 50.7, notice is hereby given that a proposed consent decree in *United States* v. *179 South Street Venture, et al.*, (D. N.J.), Civil Action No. 90–4310 (JWB), was lodged with the United States District Court for the District of New Jersey on May 25, 1994. The proposed consent decree requires the Defendants to pay a civil penalty of $74,000 jointly for violations of the Clean Air Act, 42 U.S.C. section 7401 *et seq.* (the "Act") (as amended 1977), and the National Emission Standards for Hazardous Air Pollutants for Asbestos ("Asbestos NESHAP"), 40 CFR part 61, subpart M during the removal of asbestos from pipes and a boiler in an apartment complex in East Orange, N.J. The proposed Consent Decree also provides for the following injunctive requirements: Prior to any future demolition or renovation of facilities owned or operated by Defendants, Defendants must (1) survey any facility to determine the presence of regulated asbestos containing materials ("RACM"); (2) notify EPA of any RACM, (3) establish an internal program to assure compliance with asbestos NESHAP and designate an asbestos control officer for the project; and (4) all contractors and employees who participate in demolition or renovation involving RACM must successfully complete an EPA approved course.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, written comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530 and should refer to United States v. 179 South Street Venture, *et al.*, D.O.J. Ref. No. 90–5–2–1–1494.

The proposed Consent Decree may be examined at the Office of the United States Attorney, District of New Jersey Federal Building, room 502, 970 Broad Street, Newark, New Jersey 07102 (c/o Susan Handler-Menahem); at the Region II Office of the Environmental Protection Agency, 26 Federal Plaza, room No. 437, New York, New York 10278; and at the Consent Decree Library, 1120 G Street, NW., 4th floor, Washington, DC 20005. A copy of the Consent Decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW., 4th floor, Washington, DC 20005. In requesting a copy, please enclose a check in the amount of $4.50 (25 cents per page reproduction costs) payable to Consent Decree Library.

BILLING CODE 4410–01–M

Notice of Consent Decree in Action Brought Under the Clean Air Act

In accordance with Departmental policy, 28 CFR § 50.7, notice is hereby given that a consent decree in *United States* v. *Lafarge, et al.*, Civil Action No.

4–94CV–356Y, was lodged with the United States District Court for the Northern District of Texas on May 25, 1994. This Consent Decree resolves a Complaint filed by the United States against Lafarge pursuant to section 113 of the Clean Air Act, 42 U.S.C. section 7413.

The United States Department of Justice brought this action on behalf of the U.S. Environmental Protection Agency, seeking to recover a civil penalty against defendant Lafarge for alleged violations of the Clean Air Act and the National Emission Standards for Hazardous Air Pollutants for asbestos ("the asbestos NESHAP") during the 1989 demolition of a mill building at Lafarge's Fort Worth cement manufacturing and distribution facility. As part of the settlement in this case, defendant Lafarge will pay the United States a civil penalty of $10,000 and will conduct future demolition and renovation operations in compliance with the inspection, notification, and work practice requirements of the asbestos NESHAP.

The Department of Justice will accept written comments relating to this proposed Consent Decree for thirty (30) days from the date of publication of this notice. Please address comments to the Assistant Attorney General, Environment and Natural Resources Division, Department of Justice, P.O. Box 7611, Ben Franklin Station, Washington, DC 20044 and refer to United States v. Lafarge *et al.*, DOJ number 90–5–2–1–1865.

Copies of the proposed Consent Decree may be examined at the Office of the United States Attorney, Northern District of Texas, 801 Cherry Street, suite 1700, Forth Worth, Texas 76102–3697, and at the U.S. Environmental Protection Agency, Office of the Regional Counsel, Region VI, 1445 Ross Avenue, Dallas, Texas 75202. Copies of the proposed Consent Decree may also be obtained from the Consent Decree Library, 1120 G Street, NW., Fourth floor, Washington DC 20005, (202) 624–0892. A copy of the proposed Consent Decree may be obtained by mail or in person from the Consent Decree Library. When requesting a copy of the Consent Decree, please enclose a check in the amount of $2.50 (25 cents per page reproduction costs) payable to the Consent Decree Library.

John C. Cruden,

Chief Environmental Enforcement Section, Environment and Natural Resources Division.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–29,394]

Martin Marietta Projection Display Products, Syracuse, NY; Notice of Affirmative Determination Regarding Application for Reconsideration

On May 25, 1994, after being granted a filing extension, the company requested administrative reconsideration of the Department's denial notice for workers at the subject firm. The notice was issued on March 30, 1994 and was published in the **Federal Register** on April 13, 1994 (59 FR 17570).

The company indicated that the Department's original survey was inadequate and submitted a supplemental list of bid loss customers accounting for a major portion of its 1993 sales decline.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 8th day of June 1994.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Services, Unemployment Insurance Service.

BILLING CODE 4510–30–M

[TA–W–28,842]

Thomas Cort, Inc., Philadelphia, PA; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on October 13, 1993, applicable to all workers of the subject firm. The certification notice was published in the **Federal Register** on October 29, 1993 (58 FR 58187).

At the request of the State Agency, the Department reviewed the certification for workers of the subject firm. A few workers were laid off prior to the Department's impact date of June 24, 1993. The intent of the Department's certification is to include all workers who were adversely affected by increased imports. Accordingly, the Department is amending the certification with a new impact date of January 1, 1993.

The amended notice applicable to TA–W–28,842 is hereby issued as follows:

All workers of Thomas Cort, Inc., Philadelphia, Pennsylvania engaged in the production of women's leather footwear who became totally or partially separated from employment on or after January 1, 1993 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed in Washington, DC, this 3rd day of June 1994.

Violet L. Thompson,

Deputy Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

NATIONAL LABOR RELATIONS BOARD

National Labor Relations Board Advisory Committee on Agency Procedure; Meetings

AGENCY: National Labor Relations Board.

ACTION: Notice of meetings.

SUMMARY: In accordance with the provisions of the Federal Advisory Committee Act (FACA), 5 U.S.C. app. 2 (1972), and 29 CFR § 102.136 (1993), the National Labor Relations Board has established a National Labor Relations Board Advisory Committee on Agency Procedure, the purpose of which is to provide input and advice to the Board and General Counsel on changes in Agency procedures that will expedite

case processing and improve Agency service to the public. A notice of the establishment of the Advisory Committee was published in the **Federal Register** on May 13, 1994 (59 FR 25128).

As indicated in that notice, the Committee consists of two Panels which will meet separately, one composed of Union-side representatives and the other of Management-side representatives. Pursuant to section 10(a) of FACA, the Agency hereby announces the first meetings of the Advisory Committee Panels on June 27, 1994 (Union-side), and June 29, 1994 (Management-side).

TIME AND PLACE: The meeting of the Union-side Panel of the Advisory Committee will be held at 10 a.m. on Monday, June 27, 1994, at the National Labor Relations Board, 1099 14th Street, NW., Washington, DC, in the Board Hearing Room, room 11000. The meeting of the Management-side Panel of the Advisory Committee will be held at 10 a.m. on June 29, 1994, at the same location.

AGENDA: The agenda at the meetings of both Advisory Committee Panels will be: (1) How the performance of the NLRB Administrative Law Judges can be enhanced; and (2) the issue of postal or mail ballots in NLRB elections.

PUBLIC PARTICIPATION: The meetings will be open to the public. As indicated in the Agency's prior notice, within 30 days of adjournment of the later of the Advisory Committee Panel meetings, any member of the public may present written comments to the Committee on matters considered during the meetings. Written comments should be submitted to the Committee's Management Officer and Designated Federal Official, Miguel A. Gonzalez, Executive Assistant to the Chairman, National Labor Relations Board, 1099 14th Street, NW., suite 11104, Washington, DC 20570–0001; telephone: (202) 273–2864.

FOR FURTHER INFORMATION CONTACT: Advisory Committee Management Officer and Designated Federal Official, Miguel A. Gonzalez, Executive Assistant to the Chairman, National Labor Relations Board, 1099 14th Street, NW., suite 11104, Washington, DC 20570–0001; telephone: (202) 273–2864.

Dated: June 10, 1994.

By direction of the Board.

John C. Truesdale,

Executive Secretary.

BILLING CODE 7545–01–M

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Civil and Mechanical Systems; Notice Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following meeting:

Name: Special Emphasis Panel in Civil and Mechanical Systems (#1205).

Date and Time: July 7 & 8 1994; 8:30 a.m. to 5 p.m.

Place: NSF, rm. 530, 4201 Wilson Blvd., Arlington, VA 22230.

Contact: Dr. Oscar W. Dillon/Dr. William A. Spitzig, Program Directors, (703) 306–1361.

Type of Meeting: Closed.

Purpose of Meeting: To provide advice and recommendations concerning support for research proposals submitted to the NSF for financial support.

Agenda: To review and evaluate proposals as part of the selection process for awards

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b.(c) (4) and (6) of the Government in the Sunshine Act.

Dated: June 13, 1994.

M. Rebecca Winkler,

Committee Management Officer.

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

Notice of Availability

AGENCY: Office of Management and Budget, Office of Federal Procurement Policy.

ACTION: Notice of availability of the Procurement Regulatory Activity Report, Number 10.

SUMMARY: Subsections 25(g) (1) and (2) of the Office of Federal Procurement Policy (OFPP) Act, as amended by Public Law 100–679, codified at 41 U.S.C. section 421(g), require the Administrator for Federal Procurement Policy to publish a report within six months after the date of enactment and every six months thereafter relating to the development of procurement regulations.

Accordingly, OFPP has prepared this report, which is designed to satisfy all aspects of subsections 25(g) (1) and (2) of the OFPP Act, and includes information on the status of each regulation; a description of those regulations required by statute; a description of the methods by which public comment was sought; regulations, policies, procedures, and forms under review by the OFPP; whether the regulations have paperwork requirements; the progress made in promulgating and implementing the Federal Acquisition Regulation; and such other matters as the Administrator determines to be useful.

ADDRESSES: Those persons interested in obtaining a copy of the Procurement Regulatory Activity Report may contact the Executive Office of the President Publications Service, room 2200, 725 17th Street NW., Washington, DC 20503 or phone 202–395–7332.

ADDITIONAL INFORMATION: For additional information write the Office of Federal Procurement Policy, 725 17th Street NW., Washington, DC 20503 or call 202–395–6803.

Dated: June 13, 1994.

Steven Kelman,

Administrator.

PRESIDENT'S COUNCIL ON SUSTAINABLE DEVELOPMENT

Comment on Draft Vision, Statement and Principles of Sustainable Development for the United States

SUBJECT: The President's Council on Sustainable Development (PCSD) seeks public comment on draft vision statement and principles of sustainable development for the United States.

SUMMARY: The President's Council on Sustainable Development has released its long-term vision of sustainable development and the working draft of defining principles to the public. The 15 principles are designed to give perspective on how our Nation can couple the development of a healthy economy with the preservation of our cultural and natural resources.

The PCSD is inviting interested individuals and organizations to submit comments and suggestions on the draft vision statement and principles. Public comment would enhance and assist in the process of defining what a sustainable United States will look like in the year 2050 and beyond.

The President's Council on Sustainable Development is a cooperative partnership between industry, labor, government and environmental organizations, not-for-profit groups and civil rights

organizations. To obtain a copy of the draft vision statement and principles and a public comment form, please write to the PCSD at the contact address.

CONTACT: President's Council on Sustainable Development, MS 7456–MIB, 1849 C Street, NW., Washington, DC 20240, attn: Principles.

Molly Harriss Olson,

Executive Director, President's Council on Sustainable Development.

BILLING CODE DD1100R14–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–34179; File No. SR–GSCC–94–03]

Self-Regulatory Organizations; Government Securities Clearing Corporation; Order Approving Proposed Rule Change Relating to Minimum Financial Standards for Bank Netting System Members

June 8, 1994.

On April 18, 1994, the Government Securities Clearing Corporation ("GSCC") filed with the Securities and Exchange Commission ("Commission") a proposed rule change (File No. SR–GSCC–94–03) pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act").[1] The proposed rule change lowers the minimum shareholders' equity standard for GSCC bank netting system members. The Commission published notice of the proposed rule change in the **Federal Register** on May 9, 1994.[2] No comments were received. For the reasons discussed below, the Commission is approving the proposed rule change.

I. Description

The proposed rule change allows GSCC to change the minimum shareholders' equity standard for bank netting system members. In 1989, prior to the commencement of GSCC's netting system, a minimum admission and continuance standard of $250 million in shareholders' equity was established for banks or trust companies ("banks") that are, or are applying to become, members of GSCC's netting system.[3] This level was chosen because, at the time, it encompassed roughly the one hundred largest banks in the United States and, thus, reflected GSCC's initial focus on providing its netting and attendant risk protection services to only the largest market participants.

The proposed rule change, however, lowers the minimum shareholders' equity standard for bank netting members to $100 million. This standard will help ensure that each bank netting member, while not necessarily among the largest banks in the country, is still a sizable one.

II. Discussion

The Commission believes that GSCC's proposed rule change is consistent with section 17A of the Act,[4] and in particular, sections 17A(b)(3) (A) and (F) of the Act. Sections 17A(b)(3) (A) and (F) require that a clearing agency be so organized and that its rules be designed to promote the prompt and accurate clearance and settlement of securities transactions for which it is responsible and to safeguard securities and funds in its custody or control or for which it is responsible. The Commission believes that GSCC's proposal is consistent with these goals.

The Commission believes that the proposal will facilitate broader access to the government securities market. Specifically, it will allow a greater number of banks that are active participants in the government securities market to receive the benefits of GSCC's services.

The Commission also believes that GSCC has established reasonable financial and operational requirements for the admission of bank applicants. In addition to the minimum shareholders' equity standard, GSCC will explicitly impose in its rules an additional standard on all bank netting system applicants and members. The capital ratios (*i.e.*, total risk-based ratio, tier 1 risk based ratio, and tier 1 leverage ratio) of all bank netting system applicants and members must meet the minimum levels specified by the applicable bank regulatory agency. In conjunction with this change, each bank netting member would be required to report periodically to GSCC each of its capital ratios for which its appropriate regulatory authority has established standards (or the capital ratios that it would be required to report to the Board of Governors of the Federal Reserve System ("Fed") if it were a Fed member bank).

III. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule change is consistent with the Act, and in particular with section 17A of the Act, and with the rules and regulations thereunder.

It Is Therefore Ordered, pursuant to section 19(b)(2) of the Act,[5] that the proposed rule change (File No. SR–GSCC–94–03) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Margaret H. McFarland,

Deputy Secretary.

DEPARTMENT OF STATE

Bureau of Intelligence and Research

[Public Notice 2019]

Announcement of FY 1994 Russian, Eurasian and East European Studies Grant Recipients

On March 12, 1994, the U.S. Department of State approved the December 3, 1993, recommendations o the Russian, Eurasian and East European Studies Advisory Committee for awards in the competition which ended October 1, 1993.

1. American Council of Teachers of Russian/American Council for Collaboration in Education and Language Study

Grant: $370,000

Purpose: To provide fellowships for in-country training through the Academic Year and Semester language programs and the Combined Research and Language Training program in Russian, Eurasian and East European languages.

Contact: Dan E. Davidson, Director, ACTR/ACCELS, 1776 Massachusetts Avenue NW., Suite 700, Washington, DC 20036 (202) 833–7522

2. Council on International Educational Exchange

Grant: $160,000

Purpose: To support fellowship programs for in-country advanced Russian; and Russian for Social Science, Business and Science Students.

Contact: Damon B. Smith, Deputy Executive Director, Cooperative Russian Language Program/CIEE, 205 East 42nd Street, New York, NY 10017 (212) 661–1414

3. Hoover Institution on War, Revolution and Peace at Stanford University

Grant: $200,000

[5] 15 U.S.C. section 78s(b)(2) (1988).

[6] 17 CFR § 200.30–3(a)(12).

Purpose: To support postdoctoral fellowships (6–12 months duration) and summer grants for individual research projects on Russia, Eurasia and East Europe at Hoover.
Contact: Richard F. Staar, Senior Fellow, Hoover Institution, Stanford, CA 94305–6010, (415) 723–1348

4. University of Illinois at Urbana-Champaign

Grant: $174,577
Purpose: To provide partial funding for the University's Summer Research Laboratory, and the Slavic Reference Service.
Contact: Diane P. Koenker, Program Administrator, Russian and East European Center, University of Illinois at Urbana-Champaign, 104 International Studies Building, 910 South Fifth Street, Champaign, IL 61820, (217) 333–1244

5. Institute on International Education

Grant: $150,000
Purpose: To support approximately 12–13 Professional Development Fellowships for one year for advanced graduate students and junior faculty in professional fields for research on policy analysis of East Central Europe and Eurasia.
Contact: Theresa Granza, Institute of International Education, 809 United Nations Plaza, New York, NY 10017–3580, (212) 883–8200, Fax (212) 984–5452

6. International Research and Exchanges Board

Grant: $2,250,000
Purpose: To support a variety of programs facilitating American scholarly access to Russia, Eurasia and East Europe: individual field research exchanges; predeparture orientation; long-term individual research fellowships for American graduate students; short-term travel grants; special projects; research residencies; and dissemination of field results.
Contact: Robert T. Huber, Vice President, IREX, 1616 H Street NW., Washington, DC 20006, (202) 628–8188

7. Joint Committee on Eastern Europe

Grant: $1,200,000
Purpose: To support fellowship for advanced graduate training, dissertation completion, pre- and postdoctoral research; individual and institutional language training grants; US centers in East Europe, research conferences; and the Junior Scholars' Training Seminar.
Contact: Jason Parker, Executive Associate, JCEE/American Council of Learned Societies, 228 East 45th Street, New York, NY 10017–3398 (212) 697–1505 (ext. 134/135)

8. Joint Committee on the Soviet Union and its Successor States

Grant: $1,785,980
Purpose: To support a national fellowship program for graduate training, dissertation completion, and postdoctoral research, including a professional development and retraining program; an annual workshop in underepresented fields; institutional grants for intensive training in Russian and non-Russian languages of the former Soviet Union; a research & development program; and support for the *American Bibliography for Slavic and East European Studies* (ABSEES).
Contact: Susan Bronson, Staff Associate, JCSSS/Social Science Research Council, 605 Third Avenue, New York, NY 10158 (212) 661–0280

9. National Academy of Sciences

Grant: $125,000
Purpose: To support a postdoctoral fellowship program for collaborative research between American specialists and their colleagues in the fields of public policy in the former Soviet Union and Central Europe.
Contact: Gary R. Waxmonsky, Acting Director, Office for Central Europe and Eurasia, National Academy of Sciences/National Research Council, 2101 Constitution Avenue NW., (FO 2014), Washington, DC 20418 (202) 334–2644

10. National Council for Soviet and East European Research

Grant: $2,460,000
Purpose: To conduct a national competition among American institutions of higher education and non-profit corporations in support of postdoctoral research projects on Russia, Eurasia, and East Europe.
Contact: Robert Randolph, Executive Director, NCSEER, 1755 Massachusetts Avenue NW., Suite 304, Washington, DC 20036 (202) 387–0168

11. The Woodrow Wilson Center for International Scholars

Grant: $1,109,443 ($704,440 to Kennan; $405,003 to EES)
Purpose: To support the fellowships, meetings, and publications programs of the Kennan Institute for Advanced Russian Studies and the East European activities of the East and West European Program, including the annual Junior Scholars' Training Seminar.
Contact: Blair Ruble, Director, Kennan Institute or John Lampe, Director, East European Studies, East and West European Program, The Wilson Center, 370 L'Enfant Promenade, Suite 704, Washington, DC 20024–2518 (202) 287–3400.

Dated: May 31, 1994.

Kenneth E. Roberts,

Executive Director, Russian, Eurasian and East European Studies Advisory Committee.

BILLING CODE 4710–32–M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. 93–79; Notice 3]

Fisher-Price, Inc.; Notice of Appeal of Denial of Petition for Determination of Inconsequential Noncompliance

Fisher-Price, Inc. (Fisher-Price), of East Aurora, New York, has appealed a decision by the National Highway Traffic Safety Administration (NHTSA) that denied Fisher-Price's petition that its noncompliance with Federal Motor Vehicle Safety Standard (FMVSS) No. 213, "Child Restraint Systems," be deemed inconsequential as it relates to motor vehicle safety (Docket No. 93–79; Notice 2, 59 FR 23253; May 5, 1994).

This notice of receipt of Fisher-Price's appeal is published in accordance with NHTSA regulations (49 CFR 556.7 and 556.8) and does not represent any agency decision or other exercise of judgment concerning the merits of the appeal.

Paragraph S5.7 of FMVSS No. 213 states that "[e]ach material used in a child restraint system shall conform to the requirements of S4 of FMVSS No. 302 ('Flammability of Interior Materials') (571.302)." Paragraph S4.3(a) of FMVSS No. 302 states that "[w]hen tested in accordance with S5, material described in S4.1 and S4.2 shall not burn, nor transmit a flame front across its surface, at a rate of more than 4 inches per minute."

As noted in Notice 1 (58 FR 59511, November 9, 1993) of Docket No. 93–79, Fisher-Price determined that some of its child safety seats failed to comply with FMVSS No. 213, and filed an appropriate report pursuant to 49 CFR part 573, "Defect and Noncompliance Reports." Fisher-Price petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (Act) (15 U.S.C. 1381 *et seq.*) on the basis that the noncompliance is

inconsequential as it relates to motor vehicle safety.

On May 5, 1994, NHTSA published a notice in the **Federal Register** denying Fisher-Price's petition, stating that the petitioner had not met its burden of persuasion that the noncompliance is inconsequential as it relates to motor vehicle safety. The reader is referred to that notice for a further discussion of the noncompliance and the agency's rationale in denying the petition.

On May 6, 1994, Fisher-Price submitted an appeal of the agency's decision to deny its petition. The appeal contains an analysis of the agency's decision, a summary of the supplemental information Fisher-Price submitted (which is described below), and the affidavit of Gail E. McCarthy, Ph.D, P.E., of Failure Analysis Associates (FaAA).

SUPPLEMENTARY INFORMATION: Notice 1 to this docket established a 30-day public comment period, which expired on December 9, 1993. Nevertheless, Fisher-Price submitted additional information related to its petition on three occasions: February 25, 1994, March 17, 1994, and March 24, 1994. Fisher-Price also submitted additional information with its May 6, 1994, appeal. These materials are available for public review in the NHTSA docket.

The March 17, 1994, document contained research conducted by FaAA for Fisher-Price, including burn tests and a search of the literature and accident data regarding child seat fires The submission also included a calculation of an alleged incremental risk associated with a recall of the noncompliant seats.

The March 24, 1994, document, entitled "Supporting Documentation for Evaluation of the Fire Safety of Fisher-Price, Inc. Child Restraint Shoulder Harness Webbing," contains the detailed data and test results on which the material in the March 17, 1994, document was based.

Fisher-Price's May 6, 1994, appeal raised the following points: (1) In the notice of denial, NHTSA stated that Fisher-Price "determined" that some of its child restraints failed to comply with FMVSS No. 213; Fisher-Price states that it has yet to make this determination. (2) In the notice of denial, NHTSA stated that it believes flammability requirements for child restraints should be strictly adhered to; Fisher-Price believes that NHTSA should not hold child restraints to what it perceives to be a stricter standard than is stated in the Act. (3) Fisher-Price cites the grant by NHTSA of a petition for inconsequentiality filed by PACCAR, Inc. in which tape edging on a mattress had failed FMVSS No. 302 requirements (57 FR 45868; October 5, 1992). The petition was granted by NHTSA based in part on the fact that the tape edging was a very small portion of the mattress. It also cites an appeal to a petition filed by the American Honda Motor Co., Inc. (Honda) (49 FR 15046; April 16, 1984) which was granted. The agency's rationale for granting the appeal was based in part on the fact that Honda had not received any complaints regarding the noncompliance. (4) Fisher-Price claims that the data it submitted in support of its contention that children's clothing poses a much greater risk to safety than the noncompliant webbing were not adequately refuted.

In the affidavit submitted with the appeal, Dr. McCarthy argues that: (1) The shoulder belt webbing should properly be viewed as meeting the requirements of FMVSS No. 302; (2) any noncompliance that might be deemed to exist has no impact on motor vehicle safety; and (3) possible remedial measures would create substantially greater risk of injury to children than that presented by the webbing.

Interested persons are invited to submit written data, views, and arguments on the appeal of Fisher-Price, described above. Comments should refer to the docket and notice number and be submitted to: Docket Section, National Highway Traffic Safety Administration, room 5109, 400 Seventh Street SW., Washington, DC 20590. It is requested but not required that six copies be submitted.

All comments received before the close of business on the closing date indicated below will be considered. All comments received after the closing date will also be filed and will be considered to the extent feasible. When the appeal is granted or denied, notice will be published in the **Federal Register**.

Comment closing date: July 18, 1994.

(15 U.S.C. 1417; delegations of authority at 49 CFR 1.50)

Issued on: June 10, 1994

Barry Felrice,

Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

UNITED STATES INFORMATION AGENCY

Regional Scholar Exchange Program

ACTION: Notice—Request for Proposals (RFP).

SUMMARY: The United States Information Agency (USIA) invites applications from U.S. not-for-profit organizations engaged in international exchange programs to conduct research exchanges in the humanities and social sciences of pre- and/or post-doctoral students and scholars with Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzia, Latvia, Lithuania, Moldova, the Russian Federation, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. Exchange programs must recruit nationally and select participants through an open merit-based competitive process. Only organizations with at least four years of experience in international exchange activities are eligible to apply. Both existing and new projects are eligible. These exchanges are subject to the availability of funding for Fiscal Year 1995.

Support is offered for two categories: Category A, Short-term (defined as being less than six months or the equivalent of one academic year), and/or Long-term (the equivalent of at least six months or one academic year) Research Exchanges with Armenia, Azerbaijan*, Belarus, Georgia, Kazakhstan, Kyrgyzia, Moldova, the Russian Federation, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan; and Category B, Short-term (defined as being less than six months or the equivalent of one academic year), and/or Long-term (the equivalent of at least six months or one academic year) Research Exchanges with Estonia, Latvia and Lithuania.

Each category has separate conditions and requirements which are stated in this announcement. Institutions may address one or both categories, but must submit a separate proposal for each category. Proposals for Category A may include all 12 countries, a regional grouping of countries, or one country. Proposals for Category B may include one, two or three of the listed countries The goal of the program is to ensure the broadest geographic distribution in the New Independent States, the Baltics, and the U.S. Programs should be for two-way exchanges, although they do not need to be evenly reciprocal. Organizations may request funding for one or both sides of the exchange. Proposals for programs that do not fit into either Category A or B will be considered technically ineligible.

* *Please note*: Programs with Azerbaijan are subject to the restrictions of Section 907 of the Freedom Support Act of 1992: Employees of the Government of Azerbaijan or any of its instrumentalities are excluded from participation and no U.S. participant overseas may work for the Government of Azerbaijan or any of its instrumentalities.

In addition, the Government of Azerbaijan and/or its instrumentalities will have no control in the actual selection of participants

DATES: Deadline for proposals: One original and 9 copies must be received at the U.S. Information Agency by 5 p.m. Washington, DC time on Monday, August 1, 1994. Faxed documents will not be accepted, nor will documents postmarked on August 1, 1994, but received at a later date. It is the responsibility of each grant applicant to ensure that its proposals are received by the above deadline.

Grants awarded to organizations through this competition should begin no earlier than October 1, 1994 and may extend through September 30, 1996, but must be completed by December 31, 1996. Proposals for exchanges ending after December 31, 1996 will be considered technically ineligible.

DURATION: Proposals for both categories must provide for at least three-month programs for participants, but should not exceed one year.

ANNOUNCEMENT NUMBER: E/AEE–95–02. Applications submitted under this RFP must indicate the appropriate program name, category, and the above-referenced number. This announcement number must also appear in any correspondence concerning this application.

ADDRESSES: The original and 9 copies of the completed application, including required forms, should be submitted by the deadline to: U.S. Information Agency, Reference: Regional Scholar Exchange Program, E/AEE–95–02, Grants Management Division, E/XE, room 336, 301 4th Street, SW., Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Mr. Ted Kniker at the U.S. Information Agency, 301 4th Street, SW., Academic Exchanges Division, European Branch E/AEE, room 246, Washington, DC 20547; telephone (202) 619–5341, to request detailed application packages, which include award criteria additional to this announcement, all necessary forms, and guidelines for preparing proposals, including specific budget preparation information.

SUPPLEMENTARY INFORMATION: Overall authority for these exchanges is contained in the Mutual Educational and Cultural Exchange Act of 1961, as amended, Public Law 87–256 (Fulbright-Hays Act). The purpose of the Act is "to enable the Government of the United States to increase mutual understanding between the people of the United States and people of other countries by means of educational and cultural exchange; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations * * * and thus to assist in the development of friendly, sympathetic, and peaceful relations between the United States and other countries of the world." Programs shall also "maintain their scholarly integrity and shall meet the highest standards of academic excellence or artistic achievement." Pursuant to the Bureau of Educational and Cultural Affairs' authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social and cultural life. Diversity should be interpreted in the broadest sense and encompass differences including but not limited to ethnicity, gender, religion, geographic location, socio-economic status, and physical challenges. Applicants are strongly encouraged to adhere to the advancement of this principle throughout the proposed program and within their own operations.

Overview

The Regional Scholar Exchange Program is intended to promote scholarly research by funding U.S academic exchanges of pre- and postdoctoral students and scholars (including graduate students, junior faculty, and senior scholars) with Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzia, Latvia, Lithuania, Moldova, the Russian Federation, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. Participants must be citizens of the United States, Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzia, Moldova, the Russian Federation, Tajikistan, Turkmenistan, Ukraine, or Uzbekistan (Category A) or citizens of the United States, Estonia, Latvia, or Lithuania (Category B). Within the spirit of the Mutual Education and Cultural Exchange Act of 1961, the purposes of the Regional Scholar Exchange Program are (1) to provide access by U.S. scholars to research sources in the countries listed above, (2) to provide access by scholars from these countries to research sources in the United States, and (3) to encourage scholarly cooperation in the humanities and social sciences.

Guidelines

Language Qualifications

For both categories, foreign participants must have sufficient fluency in English and U.S. participants must have sufficient fluency in the language of the host country to be able to conduct research. Escort-interpreters will not be provided, nor funded by USIA.

Institutional Commitment

Proposals must include documentation of institutional support for the proposed program in the form of signed letters of endorsement from the U.S. and foreign partners' directors, or in the form of a signed agreement by the same persons. Letters of endorsement must describe each institution's or organization's commitment and make specific reference to the proposed program, each institution's activities in support of that program, and each institution's ability to provide access to archival or manuscript repositories. Documentation of support from governmental ministries or academies will be acceptable when appropriate, replacing individual documentation from each foreign educational institution involved. Applicants must submit this documentation as part of the completed application; letters and agreements will not be accepted if sent separately to USIA. Applying institutions are expected to make their own arrangements with the appropriate foreign institutions. National ministries of educational and culture and academies of science are included as eligible foreign partner institutions.

Authorization to work in archives manuscript repositories, and to use research materials is critical for U.S scholars. Proposals should include evidence of such authorization.

Proposal Narrative

The proposal narrative describing the program must conform to the Guidelines dated April 1993 and must include any subgrants to be issued. All narratives must describe in detail the abilities of the participating organizations to adapt to the changing exchanges environments in the countries eligible for participation in this program.

Participant Selection

The proposal must include detailed descriptions of the selection processes of participants, both foreign and American. This must include procedures by which selecting officials are named. A goal for this program is to select students and scholars from geographically diverse backgrounds in the home country and place them in wide geographic distribution in the host country.

Categories A and B (Short and Long-term Research Exchange): All scholars, at a minimum, must be Ph.D. candidates and currently enrolled at or affiliated

with a university. Applicants should not have travelled on a similar grant in the last five years, or should have little opportunity to travel unless as a participant of this program. Applying organizations must demonstrate the ability to conduct competitive award programs that are national in scope. Programs must be based on an open, nationwide competition, incorporating peer group review mechanisms.

The selection process for U.S. participants must be merit based. Selection criteria for the U.S. participants must be based on: (1) Academic rigor of the participant's proposed project, including a demonstration of the need to study abroad; (2) feasibility of the participant's proposed project, including time-frame and methodology; (3) language proficiency in the language of the host country by the participant; and (4) a solid foundation of background knowledge and research through general literature available in Western repositories.

The selection process for foreign researchers should be merit based and the result of a country-wide or multi-country wide competition. Selection criteria for the foreign participants should be based on: (1) Academic rigor of the participant's proposed project, including a demonstration of the need to study abroad; (2) feasibility of the participant's proposed project, including time-frame and methodology; (3) English language proficiency by the participant; and (4) a solid foundation of background knowledge and research through general literature available in the repositories of the foreign region. Although not a requirement, preference should be given to junior faculty holding lecturing positions.

Orientation Programs

Participants should be provided with a substantive and comprehensive orientation to the countries of their visits, and proposals should describe these orientation programs, including costs, in detail.

Alumni Activities

USIA recognizes the contributions of alumni to the goals of the program and the goals of the Mutual Educational and Cultural Exchanges Act. Priority will be given to proposals which include detailed and comprehensive alumni tracking and networking plans. Electronic mail access and training may be included in any such plans.

Proposed Budget

Funding anticipated for Category A is estimated at $1,300,000, which includes all program and administrative costs. Funding anticipated for Category B is estimated at $240,000, which includes all program and administrative costs.

The following budgetary guidance applies to both Categories A and B: Project awards to U.S. organizations will be made in a wide range of amounts. The Agency reserves the right to reduce, revise or increase proposal budgets in accordance with the needs of the program. All organizations must submit a comprehensive line-item budget, the details and format of which are contained in the application packet. The budget should list all sources of support for the program fiscal year 1995 including both cash and in-kind contributions.

Allowance Costs

Grant-funded items of expenditure may include, but are not limited to, the following categories:

Categories A and B:

—International Travel (via American flag carrier);
—Domestic travel;
—Maintenance (lodging, meals, incidental expenses, etc.);
—Stipend (not to exceed $250 per month);
—Academic program costs (e.g. book allowance);
—Orientation costs (speaker honoraria are not to exceed $150 per day per speaker);
—Cultural enrichment expenses (admissions, tickets, etc.; limited to $150 per participant);
—Conference and/or other travel and lodging for cultural enrichment (not to exceed $400.00 per participant);
—Administration (salaries, benefits, communications, other direct costs and indirect costs), including administration of tax withholding and reporting as required by federal, state and local authorities and in accordance with relevant tax treaties.*;
—Taxes and visa fees;
—Application should demonstrate substantial cost-sharing (dollar and in-kind) in both program and administrative expenses, including tuition waivers and overseas partner contributions.

**Please Note:* It is required that requested administrative funds, including indirect costs and administrative expenses for orientation, not exceed 20 percent of the total amount requested from USIA; administrative expenses should be cost-shared. (See the accompanying guidelines for complete cost-sharing and auditing requirements.)

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application package, including the Guidelines for Preparing Proposals. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate geographic area office, and the budget and contracts offices. Proposals may also be reviewed by the Agency's Office of General Counsel. Funding decisions are at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for grant assistance resides with USIA's grants officer.

Review Criteria

Technically eligible applications will be competitively reviewed according to the following criteria:

a. Quality of Program Plan

Including academic rigor and excellence, thorough conception of project, demonstration of meeting participants' needs, contributions to understand the partner country, proposed follow-up, and qualifications of program staff and participants.

b. Reasonable, Feasible, and Flexible Objectives

The capacity of the organization to conduct the program. Proposals should clearly demonstrate how the institution will meet the program objectives and plan.

c. Track Record

Relevant Agency and outside assessments of the organization's experience with international programs; for organizations that have not worked with USIA, the demonstrated potential to achieve program goals will be evaluated.

d. Multiplier Effect/Impact

The positive effect of the program on long-term mutual understanding, the inclusion of maximum sharing of information, and the establishment of long-term institutional and individual linkages.

e. Value of U.S.-Partner Country Relations

The assessment by USIA's geographic area office of the need, potential impact, and significance of the project with the partner country.

f. Cost Effectiveness

Greatest return on each grant dollar, degree of cost-sharing exhibitied.

g. Diversity and Pluralism

Preference will be given to proposals that demonstrate efforts to include participants from diverse regions, and of different socio-economic and ethnic backgrounds, to the extent feasible for the applicant institutions.

h. Adherence

Of proposed activities to the criteria and conditions described above

i. Institutional Commitment

As demonstrated by financial and other support to the program.

j. Follow-On Activities

Proposals should provide a plan for continued follow-on activity (without USIA support) which insures that USIA supported programs are not isolated events.

k. Evaluation Plan

Proposals should provide a plan for evaluation by the grantee institution

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of this request for proposals does not constitute an award commitment on the part of the government. Final award cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified in writing of the results of the review process on or about September 23, 1994 All funded proposals will be subject to periodic reporting and evaluation requirements.

Options for Renewal (All Categories)

Subject to the availability of funding for FY 1996 and the satisfactory performance of grant programs, USIA may invite grantee organizations to submit proposals for renewals of awards.

Dated: June 11, 1994.

Barry Fulton,

Deputy Associate Director, Bureau of Educational and Cultural Affairs.

[FR Doc. 94–14690 Filed 6–15–94; 8:45 am]

BILLING CODE 8230–01–M

Undergraduate and Graduate Student Exchanges With the Baltic Countries, the New Independent States, and Central and Eastern Europe

ACTION: Notice—Request for Proposals (RFP).

SUMMARY: The United States Information Agency (USIA) invites applications from U.S. educational, cultural, and other not-for-profit organizations to conduct exchanges of college students with Albania, Armenia, Azerbaijan*, Belarus, Bulgaria, Croatia, the Czech Republic, Estonia, Georgia, Hungary, Kazakhstan, Kyrgyzia, Latvia, Lithuania, Macedonia, Moldova, Poland, the Republic of Slovakia, Romania, the Russian Federation, Slovenia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. These exchanges represent part of the activities of the Presidents' University Student Exchange (the 1000–1000 Student Exchange) and the Samantha Smith Memorial Exchange Program and are subject to the availability of funding. Interested applicants are urged to read the complete **Federal Register** announcement before addressing inquiries to the Office of Academic Programs, Academic Exchanges Division, European Branch or submitting their proposals. After the RFP deadline, the European Branch may not discuss this competition in any way with applicants until the final decisions are made.

Support is offered for three categories of exchange programs:

Category A: The Presidents' University Student Exchange Program (the 1000–1000 Student Exchange) with Armenia, Azerbaijan*, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzia, Latvia, Lithuania, Moldova, the Russian Federation, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan;

Category B: The Samantha Smith Memorial Exchange with Armenia, Azerbaijan*, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzia, Latvia, Lithuania, Moldova, the Russian Federation, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan; and,

Category C: The Samantha Smith Memorial Exchange with Albania, Bulgaria, Croatia, the Czech Republic, Hungary, Macedonia, Poland, the Republic of Slovakia, Romania, and Slovenia.

*Please note: Programs with Azerbaijan are subject to the restrictions of Section 907 of the Freedom Support Act of 1992. Employees of the Government of Azerbaijan or any of its instrumentalities are excluded from participation and no U.S. participant overseas may work for the Government of Azerbaijan or any of its instrumentalities. In addition, the Government of Azerbaijan and/or its instrumentalities will have no control in the actual selection of participants.

Each category has separate conditions and requirements, which are stated in this announcement. Organizations may compete in one, two or three of the categories, but must submit a separate proposal and budget for each category. If an institution submits proposals in more than one category which appear to be identical or nearly identical in content, the Agency reserves the right to consider only one of the proposals.

Organizations applying under any or all categories must follow the requirements stipulated in this RFP, the application guidelines, and any additional material specific to a given category. Failure to do so may result in a proposal being deemed technically ineligible. Programs and projects must conform with all Agency requirements and guidelines, and are subject to final review by a USIA grants officer. Proposals must be for study programs for which academic credit is given. While programs may include internships, the focus of projects should be classroom work or research. Programs designed specifically for foreign participants to teach their native language or area studies in American institutions are ineligible for support.

Eligible Applicants: Applications under Categories A, B or C for substantive academic exchanges will be accepted from accredited, degree-granting U.S. universities or colleges, including two-year community colleges university systems, and not-for-profit organizations engaged in international educational exchange programs.

DATES: Deadline for proposals: September 28, 1994. All copies of proposals for Categories A, B and C must be received at the U.S. Information Agency by 5 p.m. Washington, DC time on September 28, 1994. Faxed documents will not be accepted nor will documents postmarked on September 28, 1994, but received at a later date. It is the responsibility of each grant applicant to ensure that its proposals are received by the appropriate deadline. No funds may be expended until the grant agreement is signed with USIA's Office of Contracts.

Announcement Number: E/AEE–95–01. Applications submitted under this RFP must indicate the appropriate program name, category, and the above-referenced number. This announcement number must also appear in any correspondence concerning this application.

ADDRESSES: The original and nine (9) complete copies of the application,

including required forms, should be addressed as follows:

U.S. Information Agency,
Reference: _____
(Program Title)
Category _____
(A, B or C)

Announcement number: E/AEE–95–01, Office of Grants Management, E/XE Room 336, 301 4th Street SW., Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Ms. Effie Wingate or Mr. Ted Kniker, U.S. Information Agency, 301 4th Street SW., European Branch, Academic Exchanges Division, E/AEE Room 246, Washington, DC 20547; telephone (202) 205–0525. To request detailed application packages, which include award criteria additional to this announcement, all necessary forms, formats, guidelines for preparing proposals, and for other technical information please call (202) 619–5341. The application package will be mailed to you via regular mail. USIA will not fax the application packet or send it via express mail, nor will USIA staff accept requests to send application packets via express carriers using non-USIA account numbers.

SUPPLEMENTARY INFORMATION: Overall authority for these exchanges is contained in the Mutual Educational and Cultural Exchange Act of 1961, as amended, Public Law 87–256 (Fulbright-Hays Act). The purpose of the Act is "to enable the Government of the United States to increase mutual understanding between the people of the United States and people of other countries by means of educational and cultural exchanges; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations * * * and thus to assist in the development of friendly, sympathetic, and peaceful relations between the United States and other countries of the world." Programs shall also "maintain their scholarly integrity and shall meet the highest standards of academic excellence or artistic achievement." Pursuant to the Bureau of Educational and Cultural Affairs authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social and cultural life. It should be noted that a greater emphasis is being placed on promoting diversity in Bureau programs. Diversity should be interpreted in the broadest sense and encompass differences including but not limited to ethnicity, gender, religion, geographic location, socio-economic status, and physical challenges. Applicants are strongly encouraged to adhere to the advancement of this principle throughout the proposed program and within their own operations.

Application Notice (All Categories)

Please be advised: Proposals submitted by the same institution under Categories A, B, and C for this or previous years' competitions may not be duplicative or identical. If an organization submits more than one proposal, each proposal must sponsor different students and employ separate budgets. If organizations have been funded under previous competitions, the new proposal(s) may not be identically written to previous submissions, but should include the most recent program information. Proposals not adhering to these restrictions will be deemed technically ineligible and will not be reviewed for funding. Organizations applying for exchanges with the New Independent States are encouraged to submit only under one category, A or B.

General Requirements (All Categories)

(1) Institutional Commitment

Proposals must include documentation of institutional support for the proposed program in the form of signed letters of endorsement from the U.S. and foreign institutions' directors, or in the form of a signed agreement by the same persons. Letters of endorsement must describe each institution's or organization's commitment and make specific reference to the proposed program and each institution's activities in support of that program. Documentation of support from governmental ministries or academies will be acceptable when appropriate, replacing individual documentation from each foreign educational institution involved. Applicants must submit this documentation as part of the completed application. Applying institutions are expected to make their own arrangements with the appropriate foreign institutions.

(2) Orientation Programs

Participating students should be provided with a substantive and comprehensive orientation to the country where they will be studying, and proposals should describe these programs, including cost, in detail.

(3) Visas

All foreign participants must be sponsored under an Exchange Visitor Program on a J visa. Programs must comply with J visa regulations and should reference this adherence in the proposal narrative. Applicants should demonstrate tax regulation adherence in the proposal narrative and budget notes.

(4) Taxes

Administration of the grant awards must be in compliance with reporting and withholding regulations for federal, state, or local taxes as applicable. Recipient organizations should demonstrate tax regulation adherence in the proposal narrative and budget.

(5) Participant Tracking

Proposals should provide a plan showing how organizations will track participants after their return to their home countries upon completion of the program. Organizations should chart the progress of the program's alumni in their academic and professional careers and establish a system for distributing periodic updates of such information among both current participants and alumni of the program.

(6) Budget

All organizations must submit a comprehensive line item budget, the details and format of which are contained in the application package. The Agency reserves the right to increase, decrease or revise proposal budgets in accordance with the needs of the program. Grant-funded items of expenditure may include, but are not limited to, the following categories:

Program Costs

—Round trip travel to and from their home city to international point of departure (if applicable);
—International Travel (via American flag carrier);
—Domestic travel to and from host institution;
—Excursionary travel and lodging for cultural enrichment (not to exceed $200.00 per participant);
—Maintenance and per diem;
—Academic program costs (e.g. tuition, book allowance);
—ESL training (if necessary);
—Travel and maintenance costs for accompanying faculty or resident directors; for no more than one program supervisor per ten students;
—Participant recruitment costs;
—Orientation costs (speaker honoraria are not to exceed $150 per day per speaker);
—Cultural enrichment expenses (admissions, tickets, etc., limited to $150 per participant);
—Medical insurance for participants (participants are covered by the Agency's self-insurance policy when USIA is funding over fifty percent of the total cost of the projects);
—Withholding for taxes; and
—Visa fees.

Administrative Costs—Not To Exceed 20% of the Requested Budget

—Salaries and benefits;
—Communications (e.g. fax, telephone, postage);
—Office Supplies;
—Administration of tax withholding and reporting as required by Federal, State and local authorities and in accordance with relevant tax treaties; recipient organization should demonstrate tax regulation adherence in the proposal narrative and budget;
—Other Direct Costs;
—All Indirect Costs.

Please note: It is required that requested administrative funds, including indirect costs and administrative expenses for orientation, not exceed 20 percent of the total amount requested from USIA; administrative expenses should be cost-shared.

Applications should demonstrate substantial cost-sharing (dollar and in-kind) in both program and administrative expenses, including tuition waivers and overseas partner contributions. (See the accompanying guidelines for complete cost-sharing and auditing requirements.)

Additional Criteria for Category A

President's University Student Exchange Program (the 1000–1000 Student Exchange) With the Baltic Countries and the New Independent States

Grant funding under this category is intended to enhance and expand the scope of U.S. academic exchanges with undergraduate and graduate students from Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyia, Latvia, Lithuania, Moldova, the Russian Federation, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. For accident year 1995–96 the intention is to exchange 1,000 students in each direction. Priority will be given to applications from international exchange organizations and consortia of universities that have a demonstrated ability to exchange students from multiple countries in the former USSR. Preference will then be given to applications from single institutions for programs outside the Russian Federation. For projects in the Russian Federation, preference will be given to applications involving multiple foreign partner institutions, especially outside of Moscow and St. Petersburg. Both existing and new projects are eligible.

(1) Awards

Project awards to U.S. organizations will be made in a wide range of amounts. The Agency reserves the right to reduce, revise or increase proposal budgets in accordance with the needs of the program. For organizations with less than four years of experience in international exchange activities, grants will be limited to a maximum of $60,000, and proposed budgets should not exceed this amount.

(2) Participants

Participants must be citizens either of the U.S. or of the host country. Undergraduate students are defined as students who have not received their baccalaureates prior to participation in this program. Graduate students for this program should be studying at the equivalent of the Master's degree level. Doctoral candidates are not eligible. Students in all academic fields are eligible; students of agricultural are especially encouraged to apply (please note special conditions for agricultural programs below). Projects that include graduate students must delineate between the number of graduate and undergraduate participants, separately describe the academic programs, and include for each a separate line item in the budget. All projects must include undergraduate students. It is important that the selection process ensure equal opportunities for both male and female students.

(3) Language Qualifications

Students should have sufficient fluency in the institutional language of the host country to be able to pursue university study in that language and to be able to converse with the citizens of the country without the aid of interpreters. Generally, the equivalent of two years of college-level study is considered the minimum.

(4) Duration

Applications will be accepted for projects with durations of at least eight weeks to no more than one year, including programs lasting an academic quarter, trimester, or semester. Exchanges of less than eight weeks duration or more than one year will be considered technically ineligible. Although grant awards may begin earlier, the actual exchange of participants may not begin before February 1, 1995, and must be completed by December 31, 1996. Programs for exchanges in subsequent academic years will be considered technically eligible.

(5) Preference Factors

a. Preference will be given to proposals in which incoming students study in the U.S. for a full academic year.

b. Preference will be given to programs that reflect wide geographic distributions in recruitment of participants.

c. Preference will be given to programs that recruit foreign and U.S. participants through merit-based, open competition.

(6) Reciprocity

Proposals should be reciprocal, but not necessarily equal in numbers. In cases where political or practical circumstances do not allow for the placement of U.S. students, one-way programs will be considered. The proposal should provide detailed information on the activities in both the U.S. and the partner country.

(7) Internships

While programs may include internships, the focus of projects should be classroom work or research. If internships are included in the exchange experience, students should have completed at least one semester of classroom work. The duration of the internship should not exceed the duration of the classroom work. Institutions are encouraged to grant academic credit for the internship experience.

(8) Special Allowances for Agriculture Programs

In order to give added encouragement to the participation of students of agriculture as provided for in the bilateral agreement, language standards may be modified for participating students of agriculture. Programs including agriculture students need not exchange agriculture students in both directions.

Additional Criteria for Categories B and C

Category B: Samantha Smith Memorial Exchange With the Baltic Countries and the New Independent States

Grant funding is intended to enhance and expand the scope of academic exchanges with Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzia, Latvia, Lithuania, Moldova, the Russian Federation, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan for undergraduate students under the age of 26. Participants must be citizens either of the U.S. or of the host country. Programs designed specifically for foreign participants to teach their native

language or area studies in American institutions are ineligible for support.

Priority for Category B

For FY 1995 priority will be given to applications from community colleges, two-year colleges, non-profit organizations working specifically with community colleges and/or two-year colleges, and institutions that have not received funding under this program in previous competitions.

Category C: Samantha Smith Memorial Exchange With Central and Eastern Europe

Grant funding under this category is intended to enhance and expand the scope of academic exchanges with Albania, Bulgaria, Croatia, the Czech Republic, Hungary, Macedonia, Poland, the Republic of Slovakia, Romania, and Slovenia for undergraduate students under the age of 26. Participants must be citizens either of the U.S. or of the partner country. Programs designed specifically for foreign participants to teach their native language or area of studies in American institutions are ineligible for support.

(1) Language Qualification

It is desirable, but not required, that exchange students have sufficient fluency in the language of the country to be visited for the pursuit of university study in the language and to converse with citizens of the country without the aid of interpreters. Generally, the equivalent of two years of college-level language study is considered the minimum. The two-year language minimum will be waived for community colleges, two-year colleges, and non-profit organizations working specifically with community colleges and/or two-year colleges in order to encourage their participation.

(2) Duration

Applications will be accepted for projects with duration of at least eight weeks including programs lasting one academic quarter, trimester, semester or a full year. Projects of less than eight weeks duration will be considered technically ineligible. Grants generally will be made for exchanges occurring within a 12-month period, but requests for two-year programs will be considered. Proposals for two-year programs should submit one budget that covers the entire two-year period. The total award (one-or two-year) may not exceed $80,000.

(3) Reciprocity

It is desirable, but not required, that programs are reciprocal and the number of U.S. and foreign participants be nearly equal. The proposal should provide detailed information on the activities in both the U.S. and the partner country.

(4) Awards

Project awards will be made in a wide range of amounts up to $80,000. The Agency reserves the right to reduce, revise or increase proposal budgets in accordance with the needs of the program. For organizations with less than four years of experience in international exchange activities, grants will be limited to a maximum of $60,000 and proposed budgets should not exceed this amount. All organizations must submit a comprehensive line item budget, the details and format of which are contained in the application packet.

(5) Preference Factors

a. Preference will be given to programs in which U.S. participants will have had a minimum of two years of relevant language study.

b. Preference will be given to proposals in which incoming students study in the U.S. for a full academic year.

c. Preference will be given to reciprocal exchanges.

Review Process (All Categories)

USIA will acknowledge receipt of all proposals and will review them for technical eligibility.

Please note: Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the Application Package, including the Guidelines for Preparing Proposals.

Eligible Proposals

Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate geographic area office, and the budget and contracts office. Funding decisions are at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for grant awards resides with USIA's grants officer.

Review Criteria (All Categories)

Technically eligible applications will be competitively reviewed according to the following criteria:

a. Quality of Program Plan

Academic rigor, thorough conception of project, demonstration of meeting student needs, contributions to understanding the partner country, proposed follow-up, and qualifications of program staff and participants.

b. Feasibility of the Program Plan

Capacity of the organization to conduct the exchange. Proposals should clearly demonstrate how the institution will meet the program objectives and plan.

c. Track Record

Revelant Agency and outside assessments of the organization's experience with international exchanges; for organizations that have not worked with USIA before, the demonstrated potential to achieve program goals will be evaluated.

d. Multiplier Effect/Impact

The impact of the exchange activity on the wider community and on the development of continuing ties, as well as the contribution of the proposed activity in promoting mutual understanding.

e. Value of U.S.—Partner Country Relations

The assessment by USIA's geographic area office of the need, potential impact, and significance of the project with the partner country.

f. Cost-Effectiveness

Greatest return on each grant dollar. A key measure of cost-effectiveness is the unit cost to the Agency. This is the total request of USIA monies divided by the number of exchangees (people moved). The Agency also reviews the ratio of cost-sharing exhibited. Cost-sharing through other financial support as well as institutional direct and in kind funding contributions is strongly encouraged.

g. Diversity and Pluralism (for Student Programs)

Preference will be given to proposals that demonstrate efforts to provide for the participation of students with a variety of major disciplines, from diverse regions, and of different socio-economic and ethnic backgrounds, to the extent feasible for the applicant institutions.

h. Adherence of Proposed Activities

To the criteria and conditions described above.

i. Institutional Commitment

Demonstrated by financial and other support to the program, including the provision for adequate and appropriate personnel and institutional resources to achieve the program goals.

j. Follow-on Activities

Proposals should provide a plan for continued follow-on activity (without USIA support) which insures that USIA-supported programs are not isolated events.

k. Evaluation Plan

Proposals should provide a plan for evaluation by the grantee institution to determine the success of the project.

l. Geographic Diversity

The Agency will seek to achieve maximum geographic diversity in selection and placement of participants through its award of grants.

Application Disclaimer (All Categories)

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of this request for proposals does not constitute an award commitment on the part of the government. Final award cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants for Categories A, B, and C will be notified in writing of the results of the review process on or about February 1, 1995. All funded proposals will be subject to periodic reporting and evaluation requirements.

Options for Renewal (All Categories)

Subject to the availability of funding for FY 1995 and the satisfactory performance of grant programs, USIA may invite grantee organizations to submit proposals for renewals of awards.

Dated: June 11, 1994

Barry Fulton,

Deputy Associate Director for Bureau of Educational and Cultural Affairs.

[FR Doc. 94-14691 Filed 6-15-94; 8:45 am]

BILLING CODE 8230-01-M

International Creative Arts Exchanges for Public and Private Non-Profit Organizations

ACTION: Request for proposals

SUMMARY: The Creative Arts Exchanges Division of the U.S. Information Agency's [USIA] Office of Arts America announces a program of awards to private, non-profit organizations to support projects for artists and arts administrators. These will consist of residencies and/or study tours in which artists from the United States and other countries work and learn together. Interested applicants are invited to request and read the complete **Federal Register** announcement before submitting their proposals.

DATES: This action is effective from the publication date of this notice through September 21, 1994, for projects whose activities will begin between February 1, 1995, and June 30, 1995. All applications must be received at the U.S. Information Agency by 5 p.m. Washington DC time on Wednesday, September 21, 1994. Faxed documents will not be accepted, nor will documents postmarked on September 21, 1994, but received at a later date.

For projects that begin after June 30, 1995, competition details will be announced in the **Federal Register** on or about December 1, 1994. Inquiries concerning technical requirements are welcome prior to submission of applications.

ADDRESSES: The original and 14 copies of the completed application, including required forms, should be submitted by the deadline to: U.S. Information Agency, REF: E/DE Discretionary Grant Competition, Grants Management Division (E/XE), E/DE-95-01, room 336, 301 4th Street, SW., Washington, DC 20547. Awards are contingent upon the availability of funds.

FOR FURTHER INFORMATION AND APPLICATION PACKAGES, CONTACT: The Creative Arts Exchanges Division of the U.S. Information Agency's Office of Arts America, 301 4th Street, SW., Washington, DC 20547; telephone (202) 619-5338.

SUPPLEMENTARY INFORMATION: The Creative Arts Exchanges Division works with U.S. non-profit organizations on cooperative international group projects that introduce American and foreign participants to each other's cultural and artistic life and traditions. It supports international projects in the United States or overseas involving composers, choreographers, filmmakers [see guidance below], playwrights, theater designers, writers and poets, visual artists, museum professionals [see guidance below], managers and administrators of arts institutions and organizations [see guidance below].

We particularly seek projects with organizations with expertise in the arts as well as broad outreach and networking capabilities into American arts activities nationwide. Overseas USIA offers prospective applicants its network of U.S. Information Service [USIS] posts located in American embassies, consulates and cultural centers around the world. Proposals making imaginative and substantive use of this USIS network will have a decided advantage in the competition. Proposed projects should support the USIA mission to increase mutual understanding between the United States and other countries and to promote international cooperation in educational and cultural fields. USIS role in such projects should be integral and not purely facilitative.

Common Provisions

Projects supported by these awards share some or all of the following features:

1. An international exchange of professionals in the fields listed above.
2. The development of institutional linkages between American organizations and their counterparts in other countries.
3. Travel to or from the United States, preferably in both directions.
4. Competition in which USIS posts nominate foreign candidates for awards, while the American arts organizations select the award-winners.
5. Assurances of quality, fairness, balance and openness in the selection of American project participants.
6. A non-political character reflective of the diversity of American political, social and cultural life.

Special Conditions

1. Proposals should involve more than one country. However, single-country projects that have strong USIS-post support and clearly demonstrate the potential for creating and strengthening linkages between foreign and U.S. institutions are also welcome.
2. Proposals are subject to review and comment by the USIS posts in the relevant countries.
3. Proposals involving foreign organizations should identify them and clearly define their role in the project. Prospective applicants would do well to consult with USIS posts regarding such organizations prior to submitting their proposals.
4. Proposals centering on films or videos must deal with the creative aspects of film or video making. They should be written for professional partners, not for amateur or student groups. Projects may include story development, other aspects of the creative processes, or management issues like funding and distribution. They should not include film or video festivals, installations, seminars, competitions, full scale film production or distribution, or any other type of project prohibited in this announcement.
5. Proposals centering on arts presenters, administrators, and managers should feature exchanges

involving these professionals exclusively.

6. Arts America is the major supporter of the American Association of Museums [AAM] International Partnerships Among Museums [IPAM] program. Museums interested in international projects should address queries to the Office of International Programs, American Association of Museums, 1225 Eye Street, NW., Washington, DC 20005; telephone: [202] 289–1818; FAX: [202] 289–6578. We will not accept direct applications from museums for international projects [see Program Exclusions, below].

7. Proposals for projects in Eastern Europe and/or the Newly Independent States of the ex-Soviet Union should focus on the exchange of arts administrators or professionals dealing in theatrical arts. Proposals should clearly demonstrate knowledge of host country environment and its institutional partner in that country and provide evidence of long-term commitment to project goals.

Program Exclusions

1. Projects should be artistic, intellectual, and cultural, not technical. Vocational and technical training projects are ineligible for support.

2. Scholarship programs or proposals for long-term academic study or training are ineligible for support.

3. Speaking tours, conferences or seminars, research projects, research for project development purposes, youth or youth-related activities (participants' age under 25), publications, student and/or faculty exchanges, or projects for the exchange of amateurs or semi-professionals are all ineligible.

4. Arts America does not accept proposals to support performing arts productions or tours, film or video festivals, film/video installations, full-scale film production or distribution, international arts competitions, community-level arts presentations or festivals for general audiences, visual arts exhibits, museum projects except for those under the AAM/IPAM program [see above], or projects in the fields of historical and cultural conservation and preservation.

5. USIA is a major supporter of Sister Cities International and Partners of the Americas. It has agreed to fund administrative expenses of these organizations' national offices, but will not fund projects arising from sister city and partner state relationships once they are established.

Budgetary Requirements

1. There must be minimum of 33% cost sharing of the project cost. Cost sharing may be in the form of allowable direct or indirect costs. The recipient must maintain written records to support all allowable costs which are claimed to be its contribution to cost participation, as well as costs to be paid by the Federal Government. Such records are subject to audit. The basis for determining the value of cash and in-kind contributions must be in accordance with OMB Circular A–110, Attachment E—Cost Sharing and Matching—and should be described in the proposal. In the event the recipient does not provide a minimum of 33% cost sharing following the award, the Agency's contribution will be reduced in proportion to the recipient's contribution.

2. Administrative costs must be no more than 20% of the total amount requested from USIA.

3. Awards are limited to $200,000. We will consider requests for $100,000 or more only for projects that are internationally regional, multi-regional or worldwide in scope. Awards are limited to $60,000 for organizations with less than four years' experience in conducting international exchange programs.

4. Allowable costs are those defined in the application package, which is available upon request.

5. To calculate the costs per participant, divide the project total by the number of participants who will be funded under the terms of the award.

Definition of Administrative Costs

Administrative costs are defined as salaries, benefits and other direct and indirect costs incurred. Important note for universities: The U.S. Information Agency defines American faculty salaries as an administrative expense, regardless of how the faculty time is to be used.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines in the application package. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate USIA geographic area officers, and budget and contract offices. Proposals may also be reviewed by the Agency's General Counsel. Review criteria are listed in the application package, which is available upon request. Funding decisions are at the discretion of USIA's Associate Director for Educational and Cultural Affairs. Final technical authority for awards resides with USIA's contracting officer.

Review Criteria

Proposals are reviewed for adherence to legal and budgetary requirements by USIA offices responsible for these functions and for artistic/organizational rigor, program content and cost-effectiveness.

Technically eligible applications will be competitively reviewed according to the following criteria:

a. Quality of Program Plan

Which includes how your project would meet the Creative Arts Exchanges Program goals, artistic/organizational planning of the highest caliber, why the participants would be appropriate for this project, how the project would contribute to a higher awareness of other countries, a proposed followup, and the qualifications of program staff and participants.

b. Feasibility of the Program Plan

And the capacity of the organization to conduct the exchange. Proposals should clearly demonstrate how the institution will meet the program objectives and plan.

c. Track Record

Included are the past successes of the organization in previous USIA programs and assessments of the organization's experience with international exchanges. For organizations that have not worked with USIA, they will be evaluated by their demonstrated potential to achieve their program goals

d. Multiplier Effect/Impact

The ability of the organization to affect the wider community as well as developing continuing ties in the country. The proposal must also promote mutual understanding between the two groups.

e. Value to U.S.—Partner Country Relations

The Agency assesses the need, the potential impact, and the significance of the project with the partner country.

f. Cost-Effectiveness

The organization should exhibit a wise budgetary policy including cost-sharing. A key measure of cost-effectiveness is the cost per participant.

g. Diversity and Pluralism

Preference will be given to proposals that demonstrate efforts to provide for the participation of artists from diverse regions, socio-economic and ethnic backgrounds; but only to the extent feasible for the applicant institutions

h. Institutional Commitment

As demonstrated through use of personnel, resources and funding.

i. Follow-up Activities

Proposals should provide a plan for later continuation of contact (without USIA support), which ensures that USIA-supported programs are not isolated events.

j. Evaluation Plan

Proposals should provide a plan for your own evaluation of the project.

Technical Requirements

Proposals can only be accepted for review when they are fully in accord with the terms of this request for proposals, as well as with requirements stipulated in the application package.

Notice

The terms and conditions published in the request for proposals are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of request for proposals does not constitute an award commitment on the part of the Government. Final awards cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about January 4, 1995. Awards will be subject to periodic reporting and evaluation requirements.

Dated: June 10, 1994.

John P. Loiello,

Associate Director, Bureau of Educational and Cultural Affairs.

[FR Doc 94–14692 Filed 6–15–94; 8:45 am]

BILLING CODE 8230–01–M

International Educational and Cultural Activities Discretionary Grant Program

ACTION: Notice—Request for proposals.

SUMMARY: The Office of Citizen Exchanges (E/P) of the United States Information Agency's Bureau of Education and Cultural Affairs announces an open competition for an assistance award program. Public or private non-profit organizations meeting the provisions described in IRS regulation 501 (c) (3) may apply to develop projects that link their international exchange interests with counterpart institutions/groups in ways supportive of the aims of the Bureau of Educational and Cultural Affairs.

Overall grant making authority for this program is contained in the Mutual Educational and Cultural Exchange Act of 1961, as amended, Public Law 87–256, also known as the Fulbright Hays Act. The purpose of the Act is "to enable the Government of the United States to increase mutual understanding between the people of the United States and the people of other countries. . . .; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations.* * * and thus to assist in the development of friendly, sympathetic and peaceful relations between the United States and the other countries of the world." Programs and projects must conform with Agency requirements and guidelines outlined in the Application Package. USIA projects and programs are subject to the availability of funds.

Interested applications should read the complete **Federal Register** announcement before addressing inquiries to the Office of Citizen Exchanges or submitting their proposals. Once the RFP deadline has passed, the Office of Citizen Exchanges may not discuss this competition in any way with applicants until after the Bureau program and project review process has been completed.

ANNOUNCEMENT NUMBER: All communications concerning this announcement should refer to the Fall Discretionary Grant Program. The announcement number is E/P–95–1. Please refer to title and number in all correspondence or telephone calls to USIA.

DATES: Deadline for Proposals: All copies must be received at the U.S. Information Agency by 5 p.m. Washington, D.C. time on Friday, September 16, 1994. Faxed documents will not be accepted, nor will documents postmarked on September 16, 1994, but received at a later date. It is the responsibility of each grant applicant to ensure that proposals are received by the above deadline. This action is effective from the publication date of this notice through September 16, 1994, for projects where activities will begin between January 1, 1995 and June 30, 1995.

FOR FURTHER INFORMATION CONTACT: Interested organizations/institutions must contact the Office of Citizen Exchanges, E/PL, room 216, United States Information Agency, 301 4th Street, SW., Washington, DC 20547, (202) 619–5326, to request detailed application packets, which include award criteria, all application forms; and guidelines for preparing proposals, include specific criteria for preparation of the proposal budget. Please specify the USIA Program Officer Laverne Johnson on all inquiries and correspondences.

ADDRESSES: Applicants must follow all instruction given in the Application Package and send only complete applications to: U.S. Information Agency, REF: E/P–95–1 Fall Discretionary Grant Competition, Grants Management Division (E/XS), 301 4th Street, SW., room 336, Washington, DC 20547.

SUPPLEMENTARY INFORMATION: Pursuant to the Bureau's authorizing legislation, programs must maintain a non political character and should be balanced and representative of the diversity of American political, social, and cultural life. "Diversity" should be interpreted in the broadest sense and encompass differences including but not limited to race, gender, religion, geographic location, socio-economic status, and physical challenges. Applicants are strongly encouraged to adhere to the advancement of this principle.

Overview: The Office of Citizen Exchanges works with U.S. private sector non-profit organizations on cooperative international group projects that introduce American and foreign participants to each others' social, economic, and political structures; and international interests. The Office supports international projects in the United States or overseas involving leaders or potential leaders in the following fields and professions: Urban planners, jurists, specialized journalists (specialists in economics, business, political analysis, international affairs), business professionals, NGO leaders, environmental specialists, parliamentarians, educators, economics planning, and other government officials.

Guidelines: Applicants should carefully note the following restrictions/recommendations for proposals in specific geographical areas:

The Newly Independent States: USIA and other agencies of the U.S. government have numerous programs in the countries of the NIS (Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan). As such, the amount of funds for that part of the world in this competition will be extremely limited. Proposals which would normally be considered for other USIA grant competitions will not be

accepted. E/P encourages organizations to seek clarification on these points before presenting a proposal.

Europe, Eastern Europe, and the Baltics (EU): Projects are encouraged involving Western Europe. Due to the fact that the office has or is in the process of conducting specific competitions in Eastern Europe and the Baltics, we will not accept proposals for youth exchange programs or for programs in the following thematic areas: public administration, business management, independent media development, journalism training, and local government administration and municipal management. Priority will be given to projects relating to conflict resolution, tolerance, and diversity.

East Asia and the Pacific (EA): Priority consideration will be given to the following: (1) Projects for journalists (print or electronic). Priorities are projects for Hong Kong and Singapore combined or for Thailand on press freedom, the press/government relationship, and the role of a free press in society. Other projects for journalists include regional/subregional projects that focus on APEC-related economic and trade issues and policies or regional/subregional projects that focus on security issues. The projects may consist of but are not limited to workshops, site tours, seminars and discussions and internships. (2) Projects concerned with the strengthening of democracy in Cambodia, with priority given to projects that focus on education and representative government. (3) Projects concerned with the organization, management, and administration of citizen action groups or other non-governmental organizations in the Peoples' Republic of China and Southeast Asian countries. Priority will be given to subject areas, such as grass roots democracy, the environment, and human rights.

American Republics (AR): Priority will be given to projects in the following areas: Good governance, public administration, decentralization of government, judicial reform, and the protection/promotion of minority and indigenous rights.

Africa (AF): While proposals in all fields are encouraged, emphasis will be given to proposals which focus on strengthening democratic institutions. Proposals involving South Africa are encouraged.

North Africa, Near East and South Asia (NEA): Priority will be given to projects which promote democratization, economic reform, free markets, tolerance and pluralism, conflict resolution, and Israeli and Palestinian understanding. The Office of Citizen Exchanges strongly encourages the coordination of activities with respected universities, professional associations, and major cultural institutions in the U.S. and abroad, but particularly in the U.S. Projects should be intellectual and cultural, not technical. Vocational training (an occupation other than one requiring a baccalaureate or higher academic degree; i.e., clerical work, auto maintenance, etc. and other occupations requiring less than two years of higher education) and technical training (special and practical knowledge of a mechanical or a scientific subject which enhances mechanical, narrowly scientific, or semi-skilled capabilities) are ineligible for support. In addition, scholarship programs are ineligible for support.

The Office does not support proposals limited to conferences or seminars (i.e., one to fourteen-day programs with plenary sessions, main speakers, panels, and a passive audience). It will support conferences only insofar as they are part of a larger project in duration and scope which is receiving USIA funding from this competition. USIA-supported projects may include internships; study tours; short-term, non-technical training; and extended, intensive workshops taking place in the United States or overseas.

The themes addressed in exchange programs must be of long-term importance rather than focused exclusively on current events or short-term issues. In every case, a substantial rationale must be presented as part of the proposal, one that clearly indicates the distinctive and important contribution of the overall project, including where applicable the expected yield of any associated conference.

No funding is available exclusively to send U.S. citizens to conferences or conference-type seminars overseas; neither is funding available for bringing foreign nationals to conferences or to routine professional association meetings in the United States.

Projects that duplicate what is routinely carried out by private sector and/or public sector operations will not be considered. The Office of Citizen Exchanges strongly recommends that applicants consult with host country USIS post, prior to submitting proposals.

Section of Participants

All grant proposals should clearly describe the type of persons who will participate in the program as well as the process by which participants will be selected. It is recommended that programs in support of U.S. internships include letters tentatively committing host institutions to support the internships.

In the selection of foreign participants, USIA and USIS posts retain the right to nominate all participants and to accept or deny participants recommended by grantee institutions. However, grantee institutions are often asked by USIA to suggest names of potential participants. The grantee institution will also provide the names of American participants and brief (two pages) biographical data on each American participant to the Office of Citizen Exchanges for information purposes. Priority will be given to foreign participants who have not previously travelled to the United States.

Additional Guidance

The Office of Citizen Exchanges offers the following additional guidance to prospective applicants:

1. The Office of Citizen Exchanges encourages project proposals involving more than one country. Pertinent rationale which links countries in multi-country projects should be included in the submission. Single-country projects that are clearly defined and possess the potential for creating and strengthening continuing linkages between foreign and U.S. institutions are also welcome.

2. Proposals for bilateral programs are subject to review and comment by the USIS post in the relevant country, and pre-selected participants will also be subject to USIS post review.

3. Bilateral programs should clearly identify the counterpart organization and provide evidence of the organization's participation.

4. The Office of Citizen Exchanges will consider proposals for activities which take place exclusively in other countries when USIS posts are consulted in the design of the proposed program and in the choice of the most suitable venues for such programs.

5. Office of Citizen Exchanges grants are not given to support projects whose focus is limited to technical or vocational subjects, or for research projects, for publications funding, for student and/or teacher/faculty exchanges, for sports and/or sports related programs. Nor does this office provide scholarships or support for long-term (a semester or more) academic studies. Competitions sponsored by other Bureau offices are also announced in the **Federal Register**.

For projects that would begin after July 1, 1995, competition details will be announced in the **Federal Register** on or about December 1, 1994. Inquiries

concerning technical requirements are welcome prior to submission of applications.

Funding

Although no set funding limit exists, proposals for less than $150,000 will receive preference. Organizations with less than four years of successful experience in managing international exchange programs are limited to $60,000. Applicants are invited to provide both an all-inclusive budget as well as separate sub-budgets for each program component, phase, location, or activity in order to facilitate USIA decisions on funding. While an all-inclusive budget must be provided with each proposal, separate component budgets are optional. Competition for USIA funding support is keen.

The selection of grantee institutions will depend on program substance, cross-cultural sensitivity, and ability to carry out the program successfully. Since USIA grant assistance constitutes only a portion of total project funding, proposals should list and provide evidence of other anticipated sources of financial and in-kind support.

The Recipient must provide a minimum of 33 percent cost sharing of the total project cost. Cost sharing may be in the form of allowable direct or indirect costs. The Recipient must maintain written records to support all allowable costs which are claimed as being its contribution to cost participation, as well as costs to be paid by the Federal government. Such records are subject to audit. The basis for determining the value of cash and in-kind contributions must be in accordance with OMB Circular A–110, Attachment E-Cost Sharing and Matching and should be described in the proposal. In the event the Recipient does not provide a minimum of 33 percent cost sharing, the Agency's contribution will be reduced in proportion to the Recipient's contribution. Proposals with cost sharing of less than 33 percent of the total project cost will be considered ineligible. The recipient's proposal shall include the cost of an audit that: (1) Complies with the requirements of OMB Circular No. A–133, Audits of Institutions of Higher Education and Other Nonprofit Institutions; (2) complies with the requirements of American Institute of Certified Public Accountants (AICPA) Statement of Position (SOP) No. 92–9; and (3) includes review by the recipient's independent auditor of a recipient-prepared supplemental schedule of indirect cost rate computation, if such a rate is being proposed. The audit costs shall be identified separately for: (1) Preparation of basic financial statements and other accounting services; and (2) preparation of the supplemental reports and schedules required by OMB Circular No. A–133, AICPA SOP 92–9, and the review of the supplemental schedule of indirect cost rate computation. The following project costs are eligible for consideration for funding:

1. International and domestic air fares; visas; transit costs; ground transportation costs.

2. Per Diem. For the U.S. program, organizations have the option of using a flat $140/day for program participants or the published U.S. Federal per diem rates for individual American cities. For activities outside the U.S., the published Federal per diem rates must be used. NOTE: U.S. escorting staff must use the published Federal per diem rates, not the flat rate.

3. Interpreters: If needed, interpreters for the U.S. program are provided by the U.S. State Department Language Services Division. Typically, a pair of simultaneous interpreters is provided for every four visitors who need interpretation. USIA grants do not pay for foreign interpreters to accompany delegations from their home country. Grant proposal budgets should contain a flat $140/day per diem for each Department of State interpreter, as well as home-program-home air transportation of $400 per interpreter plus any U.S. travel expenses during the program. Salary expenses are covered centrally and should not be part of an applicant's proposed budget.

4. Book and cultural allowance: Participants are entitled to and escorts are reimbursed a one-time cultural allowance of $150 per person, plus a participant book allowance of $50. U.S. staff do not get these benefits.

5. Consultants. May be used to provide specialized expertise or to make presentations. Daily honoraria generally do not exceed $250 per day. Subcontracting organizations may also be used, in which case the written agreement between the prospective grantee and subcontractor should be included in the proposal.

6. Room rental, which generally should not exceed $250 per day.

7. Materials development. Proposals may contain costs to purchase, develop, and translate materials for participants.

8. One working meal per project. Per capita costs may not exceed $5–$8 for a lunch and $14–$20 for a dinner; excluding room rental. The number of invited guests may not exceed participants by more than a factor of two to one.

9. A return travel allowance of $70 for each participant which is to be used for incidental expenditures incurred during international travel.

10. All USIA-funded delegates will be covered under the terms of a USIA-sponsored health insurance policy. The premium is paid by USIA directly to the insurance company.

11. Other costs necessary for the effective administration of the program, including salaries for grant organization employees, benefits, and other direct and indirect costs per detailed instructions in the application package. Note: the 20 percent limitation of "administrative costs" included in previous announcements does not apply to this RFP. Please refer to the Application Package for complete budget guidelines.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the Application Packet. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the budget and contract offices, as well as the USIA geographic regional office and the USIS post overseas, where appropriate. Proposals may also be reviewed by the USIA's Office of General Counsel or by other Agency elements. Funding decisions are at the discretion of the USIA Associate Director for Educational and Cultural Affairs. Final technical authority for grant awards resides with USIA's contracting officer.

Review Criteria

USIA will consider proposals based on their conformance with the objectives and considerations already stated in this RFP, as well as the following criteria:

1. *Quality of Program Idea:* Proposals should exhibit originality, substance, precision, and relevance to the Agency mission.

2. *Program Planning:* Detailed agenda and relevant work plan should demonstrate substance undertakings and logistical capacity. Agenda and plan should adhere to the program overview and guidelines described above.

3. *Ability to Achieve Program Objectives:* Objectives should be reasonable, feasible, and flexible. Proposal should clearly demonstrate how the institution will meet the program objectives and plan.

4. *Multiplier Effect:* Proposed programs should strengthen long-term

mutual understanding, including maximum sharing of information and establishment of long-term institutional and individual linkages.

5. *Value to U.S.—Partner Country Relations:* Proposed projects should receive positive assessments by USIA's geographic area desk and overseas officers of program need, potential impact, and significance in the partner.

6. *Institutional Capacity:* Proposed personnel and institutional resources should be adequate and appropriate to achieve the program or project's goal.

7. *Institution Reputation/Ability:* Proposal should demonstrate an institutional record of successful exchange programs, including responsible fiscal management and full compliance with all reporting requirements for past Agency grants as determined by USIA's Office of Contracts. The Agency will consider the past performance of prior recipients and the demonstrated potential of new applicants.

8. *Follow-on Activities:* Proposals should provide a plan for continued follow-on activity (without USIA support) which ensures that USIA supported programs are not isolated events.

9. *Evaluation Plan:* Proposals should provide a plan for a thorough and objective evaluation of the program/project by the grantee institution.

10. *Cost-Effectiveness:* The overhead and administrative components of the proposal, including salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate.

11. *Cost-Sharing:* Proposals should maximize cost-sharing through other private sector support as well as institutional direct funding contributions.

12. *Support of Diversity:* Proposal should demonstrate the recipients' commitment to promoting the awareness and understanding of diversity throughout the program. This can be accomplished through documentation (such as a written statement or account) summarizing past and/or on-going activities and efforts that further the principle of diversity within both their organization and their activities.

Notice

The need of the program may require the award to reduced, revised, or increased. The terms and conditions published in the RFP are binding and may not be modified by any USIA representative. Explanatory information provided by USIA that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. Final awards cannot be made until funds have been fully appropriated by the Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about December 1, 1994. Awarded grants will be subject to periodic reporting and evaluation requirements.

Dated: June 8, 1994.

John P. Loiello,

Associate Director, Bureau of Educational and Cultural Affairs.

[FR Doc. 94–14510 Filed 6–15–94; 8:45 am]

BILLING CODE 8230–01–M

Public and Private Nonprofit Organizations in Support of International Educational and Cultural Activities—Professional Development in English Language Teaching: Israel, et al.

ACTION: Notice—request for proposals.

SUMMARY: The Office of Citizen Exchanges (E/P) of the United States Information Agency's Bureau of Educational and Cultural Affairs announces a competitive grant program for nonprofit organizations to conduct a project for enhancing professional development in English language teaching at the secondary level in Israel (both Arab and Jewish communities), Gaza, and the West Bank. Participants will be professionals responsible for developing effective English language teaching programs; emphasis will be on curriculum development, teaching methodology, production of classroom-appropriate material, and organizing professional associations and networks.

A second, underlying, agenda of this project is to convene, on an egalitarian basis and on neutral territory, a group of Israeli Jews, Israeli Arabs, and Palestinians who will work together within a professional discipline—in this case, English language teaching—and who will, upon returning to their own communities, both maintain professional, mutually supportive contact and represent, within those communities, the feasibility of collegial relationships between Jews, Israeli Arabs, and Palestinians.

The program will be conducted in English.

Interested applicants are urged to read the complete **Federal Register** announcement before addressing inquiries to the Office of Citizen Exchanges or submitting their proposals. After the RFP deadline, the Office of Citizen Exchanges may not discuss this competition in any way with applicants until the final decisions are made.

ANNOUNCEMENT NAME AND NUMBER: All communications with USIA concerning this announcement should refer to the above title and reference number E/P–94–31.

DATES: Deadline for Proposals: All copies must be received at the U.S. Information Agency by 5 p.m., Washington, DC time on August 2, 1994. Faxed documents will not be accepted, nor will documents postmarked August 2, 1994 but received at a later date. It is the responsibility of each grant applicant to ensure that proposals are received by this deadline.

ADDRESSES: The original and 14 copies of the completed application and required forms should be submitted by the deadline to: U.S. Information Agency, Ref: E/P–94–31, Office of Grants Management (E/XE), 301 Fourth Street SW.—room 336, Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Interested organizations/institutions should contact the Office of Citizen Exchanges (E/P), room 224, USIA, 301 Fourth Street SW., Washington, DC 20547, fax (202) 619–4350, tel. (202) 619–5319, to request detailed application packages which include all necessary forms and guidelines for proposals, including specific budget preparation. Please specify the name of USIA Program Specialist Thomas Johnston on all inquiries and correspondence.

Background/Objectives of This Program

There is a strong need and desire among educational professionals in Gaza, the West Bank, Israeli Arab communities, and selected Israeli Jewish communities for assistance in the development of an effective, comprehensive program of English language teaching at the secondary level. Concomitantly, there is an even greater imperative for members of the diverse communities within Israel and for Palestinians from both Gaza and the West Bank to meet and work together in a professional, non-politically charged context.

One goal of this project is to prepare Israeli and Palestinian participants—individuals active in setting the agenda for high school and/or community-based English Language teaching programs—to implement state-of-the-art TESOL curriculum design, teaching methodology, and material/text development in an effort to enhance English teaching and learning in their respective communities.

The second goal is to develop a situation in which professionals from the diverse communities may meet and work together in an egalitarian, mutually supportive way.

American organizations are invited to submit proposals for a project to bring 12 English teaching professionals to the United States for a period of four or five weeks.

Participants should become thoroughly conversant with state-of-the-art theory and practice of teaching English as a second language. They should observe and participate in classroom and language lab instruction, become involved in the complexities of curriculum development, and produce guidelines for and examples of classroom-appropriate teaching material. In addition, they should be introduced to professional associations and networks of teachers, curriculum developers, and education officials, providing them models of professional cooperation and information exchange which will be useful in establishing cross-cultural professional linkages in the region.

The second phase of the project should take place over a period of approximately six months and should entail the travel at approximately eight-to-ten-week intervals, of four American specialists/consultants. Each specialist will conduct a series of two-to-three-day workshops on one or more of the key issues addressed in the initial phase of the exchange (e.g., curriculum development; teaching methodology; in-service training), in each of the locations in Israel, Gaza, and the West Bank from which participants in the original phase were drawn.

Participants

Participants' professional titles will vary from community to community, given the independent development of educational supervisory/oversight institutions in Israel, Gaza, and the West Bank. They might be drawn from the Ministry of Education, the ranks of consultants to the educational establishment, teachers' unions, professional committees, or teacher training institutions. All will be responsible, in some capacity, for the development of effective English language teaching programs. Participants will be selected by United States Information Service officers (The United States Information Agency's overseas contingent is officially called the United States Information Service) serving in the American Embassy in Tel Aviv and the American Consulate in Jerusalem. Individuals may also be recommended for participation by the grantee institution, but selection will be made only in close consultation with USIS officers. American consultants who will travel abroad during the second phase of this exchange program will be selected by the grantee institution in consultation with USIA.

USIA officers in participating countries will facilitate the issuance of visas and other program-related material.

Programmatice Considerations

Thematically, the project should:

—Consider the current status of English Language instruction in the communities represented by the participants and determine, in conjunction with USIS posts in Israel and Jerusalem and with the educators selected as participants, the needs to be addressed by the project;

—Provide the participants both a general and specific overview of English Language education—focussing specifically on teaching English as a second language—as it is practiced in the United States, in the context of a socially diverse country;

—Be organized, to the extent possible, around open seminar/discussions, participant observation, and hands-on, experiential learning;

—Introduce participants to the organization and workings of professional associations of educators and other means of information exchange, such as internet, which would provide continued access to diverse ideas, publications, etc.;

—And include, if feasible, attendance at the TESOL international convention in Long Beach, California, March 28–April 1, 1995.

Pursuant to the legislation authorizing the Bureau of Educational and Cultural Affairs, programs must maintain a nonpolitical character and should be balanced and representative of the diversity of American political, social, and cultural life.

Beyond the immediate goals of this program, USIA is interested in supporting programs which will lay the groundwork for new and continuing links among American, Israeli, and Palestinian institutions and professional organizations and which will encourage the further growth and development of democratic structures.

The grantee will be responsible for most arrangements associated with this program. These include organizing a coherent progression of activities, providing international and domestic travel arrangements for all participants, making lodging and local transportation arrangements for visitors, orienting and debriefing participants, preparing any necessary support material, and working with host institutions and individuals to achieve maximum program effectiveness.

To prepare the foreign educators for this project prior to their arrival in the United States, E/P encourages the grantee organization to develop material that would be sent to USIS offices overseas for distribution to participants. This material might include a tentative project outline and suggested goals and objectives, relevant background information, and information about American institutions and individuals involved in the project.

At the beginning of the program, the grantee organization should conduct an orientation session for the visiting participants which addresses administrative details of the program and provides general information about American society and culture which will facilitate the participants' understanding of and adjustment to daily life in the United States.

At the conclusion of the program, the group should meet in a symposium to review what has been presented to and experienced by the participants and to consider how that which has been learned can most effectively be applied upon the participants' return to their home countries.

Additional Guidelines

Program monitoring and oversight will be provided by appropriate USIA elements. Per Diem support from host institutions during an internship component is strongly encouraged. However, for all programs which include internships, a nonprofit grantee institution which receives funds from corporate or other co-sponsors should then use those funds to provide food, lodging, and pocket money for the participants. In no case could the intern receive a wage or "be hired" by the sponsoring institution.

Internships should also have an American studies/values orientation component at the beginning of the program. The American grantee institutions should try to maximize cost-sharing in all facets of the program, and to stimulate U.S. private sector (foundation and corporate) support.

Proposals incorporating internships will be more competitive if letters committing prospective host institutions to support these efforts are provided.

Funding

Competition for USIA funding support is keen. The final selection of a

grantee institution will depend on assessment of proposals according to the review criteria delineated below.

The amount requested from USIA for this program should not exceed $135,000. However, organizations with less than four years of successful experience in managing international exchange programs are limited to $60,000.

While applicants must provide an all-inclusive budget with the proposal, they are also encouraged to include separate sub-budgets for each program component, phase, location or activity.

The recipient's proposal shall include the cost of an audit that: (1) Complies with the requirements of OMB Circular No. A–133, Audits of Institutions of Higher Education and Other Nonprofit Institutions; (2) complies with the requirements of American Institute of Certified Public Accountants (AICPA) Statement of Position (SOP) No. 92–9; and (3) includes review by the recipient's independent auditor of a recipient-prepared supplemental schedule of indirect cost rate computation, if such a rate is being proposed.

The audit costs shall be identified separately for: (1) Preparation of basic financial statements and other accounting services; and (2) preparation of the supplemental reports and schedules required by OMB Circular No. A–133, AICPA SOP 92–9, and the review of the supplemental schedule of indirect cost rate computation.

USIA will consider funding the following project costs:

1. International and domestic air fares; visas; transit costs (e.g., airport taxes); ground transportation costs.

2. *Per diem*: For the U.S. program, organizations have the option of using a flat $140/day for international participants or the published Federal Travel Regulations per diem rates for individual American cities.

Note: U.S. escorting staff must use the published federal per diem rates, not the flat rate. For activities in the Middle East the Standard Government Travel Regulations per diem rates must be used.

3. *Book and cultural allowance*: Participants are entitled to a one-time cultural allowance of $150 per person, plus a participant book allowance of $50. Escorts are reimbursed for actual expenses up to $150. U.S. staff do not get these benefits.

4. *Consultants*: May be used to provide specialized expertise or to make presentations. Honoraria should not exceed $250 per day. Subcontracting organizations may also be used, in which case the written contract(s) must be included in the proposal.

5. *Room rental (for meeting or conference rooms)*: Generally should not exceed $250 per day.

6. *Material development*: Proposals may contain costs to purchase, develop and translate material for participants. USIA reserves the rights to this material for future use.

7. *One working meal per project*: Per capita cost may not exceed $5–8 per lunch and $14–20 per dinner, excluding room rental. The number of invited guests may not exceed the number of participants by a factor of more than two to one.

8. *Return travel allowance*: $70 for each participant which is to be used for incidental expenditures incurred during international travel.

9. Other costs necessary for the effective administration of the program, including salaries for grant organization employees, benefits, and other direct and indirect costs per detailed instructions in application package.

Note: the 22% limitation of "administrative costs" included in previous announcements does NOT apply to this RFP

E/P encourages cost-sharing, which may be in the form of allowable direct or indirect costs. E/P would be especially interested in proposals which demonstrate a program vision which goes well beyond that which can be supported by the requested USIA grant and which would try to use a USIA grant to leverage additional funding from other sources to support elements of the broader program plan.

The Recipient must maintain written records to support all allowable costs which are claimed as being its contribution to cost participation, as well as costs to be paid by the Federal Government. Such records are subject to audit. The basis for determining the value of cash and in-kind contributions must be in accordance with OMB Circular A–110, Attachment E, "Cost-sharing and Matching," and should be described in the proposal. In the event the Recipient does not meet the minimum amount of cost-sharing as stipulated in the Recipient's budget, the Agency's contribution will be reduced in proportion to the Recipient's contribution.

Please Note all delegates will be covered under the terms of a USIA-sponsored health insurance policy. The premium is paid by USIA directly to the insurance company.

Application Requirements

Proposals must be structured in accordance with the instructions contained in the Application Package. Confirmation letters from U.S. and foreign co-sponsors noting their intention to participate in the program will enhance a proposal.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the Application Package.

Eligible proposals will be forwarded to panels of USIA officers for advisory review. Proposals will be reviewed by USIS posts and by USIA's Office of Near Eastern, North African, and South Asian Affairs. Proposals may also be reviewed by the Office of the General Counsel or other Agency elements. Funding is at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for granting awards resides with USIA's contracting officer. The awarding of any grant is subject to availability of funds.

The U.S. Government reserves the right to reject any or all applications received. USIA will not pay for design and development costs associated with submitting a proposal. Applications are submitted at the risk of the applicant; should circumstances prevent the awarding of a grant, all preparation and submission costs are at the applicant's expense. USIA will not award funds for activities conducted prior to the actual grant award.

Review Criteria

USIA will consider proposals based on the following criteria:

1. Quality of Program Idea

Proposals should exhibit substance, originality, rigor, and relevance to the Agency mission. They should demonstrate the matching of U.S. resources to a clearly defined need.

2. Institutional Reputation/Ability

Institutions should demonstrate their potential for effective program design and implementation and provide, if available, evidence of having conducted successful programs. If an applicant has previously received a USIA grant, responsible fiscal management and full compliance with all reporting requirements for past Agency grants, as determined by USIA's Office of Contracts (M/KG), will be considered. Evaluations of previous projects may also be considered in this assessment.

3. Project Personnel

Information provided regarding the thematic and logistical expertise of project personnel should be relevant to the proposal at hand. In addition to English teaching specialists, applicants

for this grant should have involved, on a consultative basis, individuals with Middle Eastern and conflict resolution expertise. Resumes or C.V.s should be summaries appropriate to the specific proposal and should not exceed two pages each.

4. Program Planning

A detailed agenda and relevant work plan should demonstrate substantive rigor and logistical capacity.

5. Thematic Expertise

The proposal should demonstrate the organization's expertise in the subject area and its ability to share information effectively.

6. Cross-Cultural Sensitivity/Area Expertise

Evidence should be provided of sensitivity to historical, linguistic, religious, and other cross-cultural factors, as well as relevant knowledge of the target geographic area/country.

7. Ability To Achieve Program Objectives

Objectives should be realistic and feasible. The proposal should clearly demonstrate how the grantee institution will meet program objectives.

8. Multiplier Effect

Proposed programs should strengthen mutual understanding and should contribute to maximum sharing of information and the establishment of long-term institutional and individual ties.

9. Cost-Effectiveness

Costs to USIA per exchange participant (American and foreign) should be kept to a minimum, and all items proposed for USIA funding should be necessary and appropriate to achieve the program's objectives.

10. Cost-Sharing

Proposals should maximize cost-sharing through private sector support as well as through direct funding contributions and/or in-kind support from the prospective grantee organization and its partners.

11. Follow-On Activities

Proposals should provide a plan for continued exchange activity (without USIA support) which ensures that USIA-supported programs are not isolated events.

12. Project Evaluation

Proposals should include a plan to evaluate the project. USIA recommends that the applicant discuss the evaluation methodology chosen and the techniques which will be employed to assess the effectiveness of the project and the correspondence between observable outcomes and original project objectives. Grantees will be expected to submit intermediate reports after each project component is concluded or quarterly, whichever is less frequent.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative.

Explanatory information provided by the Agency which contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the American Government. Awards cannot be made until funds have been fully appropriated by Congress and allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about September 16, 1994. Awarded grants will be subject to periodic reporting and evaluation requirements.

Dated: June 11, 1994.

Barry Fulton,

Deputy Associate Director, Bureau of Educational and Cultural Affairs.

[FR Doc. 94–14693 Filed 6–15–94; 8:45 am]

BILLING CODE 8230–01–M

Freedom Support Act—Secondary School Initiative for Short Term Exchange Projects

ACTION NOTICE: Request for proposals.

SUMMARY: The United States Information Agency (USIA) invites applications from U.S. educational, cultural, and other not-for-profit institutions to conduct exchanges of young persons between the ages of 14 and 17 years of age with the twelve Newly Independent States (NIS) of the former Soviet Union; viz., Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. These exchanges represent part of the activities of the Secondary School Student Exchange Initiative as included in the FREEDOM Support Act of 1992 and are subject to the availability of funding for the Fiscal Year 1995 program. This is a request for proposals for short term thematic exchanges. Requests for proposals in support of other programs under the aegis of the FREEDOM Support Act are being published separately.

DATES: Deadline for proposals: All copies must be received at the U.S. Information Agency in Washington, DC by 5 p.m. on Friday, September 2, 1994. Faxed documents will not be accepted, nor will documents postmarked on or before September 2, but received at a later date. It is the responsibility of each grant applicant to ensure that proposals are received by the above deadline. Subject to availability of funds, notification of awards will be announced on or after February 1, 1995 for exchanges to begin on or after May 1, 1995.

ANNOUNCEMENT NUMBER: This Announcement number is E/P–95–02. Please refer to this number in all correspondence or telephone calls to USIA.

ADDRESSES: The original, plus three fully tabbed copies and 10 partial copies (Tabs A–D) of the completed application, including required forms, should be submitted in the format described in the Bureau's application package and mailed to: U.S. Information Agency, Ref: F.S.A. E/P–95–02, Division of Grants Management, E/XE, 301 4th St. SW., room 336, Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Interested organizations and institutions should contact Steven Lauterbach, NIS Youth Exchange, U.S. Information Agency, room 314, Washington, DC 20547, (202) 619–6299, FAX (202) 619–5311, to request detailed application packages which include award criteria additional to this announcement, all necessary forms, and guidelines for preparing proposals, including specific budget information.

SUPPLEMENTARY INFORMATION: Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life. Overall authority for these programs is contained in the Mutual Education and Cultural Exchange Act of 1961, as amended, Public Law 87–256 (Fulbright-Hays Act).

Overview:

Grant funding is intended to promote the exchange of secondary school students, from 14 to 17 years of age, between the United States and the NIS (Newly Independent States) of Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. Limited funding is also available to support leadership development and training for adults in NIS non-governmental

organizations who work with youth, when such an activity is coupled with a youth exchange program. The Agency's main objectives are to foster interaction between American and foreign youth, to promote democratic values and the development of democratic institutions, and to build sustainable partnerships between organizations in the United States and organizations in the former Soviet Union. It is important that all projects make interaction between the American and NIS participants a central focus of their activities. Proposals should demonstrate how American and foreign participants will interact in a substantive way that encourages the exchange of ideas, culture, values, and information.

Four different program designs will be utilized in the NIS Secondary School Initiative: (A) An academic year program, (B) a semester exchange program (C) a school-to-school linkage program, and (D) a short-term exchange program. This RFP describes the short-term program. Other RFPs will be published separately soliciting proposals for the other three programs.

Guidelines for Short-Term Exchanges

Grants will be awarded to support programs of a three to eight week duration. Programs should have a thematic focus. Proposals which address civics education and the American political system are encouraged. Other eligible foci may include, but are not limited to: The arts; language and culture; science; computer technology; leadership training; conservation and the environment; journalism; social and economic issues; agriculture; business administration/management (including enterprise promotion); and homestay programs under the title "American Community Experience," which should include local programming in such areas as state and municipal government, regional culture, etc. Proposals should provide detailed information on activities planned in both the U.S. and the partner country. It is important for program activities to be of a substantive nature. These may include excursions, cultural activities, and opportunities to experience community life. It is very desirable for each group of NIS students to have a segment of their program in Washington, DC or a state capital. Care should be taken to avoid proposing a program which is too heavily weighted toward "touristic" activities.

One-for-one reciprocity is not a requirement, but is encouraged. Proposals should also provide written evidence that the U.S. organization has the commitment of a reliable counterpart organization in the partner country willing and able to engage in the proposed activities. Homestays are desirable. The minimum stay in country for all programs is three weeks.

The core of the proposal narrative should articulate the purposes of the project, as they relate to the objectives stated above in the "Overview," and should describe the program elements. Guidelines for preparing the narrative are available from USIA (address and telephone number provided above).

Projects requesting support for tours of performing arts groups or sports teams are eligible only if the primary purpose of the program is mutual education and there is extensive structured interaction and cultural exchange between international participants and their hosts. Tours of performing arts groups or sports groups for whom the primary activity is performance or competition will not be eligible. Outdoor camping projects must have a thematic focus. Proposals must include a plan for evaluating the program in terms of its value to the participants. Unless there are extenuating circumstances, programs should maintain a ratio of not more than one adult per every ten young people. (If fewer than ten students are being sent on either side of an exchange, those students are entitled to one adult escort). Programs requesting an exception to the 1/10 ratio must provide a justification. One justifiable exception would be for those projects that include leadership development and training for adult leaders. Organizations wishing to pay for additional escorts from their own funds are free to do so.

Grantee organizations are responsible for developing a sustainable partnership with an organization in the NIS; designing and implementing the components of the exchange; managing all travel arrangements, logistics, insurance coverage, passports, visas, etc; and disbursing and accounting for funds.

Budget

The organization must submit a comprehensive line item budget. Costs for US and NIS students are to be listed separately. Details are available in the application packet. Grants awarded to eligible organizations with less than four years of experience in conducting international exchange programs will be limited to $60,000. Organizations should be familiar with grant regulations described in OMB circulars A110, A122, and A133.

Cost sharing is encouraged. Cost sharing may be in the form of allowable direct or indirect costs. The grant recipient must maintain written records to support all allowable costs which are claimed as being its contribution to cost participation, as well as costs to be paid by the Federal government. Such records are subject to audit. The basis for determining the value of cash and in-kind contributions must be in accordance with OMB Circular A110, Attachment E—Cost Sharing and Matching should be described in the proposal. In the event the recipient does not provide the minimum amount of cost sharing as stipulated will be reduced in proportion to the recipient's contribution.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application packet. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate geographical office of the U.S. Information Agency, and the Agency's budget and contract offices. Proposals may also be reviewed by the Agency's Office of the General Counsel. Funding decisions are at the discretion of the Associate Director of Education and Cultural Affairs. Final technical authority for grant awards resides with the Agency's Office of Contracts.

Review Criteria

Technically eligible applications will be competitively reviewed according to the following criteria:

1. Quality of the Program Idea

Proposals should exhibit originality, substance, rigor, and adherence to the criteria and conditions described above.

2. Reasonable, Feasible, and Flexible Objectives

Proposals should clearly demonstrate how the institution will meet the program's objectives and plan.

3. Multiplier Effect/Impact

Proposed programs should strengthen long-term mutual understanding, to include maximum sharing of information and establishment of long-term institutional and individual linkages. A program is also considered to have a strong "multiplier effect" if it affects a significant number of persons in addition to the actual program participants. For example, a group of high school students may have

extensive interaction with community groups.

4. Value to U.S.—Partner Country Relations

Assessments by USIA's geographic area desk, and USIS officers overseas of the need, potential, impact, and significance in the partner country(ies), as demonstrated by a sustainable partnership with an organization in the former Soviet Union.

5. Cost Effectiveness

The overhead and administrative components of grants, as well as salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate. Proposals should to the extent possible maximize cost-sharing through other private sector support as well as institutional direct funding contributions. Other things being equal, a proposal with a low cost per participant and/or a low cost per participant program day will have a competitive advantage.

6. Institutional Capacity

The proposed personnel and institutional resources of both the U.S. applicant and the NIS partner organization should be adequate and appropriate to achieve the program or project's goals.

7. Proposals Should Demonstrate Potential for Program Excellence and/or Track Record of Applicant Institution

The Agency will consider the past performance of prior grantees and the demonstrated potential of new applicants. A documented record of successful exchange programs, whether USIA financed or not, is one way in which an applicant may demonstrate strength in this area.

8. Follow-On Activities

In accordance with the stated objective of a sustainable partnership with an organization in the former Soviet Union, proposals should provide a plan for continued follow-on activity which ensures that USIA supported programs are not isolated events.

9. Evaluation Plan

Proposals should provide a thoughtful and comprehensive description of how the project will be evaluated in terms of meeting the objectives listed above and how such an evaluation would present quantitative data on participants, contacts, interactions, activities, achievements, etc., as well as qualitative appraisals of successes and shortcomings and suggestions for program improvement.

10. Selection Process

All participants must be between the ages of 14 and 17 at the time they begin the program. In all cases, selection should be merit-based. Selection criteria should include actual or potential leadership qualities, and may also include some or all of the following: Maturity, academic achievement, interest in the program, motivation, recommendations of teachers, and language ability, although no participant should be chosen solely on the basis of his or her language ability. As far as possible, participants should reflect the diversity of the communities from which they come. Ability to pay should not be a determining factor for either American or foreign participants.

11. Geographic Diversity

To the extent possible, the Agency will seek to fund programs from different geographic areas within the former Soviet Union and within the United States.

12. Participant Diversity

Programs should strive for a diversity of participants and include members of underrepresented groups; e.g., racial and ethnic minorities and persons with disabilities.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. A final award cannot be made until funds have been fully appropriated by Congress, allocated, and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about March 1, 1995. Awarded grants will be subject to periodic reporting and evaluation requirements.

Dated: June 8, 1994.

John P. Loiello,

Associate Director, Bureau of Educational and Cultural Affairs.

[FR Doc. 94–14511 Filed 6–15–94; 8:45 am]

BILLING CODE 8230–01–M

Samantha Smith Memorial Exchange Program—Youth Exchanges

ACTION: Request for proposals.

SUMMARY: The United States Information Agency (USIA) invites applications from U.S. educational, cultural, and other not-for-profit institutions to conduct exchanges of youth under the age of 21 with Central and Eastern Europe: Albania, Croatia, Slovenia, Bosnia-Hercegovina, Bulgaria, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia, and The Former Yugoslav Republic of Macdeonia, or the Newly Independent States (NIS) of Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. Proposals may address more than one country in each area but cannot combine NIS countries with those of Central and Eastern Europe. However, organizations may submit two different proposals for these two geographic areas. These exchanges represent part of the activities of the Samantha Smith Memorial Exchange Program and are subject to the availability of funding for the Fiscal Year 1995 program. A request for proposals in support of exchanges of college and university undergraduate students under the AEGIS of the Samantha Smith program will be published separately by the office of Academic Exchanges.

DATES: Deadline for proposals: All copies must be received at the U.S. Information Agency in Washington, DC by 5 p.m. EST on Friday, September 2, 1994. Faxed documents will not be accepted, nor will documents postmarked on a September 2 but received at a later date. It is the responsibility of each grant applicant to ensure that complete proposals are received by the above deadline. Grant funds are unlikely to be available before February 1, 1995.

ANNOUNCEMENT NUMBER: This Announcement number is E/P–95–03. Please refer to this number in all correspondence or telephone calls to USIA.

ADDRESSES: One complete signed original, three complete, fully tabbed copies, and ten partial copies (parts A through D only), not bound, must be submitted before the deadline to: U.S. Information Agency, Ref: E/P–95–03, Office of Grants Management, E/XE, room 336, 301 4th St. SW., Washington, DC, 20547.

FOR FURTHER INFORMATION CONTACT: Interested organizations and institutions should write or fax: U.S. Information Agency, Office of Citizen Exchanges, E/PY, room 314, 301 4th St., SW., Washington, DC 20547, FAX for NIS (202) 619–5311, for Central and Eastern Europe FAX (202) 619–4350 to request

detailed application packages, which include award criteria additional to this announcement, all necessary forms, and guidelines for preparing proposals, including specific budget preparation information. Questions may be directed to E/PY (202) 619–6299 (NIS) or E/PN (202) 619–5348 (Central and Eastern Europe).

SUPPLEMENTARY INFORMATION: Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life. Overall authority for these programs is contained in the Mutual Education and Cultural Exchanges Act of 1961, as amended, Public Law 87–256 (Fulbright-Hays Act).

Overview

Grant funding is intended to promote the exchange of young people 21 years of age or younger between the U.S. and the Newly Independent States (NIS) or Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan, and the Central and Eastern European countries of Albania, Bosnia-Hercegovina, Bulgaria, Croatia, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia, Slovenia, and the Former Yugoslav Republic of Macedonia. Proposals may address more than one country in each area, for example, a project with Bulgaria, Latvia, and Slovenia, or Belarus, Moldova, and Kyrgyzstan. Proposals cannot combine NIS countries with those of Central and Eastern Europe. The Agency's main objective is to foster interaction between American and foreign youth. Consequently, extensive interaction is a requirement. Proposals should demonstrate how American and foreign youth will interact in a way that encourages the exchange of ideas, values, culture, and information.

This competition will give priority consideration to projects taking place in Russia in areas other than Moscow and St. Petersburg, and to projects taking place outside of capital cities in all the eligible countries.

Twenty-five percent (25%) of the available funds will be reserved for organizations that have not received Samantha Smith grants in the past year. Grants are awarded to expand or enhance existing exchange programs or to encourage the development of new exchanges. Programs may involve the U.S. organization in a partnership with organizations in one or more countries. The minimum length of stay in country for a project should be three weeks.

Two categories of grants are being offered.

Category A—School-to-School Exchanges

A school-to-school exchange is one that involves a direct linkage between a U.S. and a Central and Eastern European or NIS elementary, middle, or high school, or a two-year college. (4-year colleges and universities are not eligible under this competition). An applicant must be a school, school district, or two-year college. The maximum grant for this category is $15,000. The exchange program activity should be reciprocal and permit students to live in each other's countries during the academic year when schools are in session. (This would include officially-sponsored summer school sessions). The proposal should provide detailed information on the classroom and other activities in both the U.S. and the partner country. The duration of the projects may be one academic year, one semester, or short-term (generally understood to mean three to eight weeks). Organizations which are receiving funding under other USIA grants for youth exchanges must insure that proposals submitted under this solicitation do not duplicate or overlap with programs already being funded by USIA.

Category B—General Youth Exchange

This category includes all other projects, which will be eligible for grants of up to $75,000. Semester and year-long high school or two-year college study programs conducted by exchange organizations may fall within this category, as may projects involving the annual exchange of groups of students and teachers among several linked schools for short-term stays during the academic year. (4-year colleges and universities are not eligible under this competition). For short-term (3–8 weeks) exchanges, preference is given to projects with a thematic focus. Eligible foci may include, but are not limited to: The arts (theater, dance, music, fine arts, literature, folklore, and film/video); language and culture; science, technology, and mathematics; conservation and the environment; historic preservation; museum training; social, political, and economic issues; agriculture; business and administration/management (including enterprise promotion). While a thematic focus is not an absolute requirement, care should be taken to avoid proposing a program which is too heavily weighted toward "touristic" activities and lacking in substance. Projects requesting support for tours of performing arts groups or sports teams are eligible if the primary purpose of the program is interaction among international participants and their hosts. Tours of performing arts groups or sports groups where the primary activity is performance or competition are not eligible.

Reciprocity is not a requirement for this category, but in general, USIA gives preference to proposals for reciprocal exchanges. The proposal should provide detailed information on the activities in both the U.S. and the partner country. The number of U.S. and foreign participants should be roughly equal. Such proposals must provide written evidence of the commitment of a counterpart organization in the partner country willing and able to engage in the proposed activities. In most cases the counterpart organization should assume a significant portion of the cost of hosting the American participants in the reciprocal portion of the program.

Guidelines

All categories of proposals must include: Participant selection criteria and a description of the selection process. All participants must be under the age of 21 at the time they begin the program. In all cases, selection should be merit-based. Selection criteria should include actual or potential leadership qualities, and may also include some or all of the following: maturity, academic achievement, interest in the program, motivation, recommendations of teachers, and language ability, although no participant should be chosen solely on the basis of language ability. As far as possible, participants should reflect the diversity of the communities from which they come. Ability to pay should not be a determining factor for either American or foreign participants.

Description of Orientation Programs

There should be ample introduction to the program theme, administrative procedures, basic historical, cultural, and social information, and substantive issues likely to be raised by their U.S. or foreign counterparts. The orientation program should help minimize the "culture shock" of the participants when they are in the partner country.

Information Concerning Stays in the Host Country

Preference is generally given to longer stays in-country. The proposal should describe in detail the selection and orientation processes for both U.S. and host families and institutions. Consideration will be given to those projects which for reasons or requirements of the partner country(ies) are of short duration, but the length of stay in country should be a minimum of three weeks.

Information Concerning Language Qualifications

Speaking ability in the language of the host country for both American and foreign participants is preferred, but not required. It is recognized that relatively few American young people will speak the languages of the host countries, given the fact that relatively few American schools teach these languages. Ideally, some participants in each incoming delegation should be conversant in English, and some participants in each outgoing delegation should be conversant in the host country language. However, no participant should be selected solely on the basis of his or her language ability.

Details on Planning

The proposal should show evidence of adequate lead/planning time to ensure a successful exchange program. A proposed time frame should also be included, as should provisions for monitoring and evaluating the program.

Proposed Budget

Organizations must submit a comprehensive line item budget for which specific details are available in the application packet.

Grants awarded to eligible organizations with less than four years of experience in conducting international exchange programs will be limited to $60,000. Organizations should be familiar with grant regulations described in OMB circulars A110, A122, and A133.

Cost sharing is encouraged. Cost sharing may be in the form of allowable direct or indirect costs. The grant recipient must maintain written records to support all allowable costs which are claimed as being its contribution to cost participation, as well as cost to be paid by the Federal government. Such records are subject to audit. The basis for determining the value of cash and in-kind contributions must be in accordance with OMB Circular A110, Attachment E—Cost Sharing and Matching, and should be described in the proposal. In the event the recipient does not provide the minimum amount of cost sharing as stipulated in the recipient's budget, the Agency's contribution will be reduced in proportion to the recipient's contribution.

Allowable Costs

Grant-funded expenditures will generally be limited to the following categories:

—In-country travel and per diem; i.e., lodging, meals, clothing, maintenance, and incidentals, or stipends.

—Orientation, honoraria, or preparation costs; briefing materials. Honoraria is limited to $150/day/speaker.

—Educational and cultural enrichment activities up to a limit of $150 per program youth participant.

—Tuition, conference/seminar registration fees, and other program admission fees.

—International travel, normally limited to partial support for Americans traveling to the NIS, Baltic Republics, or Central and East Europe, and Central and East Europeans traveling to the U.S. The American participants and/or the American organization should be encouraged to fund a portion of the Americans' travel costs, although full funding of participants from economically disadvantaged backgrounds is encouraged. The NIS partner organizations should also be encouraged to make a contribution toward international travel, but in this regard one should avoid a situation in which participants are chosen largely or wholly on the basis of their ability to pay, thus creating an unrepresentative group. In some cases 100% of the travel costs for NIS participants will be paid from USIA funds.

—Proposals should demonstrate substantial cost sharing in both program and administrative expenses.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not adhere to the guidelines established herein and in the application package. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate geographic area office, and the budget and contracts offices. Proposals may also be reviewed by the Agency's Office of General Counsel. Funding decisions are at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for grant awards resides with the USIA's grants officer.

Review Criteria

Technically eligible applications will be reviewed according to the following criteria in addition to what has been outlined already in this RFP:

1. Quality of Program Idea

Quality of the program plan and adherence of proposed activities to the criteria and conditions described above.

2. Reasonable, Feasible, and Flexible Objectives

Proposals should clearly demonstrate how the institution will meet the program's objectives and plan.

3. Multiplier Effect/Impact

Proposed programs should strengthen long-term mutual understanding, to include maximum sharing of information and establishment of long-term institutional and individual linkages. A program is also considered to have a strong "multiplier effect" if it affects a significant number of persons in addition to the actual program participants. For example, a group of high school students may have extensive interaction with community groups.

4. Value to U.S.—Partner Country Relations

Assessments by USIA's geographic area desk, and overseas officers of the need, potential, impact, and significance in the partner country(ies).

5. Cost Effectiveness

The overhead and administrative components of grants, as well as salaries and honoraria, should be kept as low as possible. Proposals which utilize grant funds for program rather than administrative costs will, in general, be more favorably reviewed. All other items should be necessary and appropriate. Proposals should to the extent possible maximize cost-sharing through other private sector support as well as institutional direct funding contributions. Other things being equal, a proposal with a low cost per participant and/or a low cost per participant program day will have an advantage.

6. Institutional Capacity

Proposed personnel and institutional resources should be adequate and appropriate to achieve the program or project's goals.

7. Institution's Track Record/Ability

Proposals should demonstrate potential for program excellence and/or the track record of applicant institution. The Agency will consider the past performance of prior grantees and the demonstrated potential of new applicants. A documented record of successful exchange programs, whether USIA financed or not, is one way in

which an applicant may demonstrate strength in this area.

8. Follow-on Activities

Proposals should provide a plan for continued follow-on activity (without USIA support) which insures that USIA supported programs are not isolated events.

9. Evaluation Plan

Proposals should provide a plan for evaluation of the program by the grantee institution.

10. Participant Diversity

Programs should strive for a diversity among participants and include members of underrepresented groups; e.g., racial and ethnic minorities and persons with disabilities.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. Final awards cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process by February, 1995. Awarded grants will be subject to periodic reporting and evaluation requirements.

Dated: June 8, 1994.

John P. Loiello,

Associate Director, Bureau of Educational and Cultural Affairs.

BILLING CODE 8230–01–M

Freedom Support Act—Youth With Disabilities

ACTION: Request for proposals.

SUMMARY: The United States Information Agency (USIA) invites applications from U.S. educational, cultural and other not-for-profit institutions to provide materials, training and facilitative support on programming for youth with disabilities for USIA grantee organizations administering international exchanges. This program is sponsored under the Secondary School Exchange Initiative as originally authorized under the Freedom Support Act of 1992. Funding for this program is subject to the availability of a Congressional authorization and appropriation.

DATES: Deadlines for proposals: All copies of proposals for grants under this request must be received at the U.S. Information Agency in Washington, DC, by 5 PM EST, on September 30, 1994.

Faxed documents will not be accepted, nor will documents postmarked by 30 September but received at a later date. It is the responsibility of each grant applicant to ensure that its proposal is received by the above deadline. Grant funding should be available after 1 February, 1995 for a grant program beginning in May, 1995.

ANNOUNCEMENT NUMBER: This announcement number is E/P–95–04. Please refer to this number in all correspondence or telephone calls to USIA.

ADDRESSES: The original, 3 fully tabbed copies and 10 copies (Tabs A–D) of the completed application, including required forms, should be submitted in the format described in the Bureau's application package and mailed to: U.S. Information Agency, Ref: E/P–95–04, Grants Management, E/XE, 301 4th Street rm. 336, Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Interested organizations/institutions should contact Robert Persiko, Secondary School Initiative, E/PY, rm. 314 (202) 619–6299; Fax (202) 619–5311, to request detailed application packets, which include award criteria additional to this announcement, all necessary forms, and guidelines for preparing proposals, including specific preparation information.

SUPPLEMENTARY INFORMATION: Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social and cultural life. Overall authority for NIS Secondary School exchanges is contained in the Freedom Support Act (Pub. L. 102–391).

Overview

Grant funding is intended to assist one organization over a one-year period to provide training, materials and facilitative support about programming of people with disabilities for organizations funded by the NIS Secondary School Initiative. The purpose of the training is to promote access to Initiative programs for youth with disabilities. Materials should support the training and supplement this goal where training is unfeasible. Facilitative support should foster connections between secondary school exchange organizations in the US with organizations serving persons with disabilities; also promote links with similar organizations in the following countries with organizations recruiting students for NIS–US exchange programs: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kryrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan. This grant is not intended to sponsor the actual exchange of students.

Students selected for exchanges under the NIS Secondary School Initiative are aged 14 to 17 years old. Proposals should focus on increasing access to exchange opportunities by participants within this age range.

A maximum of one grant will be awarded for this project.

Guidelines

The components of this program and their respective purposes are:

(1) Training

To enlighten organizations that recruit, select, place and educate students supported under the Freedom Support Act Secondary School Exchange Program about the importance of integration of participants with disabilities into their programs; to train these organizations in the logistics of handling the needs of a participant with a disability and provide supporting materials needed for training; to provide materials needed for continued training within organizations.

(2) Materials

To provide reference materials for organizations which do not participant in the above-mentioned training; to compile information about accessible educational facilities abroad, and;

(3) Facilitative Assistance

To facilitate connections between organizations to the NIS which provide support for persons with disabilities and the organizations which recruit, select and place students participating in NIS–US exchange programs; to facilitate connections between organizations in the US that provide support for persons with disabilities and organizations in the US which recruit, select, and place students participating in US–NIS exchange programs.

The following factors should be considered in preparing proposals.

—The Secondary School Initiative funds programs administered by over 50 different organizations in the United States. It is anticipated that this training will involve many, but not all, of these organizations. The final number of trainees is subject to the

availability of funding. Budgets should outline both general costs associated with development of training and materials and specific costs for these services on a per-organization basis.

—Interested organizations must submit a proposal to administer all components of this program.

—Proposals under the facilitative assistance component of this program must demonstrate the organization's connections to U.S. and NIS based organizations in support of people with disabilities.

Proposals should include a description of the process your organization would use to train organizations about the need to integrate persons with disabilities in programs and the type of logistical education necessary to facilitate integration.

The grantee organization should describe the process by which the information about accessible educational facilities in the NIS will be gathered, organized and distributed.

The grantee organizations should also demonstrate a plan for connecting US based organizations in support of disabled persons and US organizations administering grant money for student exchange. In addition, the organization should describe a culturally-sensitive plan for linking NIS organizations in support of persons with disabilities to secondary school exchange organizations.

Proposed Budget

Organizations must submit a comprehensive line item budget. Details are available in the application packet. Organizations should be familiar with OMB circulars A110, A122, and A133 on cost accounting principles.

Cost sharing is encouraged. Cost sharing may be in the form of allowable direct or indirect costs. The recipient must maintain written records to support all allowable costs which are claimed as being its contribution to cost participation, as well as costs to be paid by the federal government. Such records are subject to audit.

The basis for determining the value of cash and in-kind contributions must be in accordance with OMB circular A110, Attachment E. Cost sharing and Matching should be described in the proposal. In the event the organization does not provide the minimum amount of cost sharing as stipulated in the recipient's budget, the Agency's contribution will be reduced in proportion to the participant's contribution.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application packet. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate geographic area office, and the budget and contracts office. Proposals may also be reviewed by the Agency's Office of General Counsel.

Funding decisions are at the discretion of the Associate Director of Educational and Cultural Affairs.

Final technical authority to grant awards resides with the Agency's Office of Contracts.

Review Criteria

Technically eligible applications will be competitively reviewed according to the following criteria:

1. Quality of the Program Idea

Proposals should exhibit originality, substance, rigor, and relevance to Agency mission and adherence to the criteria and conditions described above and in application packet guidelines.

2. Reasonable, Feasible, and Flexible Objectives

Proposals should clearly demonstrate how the institution will meet the program's purposes as outlined in this RFP.

3. Multiplier Effect

Proposals should demonstrate how the programs will encourage continuation of the training objectives beyond the training period and beyond the training population.

4. Cost Effectiveness

The overhead and administrative components of grants, as well as salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate.

5. Institutional Capacity and Track Record

The organization should have demonstrated experience in the aspects of the program which they propose to administer. Proposals benefit by displaying a record of successful programs, including responsible fiscal management and full compliance with past Agency grants.

6. Follow-Up Activities

Proposals should present a plan to track the effectiveness of the training on following year exchange programs.

7. Evaluation Plan

Proposals should provide a plan for evaluation of the program by the grantee institution.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. Final award cannot be made until the funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about 15 December 1993. Awarded grants will be subject to periodic reporting and evaluation requirements.

Dated: June 11, 1994.

Barry Fulton,

Deputy Associate Director, Bureau of Educational and Cultural Affairs.

Sunshine Act Meetings

Federal Register
Vol. 59, No. 115
Thursday, June 16, 1994

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

DATE AND TIME: June 28, 1994, 2:00 p.m. (Eastern Time).

PLACE: Conference Room on the Ninth Floor of the EEOC Office Building, 1801 "L" Street, NW, Washington, DC. 20507.

STATUS: Part of the Meeting will be open to the public and part of the Meeting will be closed.

MATTERS TO BE CONSIDERED:

Open Session

1. Announcement of Notation Votes
2. Proposed Enforcement Guidance on *Hazen Paper Co.* v. *Biggins*
3. Proposed Guide on Communicating & Interacting with People who have Disabilities

Closed Session

Litigation Authorization; General Counsel Recommendations.

Note: Any matter not discussed or concluded may be carried over to a later meeting. (In addition to publishing notices on EEOC Commission meetings in the **Federal Register**, the Commission also provides a recorded announcement a full week in advance on future Commission sessions.) Please telephone (202) 663–7100 (voice) and (202) 663–4077 (TTD) at any time for information on these meetings.

CONTACT PERSON FOR MORE INFORMATION: Frances M. Hart, Executive Officer on (202) 663–4070.

This Notice Issued June 14, 1994.

Frances M. Hart,

Executive Officer, Executive Secretariat.

Part II

Department of the Interior

Bureau of Indian Affairs

Environmental Impact Statement, Rosebud and Cheyenne River Sioux Reservations, SD; Notice

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Draft Environmental Impact Statement (DEIS) for Livestock Grazing and Prairie Dog Management for the Rosebud and Cheyenne River Sioux Reservations in South Dakota

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This notice advises the public that a Draft Environmental Impact Statement (DEIS) is available for public review and that public hearings will be held regarding this document. This proposal is for the development of a plan to manage prairie dogs and livestock grazing on the Rosebud and Cheyenne River Reservations.

DATES: Two public hearings on the DEIS will be held. The first hearing will be held on Wednesday, July 20, 1994, at 7:00 p.m. The second hearing will be held on Thursday, July 21, 1994, at 7:00 p.m. Written comments should be received on or before August 22, 1994, at the address listed below.

ADDRESSES: Comments and participation at the public hearing are invited. Written comments should be directed to Mr. Donald Whitener, Acting Area Director, Bureau of Indian Affairs, Aberdeen Area Office, 115 4th Avenue, SE, Aberdeen, South Dakota, 57401, Phone: (605) 226–7343, Fax: (605) 226–7446. The first public hearing will be held Wednesday, July 20, 1994, at 7:00 p.m. at the Rosebud Sioux Tribal Council Chambers, Rosebud, South Dakota, 57570. The second public hearing will be held Thursday, July 21, 1994, at 7:00 p.m. at the Cheyenne River Sioux Tribal Council Chambers, Eagle Butte, South Dakota, 57625.

Copies of the DEIS and/or Summary of the DEIS have been sent to all agencies and individuals who participated in the scoping process and to all others who have already requested copies of the document. Persons wishing copies of this DEIS should immediately contact Ken Parr at the address below.

FOR FURTHER INFORMATION CONTACT: Ken Parr, Bureau of Indian Affairs, Aberdeen Area Office, 115 4th Avenue SE, Aberdeen, South Dakota, 57401, Phone: (605) 226–7621, Fax: (605) 226–7358.

SUPPLEMENTAL INFORMATION: This DEIS includes two proposals, one for each reservation. The proposals are for developing grazing management systems and for implementing varying levels of prairie dog poisoning on trust lands within the reservations. The proposals are intended to maintain or improve range condition to appropriate levels to sustain reservation carrying capacities for livestock grazing. This notice is required by the National Environmental Policy Act (NEPA) Regulations (40 CFR part 1503) to obtain comments on the DEIS from agencies and the public.

The Bureau of Indian Affairs (BIA), Department of the Interior, in cooperation with the Rosebud and Cheyenne River Sioux Tribes, has prepared a DEIS on the proposed management of prairie dogs and livestock grazing on trust lands on the Rosebud and Cheyenne River Sioux Reservations. The alternatives for each reservation include varying levels of prairie dog poisoning and grazing management systems.

The purpose and need for these actions is to maintain or improve range condition to meet tribal objectives to sustain reservation carrying capacities for livestock grazing and, therefore, increase tribal income. The Tribal Councils feel that some grazing lands are degraded and many perceive that prairie dogs compete with livestock for forage, causing economic losses to the tribes and tribal members.

The preferred alternative (Alternative 3) for the Rosebud Reservation would implement extensive range improvements and conduct chemical treatment of prairie dogs on all trust lands outside the 7,400-acre Corn Creek Management Area (CCMA, located on the western boundary of the reservation). This alternative would meet tribal grazing objectives and maintain the untreated CCMA for ecosystem biodiversity. Other alternatives considered were: continuing current grazing management program with no prairie dog treatment; implementing extensive range improvements and treating prairie dogs on all trust lands, with follow-up treatment for at least 90 percent control; and implementing extensive range improvements and treating prairie dogs on all trust lands once, with follow-up treatments only on trust lands outside the CCMA.

The preferred alternative for the Cheyenne River Reservation is the Prairie Management Plan (Alternative 2) developed by the Tribe in May 1992. The plan proposes extensive range improvements with prairie dog treatment conducted only under limited circumstances, such as in cemeteries and on powwow grounds. This alternative would meet tribal grazing objectives and maintain ecosystem biodiversity. Other alternatives considered were: continuing the current grazing management program with no prairie dog treatment on trust lands, implementing extensive range improvements on trust lands, conducting no prairie dog treatment within the 10,000 acre prairie dog complex along the Moreau River, conducting prairie dog treatment on varying proportion of the remaining trust lands (25 percent treatment to 100 percent treatment); and conducting treatment of prairie dogs on 50 percent of all trust lands, including those within the prairie dog complex along the Moreau River.

Agencies and individuals are urged to provide comments on this DEIS as soon as possible. All comments received by the dates given above will be considered in preparation of the final EIS. Comments made at the public hearings will not be considered comments on the DEIS unless they are submitted in writing.

This notice is published pursuant to Sec. 1503.1 of the Council on Environmental Quality Regulations (40 CFR Parts 1500 through 1508) implementing the procedural requirements of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.); Department of the Interior Manual (516 DM 1–7); and the Bureau of Indian Affairs guidelines (30 BIAM Supplements 1, 2, and 3.)

Federal Communications Commission

47 CFR Parts 0 and 1

Implementation of Section 9 of the Communications Act—Assessment and Collection of Regulatory Fees for the 1994 Fiscal Year and Amendment of the Schedule of Application Fees; Rules

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 0 and 1

[MD Docket No. 94–19; FCC 94–140]

Implementation of Section 9 of the Communications Act—Assessment and Collection of Regulatory Fees for the 1994 Fiscal Year

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission has adopted rules to implement section 9 of the Communications Act of 1934 to provide for the annual assessment and collection of regulatory fees. For fiscal year 1994, the Commission is required to utilize the Schedule of Regulatory Fees that Congress established in section 9(g) of the Act. The implementation of regulatory fees will further the National Performance Review goals of reinventing Government by requiring beneficiaries of Commission services to pay for such services.

EFFECTIVE DATE: July 18, 1994.

FOR FURTHER INFORMATION CONTACT: H. Walker Feaster, Office of Managing Director at (202) 632–0923.

SUPPLEMENTARY INFORMATION:

Report and Order

Adopted: June 3, 1994.
Released: June 8, 1994.

By the Commission: Commissioner Quello issuing a statement; Commissioners Ness and Chong not participating.

I. Introduction

1. By this *Report and Order*, the Commission adopts rules to implement section 9 of the Communications Act, as amended, 47 U.S.C. 159, providing for the annual assessment and collection of regulatory fees by the Commission.[1] The *Report and Order* establishes the amounts of the regulatory fees for Fiscal Year (FY) 1994 and the rules for the payment of such fees for fiscal years 1994 and thereafter.[2] Also, we are amending several of the rules governing the collection of the fees to be filed with applications and other filings pursuant to section 8 of the Communications Act, as amended, 47 U.S.C. 158.[3]

2. The rules we adopt below are designed to ensure that (1) collection of fees does not adversely affect the Commission's regulatory activities, (2) the most effective means possible are employed in the collection and deposit of fees, and (3) the paperwork (and financial burden) on the public resulting from our collection process is kept to an absolute minimum. The accomplish this goal, we have, to the extent possible, modeled our regulatory fee rules upon the rules that we previously established to govern the collection of fees filed with applications and other filings. See 47 CFR 1.1101 *et seq*. Moreover, in the course of fashioning rules to govern regulatory fees, we have revised several rules in order to improve the collection process related to these fees and, wherever possible, to ease the burden on those entities subject to the payment of these fees. Implementation of rules governing the collection of regulatory fees also furthers the National Performance Review goals of reinventing government by requiring beneficiaries of the Commission's services to pay the costs associated with these activities.

II. Background

3. Section 9(a) of the Communications Act requires the Commission to collect regulatory fees to recover the annual cost of its enforcement activities, policy and rulemaking activities, user information services, and international activities. 47 U.S.C. 159(a). 47 U.S.C. 159(b)(1)(A). The Schedule of Regulatory Charges sets forth in section 9(g) the categories of regulated entities subject initially to the regulatory fee requirement and designates the fees to be collected for each subject category of regulatee. 47 U.S.C. 159(g). The Schedule of Fees sets forth annual regulatory fees for specific categories of regulatees in Private Radio, Mass Media, Common Carrier and Cable Services.[4]

4. Section 9(f)(1) requires the Commission to adopt rules to implement the assessment and collection of the annual regulatory fees. 47 U.S.C. 159(f)(1). On March 4, 1994, we adopted a *Notice of Proposed Rulemaking* (*"NPRM"*) to implement section 9 of the Act.[5] In the *NPRM*, we concluded that Congress intended the Commission to rely upon the Schedule of Regulatory Fees enacted in section 9(g) to recover costs for FY 1994.

5. In addition, the *NPRM* proposed rules providing for: (1) Exemptions from

---

[1] Section 9 of the Act was added by section 6002(a) of the Omnibus Budget Reconciliation Act of 1993 (hereinafter "1993 Budget Act"). See Pub. L. No. 103–66, Title VI, 6002(a), 107 Stat. 397 (approved August 10, 1993). Section 9 is codified at 47 U.S.C. section 159.

[2] As discussed below, we will establish the accounting systems necessary to make adjustments in the Schedule of Regulatory Fees required for the assessment of fees in future years in a subsequent and separate rulemaking proceeding. See 47 U.S.C. 159(b)(3), (i).

[3] 47 U.S.C. § 158. See generally 47 CFR part 1, subpart G; *Establishment of a Fee Collection Program to Implement the Provisions of the Consolidated Omnibus Budget Reconciliation Act of 1985*, 2 FCC Rcd 947 (1987) (hereinafter "*Fees 1*"), *recon. gmnted in part*, 3 FCC Rcd 5987 (1988) (hereinafter "*Fees 1 Reconsideration*"); *Establishment of a Fee Collection Program to Implement the Provisions of the Omnibus Budget Reconciliation Act of 1989*, 5 FCC Rcd 3558 (1990) (hereinafter "*Fees II*"), *recon. granted in part*, 6 FCC Rcd 5919 (1991) (hereinafter "*Fees II Reconsideration*"). See also section 6003(a)(2) of the 1993 Budget Act, Pub. L. 103–66, Title VI, § 6003(a)(2), 107 Stat. 401 (1993) (making conforming amendments to section 8).

[4] Congress included the regulatory fees for cable services in the Schedule of Regulatory Fees as a subpart of the fees established to recover appropriations related to the regulation of mass media services. 47 U.S.C. 159(g). Because we recently established a Cable Services Bureau to administer the regulation of cable television operations, we have amended our rules to set forth separately the regulatory fees applicable to cable services. See section 1.1155, 47 CFR 1.1155.

[5] *See Notice of Proposed Rulemaking in the Implementation of Section 9 of the Communication Act*, FCC 94–46, released March 11, 1994.

the regulatory fee requirements for governmental entities, nonprofit entities, amateur licensees, noncommercial educational broadcasters, and licensees in the public safety services, (2) standards for waiver, reduction and deferment of regulatory fees, (3) procedures for the payment of regulatory fees, including the timing and method of payments, and the location for submission of payments, and (4) procedures to assure timely payment of regulatory fees, including announcements in the **Federal Register** of the filing times for the fee payments, and penalties for late payment and nonpayment of fees.

III. Discussion

A. Assessment of Regulatory Fees for FY 1994

6. The *NPRM* proposed that for FY 1994, the Commission would utilize the Schedule of Regulatory Fees established by Congress in section 9(g) of the Act. 47 U.S.C. 159(g). In response to this proposal, several commenters suggest that we amend the Schedule of Fees for FY 1994. They contend that fees in the Schedule are too high, that the schedule provides the wrong mechanism for assessing fees, and that additional services should be included in the fee schedule.

7. In particular, Fireweed Communications Corp.[6] (Fireweed) argues that the regulatory fees impose an unfair and confiscatory financial burden on broadcast stations in small markets, and impinge on the constitutional right of freedom of speech of Fireweed and its listeners. Fireweed contends that the financial burden imposed by the regulatory fee would cause it to reduce its programming or even to cease its operations. The Joint Commenters, consisting of several cable television interests,[7] argue that we have authority to modify the Fee Schedule for FY 1994, to add classes of services that Congress did not include in section 9(g)'s fee schedule. In addition, the Joint Commenters assert that the Commission is authorized to modify the fee schedule for FY 1994 because section 9(b)(3), which governs permissive adjustments to the fee schedule, including addition of services to the schedule, does not restrict our authority for making changes to fiscal years after 1994. In particular, the Joint Commenters contend that Direct Broadcast Satellite, if available later this fiscal year, Instructional Television Fixed Service, if used for commercial purposes, and Multi-channel Multipoint Distribution Services, because it is not expressly enumerated as a service subject to the fee requirement, should be added to the fee schedule and assessed a fee for FY 1994. The Joint Commenters also assert that adopting a fee requirement for these services in this proceeding will avoid the necessity for immediately initiating a new rulemaking to include these services in the fee schedule for FY 1995 and thereafter.

8. Other parties including Sprint, the Cellular Telephone Industry Association (CTIA), Comsat, and the Utilities Telecommunications Counsel (UTC), support our conclusion in the *NPRM* that Congress intended that the Schedule set forth in section 9(g) would govern the assessment and collection of fees for FY 1994. UTC states that Congress' inclusion in section 9(g) of the fee schedule, as well as other language in the Act, clearly demonstrates that Congress did not intend that the Commission revise the fee schedule so soon after its enactment.

9. We are not persuaded by the arguments urging a reduction in the statutory fees or amendment of the service categories subject to the regulatory fees. In the *NPRM*, we concluded that Congress did not intend that we change the amounts or the services established by the statutory fee schedule for 1994. Our conclusion is supported by the Conference Report, which states that we have authority to review and adjust the fees after one year.[8] Congress also enacted the fee schedule after reviewing information that we provided concerning the services subject to the fees. We do not believe that Congress would have enacted section 9(g) intending that we immediately amend the service classifications or fee amounts in its schedule.

10. In addition, other provisions of section 9 support our interpretation. Section 9(i) requires that, before making adjustments to the services included in the fee schedule, we must develop accounting systems and provide an opportunity for public comments on proposed cost allocations. *NPRM* para. 9. Section 9(b)(4)(B) requires that any amendment to the services contained in the statutory fee schedule not be effective until 90 days after Congress is notified of those revisions. See 47 U.S.C. 159. As a practical matter, the Commission could not possibly meet these requirements in time to permit section 9 fee collections in FY 1994. Given these statutory requirements, we conclude that Congress did not intend that we make any changes to the services subjected to the regulatory fee requirement or the amounts contained in the schedule for FY94.[9]

11. Also, we do not agree with Joint Commenters that this is the appropriate proceeding to amend the Schedule of Fees for future years. Such amendments would be premature because we do not now have the information necessary to establish regulatory fees for FY 1995. As we stated in the *NPRM*, we intend to commence a separate proceeding in connection with the assessment of fees for FY 1995. We will seek in that proceeding comment concerning the allocation of costs of our enforcement, policy and rulemaking, information services, and international services, including any necessary adjustments to the classes of services set forth in section 9(g)'s fee schedule. See 47 U.S.C. ¶ 159(i).

12. Therefore, as we proposed in the *NPRM*, in order to meet the congressional directive to implement the collection of regulatory fees in Fiscal Year 1994, we are adopting without modification the Schedule of Regulatory Fees enacted by Congress in section 9(g). See 47 U.S.C. 159(b)(1)(C). The Schedule provides a listing of the specific categories of regulatees in the Private Radio, Mass Media, Common Carrier and Cable services that are required to pay a regulatory fee. We have incorporated the schedule into our rules and we have established separate sections of the rules to provide the payment schedules for the Private Radio

[6] Fireweed filed its comments late. It argues that the Commission failed to provide proper notice to interested parties and asserts that we failed to publish the *NPRM* "in publications likely to be obtained by small entities" or to "conduct open conferences and public meetings" concerning our proposals as provided in 5 U.S.C. § 609 (2) and (4). However, section 609 requires only that we "assure that small entities have been given an opportunity to participate in the rulemaking" through means "such as" those enumerated in section 609. 5 U.S.C. § 609. We have met that requirement. The *NPRM* was published and distributed pursuant to section 1.412 of our rules and was distributed to over 100 members of the trade press, newspapers, wire services, broadcasters, and magazines, including those dealing with consumer, minority and small business issues. In addition, the Commission's Daily Digest, which included notice of the *NPRM*, was published on Internet. We will also accept and give full consideration to the arguments in Fireweed's comments even though they were untimely filed. Further, we will accept the late filed comments of MCI Telecommunications Corporation.

[7] The Joint Commenters are Blade Communications, Inc., Cablevision Industries Corp., Crown Media, Inc., Multivision Cable TV Corp., Parcable, Inc., Providence Journal Company, Summons Communications, Inc., and Star Cable Associates.

[8] H.R. Rep. No. 213, 103 Cong., 1st Sess. 499 (1993) (Conference Report).

[9] In view of our conclusion that Congress did not intend us to make any changes to its Schedule of Fees for FY 1994, we will not at this time assess fees on lifetime restricted radiotelephone and radio operator applicants and permittees.

Services (§ 1.1152), Mass Media Services (§ 1.1153), Common Carrier Services (§ 1.1154) and Cable Services (§ 1.1155). In Appendix A of this *Report and Order*, we have included guidelines for the payment of fees for each service subject to the regulatory fee requirement.

B. Exemptions From Regulatory Fees

13. In the *NPRM*, we proposed to exempt certain discrete categories of regulatees from the requirement of file annual regulatory fees. Section 9(h) explicitly provides and exemption from the fees for governmental entities, nonprofit entities and amateur radio licensees. 47 U.S.C. 159(h). We concluded that Congress also intended to exempt all public safety licensees and noncommercial educational broadcasters from the regulatory fee requirements. In the paragraphs below, we review each of these categories and consider the comments that address each exemption.

1. Governmental Entities

14. As provided in section 9(h) and proposed in the *NPRM*, governmental entities will exempt from the regulatory fee requirement. As proposed, our rule implementing the governmental exemption will conform to existing § 1.1112(f) of the rules, which provides an exemption for governmental entities from the fee requirements for applications and other filing fees. See 47 CFR 1.1112(f); see *also* 47 U.S.C. 158(d)(1) (A), (B). Section 1.1112(f) broadly defines the term 'governntental entity" to include "any state, possession, city, county, town, village, municipal corporation or similar political organization or subpart controlled by publicly elected officials exercising sovereign direction and control over their respective communities or programs." The comments generally support our proposals with regard to the exemption for governmental entities.

15. Cellular Communications of Puerto Rico (CCPR) contends that we should limit the government exemption so that only usual and customary governmental functions would be exempt. In particular, CCPR argues that the Puerto Rico Telephone Company (PRTC) which is controlled by the Commonwealth of Puerto Rico and operates a cellular telephone system, should be required to pay a regulatory fee to the extent that it engages in for profit or competitive operations. Further, CCPR argues that exempting PRTC from the regulatory fees for cellular telephone systems would give PRTC an unfair competitive advantage. In opposition, PRTC argues that Congress did not distinguish between different activities, and that as a result all of its operations are subject to the governmental exemption.

16. The governmental exemption is mandated by Congress. Congress did not distinguish between various governmental functions, nor did it restrict the exemption's availability for any specific governmental entities. Therefore, we do not accept CCPR's proposal.

2. Nonprofit Entities

17. Section 9(h) also exempts nonprofit entities from the requirement to file regulatory fees. In the NPRM, we tentatively found that Congress intended its exemption for nonprofit entities to cover any entity possessing nonprofit, tax exempt status pursuant to section 501 of the Internal Revenue Code, 26 U.S.C. 501. Congress' exemption of nonprofit entities from regulatory fees is substantially broader than the limited exemption from the payment of application filing fees that Congress afforded in section 8(d)(1) to nonprofit entities licensed in the Public Safety Radio Services and tax exempt under section 501(c)(3). See 47 U.S.C. 158(d)(1); see also 47 CFR 1.1112(b). The comments generally support our interpretation of the exemption, and we will adopt the exemption as proposed in the *NPRM*. The nonprofit exemption will be available only to those licensees who have established their nonprofit status under section 501.

3. Amateur Licensees

18. Pursuant to section 9(h), we proposed to establish an exemption from regulatory fees for amateur radio operators licensed under part 97 of our rules. However, Congress included in the Schedule of Fees an annual regulatory fee covering vanity call signs, and we proposed to establish a fee for amateur vanity call signs. We proposed that this fee would be assessed if our proposed rules to establish vanity call signs become effective. See *Notice of Proposed Rulemaking*, 9 FCC Rd 105 (1993).

19. We will adopt the exemption for amateur licensees as set forth in *NPRM*. If our proposal to issue vanity calls signs is adopted, we will also assess a regulatory fee in FY 1994 upon persons filing applications, pursuant to the charges listed in Congress' fee schedule.[10]

[10] The American Radio Relay League, Incorporated asserts that it has requested Congress to change the vanity call sign annual regulatory fee to a one time application fee. We, of course, will modify our fee schedule to be consistent with any congressional amendment of the fees.

4. Noncommercial Educational Broadcasters

20. In the NPRM, we concluded that regulatory fees are not applicable to noncommercial educational broadcasters. Congress included commercial television and AM and FM radio broadcast licensees and permittees in its Schedule of Fees. In contrast, Congress omitted the noncommercial educational stations from the category of stations subject to the regulatory fee. In addition, and consistent with existing section 1.1112(d) of the rules governing application fees, we proposed to exempt from the regulatory fee requirement any secondary and auxiliary broadcast services, such as low power television ("LPTV") stations, television translators and boosters, remote pickup stations and intercity relay stations and other Mass Media, Common Carrier, and Private Radio facility authorizations used with noncommercial radio, television and instructional services qualifying for the exemption. See 47 CFR 1.1112(d). The comments supported the exemption for nonprofit educational broadcast stations and we will adopt the exemption as set forth in the *NPRM*.

21. Further, we affirm the tentative conclusion of the *NPRM* that noncommercial international short-wave will be subject to the regulatory fees. Congress did not provide an express exemption for these stations and none of the commenters urged us to exempt the international short-wave stations. In addition, unlike noncommercial LPTV and translator stations, the government does not provide financial support to noncommercial international short wave stations through the Corporation for Public Broadcasting (CPB) or the National Telecommunications and Information Administration (NTIA). Thus, the considerations that led us to conclude that Congress intended to exempt noncommercial educational LPTV and translator stations are not present with respect to international short-wave stations. See *Fee Collection Program*, 6 FCC Rcd 5919, 5925 (1991).

5. Public Safety Services

22. We have received no comments opposing our proposal to exempt all licensees in the Special Emergency Radio and Public Safety Radio services from regulatory fees even where the licensee does not qualify for an exemption as a governmental or nonprofit entity. In the *NPRM*, we noted that the legislative history states that

Congress intended to exempt public safety licensees from regulatory fees. APCO, in supporting our proposal, urges that we limit the public safety exemption to entities eligible for Public Safety Radio Service licenses pursuant to the provisions of part 90, subpart B, and not exempt licensees merely because they are authorized to operate on a public safety channel. We agree with APCO that only entities eligible to operate as public safety licensees should be entitled to an exemption. Therefore, we will restrict the public safety exemption to entities eligible to operate in the Special Emergency Radio or Public Safety Radio Services.[11] Under this definition, the fact that a licensee is authorized to use a frequency allocated to these services is insufficient to gain an exemption as a public safety entity.

6. Certification of Exempt Status

23. In order to implement our congressional mandate concerning exemptions, the *NPRM* asked the parties to comment on the appropriate method for establishing exemptions from regulatory fees. Our goal is to minimize the burden on applicants and licensees seeking exemption from the regulatory fees. See *NPRM* at ¶¶ 13, 16, and 21. The commenters supported our efforts and urged reporting and exemption certifications designed to minimize their paperwork burdens.

24. Forest Industries Telecommunications (FIT) proposed that the Commission allow nonprofit entities to establish their exempt status by submitting a Determination Letter issued by the Internal Revenue Service (IRS) stating that the applicant has qualified for tax exempt status under Section 501 of the Internal Revenue Act. The Utilities Telecommunications Council (UTC) urges that we reduce the burden on entities seeking to obtain a nonprofit exemption by requiring only that they file their employer identification numbers (EINs). UCC asserts that EINs are sufficient to permit verification of an entity's nonprofit status. The National Telephone Cooperative Association (NTCA) urges that we also exempt entities that have applied for IRS Determination Letters so that IRS administrative delays do not result in the denial of exemption from the regulatory fee requirement. NTCA requests that our determination of nonprofit status remain effective until a change in such status is determined by the IRS.

25. PRTC urges us to rely upon existing exemptions from application fee payments held by governmental entities rather than require these entities to provide additional certifications to obtain exemptions from the regulatory fee requirement. Similarly, UCC contends that no additional certification of exempt status should be required from governmental applicants in the Private Radio services since applications for these services require information disclosing their exempt status.

26. We agree with PRTC and UCC that we can rely on the data in private radio service applications and in the Commission's files to determine a regulatee's exempt status. Further, licensees and other regulatees for whom we have such data will not be required to file documentation to support their exempt status. If, after reviewing the information already on file, we are unable to determine a regulatee's exempt status we will issue a request that an applicant or licensee further document its claim of exempt status. With respect to amateur, noncommercial educational broadcast stations and public safety licensees, we do not anticipate any problem in establishing their eligibility for exempt status because their exempt status is based on the nature of their licenses.

27. When our records contain no evidence of a governmental entity's exempt status, we will accept a certification of its governmental status. Nonprofit licensees may submit section 501 Determination Letters. Because these documents are readily available in the files of nonprofit entities, we decline at this time to establish a mechanism to verify nonprofit status through EINs. We will also require that an entity with a pending request for an IRS Determination Letter submit a regulatory fee because the IRS may deny the request for tax exempt status. However, we will refund the fee for the period covered by a subsequently issued Determination Letter.[12]

28. We caution that we expect regulatees to act in good faith. In any instance in which payment is overdue, and the licensee or permittee cannot establish its entitlement to an exemption, we will assess a 25 percent penalty for late payment as authorized by Congress.

C. Waivers, Reductions and Deferments

29. Section 9(d) provides that "[t]he Commission may waive, reduce, or defer payment of a fee in any specific instance for good cause shown, where such action would promote the public interest." 47 U.S.C. 159(d). Section 9(d) is similar to, if not identical with section 8(d)(2) of the Act related to waivers and deferments of application fees. 47 U.S.C. 158(d)(2). Pursuant to section 8(d)(2), we have permitted waivers only on a case-by-case basis following a demonstration that the public interest clearly overrides the private interest of the requester. Thus, in our *NPRM*, we proposed to restrict similarly waivers to encompass only those requests unambiguously articulating "extraordinary and compelling circumstances" outweighing the public interest in recouping the cost of the Commission's regulatory services from a particular regulatee.

30. For those entities required to file regulatory fees with their applications, such as licensees in the private radio service, we proposed procedures for filing waiver, deferral and reduction requests similar to those we have fashioned for application fee waiver requests. See 47 CFR 1.1115(e). Persons seeking waiver or reduction of a regulatory fee would submit the required fees and forms along with their requests for waiver or reduction. We noted that this procedure assures efficient collection of necessary fees and avoids the possible imposition of a late fee in the event that the licensee's request for waiver or reduction is denied. In the case of standard regulatory fees, we further proposed that the required fee accompany any request for waiver or reduction. In either case, we proposed to return or modify the tendered fee upon grant of the waiver or reduction request. Finally, we proposed that a request for deferred payment of the required fee should be submitted 60 days in advance of the date established for the payment of the fee in order to permit review and action prior to the fee's due date.

31. Several state broadcasting associations (State Broadcasters) in their joint comments, suggest that the public interest would be served by granting permanent or temporary waivers or reduction or deferment of fees to Mass Media licensees who can demonstrate that payment of the fees would impair their service to the public. The State Broadcasters contend that our authority to waive, reduce or defer fee payments

[11] Moreover, we will not assess a regulatory fee upon Emergency Broadcast Service (EBS) licenses for auxiliary service facilities that use government-provided equipment because these stations are dedicated for EBS and are used solely for public safety purposes.

[12] To obtain a refund a regulatee must demonstrate that the period covered by the Determination Letter's finding of tax exempt status includes the date that we established for the calculation of its fee in the fiscal year for which the refund is requested. Further, an entity will be subject to a regulatory fee for the fiscal year that the IRS terminates its tax exempt status if the termination is made prior to the date for calculating its fees.

in such cases is clear if a showing is made that payment of the fee would result in degradation of service to the public, citing *NBC* v. *United States*, 319 U.S. 190 (1943); *FCC* v. *Sanders Bros. Radio Station*, 309 U.S. 470 (1940). In order to demonstrate financial hardship, the State Broadcasters urge that they be allowed to submit any relevant evidence, including tax records, unaudited balance sheets or any other financial statements. Further, the State Broadcasters argue that the fee should be automatically waived if a Mass Media licensee is in bankruptcy, receivership or trusteeship because this status is a clear signal of financial hardship.

32. The Broadcasters, joined by the National Association of Broadcasters (NAB), contend further that the requirement to file the regulatory fee payment with a request for waiver is irrational where the basis for the waiver request is the financial hardship of the licensee. Further, the NAB states that it will be impossible to dispose of waiver requests before the fee payments are due for FY 1994 because of the short period between the completion of this proceeding and the date for submission of fees. Moreover, the NAB stresses that Congress contemplated that there would be situations where the financial burden imposed by the fee requirement would be so onerous that payment should be waived. According to the NAB, if Congress' purpose in providing for waiver, reduction or deferment is to have any practical effect, according to NAB, we should not require applicants requesting waivers for financial hardship to suffer additional financial burden that they cannot afford.

33. We are not persuaded that we should modify our proposal to generally require the filing of the regulatory fee with each waiver or reduction request. Rather, we continue to believe that our current procedure will help ensure efficient collections.

34. Nevertheless, we recognize that there may be exceptional instances in which requiring payment of the regulatory fee along with a waiver or reduction request could result in the reduction of service to a community or other financial hardship to the licensee or other regulatee. In those instances, the licensee should submit, together with its waiver request, a petition to defer payment until the waiver request is resolved. In order to reduce the burden on regulatees, we will accept petitions for waiver, reduction and deferment so long as they are filed no later than by the date payment is due. The filing of the deferment request will toll the requirement to pay the regulatory fee until disposition of the deferment request.[13]

35. Petitioners seeking a waiver, deferral or reduction of a regulatory fee based upon financial hardship may submit any relevant information in support of their request. We will review the supporting documents and base our ruling upon the information submitted and any additional information available in our records. If a petitioner presents a compelling case of financial hardship, no payment of the regulatory fee will be due. If the supporting materials do not present sufficient evidence of hardship, we will deny the petition. If the fee has not already been submitted, the petitioner will then have 30 days to file its regulatory fee in order to avoid the assessment of penalty charges and the invocation of any other available remedy. The filing of a petition for reconsideration will not toll this 30-day period.

D. Procedures for Payment

1. Categories of Payors

36. Pursuant to section 9(f), we proposed to establish three classes of regulatory fee payments, standard, small and large, based upon the size of the payment required by the Schedule. The time for submitting the fee would be determined by the class of fee payment. Persons making "large" fee payments for Fiscal Year 1994 would be eligible to complete their fee payment in two installments. Moreover, we stated that consideration would be given to allowing four installment payments for Fiscal Year 1995 and thereafter. We proposed, however, that small fee payments be remitted when an application for a license of a facility subject to the fee is filed and the payment amount is the fee due for the entire term of the license or other authorization. We proposed that regulatees subject to a standard fee are to submit the fee in a single, annual payment. The specific date for the payment of a standard fee would be announced by public notice and published in the **Federal Register** well before the payment's due date.[14]

37. Brown and Schwaninger (B&S) states that Congress intended to establish only two, not three, categories of regulatory fees—large fees and small fees—because section 9(f) enumerates only two such categories of fee payments. B&S contends that Congress would have included in section 9 explicit authority to establish a third category if it had intended to provide such authority. In the absence of any language in section 9 indicative of a third category, B&S contend that we are precluded from adopting a standard fee category and collecting standard fees. Instead, B&S reasons that our authority under section 9 is limited to determining that a particular fee is either large, and establishing an installment plan, or the fee is small and collecting it in advance for a number of years not to exceed the term of the license.

38. We reject B&S's interpretation of section 9(f). In section 9(a), the general authority provision, Congress broadly empowered us "to assess and collect regulatory fees. . . ." Subsection 9(f) requires only that our rules include specific provisions providing for advance payments in the case of small fees and installment payments for larger ones. Nothing in that section, or in logic, compels a conclusion that every fee must necessarily fall within a category of either "large" or "small." Section 9(f) is simply silent regarding any other substantive aspect of our fee collection system, including whether other categories of fee payments may be established. Moreover, our conclusion that some regulatees are subject to payment of neither large nor small fees and, consequently, are only subject to a single annual regulatory "standard" fee payment, in no way conflicts with Congress' directive to include specific consideration of those payors of large and small fees. Therefore, we adopt our proposal to establish three categories of regulatory fees.

2. Installment Payments

39. In the NPRM, we proposed that some fees would be classified as "large" fees and, therefore, eligible for payment by installment. For FY 1994, we identified the following fee amounts in the specified categories as eligible for payment on the installment plan.

Regulatory fee category	Large fee
VHF and UHF Commercial Television Station.	Above $12,000.
Cable Television System .	Above $18,500.

[13] We deny NABER's request that we modify the fee that Congress required for filing a petition for waiver of a private radio service rule. Section 8 of the Communications Act empowers us only to adjust fees for applications and other filings based upon changes in the Consumer Price Index.

[14] GTE has urged that we allow licensees that transfer or assign licenses during FY 1994 to prorate their fee payments for the subject licenses on the basis of the amount of time the license was held by each party. The law authorizing section 9 was enacted in August 1993 and we believe that the negotiation between the parties to a transfer or assignment that occurred this fiscal year would ordinarily have included consideration of expenses related to the payment of regulatory fees. The party holding the license on the date the fees are due will be the party responsible for its payment.

Regulatory fee category	Large fee
Inter-Exchange Carrier	Above $500,000.
Local Exchange Carrier ...	Above $700,000.

40. Several parties urge that we expand significantly our proposed installment payment eligibility standards. GTE and Sprint request that we establish an installment fee benchmark of $250,000 for all classes of services that are not allowed to make installment payments under our proposal. The Broadcasting Association argues that all mass media licensees should be eligible for installment payments and the New Jersey Broadcasting Association (New Jersey Association) argues that all radio broadcasting licensees, or in the alternative, licensees encountering financial hardship should be permitted to make installment payments. GE American Communications, Inc. contends that licensees of satellite space stations should be afforded installment payment eligibility.

41. For FY 1994, we intend to permit installment payments by a reasonable number of regulatees whose fees greatly exceed the average fee in a particular service category. Through this means we can ensure that we are able to structure a fee collection system that can be fairly and efficiently administered, given our available resources and our relative inexperience with the regulatory fee program and its installment component.[15]

42. Since little time is left in which to collect fees for FY 1994, the practical impact of permitting licensees to make installment payments this year should be minimal in any event. In these circumstances, we thus find it both fair and prudent to decline to expand significantly installment payment eligibility for FY 1994. Also, we decline to permit installment payments for radio licensees, since no fee greater than $900.00 is imposed on these licensees.

43. As we gain experience with the regulatory fee program and, in particular, with its installment payment component, we will consider increasing eligibility to make installment payments. Therefore, with a limited exception, we will adopt our proposed installment fee standards. As discussed above, if a licensee concludes that payment of a fee in its entirety would constitute a financial hardship or if it cannot otherwise submit a full payment, the licensee may submit a partial payment of the fee with a petition to defer payment of the remaining portion of the fee. Interested parties may renew their arguments for increased installment opportunities in their comments concerning the assessment and collection of regulatory fees for 1995.

44. Notwithstanding our decision not to expand significantly installment payment eligibility this year, we have decided to permit space station and system licensees to submit their fees in installments. These licensees are relatively few in number, and the uniform fee structure for this service does not lend itself to the mechanism we used to establish installment payments in categories of services with progressive fee structures. Thus, we will permit licensees of geosynchronous satellite space stations and low earth orbit satellite systems to file their fee payments in installments.

45. As proposed, regulatees qualifying for installment payments for FY 1994 may make their fee payments in two separate and equally divided payments with the first payment due on the date set for paying standard annual fees. The date for each installment will be announced by Public Notice and in the **Federal Register**. For future fiscal years, we plan to permit four installments annually. We have decided not to impose an administrative fee with each installment payment. However, any late filed installment payment will be subject to a 25 percent late fee and the payment of interest for the delinquent amount. Further, any regulatee paying its fees by installment will automatically lose its eligibility to pay by installments if it fails to make any of its payments in a timely fashion.

3. Advance Payments

46. FIT and UTC support our proposal to require that regulatory fee payments in the Private Radio services be made in advance. We will require that full payment for Private Radio service regulatory fees due over the entire term of the authorization be submitted at the time an applicant in the Private Radio service submits its new, renewal or reinstatement application.[16] For example, regulatees in the private, shared use services would submit a one time regulatory fee of $35.00 per license to cover the entire five-year term of their license or authorization. Moreover until expiration of that authorization, we will not subject regulatees submitting advance fee payments to submit another (supplementary) fee payment for the same authorization until expiration of that authorization, notwithstanding any subsequent increase in the applicable annual fee. In instances in which a license is transferred to another service and, therefore, becomes subject to a different annual fee, as in the case of Private Radio licensees as they become Commercial Mobile Radio Service licensees, we have generally decided to apply any advance payment to the new annual fee requirement resulting from that reclassification. Thus, the licensee would become subject to payment of the difference between its initial fee payment and the amount required under the fee schedule for its new service.

47. For FY 1994, no Mass Media or Common Carrier regulatory fees will be subject to collection as small fees. However, in future years, we may decide to collect advance payments of fees in these services in the event that we conclude that the fee required is small and our experience shows that it is inefficient to collect the fee on an annual basis.

4. Timing of Payment

48. As noted, the date for payment of standard fees will be announced by public notice and published in the **Federal Register**. For licensees, permittees and holders of other authorizations in the Common Carrier, Mass Media and Cable Services whose fees are not based on a subscriber, line or circuit count, fees should be submitted for any authorization held as of October 1, 1993. We have selected October 1 as the date for calculating these fees since October 1 is the first day of the fiscal year and, therefore, current licensees subject to the fees would have benefited from out regulatory activities since the beginning of the period covered by their payment.[17]

49. In the case of regulatees whose fee payments are based upon a subscriber, line or circuit count, we have decided that the number of a regulatee's subscribers, lines or circuits on December 31, 1993 will be used to calculate the fee. We have selected the last date of the calendar year because many of these entities file reports with us as of that date. Others calculate their subscriber numbers as of the last day of the calendar year for internal purposes. Therefore, calculation of the subscriber fee as of that date will facilitate both an entity's computation of its fee payment

[15] Because our fee collection program is not yet capable of accounting for installment payments aggregated on other than a single service basis, regulatees must pay their fee payments on a service by service basis.

[16] Regulatory fee payments submitted with applications that are subsequently dismissed or denied will be returned upon request.

[17] In light of this decision, the comments by Orbital Communications Corporation, GE American Communications, Inc. and Starsys Global Positioning, Inc. concerning appropriate payments for satellites that became operational after commencement of the fiscal year are moot.

and our verification that the correct fee payment has been submitted. Cable systems should calculate their FY 1994 regulatory fees using the subscriber data that was provided to the Commission for the 1993 Annual Report of Cable Television Systems (FCC Form 325A) submission. Accordingly, the number of subscribers will not necessarily be based on December 31, 1993, but rather on "a typical day in the last full week of December 1993." (*See* FCC Form 325 Instructions at page 1). Finally, since entities in the Private Radio services pay their fees when applying for an new, renewal or reinstatement license, we will require Private Radio applicants to submit a regulatory fee with new, renewal and reinstatement applications filed following the effective date of these rules.

5. Method and Location of Payment

50. We proposed to adopt generally the same methods of payment for regulatory fees as we established for application fees. See 47 CFR 1.1108(a). In addition, we proposed to establish a process to permit the electronic filing of fee payments, initially on an experimental basis. Further, we proposed to permit payment of fees by credit card (VISA and Mastercard) in some circumstances subject to the requirement that, when a credit card payment is made, the entire fee payment must be made in a single credit card transaction.

51. Several parties have requested clarification of our requirements for multiple fee payments by Private Radio licensees.[18] Other parties support our proposals concerning payment methods, particularly our decision to accept credit cards and electronic payments.[19]

52. We have designed FCC Forms 159 (Remittance Advice) and 159–C (Continuation sheet) to replace Form 155. We are satisfied that the forms, and our rules, provide sufficient clarification of our requirements concerning multiple fee payments. These forms are to be submitted with any regulatory fee payment in the mass media, common carrier and cable services. Payors, in the Private Radio services making a single regulatory fee payment, other than by electronic means or credit card, are not required to file a Form 159 as long as their accompanying application form provides the information necessary to accomplish the payment.

6. Multiple Payments

53. Generally, we will permit any entity, including licensees in the private radio services, to make multiple section 9 regulatory (and section 8 application) fee payments within the same lockbox, including, where applicable, installment payments. Under this procedure, a single payment form and a single instrument of payment may be used to cover multiple regulatory fee payments.[20] A multiple regulatory fee payment also may cover payments by more than a single regulatee. Regulatees making combined payments of regulatory fees and application fees within the same lockbox for the Private Radio services may make payment with a single payment instrument and are to submit with the multiple payment a Form 159 and, if needed, a Form 159–C. Also, any regulatee making payment by credit card, including licensees in the private radio services, must submit a Form 159. See the specific instructions concerning the use of Forms 159 and 159–C. A copy of the forms and instructions may be obtained from the Federal Communications Commission, Forms Distribution Center, 2803 52d Avenue, Hyattsville, MD 20781.

54. Each regulatee will remain solely responsible for assuring that its applications and authorizations are properly accounted for and listed, and for submitting the full, cumulative payment covering each of its licenses and authorizations.[21] As described below, payment deficiencies could lead to penalty charges, dismissal of applications and revocation of authorizations.

55. As proposed in our *NPRM*, we are establishing a single lockbox at our lockbox bank for the receipt of mass media, common carrier and cable regulatory fees. The single lockbox will accept Mass Media, Common Carrier and Cable Services regulatory fee payments, and will enable regulatees to submit fee payments for these services to the same lockbox and to combine their fee payments for these service categories. However, Private Radio fees will not be accepted at this lockbox and, instead, should be submitted to the lockbox designated for application fees covering the category of license or authorization for which the payment is made. See sections 1.1152 through 1.1155 for the address, including lockbox number regarding payment of regulatory fees for the specific categories of service.

7. Electronic Payments

56. We have decided to proceed cautiously with our implementation of electronic fee payments. We require that regulatees intending to make fee payments electronically submit a written request to the Managing Director and obtain his written authorization or that of his designee prior to making their initial electronic payment.[22] Following authorization by the Office of the Managing Director, a payor may either instruct its bank to make payment of a regulatory fee directly to our lockbox bank or authorize us to direct our lockbox bank to withdraw funds directly from the payor's bank account. It is the responsibility of the entity subject to the regulatory fee payment to assure compliance with our electronic payment procedures. We will announce specific procedures for electronic payment by public notice. Failure to comply with these procedures will result in the return of the fee payment and a penalty of 25 percent if the subsequent refiling of the payment is late. Any late payment resulting from a failure to comply with our electronic fee payment procedures will also subject the payor to the penalties set forth in § 1.1163 of the rules.

57. Credit card payments may be made only with Mastercard and Visa since at this time these are the only credit cards authorized for payments to the United States Treasury. Credit card payments must be accompanied by a Form 159. Failure to accurately enter an authorized signature and the credit card name, number and date of expiration in blocks 22 and 23 of Form 159 will result in the return of the credit card payment and any associated filing.

E. Enforcement

58. As provided in section 9(c) of the Act, we proposed to enforce payment of regulatory fees by: (1) Assessing monetary penalties for late payment, (2) dismissal of applications and, (3) in egregious cases, revocation of existing licenses and authorizations. 47 U.S.C. 159(c). In addition, we proposed to pursue delinquent regulatees under the Debt Collection Act, 31 U.S.C. 3711 *et seq.*, and related statutory provisions.

[18] See comments filed by FIT, Naber and UTC.

[19] See comments filed by SWB and Bell Atlantic.

[20] Payors of regulatory fees for vanity call signs must submit a Form 159 with their applications.

[21] Payment of a regulatory fee may be made by a third party, as NABER and NECA request. However, the entity subject to the requirement to pay the fee will remain responsible for ensuring correct and timely payment.

[22] NYNEX has suggested that responsibility for recommending rules and procedures relating to the electronic payment of regulatory fees by common carriers be given to the proposed advisory committee that would be established to assist the Common Carrier Bureau in the development and implementation of an electronic filing system. See Public Notice, 9 FCC Rcd 1293 (1994). Since our system for the electronic payment of fees will soon be operational, we decline to combine these tasks into a single project. However, the Commission staff involved in these undertakings will closely coordinate their activities.

1. Penalties for Late Payment

59. Any regulatee that fails timely to pay its regulatory fee or make an installment payment shall be assessed a 25 percent penalty. See 47 U.S.C. 159(c)(1). A regulatory fee is untimely paid when it is not received at the lockbox bank by the date we establish for payment.[23] A fee payment is also considered late filed if an instrument of payment is not collectible. A 25 percent penalty will be assessed against any outstanding amount due on a fee, including any amount past due on an installment payment.

2. Dismissal of Application

60. We will dismiss any application, group of applications or other filings in the private radio services when a regulatee fails timely to submit any regulatory fee or associated penalty. 47 U.S.C. 159(c)(2). A fee payment will be considered to be late filed if a timely filed instrument of payment is uncollectible and the deficiency is not the result of bank error.[24] Thus, an application required to be submitted with a regulatory fee will be returned without action if the fee is not filed with the application. Moreover, if the returned application is mutually exclusive and must be filed by a date certain (or is required to be filed by a date certain for any other reason), the application will be dismissed as untimely if resubmitted subsequent to the filing deadline.[25]

3. Revocation

61. Section 9(c)(3) provides the Commission with authority to revoke an existing license or other authorization for nonpayment of a regulatory fee. 47 U.S.C. 159(c)(3). We proposed to reserve our revocation remedy for egregious cases of nonpayment. Section (9)(c)(3) does not require a finding of "willful or repeated" failure to make payment before a license or authorization may be revoked. Further, the section affords the right to a hearing only if a regulatee's response to our notice of revocation presents a "substantial and material question of fact."

62. Consistent with the statutory framework for revocation, any revocation hearing will be resolved by written evidence only and the burden of proceeding and the burden of proof will be on the respondent. As proposed, we will provide a period of 60 days for a regulatee to respond to our notice of revocation in order to assure that the subject regulatee will have a full opportunity to obtain the funds needed to make payment and to prepare its case. Further, we will assess the regulatee for the costs for the conduct of any revocation proceeding unless the regulatee "substantially" prevails at the hearing. 47 U.S.C. 159(c)(3). Finally, pursuant to section 9(c)(3), an order of revocation will not become final until the respondent regulatee has had an opportunity to exhaust its rights to judicial review under section 402(b)(5) of the Act. 47 U.S.C. 402(b)(5).

63. MCI recognizes that we should use our authority to revoke licenses and assess penalties as tools to enforce payment of fees. However, MCI urges that we restrict their use to cases where a licensee "willfully" has acted in bad faith in not paying the required fee. MCI states that this is particularly important for licensees with large and complex operations in services where licensing information currently is not included in our records since licensees with numerous authorizations may have no other way to confirm existing licenses. In these instances, according to MCI, we should attempt to resolve nonpayment issues informally since most fee payment disputes should be quickly and easily resolved.

64. We agree with MCI that our revocation powers should not be lightly invoked. We stated in the NPRM that we would reserve the right to revoke licenses held by a delinquent regulatee, but that we did not foresee the need for revocation, except in egregious circumstances. We will not consider a failed payment to be egregious as long as the regulatee demonstrates that its deficiency was not due to gross neglect in maintaining its records or in preparing to meet its obligation to make the fee payments. However, we intend to automatically assess delinquent payors a 25 percent penalty for late or missing payments, and such assessments will be strictly enforced.

4. Debt Collection Act Remedies

65. In addition to those specific remedies for nonpayment or untimely payment of regulatory fees provided in section 9, we will invoke our powers under the Debt Collection Act against any regulatee failing to pay a regulatory fee. See 31 U.S.C. 3711 *et seq.* We will afford a regulatee a 30-day period to respond to our notice of delinquency before invoking the procedures provided in the Debt Collection Act. Moreover, when necessary, we will refer outstanding debts of delinquent regulatees to the Internal Revenue Service for offset. See 31 U.S.C. 3720A. Included in the recovery of any delinquent fee will be an assessment of interest on the debt due, a penalty for nonpayment, and the allowable cost incurred due to the federal government in the collection process. See 31 U.S.C. 3717.

IV. Regulatory Fee Categories

66. In our NPRM, we provided an explanation of the regulatory fee categories subject to the payment of a fee under the schedule established by Congress. 47 U.S.C. 159(g). Where a regulatory fee category required additional interpretation or clarification, we relied on the legislative history of section 9 and our experience in establishing and regulating the various services. The categories and amounts set out in the schedule may, by the next fiscal year and in subsequent fiscal years, be amended, adjusted, or modified to reflect changes in our appropriations, costs and changes in the nature of our regulated services. See 447 U.S.C. 159(b) (2), (3).

67. Several parties have submitted comments regarding the regulatory fee categories. Generally, the comments addressed issues concerning possible adjustment of the required fees, the absence of certain services from the fee schedule, and definitions of terms important to payment of the fees. We address these comments below. In certain instances, we have clarified our explanation of a fee category based upon the comments of the parties. See Appendix B.

A. Private Radio Services

68. The two basic levels of statutory fees allocated for Private Radio Services, exclusive use and shared use services, were established on the premise that those licensees who generally receive a higher quality communications channel, due to exclusive or lightly shared frequency assignments, will pay a higher fee than those who share

[23] The NAB and the Society of Broadcast Engineers have proposed that we consider a regulatory fee payment to be timely submitted if the payment is postmarked by the date it is due. At least for FY 1994, we have decided to continue our practice of requiring fee submissions to be received by the date due. We believe retention of this practice for regulatory fee payments for FY 1994 is necessary to enable us to process these payments efficiently.

[24] As noted in the NNPRM, we will not accept instruments of payment other than cashier's checks for payors who are notified that payment will not be accepted by other payment methods. Of course, while we discourage the use of cash for the payment of fees generally, payment by cash is permissible. See 31 U.S.C. 5193. We will not be responsible for cash lost or stolen in the process of delivery to our lockbox bank.

[25] In any case in which a fee payor believes that a monetary or other penalty has been wrongfully imposed, the fee payor may file a petition requesting that the penalty be set aside.

channels of marginal quality.[26] *House Report* at 17. In addition, because of the relatively small fee amounts levied in the Private Radio Services, as we proposed in the Notice, applicants for new licenses, reinstatement and renewal licenses will be required to pay a regulatory fee covering an entire license term. Applications for modification or assignment of an existing authorization do not require payment of a regulatory fee since the expiration date of modified or assigned licenses will not reflect a new license term.

1. Exclusive Use

69. B&S disputes our interpretation of the fee schedule's requirement for Private Radio Service fees. Essentially, B&S contends that the term "shared use services," as it appears in the Schedule of Regulatory Fees, applies to systems that share use of their licensed facilities with others. According to B&S, an 800 MHz Specialized Mobile Radio Service licensee providing service to end users is an example of a shared use service because the SMRs customers are sharing the same base station facility. B&S argues that their analysis is consistent with 47 CFR 90.179 and precedent interpreting that provision of our rules. According to B&S, it follows that "exclusive use services" are comprised of licensed facilities that are used only by the licensee. An example of what B&S considers an exclusive use service is a licensee in the Taxicab Radio service that operates an internal communications system in the 470–512 MHz band.

70. B&S confuses the concept of shared use of a particular licensed facility with that of shared channel assignments. Under 47 CFR 90.179, a licensee or group of licensees may choose to share base station facilities on a non-profit or not-for-profit basis. In contrast, shared channel assignments require licensees to be licensed for the same channel for the same geographic area, and it is this latter concept that the Schedule of regulatory fees clearly addresses. As we have recently explained in our *Notice of Proposed Rulemaking* in PR Docket No. 92–235,[27] the private land mobile radio services licensed below 470 MHz [28] do not enjoy exclusive use of their channel assignments in a particular geographic area, and must accept a greater degree of co-channel interference.[29] In contrast, channel assignments above 470 MHz, including the SMR service, are granted on either an exclusive basis, with no other co-channel use authorized in a geographic area, or are licensed on an "earned exclusivity" basis, where co-channel use is capped. Thus, licensees of services above 470 MHz enjoy a lesser degree of interference than those below 470 MHz, and, accordingly, are required to pay the higher regulatory fee. To accept B&S's interpretation would ignore the established demarcation point between "shared" and "exclusive" channel assignments that 470 MHz represents.

71. RAM Mobile Data USA Limited Partnership (RMD) states that 900 MHz SMR licensees should be required to pay a fee based upon their total number of licensed Designated Filing Areas (DFA) rather than their number of base station and frequencies individually licensed with a DFA. RMD contends that an assessment based upon total DFAs licensed is more consistent with Congress' intention that regulatory fees be "reasonably related to the benefits provided to the payor of the fee by the Commission's activities." 47 U.S.C. 159(b)(1)(A). Further, RMD states that section 9(g)'s fee requirements will compel a consolidation of its licenses in order to minimize its fee payments. Similarly, the Utilities Telecommunications Council (UTC) objects to the requirement that 220 MHz licensees submit fees on a per license basis.

72. We decline to consider amending the section 9(g) fee schedule for FY 1994. As we have stated, Congress did not intend that we adjust any aspect of the fee schedule for FY 1994. RMD and UTC may submit their proposals for amending the fee schedule in our proceeding to establish regulatory fees for FY 1995.[30]

Of course, RMD and any other licensee may surrender or modify their licenses and other authorizations in order to minimize their regulatory fee burden.

2. Marine (Coast and Ship Stations)

73. Numerous formal and informal commenters, including the United States Coast Guard, raise concerns about our proposal to collect a regulatory fee from licensees in the marine service, including licensees using radio equipment voluntarily installed on small vessels, such as recreational boats.[31] These parties contend that a waiver, or exemption, for vessels that voluntarily carry radio equipment would enhance maritime safety and promote the public interest. As support, the parties state that marine radio provides a vital link between recreational boaters and emergency safety entities, as well as an important source for weather and navigational information. Further, they contend that the regulatory fee, added to the existing application fee, will act as a substantial disincentive for recreational boaters to carry, maintain and operate marine communications equipment.

74. We recognize that radio communication between recreational boaters and various emergency safety entities provides an important public service. However, our authority to waive a fee requirement is limited to "narrow" and "compelling circumstances." 2 FCC Rcd 947, 961 (1987); H.R. 3128, H.R. Rep. No. 453, 99th Cong., 1st Sess. 39–42, 423 (1985). In view of this strict Congressional limitation, we do not believe that a "blanket waiver" granted to boaters operating marine radios is permissible, absent legislative amendment.

3. General Mobile Radio Service

75. The Personal Radio Steering Group (PRSG) requests that we lower the annual fee for licensees in the General Mobile Radio Service (GMRS). PRSG states that, because the Schedule of Regulatory Fees does not explicitly include a fee for GMRS, we have authority to reduce its fee. Moreover, PRSG contends that the service should be subject to a lower fee than that for other shared use services because it is intended primarily for personal communications, similar to the Amateur Radio Service.

---

[26] As noted, for FY 1994, we will not impose a regulatory fee upon applicants for lifetime restricted radiotelephone permits and radio operator licenses.

[27] 8 FCC Rcd 8105, paras 11–13 (1992).

[28] The 220–222 MHz band is the sole exception, where we have created exclusive use channels below 470 MHz.

[29] While there may be rare instances where a particular licensee below 470 MHz does not share its channel assignment with other licensees in a geographic area, these licensees have no ability to preclude new licensees from requesting the same channel assignment.

[30] RMD asks that we waive our requirement that SMR licensees pay their fees in advance and, instead, permit them to submit these fees on an annual basis. RMD contends that the overall fees that may be imposed on SMR systems are not "small" and, therefore, fall outside the category of fees that Congress authorized us to collect in advance. We decline to allow RMD to pay its fees on an annual basis because Congress specifically indicated that fees for private radio services licensees, including licensees of SMR systems, would be considered small and subject to the payment of fees in advance. See H.R. Rep. No. 207, 102d Cong., 1st Sess. 11 (1991).

[31] In addition to the USCG, the commenters include the National Marine Electronics Association, Radio Technical Commission for Maritime Services, State of Nevada, Division of Wildlife and the United States Power Squadrons. We also received and considered informal comments filed by numerous parties concerned about the regulatory fee required from recreational boaters.

76. We agree with PRSG that section 9(g)'s fee schedule contains no explicit terms regarding the GMRS. However, that section does require the payment of a fee by "shared use" services in the private radio service. GMRS is within that category of service and was explicitly mentioned in the House Report as a service that would be subject to a fee. Therefore, we conclude that GMRS licensees are subject to a $7.00 fee for each year of the license term, payable in advance upon the filing of a GMRS application. We decline to rule on the merits of PRSG's argument that its fees should be lowered because, as discussed above, we conclude that Congress for FY 1994 intended us to assess fees in accordance with its Schedule.

B. Mass Media Services

1. Broadcast Stations

77. The regulatory fees in the Schedule for Mass Media services generally include broadcast licensees, permittees and other regulatees. As discussed above, we have exempted noncommercial educational broadcasters from regulatory fees. To the extent possible, we intend to use the Bureau's computer data bases to verify the identity of regulatees subject to regulatory fees in the Mass Media services.

78. Several commenters contend that the statutory fee schedule is unfair to certain categories of licensees in the Mass Media services and complain that the schedule fails to impose a fee on other categories of regulatees. De La Hunt Broadcasting Corporation and the Broadcasting Associations believe that radio broadcaster licensees should be assessed regulatory fees on a market-size basis, in a manner similar to the fees mandated for television stations. The NAB urges that we adjust the schedule for radio broadcast licensees when we consider appropriate fees for future years. Further, the Broadcasting Associations contends that we should not include a television station as being in a major market unless that station serves the metropolitan area of that particular market.

79. We decline to consider any adjustments to the schedule for FY 1994 for radio and television stations. As we explained above, we believe that Congress did not intend that we adjust any aspect of the fee schedule it established for FY 1994. Interested parties may submit comments, however, addressed to modifying the method for assessment of radio and television broadcasting fees at the time we issue our proposed schedule of fees for FY 1995.

2. Television Stations

80. Section (9)(g) provides that the regulatory fee charged a television licensee will be determined by the size of its market. We recognized in our *NPRM* that Arbitron no longer provides television rating information. However, no party has proposed that we rely on another mechanism for determining market size. Therefore, we will utilize Arbitron's ADI rankings for 1993–1994 for the determination of television markets for assessing our FY 1994 regulatory fees since it appears, at this time, that these are the most familiar and readily available tools for determining the relative ranking of television markets.

81. KBS License L.P. (KBS) and the NAB argue that satellite television stations should not be subject to the same regulatory fee payment as fully powered television stations. The NAB contends that satellite television stations should be assessed as if they were television translator stations. KBS argues that our proposal to assess fees for satellite stations at the same level as full powered stations is inconsistent with section 9. First, in KBS's view, Congress established regulatory fees for commercial television stations, and did not set any fee requirement for satellite television stations. Second, according to KBS, Congress intended the Commission to charge licensees fees based on the regulatory burden they impose, yet satellite stations require much less regulatory oversight than full powered stations. Also, KBS contends that the fee would place an unfair and illogical burden on small market licensees who use satellite television stations to reach remote areas in their markets.

82. Section 9(g)'s fee schedule establishes specific fees for commercial television stations. These fees are to be assessed against a licensee solely on the basis of the market in which the station operates. The text of the schedule makes no distinction between commercial stations that are fully operational and those that are satellite stations. It is also clear that these satellite stations are not "translator stations," which are also listed in the schedule. TV translator stations are low-powered facilities that rebroadcast the signals of a full service television broadcast station, including a satellite station, and are afforded secondary status vis-a-vis full service television stations. Also, unlike satellite stations, they are not subject to the technical, operational and program service obligations that are imposed on all full service broadcast stations, including satellite stations.[32] Consequently, we find that in establishing fees for commercial stations, Congress assessed the same fee for both commercial fully operational and commercial satellite television stations. We therefore reject KBS's argument that Congress failed to establish a fee for television satellite stations. However, there are anomalies concerning the treatment of satellite stations that are a matter of concern to us and that we believe would be appropriate for consideration on a case-by-case basis. First, where a licensee would be required under the fee schedule to pay a higher fee for its satellite station than for the parent station, we will entertain petitions to reduce the satellite station's fee to the same amount as the fee due for the parent station. In such a case, the licensee would be required to submit with its request an amount no greater than the fee due from the parent station. Second, in any situation in which payment of the fee would cause a diminishment of a licensees ability to continue to serve the public, we will entertain requests for waiver or reduction of the fee upon an appropriate showing. In this instance, the licensee would not be obligated to pay the fee until resolution of its waiver request.

83. KBS and the NAB may submit comments in our future proceeding to establish regulatory fees for FY 1995, supporting their positions concerning the need to distinguish between satellite and fully operational stations when assessing regulatory fees. As explained above, for FY 1994, we shall make no adjustments to Congress' fee schedule pursuant to section 9(b).

3. Broadcast Auxiliary Stations

84. The Society of Broadcast Engineers, Inc. (SBE) believes that broadcast auxiliary facilities, such as remote pick-up stations, and aural, television and low power auxiliary stations, should not be subject to any regulatory fee. SBE explains that there is no justification to apply a regulatory fee to these facilities since they are essentially self-regulating and impose little burden on our resources. As indicated above, we shall not modify any of section 9(g)'s fee requirements for FY 1994, but SBE may raise these issues in future proceedings.

---

[32] Unlike other full service television broadcast stations, satellite stations have not been subject to the Commission's multiple ownership restrictions However, that distinction is currently under review in our *Second Further Notice of Proposed Rulemaking* in MM Docket No. 87–8, 6 FCC Rcd 5010 (1991).

4. ITFS and DBS

85. Finally, the Joint Parties contend that we should amend the fee schedule to add several services not subject to fees for FY 1994. These services include the commercial offering of Instructional Television Fixed Services (ITFS) and Direct Broadcast Satellite Service (DBS). We decline the Joint Parties' request to add these services to the schedule for 1994 since Congress did not provide us the authority to add any service to the schedule for FY 1994. Moreover, we are aware that ITFS is a predominantly nonprofit service with limited commercial use and, further, that DBS is not expected to become operational prior to the time for calculating fee payments for FY 1994.[33] To the extent that the Joint Parties wish to renew their arguments concerning the inclusion of these services for future years, they may do so when we consider our fee payment schedule for FY 1995.

C. Common Carrier Bureau

86. Most common carrier regulatory fees are based on the size of a regulatee's communications operation as determined by its number of stations, subscribers, access lines, or antennas. We intend to rely upon the Common Carrier Bureau's licensing data bases to confirm the identity and fee amount for most radio common carriers to the extent possible. We also intend to perform periodic, random audits to determine whether individual regulatees have reported the correct multiplier.

1. Cellular and Public Mobile Licensees

87. The Personal Communications Industry Association (PCIA) states that we should define the term "subscriber" as it applies to Part 22 and personal communications services licensees. PCIA suggests that we require Part 22 licensees to pay their fees based on the number of customers on their billing lists and urges that we permit Part 22 licensees to submit their fee payments pursuant to systemwide aggregations of subscribers. Also, PCIA contends that we should permit paging licensees to calculate their fees by aggregating their total subscribers, rather determining their fee payments by call sign, as required by section 9(g), and to submit one instrument of payment per carrier system.[34]

88. Our rules do not define a mobile service subscriber. For purposes of calculating regulatory fees, we will define a subscriber to a mobile service as an individual or entity authorized by the mobile service provider to operate under its blanket license in exchange for monetary consideration. Further, any Part 22 licensee may submit a single, aggregate payment to cover the regulatory fees due for each of its individual systems. However, each individual system and service should be clearly enumerated on the payor's FCC Form 159 accompanying the fee payment. PCIA may submit its proposal to modify the method for calculating fee payments by paging licensees in our proceeding for establishing fees for FY 1995.

2. Air-Ground Radiotelephone Service

89. Claircom Communications Group, L.P., GTE and In-Flight Phone Corporation request clarification of the definition of "subscriber" in section 9(g) when applied to the payment of regulatory fees for the Air-Ground Telephone Service. Unlike conventional telephone service, subscribers to that service, usually operators of commercial aircraft, lease their service for the purpose of making it available to their own customers. There is no contractual relationship between the air-ground service operator and the end user of its service. Consequently, as suggested by the parties, we will treat the operator of an aircraft in which its service is installed as the subscriber to the service and charge the fee based upon the number of transceivers leased by the operator. Similarly, licensees in the air-ground service should include in their total fee a payment on a transceiver basis for service they provide to users other than commercial aircraft, such as private aircraft.

3. Space Stations

90. Comsat General Corporation (Comsat); GE American Communications, Inc. (GE American), Orbital Communications Corporation (Orbital), PanAmSat, L.P. (Panamsat) and Starsys Global Postioning, Inc. (Starsys) have submitted comments addressed to our proposals concerning the requirements of satellite licensees to submit regulatory fees. Comsat and GTE state that the regulatory fee for a geosynchronous orbit space station is excessive. Comsat argues that the fee requirement should be lowered for FY 1994 because these systems no longer require the regulatory attention they received in their earlier developmental stage. It argues that the fee also is a disincentive to maintaining older and underutilized satellites in orbit for back-up purposes and is anticompetitive and anticonsumer. As we have stated earlier, we shall not adjust the schedule of fees that Congress has enacted for the assessment of fees for FY 1994. Comsat may submit its comments in the future proceeding that we will initiate in order to establish appropriate fees for FY 1995.

91. We also received comments from Orbital and a reply comment from Starsys concerning when a satellite space station becomes subject to the fee requirement. Section 9(g) requires that the payment of a regulatory fee by the operator of any "operational" space station in geosynchronous orbit. We agree with the commenters that a satellite does not become "operational" immediately upon its launch. Therefore, as proposed by the commenters, we will consider a space station in geosynchronous orbit to be subject to the fee when it has been certified by its operator to be operational in accordance with section 25.120(d) of the rules. This certification indicates that the satellite has been placed in its authorized orbit and is operating in the authorized frequency bands at the authorized power levels. Similarly, a space station or system will be considered to have terminated its operation when its licensee certifies to us that the satellite has ceased to operate.

92. Also, we will consider a space system in low earth orbit (LEO) subject to the fee payment when its first satellite becomes operational even though all its space stations are not yet operational. Similar to our treatment of geosynchronous satellites, the system will become subject to a fee payment upon the certification by the licensee that the operations of the first satellite in its system conform to the terms and conditions of its authorization pursuant to 47 CFR 25.120(d).

4. Earth Stations

93. AMSC Subsidiary Corporation contends that no payment of regulatory fees for earth stations and mobile terminals should be required until their related satellite system is operational.[35] However, we observe that the licensing

[33] The Joint Parties point out that the fee schedule contains no explicit fee requirement for Multipoint Distribution Service (MMDS). However, our schedule, modeled on the schedule contained in section 9(g) of the Act, explicitly requires the payment of a regulatory fee by Domestic Public Fixed licensees, operating under Part 21 of our rules. Since MMDS is a Part 21 service, it is fully subject to the regulatory fee prescribed for Part 21 licensees.

[34] PCIA also requests that we recalculate the regulatory fee for CMRS for FY 1995. PCIA may submit its comments regarding the fee for CMRS in the proceeding we establish to prescribe fees for FY 1995.

[35] AMSC states that its satellite will be launched in December 1995, but that its earth and mobile stations will likely be licensed before September 1994.

of satellite earth stations is entirely separate from the licensing of space stations and that fixed-satellite earth stations are generally licensed to operate with any and all domestic satellite systems located in that portion of the geostationary orbit for which the earth station has been frequency coordinated. It is common practice for a satellite system to provide preliminary service via unrelated space stations before its own stations are launched and operational.

94. We will require the licensee of an earth station to pay a fee once it has certified that the earth station's construction is completed. However, in those rare instances in which a license limits an earth station's operational authority to a particular satellite system and that system is not operational on the date for calculating the fee, the fee will not be due until the first satellite of the related system becomes "operational" within the meaning of our fee rules.

5. Interexchange and Local Exchange Services

95. Generally, the comments of local exchange carriers (LECs) and interexchange carriers (IXCs) raise issues concerning the basis upon which they are to calculate their fee payments, the need for a definition of the term "subscriber," and a date for calculating their fee payments.[36]

96. We will adopt our proposal to permit the holding company of local exchange carriers to aggregate fee payments due by its operating companies and submit a single payment to cover the fee requirements of its subsidiaries.[37] We have considered the proposals of several commenters, including Ameritech, Nynex and SWB, that LECs submit fees based upon ARMIS data. However, ARMIS data is required from comparatively few LECs and we would still need a mechanism to calculate the fees due from the vast majority of LECs. Therefore, we have decided that all LECs are to calculate the amount of their regulatory fees based upon the number of working loops as described in section 36.611 of our rules, governing the submission of Information to the National Exchange Carrier Association (NECA).[38] We believe that this definition will be simple to administer since the LECs currently compile subscriber loop data, and it will provide a consistent formulation for the assessment of fees from all LECs.[39] As noted, for FY 1994, we will require LECs to calculate their fee payments for FY 1994 as of December 31, 1993.[40]

97. In the *NPRM*, we invited comments concerning section 9(g)'s assessment of regulatory fees from IXCs on a subscriber basis. In response, AT&T, opposed by Wiltel, Inc., argues that fee payments by IXCs should be based on gross revenues, not by the number of a carrier's subscribers. We decline to reach the merits of AT&T's argument at this time because, as indicated above, we shall not adjust the fee schedule for FY 1994. Any reformulation of the basis upon which IXCs are to base their fee payments would constitute a substantial adjustment to the fee schedule that Congress enacted. IXCs shall file fees based on the total number of common lines presubscribed to that IXC as determined pursuant to section 69.116 of the rules. 47 C.F.R. § 69.116. AT&T may submit its views concerning the appropriate method of assessing fees from IXCs in our proceeding to establish regulatory fees for FY 1995.

6. International Bearer Circuits

98. Panamsat requests clarification concerning the assessment of regulatory fees for international circuits. Section 9(g)'s Schedule provides that the fee is to be computed "per 100 active 64 KB circuits or equivalent." The fee is to be paid by the facilities-based common carrier activating the circuit in any transmission facility for the provision of service to an end user or resale carrier. Private submarine cable operators also are to pay fees for circuits sold on an indefeasable right of use (IRU) basis or leased in their private submarine cables to any customer of the private cable operator. In the *NPRM*, we stated that the fee would be based upon active 64 KB circuits, or equivalent circuits. Under this formulation, 64 KB circuits or their equivalent will be assessed a fee. Equivalent circuits include the 64 KB circuit equivalent of larger bit stream circuits. For example, the 64 KB circuit equivalent of a 2.048 MB circuit is 30 64 KB circuits. Analog circuits such as 3 and 4 KHz circuits used for international services are also included as equivalent 64 KB circuits. However, circuits derived from 64 KB circuits such as circuits derived by the use of digital circuit multiplication systems are not equivalent 64 KB circuits. Such circuits are not subject to fees. Only the 64 KB circuit from which they have been derived will be subject to payment of a fee.

For analog television channels we will assess fees as follows:

Analog television channel size in MHz	Number of equivalent 64 KB circuits
36	630
24	288
18	240

D. Cable Services

99. Several commenters contend that the fee prescribed for cable television services should be paid on an exact per subscriber count rather than per 1,000 subscribers, as we proposed.[41] These commenters argue that the latter formulation would cause small cable systems to pay a disproportionately high regulatory fee. For example, a cable system with 100 subscribers would be subject to the same fee as a system with 1,000 subscribers.

100. The text of section 9(g)'s fee schedule provides for the assessment of a fee for cable television systems at the rate of $370.00 per 1,000 subscribers. Upon further consideration, we agree with the commenters that Congress did

[36] Allnet and MCI point out that resellers and pay telephone operators are not among those regulatees listed in the fee schedule. We will review whether these entities should be directly subject to a fee payment in the course of our proceeding to determine regulatory fees for FY 1995.

[37] We agree with Allnet that entities operating as both LECs and IXCs are subject to a regulatory fee for both categories of service. However, as GTE suggests, we will require a carrier to submit only a single payment when a single commonly-owned line serves as both a presubscribed line and an access line.

[38] NECA has proposed to process regulatory fees on behalf of its pooling exchange carriers and to submit their consolidated fees to our lockbox bank in a single instrument of payment. We have no objection to NECA's submission of the fee on behalf of its pooling exchange carriers or others. However, we remind entities subject to the payment of a regulatory fee that the regulatee, not an agent, such as NECA, is responsible for ensuring that the payment is made that it is subject to penalty for failure to submit the entire fee due in a timely manner. LECs will be expected to pay their fees based upon the number of access lines as determined by NECA. In case of a dispute between a carrier and NECA concerning the carrier's line count as of December 31, 1993, NECA will certify its calculation of the carrier's line count and the basis for its calculation.

[39] We expect competitive access providers (CAPs) to submit fee payments based upon their line count as required under section 9(g). Ameritech, GTE and other interested parties may submit their views on the proper method of assessing regulatory fees for CAPs in our proceeding to establish fees for FY 1995.

[40] Several LECs, including Ameritech, GTE, NYNEX and Bell South, opposed by Allnet, contend that their regulatory fee payments qualify for exogenous treatment under the price cap rules and ask that we allow their regulatory fee expense to be charged directly to their subscribers. Their request is beyond the scope of this proceeding. LECs seeking to charge their regulatory fees directly to subscribers should petition for a waiver of the Commission's rules.

[41] These commenters include the United States Small Business Administration, Cable Services, Inc., the Cable Telecommunications Association, the National Cable Television Associations, Nationwide Communications, Inc. and the Small Cable Business Association.

not intend that this provision required that a system pay its fee as if it served 1,000 subscribers when in fact it provides services to fewer than 1,000 subscribers.[42] Following this formulation to its logical extreme would impose on small cable systems a disproportionate burden of the aggregate cable service regulatory fee since it would result in the assessment of larger fees upon small systems, particularly those with fewer than 1,000 subscribers. Thus, we believe Congress' purpose was to require cable systems to formulate their fee based on the schedule's assessment of $370.00 per 1000 subscribers, but to pay the fee on an exact per subscriber count. Payment of the cable fee on the basis of the exact count of a system's subscribers will eliminate the inequity perceived by the commenters.

101. NCTA and Nationwide support our proposal to permit cable systems to submit their regulatory fees on the basis of the aggregate fee payable by commonly owned systems.[43] Therefore, we will permit commonly-owned cable systems to combine their fee payments for submission to our lockbox bank. Finally, for purposes of calculating the fee due from cable operators, we will adopt the definition of a cable subscriber, including bulk rate subscriber, used for FCC Form 325. See FCC Form 325 Instructions (Page 3).

V. Amendments to Application Fee Rules

102. In addition to the new rules for regulatory fees, we are revising several sections of our rules governing fees associated with applications and other filings. Filing fees are required pursuant to section 8 of the Communications Act and are administered separately from the regulatory fees authorized under section 9.[44]

[42] We reject the Joint Commenters' argument that the regulatory fee for cable systems be reduced when any of a system's channels are made available to competitors pursuant to 47 U.S.C. § 532. Congress has based the regulatory fee for cable systems upon the number of subscribers served, not the number of a system's channels available for the system's direct use.

[43] NCTA, the Joint Commenters and Continental request authority for cable systems to pass through their regulatory fees to cable television subscribers as extenal costs. Only those items currently itemized in the rule as external costs may be passed through to cable subscribers. Regulatory fees are not among the enumerated items and the pass through process is not the subject of this proceeding. Therefore, this matter should be addressed separately.

[44] We will publish in the FCC Record actions, including actions taken on delegated authority, related to the application and regulatory fee rules that have precedential value.

A. Fees for Resubmitted Applications

103. We have amended § 1.1107(d) of the rules, as proposed. Section 1.1107(d) governs fee payments relating to applications and other filings when resubmitted in the appropriate timeframe following a staff request for additional or corrected information. We have amended § 1.1107(d) to require persons submitting applications or other filings that have been returned for additional information or corrections and that do not require any additional fees to submit these applications and other filings directly to the Bureau/Office making the request. Applications requiring additional fees must be filed at our lockbox bank with the remittance for the entire additional amount due. In the event that the staff discovers, within 30 days after the resubmission, that the additional fee payment was not submitted, the application or other filing will be dismissed as deficient and the previously submitted section 8 fee payment will be retained under this proposal. A new fee payment (covering the entire amount of the revised fee) will be required with any future filing of the application or other filing. However, if the staff discovers the fee payment deficiency more than thirty days subsequent to the resubmission, the application or other filing will be retained, but a 25 percent late fee will be assessed on the deficient amount even if we have completed our action on the application or other filing involved.

B. Stale Checks

104. Our lockbox bank will not process a personal or business check dated more than six months prior to its submission. Therefore, we have revised § 1.1108(a) of the rules to make clear that these "stale" checks will not be accepted as fee payments. Under this revision, we will not accept any instrument of payment dated more than six months prior to the date of its filing with the lockbox bank, and we will return to the filer any application or other filing submitted with a stale payment instrument. Further, we will not accept any third party checks (*i.e.*, checks with the name of any third party as the maker or endorser).

C. Receipts

105. Our practice with regard to stamped receipts for application fee payments is to furnish receipts only upon specific request of the submitter rather than to provide receipts automatically for all fee payments received. We are clarifying these procedures by amending § 1.1108 of the rules. In order to obtain a receipt for a fee payment, section 1.1108 will require that the application and fee package include a copy of the first page of the application or other filing, clearly marked "copy," submitted expressly for the purpose of serving as a receipt of the filing. The copy should be the top document in the fee payment package. The staff will date-stamp the copy immediately and provide it to the bearer of the submission, if hand delivered. For submissions by mail, the receipt copy will be provided through return mail if the filer has attached to the receipt copy a stamped self-addressed envelope of sufficient size to contain the date-stamped copy of the application. We will provide a receipt for regulatory fee payments, upon request, if we are furnished with a copy of Form 159 or the first page of an application in the private radio services accompanying the fee payment and the request otherwise conforms with the procedures we have adopted for receipts of application fees.

D. Electronic Application Fee Payments

106. We are adopting rules regarding the submission of regulatory fee payments by electronic means. Revised §§ 1.1107 and 1.1108 of the rules allow the payment of application and other filing fees by electronic means, although our system for electronic payment is not yet fully in place. In our *NPRM*, we stated our concern about matching electronically paid fees with submitted hard-copy applications.[45] If a party chooses to pay its application filing fee electronically, we will require that the entity follow existing procedures for filing its application at the lockbox bank. However, in lieu of the current payment methods, the party will indicate on its remittance advice (FCC Form 159 or the underlying application form with fee information incorporated therein) that payment is being sent to the bank electronically. The electronic payment must be made on or before the day the application is filed. Upon receipt of an application, the bank will confirm that a fee payment has been received electronically. If the electronic payment is not received on the filing date, the application or request will be returned without processing. We believe these procedures are necessary to ensure the most efficient processing of electronic fee payments (when authorized) and applications or other filings. Finally, during the pilot phase of our electronic payment program, regulatees will be required to obtain our prior authorization before making

[45] We note that some parts of the Commission are currently experimenting with electronic filing of applications.

electronic fee payments. (See paragraphs 56 and 57, above.)

E. One Check/One Application Rule

107. We are modifying our rules to allow the use of a single payment instrument or method to cover multiple applications for the same or different applicants, so long as all the applications are filed at the same time at the same lockbox. Any applicant desiring to pay for multiple regulatory/application filings in the same lockbox with a single payment instrument, or when paying by credit card, must also complete FCC Form 159, FCC Remittance Advice. Each item must be listed separately on the form with its own Payment Type Code. If another space is needed for multiple filings, the applicant must use FCC Form 159–C, FCC Remittance Advice Continuation Sheet.[46]

F. Payment by Cashier's Check

108. To ensure that payment instruments will result in a final payment being made to the Commission, we believe that our cashier's check safeguard should be strengthened. Accordingly, as proposed, when a person or organization has, on one or more occasions, submitted a payment instrument on which final payment is not received (and is not excused by bank error), we will immediately notify the party that future fee payments must be made by cashier's check until further notice. If, subsequent to such notice, payment is not made by a cashier's check (or cash), that party's other payment instrument will not be accepted and its application or other filing will be returned. 47 CFR 1.1108(d)(1)(i); see also 47 CFR 1.1110(a).

G. Filing Locations for Petitions and Applications for Review

109. We have revised §§ 1.1109(a)(3) and 1.1115 to clarify that any petition for reconsideration, application for review, and any petition for waiver or deferral of a fee payment, accompanied by an application or regulatory fee payment, must be submitted to our lockbox bank. If no fee payment is required and the matter is within the scope of either the application or regulatory fee rules, the request should be filed with the Secretary and clearly marked to the attention of the Managing Director.

[46] All non-private radio section 9 regulatory fee payors must use FCC Form 159/159C when submitting single or multiple regulatory fees.

VI. Confidentiality

110. The Cellular Telecommunications Industry Association, GTE and Southwestern Bell Corporation urge that we amend § 0.457 of our rules to safeguard the confidentiality of data submitted with regulatory fees, including fee amounts that are calculated on a per line or subscriber basis. 47 CFR 0.457. At this time, we will not amend our rules to include a provision affording automatic confidentiality for information submitted with regulatory fees. Generally, regulatees are required to submit very little data with their fee payments and it is premature for us to determine whether the disclosure of any information submitted, including the fee amounts calculated on a per subscriber basis, will warrant the protection afforded by § 0.457. Payments of regulatory fees may be accompanied by requests for confidentiality pursuant to § 0.459 of the Commission's rules. 47 CFR 0.459.

VII. Final Regulatory Analysis

111. Pursuant to the Regulatory Flexibility Act of 1980, the Commission's final analysis is as follows:

A. Need and Purpose of This Action

112. This *Report and Order* adopts the Schedule of Regulatory Fees enacted by Congress for the assessment and collection of the Commission's regulatory fees for FY 1994 and adopts rules to govern the assessment and collection of regulatory fees for FY 1994 and future years. The rules, as required by Congress, include provisions for the advance payment of small fees, the payment of large fees by installment, and procedures for waiver, reduction and deferral of fees by regulatees that demonstrate that payment of the fee would be a financial hardship, as well as penalties for late or nonpayment of fees.

B. Summary of Comments Raised by the Public Comments in Response to the Initial Regulatory Flexibility Analysis

113. The Chief Counsel for Advocacy of the United States Small Business Administration (SBA) filed comments urging that cable television system operators be permitted to pay their fees on a per subscriber basis ($.37) rather than in increments of 1,000 subscribers ($370.00) or any portion thereof. The *Report and Order* adopts the SBA's proposal.

C. Significant Alternatives Considered

114. The *Notice of Proposed Rulemaking* in this proceeding offered many proposals, including reliance on the Schedule of Regulatory Fees as established by Congress in section 9(g) of the Communications Act, 47 U.S.C. 159(g), exemptions from regulatory fees, installment payments for large fees, advance payments for small fees, payment procedures, including payment by electronic transfer and credit card, procedures for waiver, reduction and deferment of fees, and penalties for late or nonpayment of fees. Our proposals to adopt the service categories and fee amounts in Congress' fee schedule and for waiver, reduction and deferment of fees were discussed by many commenters. Fireweed and the Joint Commenters urged that we amend the fee schedule to reduce the fees and add services subject to a fee payment. NAB and the State Broadcasters urged that we modify our proposed procedures for requesting a waiver, reduction or deferment of a fee payment. Upon review, we affirmed that Congress intended that we utilize section 9(g)'s fee schedule for FY 1994. However, we adopted more flexible procedures for obtaining a waiver, reduction or deferment of the fees in order to afford more regulatees the opportunity to obtain a waiver, reduction or deferment of the fees and we clarified the showing required for adjustment of a fee based on financial hardship.

VIII. Ordering Clauses

115. Accordingly, *it is ordered* that the rule changes as specified below *are adopted.*

116. *It is further ordered* that the rule changes made herein will become effective 30 days after publication in the **Federal Register**. This action is taken pursuant to sections 4(i), 4(j), 8, 9, and 303(r) or the Communications Act, as amended, 47 U.S.C. §§ 154(i) 154(j), 158, 159, 303(r).

List of Subjects

47 CFR Part 0

Authority delegations (Government agencies), Freedom of information, Government publications, Reporting and recordkeeping requirements.

47 CFR Part 1

Administrative practice and procedure, Communications common carriers, Investigations, Penalties, Radio Reporting and recordkeeping requirements, Telecommunications, Television.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

Rule Changes

47 CFR Parts 0 and 1 are amended as follows:

PART 0—COMMISSION ORGANIZATION

1. The authority citation for Part 0 continues to read:

Authority: Sec. 5, 48 Stat. 1068, as amended, 47 U.S.C. 155, 225, unless otherwise noted.

2. Section 0.231 is amended by revising paragraph (a) to read as follows:

§ 0.231 Authority delegated.

(a) The Managing Director, or his designee, upon securing concurrence of the General Counsel, is delegated authority to act upon requests for waiver, reduction or deferment of fees, establish payment dates, and issue notices proposing amendments or adjustments to the fee schedules established under part 1, subpart G, of this chapter.

* * * * *

3. Section 0.406 is amended by revising paragraph (b)(2) to read as follows:

§ 0.406 The rules and regulations.

* * * * *

(b) * * *

(2) *Part 1 of this chapter, practice and procedure.* Part 1, subpart A, of this chapter contains the general rules of practice and procedure. Except as expressly provided to the contrary, these rules are applicable in all Commission proceedings and should be of interest to all persons having business with the Commission. Part 1, subpart A of this chapter also contains certain other miscellaneous provisions. Part 1, subpart B, of this chapter contains the procedures applicable in formal hearing proceedings (see § 1.201 of this chapter). Part 1, subpart C, of this chapter contains the procedures followed in making or revising the rule or regulations. Part 1, subpart D, of this chapter contains rules applicable to applications for licenses in the Broadcast Radio Services, including the forms to be used, the filing requirements, the procedures for processing and acting upon such applications, and certain other matters. Part 1, subpart E, of this chapter contains general rules and procedures applicable to common carriers. Additional procedures applicable to certain common carriers by radio are set forth in Part 21 of this chapter. Part 1, subpart F, of this chapter contains rules applicable to applications for licenses in the Private Radio Services, including the forms to be used, the filing requirements, the procedures for processing and acting on such applications, and certain other matters. Part 1, subpart G, of this chapter contains rules pertaining to the application processing fees established by the Consolidated Omnibus Budget Reconciliation Act of 1985 (Pub. L. 99–272, 100 Stat. 82 (1986)) and also contains rules pertaining to the regulatory fees established by the Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103–66, 107 Stat. 397 (1993)). Part 1, subpart H, of this chapter, concerning ex parte presentations, sets forth standards governing communications with commission personnel in hearing proceedings and contested application proceedings. Part 1, subparts G and H, of this chapter will be of interest to all regulatees, and Part 1, subpart H, of this chapter will, in addition, be of interest to all persons involved in hearing proceedings.

* * * * *

PART 1—PRACTICE AND PROCEDURE

4. The authority citation for Part 1 continues to read as follows:

Authority: 47 U.S.C. 151, 154, 303, and 309(j), unless otherwise noted.

5. Section 1.742 is revised to read as follows:

§ 1.742 Place of filing, fees and number of copies.

All applications which do not require a fee shall be filed at the Commission's main office in Washington, DC., Attention: Office of the Secretary. Hand-delivered applications will be dated by the Secretary upon receipt (mailed applications will be dated by the Mail Branch) and then forwarded to the Common Carrier Bureau. All applications accompanied by a fee payment should be filed with the Commission's lockbox bank in accordance with § 1.1105, Schedule of Fees. The number of copies required for each application and the nonrefundable processing fees and any applicable regulatory fees (see subpart G of this part) which must accompany each application in order to qualify it for acceptance for filing and consideration are set forth in the rules in this Chapter relating to various types of applications. However, if any application is not of the type covered by this Chapter, an original and two copies of each such application shall be submitted.

5a. Sections 1.1106 through 1.1117 are redesignated as §§ 1.1107 through 1.1118, respectively.

5b. In the list below, for each newly designated section indicated in the left column, remove the reference indicated in the middle column everywhere it appears, and add the reference indicated in the right column:

Section	Remove	Add
1.1107	§ 1.1105	§ 1.1106.
1.1107	§ 1.1111	§ 1.1112.
1.1113 introductory text.	§ 1.1105	§ 1.1106.
1.1113(d) and (e) introductory text.	§ 1.1112(c) ...	Paragraph (c) of this section.
1.1113(e)(3) .	§ 1.1112(e)(2)	Paragraph (e)(2) of this section.
1.1114(a)	§ 1.1105	§ 1.1106.
1.1115(a)	§ 1.1107(b) ...	§ 1.1108(b).
1.1116(e)	§ 1.1107	§ 1.1108.
1.1118(b)	§ 1.1110	§ 1.1111.

6. Newly designated § 1.1108 is amended by revising paragraphs (a) through (d) to read as follows:

§ 1.1108 Payment of charges.

(a) Electronic fee payments do not require the use of a FCC Form 159, Remittance Advice. An electronic fee payment must be made on or before the day the application and appropriate processing form are filed.

(b) The schedule of fees for applications and other filings lists those applications and other filings that must be accompanied by a FCC Form 159, Remittance Advice. A separate FCC Form 159 will not be required once the information requirements of that form (payor information) is incorporated into the underlying application form.

(c) Applications and other filings that are not submitted in accordance with these instructions will be returned as unprocessable.

Note: This requirement for the simultaneous submission of fee forms with applications or other filings does not apply to the payment of fees for which the Commission has established a billing process. See § 1.1118 of this subpart.

(d) Applications returned to applicants for additional information or corrections will not require an additional fee when resubmitted, unless the additional information results in an increase of the original fee amount. Those applications not requiring an additional fee should be resubmitted directly to the Bureau/Office requesting the additional information. The original fee will be forfeited if the additional information or corrections are not resubmitted to the appropriate Bureau/

Office by the prescribed deadline. If an additional fee is required, the original fee will be returned and the application must be resubmitted with a new remittance in the amount of the required fee to the Commission's lockbox bank. Applicants should attach a copy of the Commission request for additional or corrected information to their resubmission.

(1) If the Bureau/Office staff discovers within 30 days after the resubmission that the required fee was not submitted, the application will be dismissed.

(2) If after 30 days the Bureau/Office staff discovers the required fee has not been paid, the application will be retained and a 25 percent late fee will be assessed on the deficient amount even if the Commission has completed its action on the application. Any Commission actions taken prior to timely payment of these charges are contingent and subject to recession.

* * * * *

7. Newly designated § 1.1109 is amended by revising paragraphs (a), (d) and (f) to read as follows:

§ 1.1109 Form of payment.

(a) Fee payments should be in the form of a check, bank draft, on money order denominated in U.S. dollars and drawn on a United States financial institution and made payable to the Federal Communications Commission or by a Visa or MasterCard credit card. No other credit card is acceptable. Fees for applications and other filings paid by credit card will not be accepted unless the credit card section of FCC Form 159 is completed in full. The Commission discourages applicants from submitting cash and will not be responsible for cash sent through the mail. Personal or corporate checks dated more than six months prior to their submission to the Commission's lockbox bank and postdated checks will not be accepted and will be returned as deficient. Third party checks (*i.e.*, checks with a third party as maker or endorser) will not be accepted.

(1) Specific procedures for electronic payment will be announced by Public Notice. Applicants must submit a written request to the Commission for authorization to make electronic payments of a fee for applications and other filings, as follows.

(2) No electronic payment of an application fee will be accepted unless the payor has obtained the written authorization of the Commission to submit application fees electronically. It is the responsibility of the payor to insure that any electronic payment is made in the manner required by the Commission. Failure to comply with the Commission's procedures will result in the return of the application or other filing and the fee payment.

(3) Payments by wire transfer will be accepted. Prior to making a payment by wire, the payor shall obtain the approval of the Managing Director or his designee. A completed FCC Form 159 shall be submitted to the Managing Director or his designee prior to initiating the wire transfer.

* * * * *

(d) The Commission may require payment of fees with a cashier's check upon notification to an applicant or filer or prospective group of applicants under the conditions set forth below in paragraphs (d) (1) and (2) of this section.

(1) Payment by cashier's check may be required when a person or organization has made payment, on one or more occasions with a payment instrument on which the Commission does not receive final payment and such failure is not excused by bank error.

(2) The Commission will notify the party in writing that future payments must be made by cashier's check until further notice. If, subsequent to such notice, payment is not made by cashier's check, the party's payment will not be accepted and its application or other filing will be returned.

* * * * *

(f) The Commission will furnish a stamped receipt of an application only upon request. In order to obtain a stamped receipt for an application (or other filing), the application package must include a copy of the first page of the application, clearly marked "copy", submitted expressly for the purpose of serving as a receipt of the filing. The copy should be the top document in the package. The copy will be date-stamped immediately and provided to the bearer of the submission, if hand delivered. For submissions by mail, the receipt copy will be provided through return mail if the filer has attached to the receipt copy a stamped self-addressed envelope of sufficient size to contain the date stamped copy of the application. No remittance receipt copies will be furnished.

8. Newly designated § 1.1110 is amended by revising paragraph (a) to read as follows:

§ 1.1110 Filing locations.

(a) Except as noted in this section applications and other filings, with attached fees and FCC Form 159, must be submitted to the locations and addresses set forth in §§ 1.1102 through 1.1106.

(1) Tariff filings shall be filed with the Secretary, Federal Communications Commission, Washington, DC 20554. On the same day, the filer should submit a copy of the cover letter, the FCC Form 159, and the appropriate fee to the Commission's lockbox bank at the address established in § 1.1105.

(2) Bills for collection will be paid at the Commission's lockbox bank at the address for the appropriate service as established in §§ 1.1102 through 1.1106, as set forth on the bill sent by the Commission. Payments must be accompanied by the bill and a FCC Form 159 to ensure proper credit.

(3) Petitions for reconsideration or applications for review of fee decisions pursuant to § 1.1117(b) of this subpart must be accompanied by the required fee for the application or other filing being considered or reviewed.

(4) Applicants claiming an exemption from a fee requirement for an application or other filing under 47 U.S.C. 158(d)(1) or § 1.1113 of this subpart shall file their applications in the appropriate location as set forth in the rules for the service for which they are applying, except that request for waiver accompanied by a tentative fee payment should be filed at the Commission's lockbox bank at the address for the appropriate service set forth in §§ 1.1102 through 1.1105.

* * * * *

9. Newly designated § 1.1116 is amended by revising the section heading and paragraph (c) to read as follows:

§ 1.1116 Petitions and applications for review.

* * * * *

(c) Petitions for waivers, deferrals, fee determinations, reconsideration and applications for review will be acted upon by the Managing Director. Petitions and applications for review submitted with a fee must be submitted to the Commission's lockbox bank at the address for the appropriate service set forth in §§ 1.1102 through 1.1105. If no fee payment is required, and the matter is within the scope of the fee rules in this subpart, the petition or application for review should be filed with the Commission's Secretary and clearly marked to the attention of the Managing Director. Requests for deferral of a fee payment for financial hardship must be accompanied by supporting documentation.

* * * * *

10. Section 1.1151 is added to read as follows:

§ 1.1151 Authority to prescribe and collect regulatory fees.

Authority to impose and collect regulatory fees is contained in title VI.

section 6002(a) of the Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103–66, 107 Stat. 397), enacting section 9 of the Communications Act, 47 U.S.C. 159, which directs the Commission to prescribe and collect annual regulatory fees from designated regulatees in order to recover the costs of certain of its regulatory activities in the private radio, mass media, common carrier, and cable television services.

11. Section 1.1152 is added to read as follows:

§ 1.1152 Schedule of annual regulatory fees and filing locations for private radio service.

Services	Fee amount	Address
Exclusive use services (per license)		
1. Land Mobile (Above 470 MHZ, Base Station and SMRS) (47 CFR Part 90).	$16.00	FCC, Land Mobile, P.O. Box ____ [1] Pittsburgh, PA 15251–5——
2. Microwave (47 CFR Part 94).	16.00	FCC, Microwave, P.O. Box ____ [1] Pittsburgh, PA 15251–5——
3. Interactive Video Data Service.	16.00	FCC, IVDS, P.O. Box ____ [1] Pittsburgh, PA 15251–5——
Shared Use Services.	7.00	FCC, Shared Use Services, P.O. Box ____ [1] Pittsburgh, PA 15251–5——
Amateur Vanity Call Signs.	7.00	FCC, Amateur Vanity Call Signs, P.O. Box ____ [1] Pittsburgh, PA 15251–5——

Note 1: Refer to Private Radio Service Fee Filing Guide for appropriate Post Office Box. Fee Filing Guides may be obtained by writing to the Federal Communications Commission, Public Service Division, room 154, Washington, DC 20554.

12. Section 1.1153 is added to read as follows:

§ 1.1153 Schedule of annual regulatory fees and filing locations for mass media services.

Services	Fee amount	Address
AM Radio (47 CFR Part 73):		
1. Class D Daytime.	$250.00	FCC, AM Branch, P.O. Box 358835, Pittsburgh, PA 15251–5835.
2. Class A Fulltime.	900.00	
3. Class B Fulltime.	500.00	
4. Class C Fulltime.	200.00	
5. Construction Permits.	100.00	
FM Radio (47 CFR Part 73):		
1. Classes C, C1, C2, B.	900.00	FCC, FM Branch, P.O. Box 358835, Pittsburgh, PA 15252–5835.
2. Classes A, B1, C3.	600.00	
3. Construction Permits.	500.00	
TV (47 CFR Part 73) VHF Commercial:		
1. Markets 1 thru 10.	18,000	FCC, TV Branch, P.O. Box 358835, Pittsburgh, PA 15251–5835.
2. Markets 11 thru 25.	16,000	
3. Markets 26 thru 50.	12,000	
4. Markets 51 thru 100.	8,000	
5. Remaining Markets.	5,000	
6. Construction Permits.	4,000	
UHF Commercial:		
1. Markets 1 thru 10.	14,400	FCC, UHF Commercial, P.O. Box 358835, Pittsburgh, PA 15251–5835.
2. Markets 11 thru 25.	12,800	
3. Markets 26 thru 50.	9,600	
4. Markets 51 thru 100.	6,400	
5. Remaining Markets.	4,000	
6. Construction Permits.	3,200	
Low Power TV, TV Translator, and TV Booster (47 CFR Part 74).	135	FCC, Low Power, P.O. Box 358835, Pittsburgh, PA 15251–5835.
Broadcast Auxiliary.	25	FCC, Auxiliary, P.O. Box 358835, Pittsburgh, PA 15251–5835.
International (HF) Broadcast.	200	FCC, International, P.O. Box 358835, Pittsburgh, PA 15251–5835.

13. Sec. 1.1154 is added to read as follows:

§ 1.1154 Schedule of annual regulatory charges and filing locations for common carrier services.

Services	Fee amount	Address
Radio Facilities:		
1. Cellular Radio (per 1,000 subscribers).	$60	FCC, Cellular, P.O. Box 358835, Pittsburgh, PA 15251–5835
2. Personal Communications.	60	
3. Space Station (geo orbit).	65,000	
4. Space Station (low earth).	90,000	
5. Public Mobile (per 1,000 subscribers).	60	
6. Domestic Public Fixed.	55	
7. International Public Fixed.	110	
Earth Stations:		
1. VSAT and Equivalent C-Band antennas (per 100 antennas).	6	FCC, Earth Station, P.O. Box 358835, Pittsburgh, PA 15251–5835.
2. Mobile Satellite Earth Stations (per 100 antennas).	6	
3. Less than 9 meters (per 100 antennas).	6	

Services	Fee amount	Address
4. 9 Meters or More Transmit/ Receive and Transmit Only (per meter).	85	
Receive Only (per meter).	55	
Carriers:		
1. Inter-Exchange Carrier (per 1,000 presubscribed lines).	60	FCC, Carriers, P.O. Box 358835, Pittsburgh, PA 15251–5835.
2. Local Exchange Carrier (per 1,000 access lines).	60	
3. Competitive Access Provider (per 1,000 subscribers).	60	
4. International Circuits (per 100 active 64 KB circuit or equivalent).	220	

14. Sec. 1.1155 is added to read as follows:

§ 1.1155 Schedule of regulatory fees and filing locations for cable television services

Services	Fee amount	Address
1. Cable Antenna Relay Service.	$220	FCC, Cable, P.O. Box 358835, Pittsburgh, PA 15251–5835.
2. Cable TV System (per 1,000 subscribers).	370	

15. Section 1.1156 is added to read as follows:

§ 1.1156 Payment of charges for regulatory fees.

Payment of a regulatory fee, required under §§ 1.1152 through 1.1155, shall be filed in the following manner:

(a) Payments of regulatory fees shall be submitted with the filing of any application for a new, renewal or reinstatement of a license or other authorization in the private radio services.

(1) Any regulatory fee submitted with an application in the private radio services shall include an advance payment of the total annual regulatory fee payment due for the entire term of the license or other authorization. The amount of the regulatory fee payment due with any application in the private radio service shall be the multiple of the number of years in the entire term of the requested license or other authorization multiplied by the annual fee payment required in the Schedule of Regulatory Fees, effective at the time the application is filed. Except as set forth in § 1.1159, advance payments shall be final and shall not be readjusted during the term of the license or authorization, notwithstanding any subsequent increase or decrease in the annual amount of a fee required under the Schedule of Regulatory Fees.

(2) Failure to file the appropriate regulatory fee with an application in the private radio service will result in the return of the accompanying application, including an application for which the Commission has assigned a specific filing deadline.

(b)(1) Payments of standard regulatory fees, applicable to mass media, common carrier and cable services, shall be filed in full on an annual basis at a time announced by the Commission or the Managing Director, pursuant to delegated authority, and published in the **Federal Register.**

(2) Large regulatory fees, as annually defined by the Commission, may be submitted in installment payments.

(i) For Fiscal Year 1994, large regulatory fees may be submitted in two (2) equal installment payments at times announced by the Commission or the Managing Director, pursuant to delegated authority, and published in the **Federal Register.**

(ii) For Fiscal Year 1994, installment payments may be submitted for:

(A) VHF and UHF Commercial Television Stations with a fee requirement above $12,000;

(B) Cable Television Systems whose 'community units' fee payments total more than $18,500;

(C) Inter-Exchange Carriers with a fee requirement above $500,000;

(D) Local Exchange Carriers or Holding Companies with a fee requirement above $700,000; and

(E) Space Stations with a fee of $65,000 or above.

(iii) Beginning in Fiscal Year 1995, payors of a large standard regulatory fee, as annually defined by the Commission, may submit their fee payments in four (4) equal installments at times to be announced by the Commission or by the Managing Director, pursuant to delegated authority, and published in the **Federal Register.**

(c) Standard regulatory fee payments, as well as any installment payment, must be filed with a FCC Form 159, FCC Remittance Advice, and a FCC Form 159C, Remittance Advice Continuation Sheet, if additional space is needed. Failure to submit a copy of FCC Form 159 with a standard regulatory fee payment, or an installment payment, will result the return of the submission and a 25 percent penalty if the payment is resubmitted after the date the Commission establishes for the payment of standard regulatory fees and for any installment payment.

(1) Any late filed regulatory fee payment will be subject to the penalties set forth in § 1.1163.

(2) If one or more installment payments are untimely submitted or not submitted at all, the eligibility of the subject regulatee to submit installment payments may be cancelled and the regulatee required to pay its fee in a single annual payment.

16. Section 1.1157 is added to read as follows:

§ 1.1157 Form of payment for regulatory fees.

Any regulatory fee payment must be submitted in the form of a check, bank draft or money order denominated in U.S. dollars and drawn on a United States financial institution and made payable to the Federal Communications Commission or by Visa or Mastercard credit cards only. The Commission discourages applicants from submitting cash payments and will not be responsible for cash sent through the mail. Personal or corporate checks dated more than six months prior to their submission to the Commission's lockbox bank and postdated checks will not be accepted and will be returned as deficient.

(a) Upon authorization from the Commission following a written request, electronic payment of a regulatory fee may be made as follows:

(1)(i) The payor may instruct its bank to make payment of the regulatory fee directly to the Commission's lockbox bank; or

(ii) The payor may authorize the Commission to direct its lockbox bank to withdraw funds directly from the payor's bank account.

(2) No electronic payment of a regulatory fee will be accepted unless the payor has obtained the written authorization of the Commission to submit regulatory fees electronically. Procedures for electronic payment of regulatory fees will be announced by Public Notice. It is the responsibility of the payor to insure that any electronic payment is made in the manner required by the Commission. Failure to comply with the Commission's

procedures for electronic fee payment will result in the return of the fee payment, and a penalty fee of 25 percent if the subsequent refiling of the fee payment is late. Failure to comply will also subject the payor to the penalties set forth in section 1.1163.

(b) Multiple payment instruments for a single regulatory fee are not permitted, except that the Commission will accept multiple money orders in payment of any fee where the fee exceeds the maximum amount for a money order established by the issuing entity and the use of multiple money orders is the only practicable means available for payment.

(c) Payment of multiple standard regulatory fees (including an installment payment) due on the same date, may be made with a single payment instrument and cover mass media, common carrier and cable service fee payments. Each regulatee is solely responsible for accurately accounting for and listing each license or authorization and the number of subscribers, access lines, or other relevant units on the accompanying FCC Form 159 and, if needed, FCC Form 159C and for making full payment for every regulatory fee listed on the accompanying form. Any omission or payment deficiency of a regulatory fee will result in a 25 percent penalty of the amount due and unpaid.

(d) Any regulatory fee payment (including a regulatory fee payment submitted with an application in the private radio service) made by credit card or money order must be submitted with a completed FCC Form 159. Failure to accurately enter the credit card number and date of expiration and the payor's signature in blocks number 22 and 23 of FCC Form 159 will result in rejection of the credit card payment.

17. Section 1.1158 is added to read as follows:

§ 1.1158 Filing locations and receipts for regulatory fees.

(a) Regulatory fee payments must be directed to the location and address set forth in sections 1.1152 through 1.1155 for the specific category of fee involved. Any regulatory fee required to be submitted with an application must be filed as a part of the application package accompanying the application. The Commission will not take responsibility for matching fees, forms and applications submitted at different times or locations.

(b) Petitions for reconsideration or applications for review of fee decisions submitted with a standard regulatory fee payment pursuant to §§ 1.1153 through 1.1155 are to be filed with the Commission's lockbox bank in the manner set forth in §§ 1.1153 through 1.1155 for payment of the fee subject to the petition for reconsideration or the application for review. Petitions for reconsideration and applications for review that are submitted with no accompanying payment should be filed with the Secretary, Federal Communications Commission, Attention: Managing Director, Washington, DC 20554.

(c) Any request for exemption from a regulatory fee shall be filed with the Secretary, Federal Communications Commission, Attention: Managing Director, Washington, DC 20554, except that requests for exemption accompanied by a tentative fee payment shall be filed at the lockbox set forth for the appropriate service in §§ 1.1152 through 1.1155.

(d) The Commission will furnish a receipt for a regulatory fee payment only upon request. In order to obtain a receipt for a regulatory fee payment, the package must include an extra copy of the Form FCC 159 or, if a Form 159 is not required with the payment, a copy of the first page of the application or other filing submitted with the regulatory fee payment, submitted expressly for the purpose of serving as a receipt for the regulatory fee payment and application fee payment, if required. The document should be clearly marked "copy" and should be the top document in the package. The copy will be date stamped immediately and provided to the bearer of the submission, if hand delivered. For submissions by mail, the receipt copy will be provided through return mail if the filer has attached to the receipt copy a stamped self-addressed envelope of sufficient size to contain the receipt document.

18. Section 1.1159 is added to read as follows:

§ 1.1159 Refunds of regulatory fees.

(a) Regulatory fees will be refunded, upon request, only in the following instances:

(1) When no regulatory fee is required or an excessive fee has been paid. In the case of an overpayment, the refund amount will be based on the applicants', permittees', or licensees' entire submission. All refunds will be issued to the payor named in Block Number 3 of the FCC Form 159.

(2) In the case of advance payment of regulatory fees, subject to § 1.1152, a refund will be issued based on unexpired full years:

(i) When the Commission adopts new rules that nullify a license or other authorization, or a new law or treaty renders a license or other authorization useless;

(ii) When a licensee in the private radio service surrenders the license or other authorization subject to a fee payment to the Commission; or

(iii) When the Commission declines to grant an application submitted with a regulatory fee payment.

(3) When a waiver is granted in accordance with § 1.1165 of this subpart.

(b) No pro-rata refund of an annual fee will be issued.

(c) No refunds will be issued based on unexpired partial years.

(d) No refunds will be processed without a written request from the applicant, permittee, licensee or agent.

19. Section 1.1160 is added to read as follows:

§ 1.1160 Conditional license grants and delegated authorizations.

(a) Grant of any application or an instrument of authorization or other filing, for which a regulatory fee is required to accompany the application or filing, will be conditioned upon final payment of the regulatory fee. Final payment shall mean receipt by the U.S. Treasury of funds cleared by the financial institution on which the check, bank draft, money order, credit card, wire or electronic payment is drawn.

(1) If, prior to a grant of an instrument of authorization, the Commission is notified that final payment of the regulatory fee has not been made, the application or filing:

(i) Will be dismissed and returned;

(ii) Shall lose its place in the processing line; and

(iii) Will not be treated as timely filed if resubmitted after the relevant filing deadline.

(2) If, subsequent to a grant of an instrument of authorization or other filing, the Commission is notified that final payment has not been made, the Commission will:

(i) Automatically rescind that instrument of authorization;

(ii) Notify the grantee of this action; and

(iii) Treat as late filed any application resubmitted after the original deadline for filing the application.

(3) Upon receipt of a notification of rescission of the authorization, the grantee will immediately cease operations initiated pursuant to the authorization.

(b) In those instances where the Commission has granted a request for deferred payment of a regulatory fee, further processing of the application or filing or the grant of authority shall be

conditioned upon final payment of the regulatory fee and any required penalties for late payment prescribed by the deferral decision. Failure to comply with the terms of the deferral decision shall result in the automatic dismissal of the submission or rescission of the Commission authorization. Further, the Commission shall:

(1) Notify the grantee that the authorization has been rescinded. Upon such notification, the grantee will immediately cease operations initiated pursuant to the authorization; and

(2) Treat as late filed any application resubmitted after the original deadline for filing the application.

(c) Where the procedures described in paragraphs (a) and (b) of this section would not provide a meaningful incentive to pay a regulatory fee that is due or would not be a meaningful sanction for failure to pay such a fee, the Commission may, in its discretion, whether the regulatory fee is required to be paid with an application for an instrument of authorization or otherwise, withhold processing and/or grant of any application or filing made by a person or organization who has failed to make full payment of any regulatory fee due.

(1) Before taking such action, the staff will make a written request for the fee, together with any penalties that may be rendered under this subpart. Such request shall inform the regulatee that failure to pay may result in the Commission withholding action on any application or request filed by the applicant. The staff shall also inform the regulatee of the procedures for seeking Commission review of the staff's fee determination.

(2) If, after final determination that the fee is due, payment is not made in a timely manner, the staff may terminate processing and/or withhold any grant or petition requested by the person or organization subject to the fee payment requirement, until the matter is resolved.

20. Section 1.1161 is added to read as follows:

§ 1.1161 General exemptions from regulatory fees.

No regulatory fee established in §§ 1.1152 through 1.1155 of this subpart, unless otherwise qualified in this section shall be required for:

(a) Applicants, permittees or licensees in the Amateur Radio Service, except that any person requesting a vanity call-sign, following July 18, 1994 shall be subject to the payment of a regulatory fee, as prescribed in § 1.1152 of this Subpart.

(b) Applicants, permittees, or licensees who qualify as government entities. For purposes of this exemption, a government entity is defined as any state, possession, city, county, town, village, municipal corporation, or similar political organization or subpart thereof controlled by publicly elected or duly appointed public officials exercising sovereign direction and control over their respective communities or programs.

(c) Applicants, permittees or licensees who qualify as nonprofit entities. For purposes of this exemption, a nonprofit entity is defined as an organization possessing nonprofit, tax exempt status under section 501 of the Internal Revenue Code, 26 U.S.C. 501.

(d) Applicants, permittees or licensees in the Special Emergency Radio and Public Safety Radio services.

(e) Applicants, permittees or licensees of noncommercial educational broadcast stations in the FM or TV services, as well as AM applicants permittees or licensees operating in accordance with § 73.503 of this chapter.

(f) Applicants, permittees or licensees qualifying under § 1.1161(e) requesting Commission authorization in any other mass media radio service (except the international broadcast (HF) service), private radio service, or common carrier communications service requiring payment of a regulatory fee, if the service is used in conjunction with their noncommercial educational broadcast station on a noncommercial educational basis.

(g) Other applicants, permittees or licensees providing, or proposing to provide, a noncommercial educational or instructional service, but not qualifying under § 1.1161(e), may be exempt from regulatory fees, or be entitled to a refund, in the following circumstances:

(1) The applicant, permittee or licensee is an organization that, like the Public Broadcasting Service or National Public Radio, receives funding directly or indirectly through the Public Broadcasting Fund, 47 U.S.C. 396(k), distributed by the Corporation for Public Broadcasting, where the authorization requested will be used in conjunction with the organization on a noncommercial educational basis;

(2) An applicant, permittee or licensee of a translator or low power television station operating proposing a noncommercial educational service who, after grant, provides proof that it has received funding for the construction of the station through the National Telecommunications and Information Administration (NTIA) or other showings as required by the Commission; or

(3) An applicant, permittee, or licensee provided a fee refund under § 1.1159 and operating as a noncommercial education station, is exempt from fees for broadcast auxiliary stations (Part 74, Subparts D, E, and F, of this chapter) or stations in the private radio or common carrier services where such authorization is to be used in conjunction with the noncommercial educational translator or low power station.

(h) An applicant, permittee or licensee that is the licensee of an instructional television fixed station is exempt from regulatory fees where the authorization requested will be used by the applicant in conjunction with the provision of the instructional service.

(i) Applications filed in the private radio service for the sole purpose of modifying an existing authorization (or a pending application for authorization). However, if the applicant also requests a renewal or reinstatement of its license or other authorization for which the submission of a regulatory fee is required, the appropriate regulatory fee for such additional request must accompany the application.

21. Section 1.1162 is added to read as follows:

§ 1.1162 Adjustments to regulatory fees.

(a) For Fiscal Year 1994, the amounts assessed for regulatory fees are set forth in §§ 1.1152 through 1.1155.

(b) For Fiscal Year 1995 and thereafter, the Schedule of Regulatory Fees, contained in §§ 1.1152 through 1.1155, may be adjusted annually by the Commission pursuant to section 9 of the Communications Act. 47 U.S.C. 159. Adjustments to the fees established for any category of regulatory fee payment shall include of projected cost increases or decreases of the in volume of licensees or units upon which the regulatory fee is calculated.

(c) The fees assessed shall:

(1) Be derived by determining the full-time equivalent number of employees performing enforcement activities, policy and rulemaking activities, user information services, and international activities within the Private Radio Bureau, Mass Media Bureau, Common Carrier bureau, Cable Services Bureau and other offices of the Commission, adjusted to take into account factors that are reasonably related to the benefits provided to the payor of the fee by the Commission's activities, including such factors as service coverage area, shared use versus exclusive use, and other factors that the Commission determines are necessary in the public interest;

(2) Be established at amounts that will result in collection, during each fiscal year, of an amount that can reasonably be expected to equal the amount appropriated for such fiscal year for the performance of the activities described in paragraph (c)(1) of this section.

(d) The Commission shall by rule amend the Schedule of Regulatory Fees by proportionate increases or decreases that reflect, in accordance with paragraph (c)(2) of this section changes in the amount appropriated for the performance of the activities described in paragraph (c)(1) of this section for such fiscal year. Such proportionate increases or decreases shall be adjusted to reflect unexpected increases or decreases in the number of licensees or units subject to payment of such fees and result in collection of an aggregate amount of fees that will approximately equal the amount appropriated for the subject regulatory activities.

(e) The Commission shall, by rule, amend the Schedule of Regulatory Fees if the Commission determines that the Schedule requires amendment to comply with the requirements of paragraph (c)(1) of this section. In making such amendments, the Commission shall add, delete or reclassify services in the Schedule to reflect additional deletions or changes in the nature of its services as a consequence of Commission rulemaking proceedings or changes in law.

(f) In making adjustments to regulatory fees, the Commission will round such fees to the nearest $5.00 in the case of fees under $1,000.00, or to the nearest $25.00 in the case of fees of $1,000.00 or more.

22. Section 1.1163 is added to read as follows:

§ 1.1163 Penalties for late or insufficient regulatory fee payments.

Any late payment or insufficient payment of a regulatory fee, not excused by bank error, shall subject the regulatee to a 25 percent penalty of the amount of the fee or installment payment which was not paid in a timely manner. A timely fee payment or installment payment is one received at the Commission's lockbox bank by the due date specified by the Commission or by the Managing Director. A payment will also be considered late filed if the payment instrument (check, money order, bank draft or credit card) is uncollectible.

(a) The Commission may, in its discretion, following one or more late filed installment payments, require a regulatee to pay the entire balance of its regulatory fee by a date certain, in addition to assessing a 25 percent penalty.

(b) In cases where a fee payment fails due to error by the payor's bank, as evidenced by an affidavit of an officer of the bank, the date of the original submission will be considered the date of filing.

(c) If a regulatory fee is not paid in a timely manner, the regulatee will be notified of its deficiency. This notice will automatically assess a 25 percent penalty, subject the delinquent payor's pending applications to dismissal, and may require a delinquent payor to show cause why its existing instruments of authorization should not be subject to rescission.

(d)(1) Where a regulatee's new, renewal or reinstatement application is required to be filed with a regulatory fee (as is the case with private radio services), the application will be dismissed if the regulatory fee is not included with the application package. In the case of a renewal or reinstatement application, the application may not be refiled unless the appropriate regulatory fee plus the 25 percent penalty charge accompanies the refiled application.

(2) If the application that must be accompanied by a regulatory fee is a mutually exclusive application with a filing deadline, or any other application that must be filed by a date certain, the application will be dismissed if not accompanied by the proper regulatory fee and will be treated as late filed if resubmitted after the original date for filing the application.

(e) Any pending or subsequently filed application submitted by a party will be dismissed if that party is determined to be delinquent in paying a standard regulatory fee or an installment payment. The application may be resubmitted only if accompanied by the required regulatory fee and by any assessed penalty payment.

(f) In instances where the Commission may revoke an existing instrument of authorization for failure to file a regulatory fee, the Commission will provide prior notice to the regulatee of such action and shall allow the licensee no less than 60 days to either pay the fee or show cause why the payment assessed is inapplicable or should otherwise be waived or deferred.

(1) An adjudicatory hearing will not be designated unless the response by the regulatee to the Order to Show Cause presents a substantial and material question of fact.

(2) Disposition of the proceeding shall be based upon written evidence only and the burden of proceeding with the introduction of evidence and the burden of proof shall be on the respondent regulatee.

(3) Unless the regulatee substantially prevails in the hearing, the Commission may assess costs for the conduct of the proceeding against the respondent regulatee. See 47 U.S.C. 402(b)(5).

(4) Any regulatee failing to submit a regulatory fee, following notice to the regulatee of failure to submit the required fee, is subject to collection of the fee, including interest thereon, any associated penalties, and the full cost of collection to the Federal government pursuant to section 3720A of the Internal Revenue Code, 31 U.S.C. 3720A and to the provisions of the Debt Collection Act, 31 U.S.C. 3711. See 47 CFR 1.1901–1.1952. The debt collection processes described may proceed concurrently with any other sanction in this section.

23. Section 1.1164 is added to read as follows:

§ 1.1164 Payment by cashier's check for regulatory fees.

Payment by cashier's check may be required when a person or organization makes payment, on one or more occasions, with a payment instrument on which the Commission does not receive final payment and such error is not excused by bank error.

24. Section 1.1165 is added to read as follows:

§ 1.1165 Waivers, reductions and deferrals of regulatory fees.

The fees established by §§ 1.1152 through 1.1155 of this subpart may be waived, reduced or deferred in specific instances, on a case-by-case basis, where good cause is shown and where waiver, reduction or deferral of the fee would promote the public interest. Requests for waivers, reductions or deferrals of regulatory fees for entire categories of payors will not be considered.

(a) Requests for waivers, reductions or deferrals will be acted upon by the Managing Director with the concurrence of the General Counsel. If the request for waiver, reduction or deferral is accompanied by a fee payment, the request must be submitted to the Commission's lockbox bank at the address for the appropriate service set forth in § 1.1152 through 1.1155 of this subpart. If no fee payment is submitted and the matter is within the scope of the fee rules in this subpart the request should be filed with the Commission's Secretary and clearly marked to the attention of the Managing Director.

(b) Deferrals of fees will be granted for a period of six months following the date that the fee is initially due.

(c) Petitions for waiver of a regulatory fee must be accompanied by the

required fee and FCC Form 159. Submitted fees will be returned if a waiver is granted. Waiver requests that do not include the required fees or forms will be dismissed unless accompanied by a petition to defer payment due to financial hardship, supported by documentation of the financial hardship.

(d) Petitions for reduction of a fee must be accompanied by the full fee payment less the amount of the requested reduction and FCC Form 159. Petitions for reduction accompanied by a fee payment must be addressed to the Federal Communications Commission, Post Office Box 358835, Pittsburgh, Pennsylvania, 15251–5835.

25. Section 1.1166 is added to read as follows:

§ 1.1166 Error claims related to regulatory fees.

(a) Challenges to determinations of an insufficient regulatory fee payment should be made in writing. Challenges submitted with a fee payment must be submitted to the same location as the original fee payment, marked "Attention: Fee Supervisor". Challenges not accompanied by a fee payment should be filed with the Commission's Secretary and clearly marked to the attention of the Managing Director.

(b) The filing of a petition for reconsideration or an application for review of a fee determination will not toll the requirement that full and proper payment of the underlying fee payment be submitted, as required by the Commission's action, or delegated action, on a request for waiver, reduction or deferment. Petitions for reconsideration and applications for review submitted with a fee payment must be submitted to the same location as the original fee payment. Petitions for reconsideration and applications for review not accompanied by a fee payment should be filed with the Commission's Secretary and clearly marked to the attention of the Managing Director.

(1) Failure to submit the fee by the date required will result in the assessment of a 25 percent penalty.

(2) If the fee payment should fail while the Commission is considering the matter, the petition for reconsideration or application for review will be dismissed.

Note: These appendices will not appear in the Code of Federal Regulations

Appendix A

Guidelines for Regulatory Fee Categories

1. The guidelines below provide an explanation of regulatory fee categories established by the Schedule of Regulatory Fees in section 9(g) of the Communications Act. 47 U.S.C. 159(g). Where regulatory fee categories need interpretation or clarification, we have relied on the legislative history of Section 9, our own experience in establishing and regulating the various services subject to a fee requirement and the comments of the parties in our proceeding to adopt fees for Fiscal Year 1994 and establish rules to implement the regulatory fee program. The categories and amounts set out in the schedule might, by the next fiscal year and in subsequent fiscal years, be amended, adjusted, or modified to reflect changes in the Commission's appropriations, our costs of providing the regulatory services to be recovered by the fee program, and additions, reductions and changes in the services subject to the fee requirement. See 47 U.S.C. 159(b) (2), (3).

1. Private Radio Bureau

2. The two levels of statutory fees for Private Radio services, exclusive use service and shared use services, were established on the basis that those licensees who generally receive a higher quality communications channel, due to exclusive or lightly shared frequency assignments, will pay a higher fee than those who share marginal quality channels. House Report at 17. In addition, because of the relatively small annual fee amounts in the Private Radio Services, applicants for new licenses and reinstatements and for renewal of their current licenses will be required to pay a regulatory fee covering an entire license term, with only a percentage of all licensees paying a regulatory fee in any one year.

3. Applications for modification or assignment of an existing authorization do not require payment of a regulatory fee. The expiration date of these authorizations will not reflect a new license term when either modifications or assignments are processed. In an effort to reduce public confusion, the Commission has provided separate post office box addresses for these actions.

a. Exclusive Use Services

4. *Land Mobile.* Regulatees covered under this category include those authorized under Part 90 of the Commission's Rules to provide limited access private radio service that allows high quality voice or digital communications between vehicles or to fixed stations to further the business activities of the licensee. These services, using the 220–222 MHz band and frequencies at 470 MHz and above, may be offered on a private carrier basis in the Specialized Mobile Radio Services (SMRS). These land mobile licensees are subject to a regulatory fee of $16 per license per year. They will pay either a $80 or $160 regulatory fee (depending whether their license term is 5 or 10 years).[1]

5. *Microwave.* Private microwave systems, authorized under part 94 of the Commission's Rules, provide telecommunications services between fixed points and are often used to relay data and to control railroad, pipeline and utility equipment. Microwave licensees are required to pay the total regulatory fee for the entire term of their license when filing their initial or renewal application. The annual fee is $16 for a total of $80 to be filed with the application.

6. *Interactive Video Data Service (IVDS).* IVDS is a two-way point-to-multi-point radio service which provides information about products and services, and allows subscribers to respond through their television sets. IVDS is offered on a private carrier basis and is authorized under Part 95, Subpart F of the Commission's Rules. IVDS licensees will be assessed a regulatory fee of $80 per license to cover each five year license term ($16 per year).

b. Shared Use Services and Other Authorizations

7. The specific categories of shared-use services listed below are not on the statutory schedule but were listed in the House Report. As discussed above, we propose that emergency and public safety services would be exempted from regulatory fees.

8. *Aviation (Aircraft and Ground Stations).* The aircraft radio service provides communications between aircraft or from aircraft to ground stations and includes frequencies used to communicate with air traffic control facilities. See generally 47 CFR Part 87. Aviation aircraft transceiver stations are subject to a regulatory fee of $7 per year per station (the total fee of $70 per station for ten year license term is to be paid at the time a renewal or new application is filed). Aviation ground stations provide communications to aircraft for weather or landing information, or for logistical support to aircraft operations. These stations are subject to a regulatory fee of $7 per year per license (the total fee of $35 per license for five year license term is to be paid at the time a renewal or new application is filed).

9. *Marine (Coast and Ship Stations).* Marine coast stations are land-based stations in the maritime services, authorized under Part 80 of our rules, which provide communications services to ships and other watercraft in coastal and inland waterways. Coast stations are subject to a $35 regulatory fee for each license, covering the five year license term ($7 per year). Marine ship stations, also authorized under Part 80, provide telecommunications between watercraft or between watercraft and shore-based stations. Shipboard radio installations are required by domestic and international law for large passenger or cargo vessels. Radio equipment may be voluntarily installed on smaller vessels, such as recreational boats. Ship stations are assessed a $70 regulatory fee per station, covering the ten year license term ($7 per year) and is to be paid at the same time a license renewal application or new application is filed.

10. *General Mobile Radio Service (GMRS).* GMRS, authorized under Part 95 of the Rules, is a land mobile radio service that provides personal and limited business communications between vehicles or to fixed stations for short-range, two-way communications. Each GMRS license is subject to a $35 regulatory fee, which covers the five year license term ($7 per year) and is to be paid at the same time a license

[1] Some of these services may be reclassified when the Commission implements the recent amendments to section 332 governing the provision of mobile radio services. See n. 11.

renewal application or new application is filed.

11. *Other Land Mobile.* Licensees in the land mobile services not covered in the exclusive use category provide one or two way communications between vehicles, persons or to fixed stations on a shared basis. These services, authorized under Part 90 of the Rules, include radiolocation services, private carrier paging, industrial radio services and land transportation radio services. Regulatory fees will be assessed on a per license basis with the $35 fee covering the five year license term ($7 per year) and is to be paid at the same time a license renewal application or new application is filed.

c. Amateur Vanity Call-Signs

12. If Part 97 of the Rules is amended by the Commission to authorize the use of vanity call-signs, amateur radio operators would be able to request a specific call-sign. *See Notice of Proposed Rule Making* in PR Docket No. 93–305, 9 FCC Rcd 105 (1993). Each amateur licensee with a vanity call-sign will be assessed a regulatory fee of $7 per year. The total fee of $70 will cover the ten year license term during which the call sign will be in use. The first 10-year fee must be paid at the time a request for a vanity call-sign(s) is made. If a requested vanity call-sign is not available or otherwise cannot be issued to the requestor, the regulatory fee will be refunded since amateurs are expressly exempt under the statute from regulatory fees, unless they have received their vanity call-sign.

2. Mass Media Bureau

13. The regulatory fees for Mass Media services generally apply to broadcast licensees and permittees and to other regulatees.[2] We have exempted noncommercial educational broadcasters from regulatory fees.

a. AM Radio Stations

14. *Class A.* Class A AM radio stations are unlimited time stations operating on a clear channel and designed to render primary and secondary service over an extended service area and at relatively long distances from their transmitters. Class A stations' primary service areas are protected from objectionable interference from other stations on the same and adjacent channels, with secondary service areas protected from interference from other stations on the same channel. The operating power shall not be less than 10 kW nor more than 50 kW. For FY 1994, each licensee of a Class A AM station will be assessed a $900 annual regulatory fee.[3]

15. *Class B.* Class B AM radio stations are unlimited time stations rendering service only over a primary service area. These stations are authorized to operate with a minimum power of 0.25 kW (or, if less than 0.25 kW, an equivalent RMS antenna field of at least 141 mV/m at 1 km) and a maximum power of 50 kW (or 10kW for stations that are authorized to operate in the 1605–1705 kHz band). For FY 1994, each licensee of a Class B AM station will be assessed a $500 annual regulatory fee.

16. *Class C.* Class C AM radio stations operate on local channels and are designed to render service only over a primary service area that may be reduced as a consequence of interference. These stations are authorized to operate at not less than 0.25 kW, nor more than 1 kW. Class C stations that were previously licensed to operate with 0.1 kW may continue to do so under our rules. For FY 1994, each licensee of a Class C AM station will be assessed a $200 annual regulatory fee.

17. *Class D.* Class D AM radio stations operate either daytime, limited time or unlimited time with nighttime power less than 0.25 kW and an equivalent RMS antenna field of less than 141 mV/m at one km. Class D stations operate with daytime powers not less than 0.25 kW nor more than 50 kW. Nighttime operations of Class D stations are not afforded protection and must protect all Class A and Class B operations during nighttime hours. For FY 1994, each licensee of a Class D AM station will be assessed a $250 annual regulatory fee.

18. *AM Construction Permits.* For FY 1994, persons holding a construction permit for a any class of a new am station are subject to a $100 annual regulatory fee for each outstanding permit. Upon issuance of an operating license to cover the construction permit, this fee is no longer applicable. Instead, licensees will pay a regulatory fee amount based upon the designated class of the licensed station, as described above, as of the date the regulatory fee payment is due.

b. FM Radio Stations

19. *Licensed Stations.* FM radio stations must meet the location, power and antenna height requirements for stations designated as Classes C, C1, C2, or B, as set forth in sections 73.205, 73.210 and 73.211 of the Commission's Rules. For FY 1994, each commercial licensee of a Class C, C1, C2, or B FM station will be assessed a $900 annual regulatory fee per license. FM radio stations meeting the location, power and antenna height requirements for stations designated as Classes A, B1, or C3, as set forth in the Commission's rules, have a smaller coverage area. Thus, for FY 1994, each commercial licensee for a Class A, B1, or C3 FM Station will be assessed a $600 annual regulatory fee per license.

20. *FM Construction Permits.* Persons holding a construction permit for any class of a new FM station, except Class D, are subject to a $500 annual regulatory fee per outstanding permit in FY 1994. Upon issuance of an operating license to cover the construction permit, this fee is no longer applicable. Instead licensees will pay a regulatory fee based upon the designated class of the licensed station, as described above, as of the regulatory fee payment is determined.

c. Television Stations

21. *VHF and UHF Commercial Licenses.* Commercial VHF and UHF television licensees, including licensees of satellite stations, will be assessed a regulatory fee amount based on the ranking of the station's market. Specifically, for FY 1994 these annual regulatory fees are as follows:

VHF Commercial:	
Markets 1 through 10	$18,000.00
Markets 11 through 25	16,000.00
Markets 26 through 50	12,000.00
Markets 51 through 100	8,000.00
Remaining Markets	5,000.00
UHF Commercial:	
Markets 1 through 10	14,400.00
Markets 11 through 25	12,800.00
Markets 26 through 50	9,600.00
Markets 51 through 100	6,400.00
Remaining Markets	4,000.00

Stations authorized as "satellite" television stations pursuant to note 5 of Section 73.3555 of the Commission's Rules (47 CFR 73.3555 note 5) will be assessed a fee on the same basis as other full power stations in the same market.

23. Television licensees subject to a regulatory fee above $12,000 will be automatically eligible to make two equal installment payments.

24. We have decided to rely upon the latest Arbitron market data to determine a television station's market ranking for purposes of assessing regulatory fees. These rankings may be found in the Television and Cable Factbook published by Warren Publishing. Changes in market rankings may affect regulatory fee amounts for the following fiscal year.

25. *Television Construction Permits.* For FY 1994, persons holding a construction permit for a new VHF television station, in any size market, are subject to a $4,000 annual regulatory fee per outstanding permit. UHF construction permits for stations in any size market will be assessed a $3,200 annual regulatory fee. Upon issuance of an operating license to cover the construction permit, this construction permit fee is no longer applicable. Instead, licensees will pay a regulatory fee amount based upon the licensed station's market ranking, as described above.

d. Low Power TV, TV Translator, and TV Booster Stations

26. Under Part 74 of the Commission's Rules, low power UHF and VHF TV stations operate with a transmitter power output limited to 0.01kw for a UHF facility and, generally, 1kw for a VHF facility, and may retransmit the programs and signals of a full-power TV broadcast station, originate

[2] We note that some Mass Media services, such as the direct broadcast satellite service ("DBS"), the Instructional Television Fixed Service ("ITFS"), and FM translators and boosters were not specifically listed in the statutory schedule. We believe that ITFS was excluded because of its general educational noncommercial status. We also believe that the omission of DBS and FM translators and boosters was inadvertent and that Congress did not intend to exempt all DBS permittees and licensees and licensees of FM translators and boosters from regulatory fees as these services result in the Commission incurring costs for necessary regulatory functions. Since these services are not on the statutory schedule, we have not assessed fees for these services during the 1994 fiscal year. However, pursuant to our authority in section 9(b)(3) to modify the schedule, we intend to add regulatory fee categories for DBS licenses and for FM translators and boosters to be assessed and collected during the 1995 fiscal year.

[3] Regulatees are to pay the fee to which their facility is subject on the date the fee is due.

programming, and/or operate as a subscription service. TV translator stations are authorized to retransmit the programs and signals of TV broadcast stations without significantly altering the characteristic of the original signal other than its frequency and amplitude, for the purpose of providing TV reception to the general public.

27. TV booster stations are operated by the licensee of a full service TV broadcast station to retransmit the programs and signals of the licensee's station by amplifying and reradiating such signals, without significantly altering the characteristics of the original signal other than its amplitude. For FY 1994, licensees of these secondary television broadcast stations will be assessed a $135 annual regulatory fee per license.

e. Broadcast Auxiliary Stations

28. Licensees of remote pickup stations, aural broadcast auxiliary stations, television broadcast auxiliary stations, and low power auxiliary stations, authorized under Part 74 of the Commission's Rules, will be assessed a $25 per license annual regulatory fee for FY 1994. These auxiliary stations are associated with a particular television or radio broadcast station. Hence, those licensees will be required to pay the required regulatory fees for each auxiliary license they hold. Individual users under 47 CFR subpart D, F and H will similarly have to pay the required regulatory fee for each auxiliary license they hold.

f. International (HF) Broadcast Stations

International broadcast stations are licensed to operate on frequencies in the 5,950 khz to 26,100 khz band to provide service to the general public in foreign countries. For FY 1994, each international broadcast licensee will be assessed an annual regulatory fee of $200 per license.

3. Cable Services Bureau

a. Cable Antenna Relay Service

30. Cable television antenna relay service ("CARS") stations are used to transmit television and related audio signals, signals of AM and FM broadcast stations and cablecasting from the point of reception to a terminal point from where the signals are distributed to the public by cable television systems. *See* 47 C.F.R. Part 78. For FY 1994, each CARS licensee will be assessed an annual regulatory fee of $220 per license.

b. Cable Television Systems

31. For FY 1994, each cable television system, as that term is defined in section 76.5 of our rules, will be assessed an annual regulatory fee of $.37 per subscriber.[4]

32. We will allow installment payments for these regulatory fees if the annual fee of a cable television system or a group of commonly owned systems aggregating their regulatory fees exceeds $18,500.

4. Common Carrier Bureau

32. Most common carrier regulatory fees are based on the size of a regulatee's communication operation as determined by number of stations, subscribers, access lines, or antennas.

[4] The term "subscriber" is defined in § 76.5 of the Commission's Rules, 47 CFR 76.5.

a. Mobile Services

33. *Cellular and Public Mobile Licensees.* Under Part 22 of our rules, common carriers are authorized to offer land-based or air-to-ground mobile telephone or paging services to the public. In addition to cellular telephone service, these services include those using radio to provide telephone services at fixed locations, such as Basic Exchange Telecommunications Radio Services, Rural Radio and Offshore Radio. For FY 1994, each common carrier license authorized under Part 22 will be assessed an annual regulatory fee of $.06 per subscriber.

34. *Personal Communications Services.* Licensed personal communications services ("PCS") will consist of a wide variety of commercial or private mobile communications services, including advanced paging, microcellular telephone communications, portable facsimile and other video and data transmission services. See generally, *First Report and Order*, Gen. Docket No. 90–314 and ET Docket No. 92–100, 8 FCC Rcd 7162 (1993) (narrowband PCS); *Second Report and Order*, Gen. Docket No. 90–314, 8 FCC Rcd 7700 (1993) (broadband PCS). The statutory Schedule of Regulatory Fees enacted in the 1993 Budget Act established an annual fee of $60 per 1,000 subscribers for PCS licensees. At the same time, the 1993 Budget Act recognized that PCS licenses have not yet been issued. In particular, Congress directed the Commission to conclude its PCS rulemaking proceedings (Gen. Docket No. 90–314 and ET Docket No. 92–100) by February 6, 1994, and to commence the PCS licensing process by May 7, 1994.[5] In addition, our new PCS service rules provide licensees five years to meet minimum construction requirements.[6] Accordingly, since it is unlikely that any PCS licensee will have a significant number of subscribers in the immediate future, no regulatory fees will be collected from PCS licensees during the 1994 fiscal year. We intend to begin assessing and collecting regulatory fees for PCS in the 1995 fiscal year.

b. Space Stations

35. *Space Stations in Geosynchronous Orbit.* Domestic and international satellites, positioned in orbit to remain approximately fixed relative to the earth, are authorized to provide communications between satellites and earth stations on a common carrier and/or private carrier basis. For FY 1994, entities authorized to operate these space stations in accordance with § 25.120(d), will be assessed an annual regulatory fee of $65,000 for each operational station in geosynchronous orbit on the date for calculating fees. 47 CFR 25.120(d). Payment may be made in two installments.

36. *Space Stations in Low-Earth Orbit.* Domestic and international non-geostationary satellites, positioned in a low-earth orbit ("LEO"), may be authorized to transmit to satellites and fixed or mobile earth stations.

[5] Section 6002(d)(2), 1993 Budget Act. See *Second Report and Order* in Docket 93–252, FCC–94–31, adopted February 3, 1994.

[6] See *First Report and Order*, at ¶ 37; *Second Report and Order*, at ¶ 134 (petitions for reconsideration pending).

These services include the new non-voice, non-geostationary mobile-satellite service, see *Report and Order*, CC Docket No. 92–76, 8 FCC Rcd 8450 (1993). Entities authorized to operate LEO systems will be assessed an annual regulatory fee of $90,000 for each such system. For purposes of assessing regulatory fees, a LEO operator is required to submit its annual regulatory fees in the fiscal year in which it commences operating its first satellite, pursuant to § 25.120(d), even though all the space stations specified in its application or instrument of authorization have not become operational. 47 CFR 25.120(d). While it appears unlikely that a LEO system will be operational by the date for calculating fees for the 1994 fiscal year,[7] should a LEO system be operational on the date for calculating fees during that period, we will require payment of a regulatory fee for such operational systems. The entire annual fee amount will be required. Payment may be made in two installments.

c. Public Fixed Radio Services

37. *Domestic Public Fixed Services.* Licensees in the Domestic Public Fixed Services are authorized to use microwave frequencies for video and data distribution communications within the United States. These services, authorized under Part 21 of the Rules, include the Point-to-Point Microwave Radio Service, Local Television Transmission Radio Service, Multipoint Distribution Service (single-channel and multichannel) and Digital Electronic Message Service. For FY 1994, these licensees will be assessed an annual regulatory fee of $55 per call-sign.

38. *International Public Fixed Service.* Licensees in the International Public Fixed Service are authorized as common carriers to provide radio communications between the United States and a foreign point via microwave, HF, troposcatter systems (other than satellites and satellite earth stations). This does not include service between the United States and Mexico and the United States and Canada using frequencies above 72 MHz. See 47 CFR part 23. For FY 1994, these licensees will be assessed an annual regulatory fee of $110 per call-sign.

d. Earth Stations

39. *VSAT and Equivalent C-Band Antennas.* Earth station systems comprising very small aperture terminals make up authorized networks operating in the 12 and 14 GHz bands and provide a variety of communications services to other stations in the network. Each system, authorized pursuant to blanket licensing procedures in Part 25 of the Rules, consists of a network of technically-identical small fixed-satellite earth stations which often includes a larger hub station. For FY 1994, entities holding VSAT authorizations will be assessed an annual regulatory fee of $.06 per antenna. Entities with less than 100 antennas will be subject to a minimum $6 fee.

40. *Mobile Satellite Earth Stations.* Under Part 25 of the Rules, mobile satellite service

[7] See *Report and Order*, at ¶ 18 (a permittee must begin construction of its first two satellites of its system within one year of grant of its construction permit).

providers operate under blanket licenses for mobile antennas (transceivers), which are smaller than one meter and provide voice or data communications, including position location information, for mobile platforms such as cars, buses or trucks. For FY 1994, licensees will be assessed an annual regulatory fee of $.06 per antenna. Entities with fewer than 100 antennas will be subject to a minimum $6 fee.

41. *Earth Station Antennas Less Than 9 Meters.* Persons authorized or registered under Part 25 to operate fixed-satellite earth station antennas that are less than 9 meters in diameter are private and public carriers that provide telephone, television, data, and other forms of communications. This category includes antennas used to transmit and receive, transmit only, or receive only. Also included in this category are telemetry, tracking and control (TT&C) earth stations. For FY 1994, we will assess an annual regulatory fee of $.06 per antenna. Entities with less than 100 antennas will be subject to a minimum $6 fee.

42. *Earth Station Antennas 9 Meters or Greater.* This category covers fixed-satellite earth station antennas authorized under Part 25 that are equal to or greater than 9 meters in diameter. These earth stations are operated by private carriers and common carriers to provide telephone, television, data, and other forms of communications. Included in this category are telemetry, tracking, and control (TT&C) earth stations equal to or greater than 9 meters in diameter. For FY 1994, persons authorized to operate transmit/receive and transmit-only antennas will be assessed an annual regulatory fee of $85 per meter; receive-only antennas will be assessed a regulatory fee of $55 per meter. All measurements will be to the tenth of a meter.

e. Interexchange and Local Exchange Carriers

43. For FY 1994, interexchange carriers (long distance telephone companies) ("IXCs") will be assessed an annual regulatory fee of $.06 per presubscribed line. Similarly, local exchange carriers (local telephone operating companies) ("LECs") will be assessed an annual regulatory fee of $.06 per access line. A holding company may combine the fee payments of its operating companies and pay their fees for a particular service in a single combined payment or by installments, if the aggregate of their fees in a single service qualifies the holding company to make installment payments. For IXCs we have identified regulatory fee payment amounts greater than $500,000 as large. For LECs, we have identified $700,000 as a large amount. Thus, we will permit IXCs whose annual regulatory fee exceeds $500,000 and LECs whose fee payments exceed $700,000 to make installment payments.

f. Competitive Access Providers

44. Competitive access providers ("CAPs") are companies, other than the traditional local telephone companies, that provide interstate access services to long distance carriers and other companies. For FY 1994, each CAP will be assessed an annual regulatory fee of $.06 per subscriber.

g. International Bearer Circuits

45. The Schedule of Regulatory Fees provides that the fee for international bearer circuits is to be computed "per 100 active 64 KB circuits or equivalent." The fee is to be paid by the facilities-based common carrier activating the circuit in any transmission facility for the provision of service to an end user or resale carrier. Private submarine cable operators also are to pay fees for circuits sold on an indefeasible right of use (IRU) basis or leased in their private submarine cables to any customer of the private cable operator. The fee is based upon active 64 KB circuits, or equivalent circuits. Under this formulation, 64 KB circuits or their equivalent will be assessed a fee. Equivalent circuits include the 64 KB circuit of larger bit stream circuits. For example, the 64 KB circuit equivalent of a 2.048 MB circuit is 30 64 KB circuits. Analog circuits such as 3 and 4 KHz circuits used for international service are also included as equivalent 64 KB circuits. However, circuits derived from 64 KB circuits by the use of digital circuit multiplication systems are not equivalent 64 KB circuits. Such circuits are not subject to fees. Only the 64 KB circuit from which they have been derived will be subject to payment of a fee. For analog television channels we will assess fees as follows:

Analog television channel size in MHz	No. of equivalent 64 KB circuits
36	630
24	480
18	240

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[Gen. Docket 86-285; FCC 94-141]

Amendment of the Schedule of Application Fees

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission has amended its Schedule of Application Fees to adjust the fees for processing applications and other filings. Section 8(b) of the Communications Act requires the Commission to adjust its application fees every two years after October 1, 1991 to reflect the net change in the Consumer Price Index for all Urban Consumers (CPI-U). The increased fees reflect the net change in the CPI-U of 14.8 percent, calculated from December 1989 through August 1993.

EFFECTIVE DATE: July 18, 1994.

FOR FURTHER INFORMATION CONTACT: Regina Dorsey, Office of Managing Director at (202) 632-0241.

SUPPLEMENTARY INFORMATION:

Order

In the Matter of: Amendment of the Schedule of Application Fees Set Forth in Sections 1.1102 through 1.1105 of the Commission's Rules.

Adopted: June 6, 1994;
Released: June 8, 1994.

By the Commission: Commissioners Ness and Cheng not participating.

1. By this action, the Commission amends its Schedule of Application Fees, 47 CFR 1.1102 *et seq.*, to adjust the fees for processing applications and other filings. Section 8(b) of the Communications Act requires that the Commission adjust its application fees every two years after October 1, 1991. 47 U.S.C. 158(b). The increased fees reflect the net change in the Consumer Price Index for all Urban Consumers (CPI-U) of 14.8 percent, calculated from December 1989 through August 1993. The adjustments to the fee schedule comport with the statutory formula set forth in section 8(b). Consistent with section 8(b), the Commission transmitted to Congress notification of the fee adjustments on December 23, 1993. Congress has interposed no objection to the increases in the fees.

2. Accordingly, it is ordered, That the Schedule of Application Fees, 47 CFR 1.1102 *et seq.*, is amended as set forth below, effective thirty days after publication in the **Federal Register**.

List of Subjects in 47 CFR Part 1

Administrative practice and procedure, Communications common carriers, Investigations, Penalties, Radio, Reporting and recordkeeping requirements, Telecommunications, Television.

Federal Communications Commission
William F. Caton,
Acting Secretary.

46 CFR Part 1 is amended as follows:

PART 1—PRACTICE AND PROCEDURE

1. The authority citation for part 1 continues to read as follows:

Authority: 47 U.S.C. 151, 154, 303, and 309(j) unless otherwise noted.

2. Section 1.1102 is revised to read as follows:

§ 1.1102 Schedule of charges for applications and other filings in the private radio services.

3. Section 1.1103 is revised to read as follows:

§ 1.1103 Schedule of charges for equipment authorization, experimental radio services, ship inspections and international telecommunications settlements.

Action	FCC form No.	Fee amount	Fee type code	Address
1. Certification:				
a. Receivers (except TV and FM receivers)	731	330	EEC	Federal Communications Commission, Equipment Approval Services, P.O. Box 358315, Pittsburgh, PA 15251–5315.
b. All Other Devices	731	845	EGC	Federal Communications Commission, Equipment Approval Services, P.O. Box 358315, Pittsburgh, PA 15251–5315.
c. Modifications and Class II Permissive Changes.	731	45	EAC	Federal Communications Commission, Equipment Approval Services, P.O. Box 358315, Pittsburgh, PA 15251–5315.
d. Request for Confidentiality	731 or Corr & 159.	125	EBC	Federal Communications Commission, Equipment Approval Services, P.O. Box 358315, Pittsburgh, PA 15251–5315.
2. Type Acceptance:				
a. All Devices	731	425	EFT	Federal Communications Commission, Equipment Approval Services, P.O. Box 358315, Pittsburgh, PA 15251–5315.
b. Modifications and Class II Permissive Changes.	731	45	EAT	Federal Communications Commission, Equipment Approval Services, P.O. Box 358315, Pittsburgh, PA 15251–5315.
c. Request for Confidentiality	731 or Corr & 159.	125	EBT	Federal Communications Commission, Equipment Approval Services, P.O. Box 358315, Pittsburgh, PA 15251–5315.

Action	FCC form No.	Fee amount	Fee type code	Address
3. Type Approval (There are no longer any radio frequency devices subject to Type Approval):				
4. Notifications (All Devices)	731	135	ECN	Federal Communications Commission, Equipment Approval Services, P.O. Box 358315, Pittsburgh, PA 15251–5315.
5. Advance Approval for Subscription TV System.	Corr & 159	2,590	EIS	Federal Communications Commission, Equipment Approval Services, P.O. Box 358315, Pittsburgh, PA 15251–5315.
a. Request for Confidentiality	Corr & 159	125	EBS	Federal Communications Commission, Equipment Approval Services, P.O. Box 358315, Pittsburgh, PA 15251–5315.
6. Assignment of Applicant Code:				
a. New applicants for all application types except Subscription TV.	Corr & 159	45	EAG	Federal Communications Commission, Experimental Radio Service, P.O. Box 358315, Pittsburgh, PA 15251–5315.
7. Experimental Radio Service:				
a. New Construction Permit and Station Authorization (per application).	442	45	EAE	Federal Communications Commission, Experimental Radio Service, P.O. Box 358320, Pittsburgh, PA 15251–5320.
b. Modification to Existing Construction Permit and Station Authority (per application).	442	45	EAE	Federal Communications Commission, Experimental Radio Service, P.O. Box 358320, Pittsburgh, PA 15251–5320.
c. Renewal of Station Authorization (per application).	405	45	EAE	Federal Communications Commission, Experimental Radio Service, P.O. Box 358320, Pittsburgh, PA 15251–5320.
d. Assignment or Transfer of Control (per application).	702 or 703	45	EAE	Federal Communications Commission, Experimental Radio Service, P.O. Box 358320, Pittsburgh, PA 15251–5320.
e. Special Temporary Authority (per application).	Corr & 159	45	EAE	Federal Communications Commission, Experimental Radio Service, P.O. Box 358320, Pittsburgh, PA 15251–5320.
f. Additional fee required for any of the above applications that request confidentiality.	Corr & 159	45	EAE	Federal Communications Commission, Experimental Radio Service, P.O. Box 358320, Pittsburgh, PA 15251–5320.
Ship Inspections:				
a. Inspection of Oceangoing Vessels Under Title III, Part II of the Communications Act (per inspection).	801	715	FFS	Federal Communications Commission, P.O. Box 358110, Pittsburgh, PA 15251–5110
b. Inspection of Passenger Vessels Under Title III, Part III of the Communications Act (per inspection).	801	370	FCS	Federal Communications Commission, P.O. Box 358110, Pittsburgh, PA 15251–5110.
c. Inspection of Vessels Under the Great Lakes Agreement (per inspection).	801	90	FDS	Federal Communications Commission, P.O. Box 358110, Pittsburgh, PA 15251–5110.
d. Inspection of Vessels Under the Safety of Life at Sea (SOLAS) Convention (per inspection).	801	620	FES	Federal Communications Commission, P.O Box 358110, Pittsburgh, PA 15251–5110.
e. Temporary Waiver of Inspection	159	70	FBS	Federal Communications Commission, P.O. Box 358110, Pittsburgh, PA 15251–5110.
9. International Telecommunications Settlements Administrative Fee for Collections (per line item).	99	2	IAT	Licensees will be billed.

4. Section 1.1104 is revised to read as follows:

§ 1.1104 Schedule of charges for applications and other filings in the mass media services.

Action	FCC form N No.	Fee amount	Fee type code	Address
1. Commercial TV Stations:				
a. New and Major Change Construction Permits.	301	2,915	MVT	Federal Communications Commission, Mass Media Services, P.O. Box 358165, Pittsburgh, PA 15251–5165.
b. Minor Change	301	650	MPT	Federal Communications Commission, Mass Media Services, P.O. Box 358165, Pittsburgh, PA 15251–5165.
c. Hearing (Major/Minor Change, Comparative New, or Comparative Renewal).	N/A	7,765	MWT	Federal Communications Commission, Mass Media Bureau, P.O. Box 358170, Pittsburgh, PA 15251–5165.
d. License	302	200	MJT	Federal Communications Commission, Mass Media Bureau, P.O. Box 358170, Pittsburgh, PA 15251–5165.

Action	FCC form N No.	Fee amount	Fee type code	Address
e. Assignment or Transfer:				
(i) Long Form (per station)	314, 315	650	MPR	Federal Communications Commission, Mass Media Bureau, P.O. Box 358350, Pittsburgh, PA 15251–5165.
(ii) Short Form (per station)	316	95	MDR	
f. Renewal	303–S	115	MGT	Federal Communications Commission, Mass Media Services, P.O. Box 358165, Pittsburgh, PA 15251–5165.
g. Call Sign (New or Modification)	NA	65	MBT	Federal Communications Commission, Mass Media Services, P.O. Box 358165, Pittsburgh, PA 15251–5165.

m. Standby Transmitter (per transmitter/per location).	401 & 159	230	CLR	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130. Pittsburgh, PA 15251–5130.
5. Offshore Radio Service (Mobile, Subscriber and Central Stations)				
a. New or Additional Facility (per transmitter).	401 & 159	125	CGF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130. Pittsburgh, PA 15251–5130.
b. Major Modifications (per transmitter)	401 & 159	125	CGF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130. Pittsburgh, PA 15251–5130.
c. Fill in transmitters (per transmitter)	401 & 159 or 489.	125	CGF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130. Pittsburgh, PA 15251–5130.
d. Major Amendment to Pending Application (per transmitter).	401 & 159	125	CGF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130. Pittsburgh, PA 15251–5130.
e. Minor Modification (per transmitter)	489	45	CAF	Federal Communications Commission. Common Carrier Land Mobile, P.O. Box 358130. Pittsburgh, PA 15251–5130.
f. Assignment or Transfer:				
(i) First Call Sign on Application	490 & 159	125	CGF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130. Pittsburgh, PA 15251–5130.
(ii) Each Additional Call Sign	490 & 159	45	CAF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130 Pittsburgh, PA 15251–5130.
(iii) Partial Assignment (per call sign) ..	401 & 159, 490 & 159.	125	CGF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130. Pittsburgh, PA 15251–5130.
g. Renewal (per call sign)	405 & 159	45	CAF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130, Pittsburgh, PA 15251–5130.
h. Extension of Time to Complete construction (per application).	489	45	CAF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130, Pittsburgh, PA 15251–5130.
i. Reinstatement	401 & 159 or 489.	45	CAF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130, Pittsburgh, PA 15251–5130.
j. Notice of Completion of Construction (per application).	489	45	CAF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130, Pittsburgh, PA 15251–5130.
k. Special Temporary Authority (per frequency/per location).	Corr & 159	230	CLF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130, Pittsburgh, PA 15251–5130.
l. Combining Call Signs (per call sign)	489	230	CLF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130. Pittsburgh, PA 15251–5130.
m. Auxiliary Test Station (per transmitter) ..	401 & 159	230	CLF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358130, Pittsburgh, PA 15251–5130.
n. Standby Transmitter (per transmitter/per location.	401 & 159	230	CLF	Federal Communications Commission, Common Carrier Land Mobile, P.O. Box 358680. Pittsburgh, PA 15251–5680.
6. Point-to-Point Microwave and Local Television Transmission Service:				
a. Conditional License (per station)	494	180	CJP	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358680, Pittsburgh, PA 15251–5680.
b. Major Modifications of Conditional Licenses or License Authorization (per station).	494	180	CJP	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358680, Pittsburgh, PA 15251–5680.
c. Certification of completion of Construction (per station).	494–A	180	CJP	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358680, Pittsburgh, PA 15251–5680.
d. Renewal (per licensed station)	405	180	CJP	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358680, Pittsburgh, PA 15251–5680.

Action	FCC form No.	Fee amount	Fee type code	Address
e. Assignment or Transfer:				
(i) First Station on Application	702 or 704	65	CCP	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358680, Pittsburgh, PA 15251–5680.
(ii) Each Additional Station	702 or 704	45	CAP	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358680, Pittsburgh, PA 15251–5680.
f. Extension of Construction Authorization (per station).	701	65	CCP	Federal Communications Commission, Feeable Correspondence, P.O. Box 358680, Pittsburgh, PA 15251–5680.
g. Special Temporary Authority or Request for Waiver of Prior Construction Authorization (per request).	Corr & 159	85	CEP	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358305, Pittsburgh, PA 15251–5305.
7. Multipoint Distribution Service (including multichannel MDS):				
a. Conditional License (per station)	494	180	CJM	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358155, Pittsburgh, PA 15251–5155.
b. Major Modification of Conditional Licenses or License Authorization (per station).	494	180	CJM	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358155, Pittsburgh, PA 15251–5155.
c. Certification of Completion of Construction (per channel).	494–A	525	CPM	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358155, Pittsburgh, PA 15251–5155.
d. Renewal (per licensed station)	405	180	CJM	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358155, Pittsburgh, PA 15251–5155.
e. Assignment or Transfer:				
(i) First Station on Application	702 & 704	65	CCM	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358155, Pittsburgh, PA 15251–5155.
(ii) Each Additional Station	704 & 704	45	CAM	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358155, Pittsburgh, PA 15251–5155.
f. Extension of Construction Authorization (per station).	701	130	CHM	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358155, Pittsburgh, PA 15251–5155.
g. Special Temporary Authority or Request for Waiver of Prior Construction Authorization (per request).	Corr & 159	85	CEM	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358155, Pittsburgh, PA 15251–5155.
8. Digital Electronic Message:				
a. Conditional License (per nodal station)	494	180	CJL	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358680, Pittsburgh, PA 15251–5680.
b. Modification of Conditional License or License Authorization (per nodal station).	494	180	CJL	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358680, Pittsburgh, PA 15251–5680.
c. Certification of Completion of Construction (per nodal station).	494–A	180	CJL	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358680, Pittsburgh, PA 15251–5680.
d. Renewal (per licensed nodal	405	180	CJL	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358680, Pittsburgh, PA 15251–5680.
e. Assignment or Transfer:				
(i) First Station on Application	702 or 704	65	CCL	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358680, Pittsburgh, PA 15251–5680.
(ii) Each Additional Station	702 or 704	45	CAL	Federal Communications Commission, Common Carrier Dom. Radio, P.O. Box 358680, Pittsburgh, PA 15251–5680.
f. Extension of Construction Authorization (per station).	701	65	CCL	Federal Communications Commission, Feeable Corr, P.O. Box 358305, Pittsburgh, PA 15251–5305.
g. Special Temporary Authority or Request for Waiver of Prior Construction Authorization (per request).	Corr & 159	85	CEL	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
9. International Fixed Public Radio (Public and control Stations):				
a. Initial Construction Authorization (per station).	407 & 159	590	CSN	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.

Action	FCC form No.	Fee amount	Fee type code	Address
b. Assignment or Transfer (per application)	702 or 704	590	CSN	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
c. Renewal (per license)	405	425	CON	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
d. Modification (per station)	403	425	CON	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
e. Extension of Construction Authorization (per station).	701	215	CKN	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358115, Pittsburgh, PA 15251–5115.
f. Special Temporary Authority or Request for Waiver (per request).	Corr & 159	215	CKN	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358115, Pittsburgh, PA 15251–5115.
10. Fixed Satellite Transmit/Receive Earth Stations:				
a. Initial Application (per station):				
(i) Domestic	493 & 159	1,755	BAX	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(ii) International	493 & 159	1,755	BAX	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
b. Modification of License (per station):				
(i) Domestic	493 & 159	125	CGX	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(ii) International	493 & 159	125	CGX	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
c. Assignment or Transfer:				
(i) First Station on application:				
(1) Domestic	702 or 704	345	CNX	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(2) International	702 or 704	345	CNX	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
(ii) Each Additional Station:				
(1) Domestic	702 or 704	115	CFX	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(2) International	702 or 704	115	CFX	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
d. Developmental Station (per station):				
(i) Domestic	493 & 159	1,150	CWX	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(ii) International	493 & 159	1,150	CWX	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
e. Renewal of License (per station):				
(i) Domestic	405	125	CGX	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(ii) International	405	125	CGX	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
f. Special Temporary Authority or Waivers of Prior Construction Authorization (per request):				
(i) Domestic	Corr & 159	125	CGX	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(ii) International	Corr & 159	125	CGX	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
g. Amendment of Application (per station):				
(i) Domestic	Corr & 159	125	CGX	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.

Action	FCC form No.	Fee amount	Fee type code	Address
(ii) International	Corr & 159	125	CGX	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
h. Extension of Construction Permit (per station):				
(i) Domestic	701	125	CGX	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(ii) International	701	125	CGX	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
11. Fixed Satellite Small Transmit/Receive Earth Stations (2 meters or less and operating in the 4/6 GHz frequency band):				
a. Lead Application	493 & 159	3,885	BDS	Federal Communications Commission, Common Carrier International, P.O. Box 358160, Pittsburgh, PA 15251–5160.
b. Routine Application (per station)	493 & 159	45	CAS	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
c. Modification of License (per station)	493 & 159	125	CGS	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
d. Assignment or Transfer				
(i) First Station on Application	702 & 704	345	CNS	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(ii) Each Additional Station	702 or 704	45	CAS	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
e. Developmental Station (per station)	493 & 159	1,150	CWS	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
f. Renewal of License (per station)	405	125	CGS	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
g. Special Temporary Authority or Waivers of prior construction authorization (per request).	Corr & 159	125	CGS	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
h. Amendment of Application (per station)	Corr & 159	125	CGS	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
i. Extension of Construction Permit (per station).	701	125	CGS	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
12. Receive only Earth Stations:				
a. Initial Application for Registration:				
(i) Domestic	493 & 159	265	CMO	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(ii) International	493 & 159	265	CMO	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
b. Modification of License or Registration (per station):				
(i) Domestic	493 & 159	125	CGO	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(ii) International	493 & 159	125	CGO	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
c. Assignment or Transfer:				
(i) First Station on Application:				
(1) Domestic	702 or 704	345	CNO	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(2) International	702 or 704	115	CNO	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
(ii) Each Additional Station:				
(1) Domestic	702 or 704	115	CFO	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.

Action	FCC form No.	Fee amount	Fee type code	Address
(2) International	702 or 704	115	CFO	Federal Communications Commission, International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
d. Renewal of License (per station):				
(i) Domestic	405	125	CGO	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(ii) International	405	125	CGO	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
e. Amendment of Application (per station):				
(i) Domestic	Corr & 159	125	CGO	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(ii) International	Corr & 159	125	CGO	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
f. Extension of Construction Permit (per station):				
(i) Domestic	701	125	CGO	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(ii) International	701	125	CGO	Federal Communications Commission, Common Carrier International, P.O. Box 358115 Pittsburgh, PA 15251–5115.
g. Waivers (per request):				
(i) Domestic	Corr & 159	125	CGO	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358115, Pittsburgh, PA 15251–5115.
(ii) International	Corr & 159	125	CGO	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
13. Fixed Satellite Very Small Aperture Terminal (VSAT) Systems:				
a. Initial Application (per system)	493 & 159	6,465	BGV	Federal Communications Commission, Common Carrier Dom. Earth Station, P.O. Box 358160, Pittsburgh, PA 15251–5160.
b. Modification of License (per system)	493 & 159	125	CGV	Federal Communications Commission, Common Carrier Dom. Earth Station, P.O. Box 358160, Pittsburgh, PA 15251–5160.
c. Assignment or Transfer of System	702 or 704	1,730	CZV	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
d. Developmental Station	493 & 159	1,150	CWV	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
e. Renewal of License (per system)	405	125	CGV	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
f. Special Temporary Authority or Waivers of Prior Construction Authorization (per request).	Corr & 159	125	CGV	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
g. Amendment of Application (per system)	Corr & 159	125	CGV	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
h. Extension of Construction Permit (per system).	701	125	CGV	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
14. Mobile Satellite Earth Stations:				
a. Initial Application of Blanket Authorization.	493 & 159	6,465	BGB	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
b. Initial Application for Individual Earth Station.	493 & 159	1,550	CYB	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
c. Modification of License (per system)	493 & 159	125	CGB	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
d. Assignment or Transfer (per system)	702 or 704	1,730	CZB	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.

Action	FCC form No.	Fee amount	Fee type code	Address
e. Developmental Station	493 & 159	1,150	CWB	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
f. Renewal of License (per system)	405	125	CGB	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
g. Special Temporary Authority of Waivers of Prior Construction Authorization (per request).	Corr & 159	125	CGB	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
h. Amendment of Application (per system)	Corr & 159	125	CGB	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
i. Extension of Construction Permit (per system).	701	125	CGB	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
15. Radio Determination Satellite Earth Station:				
a. Initial Application of Blanket Authorization.	495 & 159	6,465	BGH	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
b. Initial Application for Individual Earth Station.	493 & 159	1,550	CYH	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
c. Modification of License (per system)	493 & 159	125	CGH	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
d. Assignment or Transfer (per system	702 or 704	1,730	CZH	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
e. Developmental Station	493 & 159	1,150	CWH	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
f. Renewal of License (per system)	405	125	CGH	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
g. Special Temporary Authority or Waivers of Prior Construction Authorization (per request).	Corr & 159	125	CGH	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
h. Amendment of Application (per system)	Corr & 159	125	CGH	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
i. Extension of Construction Permit (per system).	701	125	CGH	Federal Communications Commission, Common Carrier Dom. Earth Stations, P.O. Box 358160, Pittsburgh, PA 15251–5160.
16. Space Stations:				
a. Application for Authority to Construction:				
(i) Domestic	Corr & 159	2,330	BBY	Federal Communications Commission, Common Carrier Dom. Satellites, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(ii) International	Corr & 159	2,330	BBY	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
b. Application for Authority to Launch & Operate:				
(i) Initial Application:				
(1) Domestic	Corr & 159	80,360	BNY	Federal Communications Commission, Common Carrier Dom. Satellites, P.O. Box 358160, Pittsburgh, PA 15251–5160.
(2) International	Corr & 159	80,360	BNY	Federal Communications Commission, Common Carrier International, P.O. Box 358115, Pittsburgh, PA 15251–5115.
(ii) Replacement Satellite:				
(1) Domestic	Corr & 159	80,360	BNY	Federal Communications Commission, Common Carrier Dom. Satellites, P.O. Box 358160, Pittsburgh, PA 15251–5160.

Part IV

Department of Education

National Workplace Literacy Program; Proposed Priority; Notice

DEPARTMENT OF EDUCATION

RIN 1830–ZA00

National Workplace Literacy Program

AGENCY: Department of Education.

ACTION: Notice of proposed priority.

SUMMARY: The Secretary proposes an absolute priority to focus fiscal year 1995 funds for new workplace literacy projects on communities that have been designated as Empowerment Zones or Enterprise Communities authorized under section 1391 of the Internal Revenue Code, as amended by title XIII of the Omnibus Budget Reconciliation Act of 1993. Under the proposed absolute priority, funds under this competition would be reserved only for projects that provide workplace literacy services to Empowerment Zones or Enterprise Communities through partnerships eligible for funding in the National Workplace Literacy Program.

DATES: Comments must be received on or before July 18, 1994.

ADDRESSES: All comments concerning the proposed priority must be addressed to Mr. Ronald S. Pugsley, U.S. Department of Education, 400 Maryland Avenue SW., room 4428–MES, Washington, DC 20202–7240.

FOR FURTHER INFORMATION CONTACT: Sarah Newcomb, Office of Vocational and Adult Education, U.S. Department of Education, 400 Maryland Avenue SW., room 4417–MES, Washington, DC 20202–7240. Telephone (202) 205–9872 or Jeanne Williams, Office of Vocational and Adult Education, U.S. Department of Education, 400 Maryland Avenue SW., room 4513–MES, Washington, DC 20202–7327. Telephone (202) 205–5977. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Background on Empowerment Zone and Enterprise Community Initiative

The Empowerment Zone and Enterprise Community program is a critical element of the Administration's community revitalization strategy. The program is a first step in rebuilding communities in America's poverty-stricken inner cities and rural heartlands. It is designed to empower people and communities by inspiring Americans to work together to create jobs and opportunity.

Under this program, the Federal Government will designate up to nine areas as Empowerment Zones and up to 95 areas as Enterprise Communities in accordance with Internal Revenue Code section 1391, as amended by title XIII of the Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103–66). To be eligible for designation, an areas must be nominated by one or more local governments and the State or States in which it is located or by a State-Chartered Economic Development Corporation. A nominated area must be one of pervasive poverty, unemployment, and general distress, and must have a poverty rate of not less than the level specified in section 1392 of the Internal Revenue Code.

In the Empowerment Zone and Enterprise Community program, communities are invited to submit strategic plans that comprehensively address how the community would link economic development with education and training as well as how community development, public safety, human services, and environmental initiatives will together support sustainable communities. Empowerment Zones and Enterprise Communities will be designated by the Department of Agriculture and the Department of Housing and Urban Development (HUD) based on the quality of their strategic plans. Designated areas will receive Federal grant funds and substantial tax benefits and will have access to other Federal programs. (For additional information on the Empowerment Zone and Enterprise Community program, contact HUD at 1–800–998–9999.)

The Department of Education is supporting the Empowerment Zone and Enterprise Community initiative in a variety of ways. It is encouraging Empowerment Zones and Enterprise Communities to use funds they already receive from Department of Education programs (including Chapter 1 of Title I of the Elementary and Secondary Education Act, the Drug-Free Schools and Communities Act, the Adult Education Act, and the Carl D. Perkins Vocational and Applied Technology Education Act) to support the comprehensive vision of their strategic plans. In addition, the Department of Education intends to give preferences to Empowerment Zones and Enterprise Communities in a number of discretionary grant programs that are well suited for inclusion in a comprehensive approach to economic and community development. In addition to the National Workplace Literacy Program described in this notice in which the Department intends to give an absolute preference, the Department intends to give competitive preferences to Empowerment Zones and Enterprise Communities in the Urban Community Service program, the Rehabilitation Act Projects with Industry program, Rehabilitation Act Special Demonstration Projects program, the Parent Training program and Early Childhood Education program under the Individuals With Disabilities Education Act, and a variety of discretionary programs under the Elementary and Secondary Education Act. Notices concerning those programs will be published at a later date.

Background on National Workplace Literacy Program

The National Workplace Literacy Program is ideally suited to play a key role in the Empowerment Zone and Enterprise Community program because it links economic development and education and training efforts. The program, which makes discretionary grants of up to three years in length, supports demonstration projects that teach literacy skills needed in the workplace through exemplary education partnerships. The partnerships are established between a business, industry, or labor organization or a private industry council and an educational organization to support work-related basic skills training. The National Workplace Literacy Program funds may be used, among other things, to update or upgrade the skills of workers in line with changes in production processes or technology. For example, basic skill levels that formerly were adequate for assembly line production are inadequate for employees faced with sophisticated quality control systems, flexible production, team-based work, and participatory management practices.

National Workplace Literacy projects can improve the human resources of Empowerment Zones and Enterprise Communities, increase the productivity of businesses located in Empowerment Zones and Enterprise Communities, and help attract new businesses to these needy areas. Further, an amendment to the program, contained in the National Literacy Act of 1991, establishes a statutory priority for serving small businesses. This is the type of business most likely to be found in the zones.

In addition, the National Workplace Literacy Program is an important vehicle for achieving the National Education Goal that by the year 2000, every adult American will be literate and will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship. The program helps further this goal by improving approaches and methods used in meeting the literacy needs of

adults in the workplace, including those with limited English proficiency. The National Workplace Literacy Program will also benefit by establishing an absolute priority related to Empowerment Zones and Enterprise Communities. Communities receiving these designations will already have demonstrated a capacity for the type of cooperative planning that is critical to a successful workplace literacy partnership. Projects funded under the priority will provide models for partnerships in other distressed areas and show how the National Workplace Literacy Program furthers the National Education Goal that every adult American will be literate and able to compete in the global economy.

Note: This notice of proposed priority does *not* solicit applications. A notice inviting applications under this competition will be published in the **Federal Register** concurrent with or following publication of the notice of final priority.

Priority

Under 34 CFR 75.105(c)(3) the Secretary proposes to give an absolute preference to applications that are otherwise eligible for funding under the National Workplace Literacy Program and that meet the following priority. The Secretary may implement this priority for fiscal year 1995 and for any later fiscal year:

Projects that provide workplace literacy services only for (a) persons who reside in and work in Empowerment Zones and Enterprise Communities; (b) persons who work in Empowerment Zones and Enterprise Communities although they do not reside there; or (c) persons who reside in Empowerment Zones and Enterprise Communities and who may work outside the Empowerment Zone or Enterprise Community. If necessary to the proper functioning of a project serving a substantial number of persons in category (c), services may also be provided to a small number of their coworkers who neither work nor reside in an Empowerment Zone or Enterprise Community.

The proposed project under the National Workplace Literacy Program must contribute to the strategic plan of the Empowerment Zone or Enterprise Community and be made an integral component of the Empowerment Zone or Enterprise Community activities.

In providing workplace literacy services, partnerships must develop curricula related to work or use or modify curricula developed by successful workplace literacy partnerships. For competitions under this absolute priority, the Secretary will waive the selection criterion "Evaluation Plan" in 34 CFR 472.22(f) and the evaluation requirements in 34 CFR 472.31 and, in their place, conduct a national evaluation of projects serving Empowerment Zones and Enterprise Communities. The purpose of the waiver is to allow Empowerment Zone and Enterprise Community projects to focus maximum resources on the provision of quality services and to further a Federal evaluation study that particularly can benefit other distressed areas.

Additional Factor the Secretary Considers

After evaluating each application according to the proposed selection criteria, the Secretary may select for funding one or more applications of high quality, other than the most highly rated applications, if the Secretary concludes that this selection would improve the distribution of grants among applicants serving urban and rural areas.

Executive Order 12866

This notice of proposed priority has been reviewed in accordance with Executive Order 12866. Under the terms of the order the Secretary has assessed the potential costs and benefits of this regulatory action.

The potential costs associated with the notice of proposed priority are those resulting from statutory requirements and those determined by the Secretary to be necessary for administering this program effectively and efficiently.

In assessing the potential costs and benefits—both quantitative and qualitative—of this notice of proposed priority, the Secretary has determined that the benefits of the proposed priority justify the costs.

The Secretary has also determined that this regulatory action does not unduly interfere with State, local, and tribal governments in the exercise of their governmental functions.

To assist the Department in complying with the specific requirements of Executive Order 12866, the Secretary invites comment on whether there may be further opportunities to reduce any potential costs or increase potential benefits resulting from this proposed priority without impeding the effective and efficient administration of the program.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding this proposed priority.

All comments submitted in response to this notice will be available for public inspection, during and after the comment period, in room 4428, Switzer Building, 330 C Street, SW., Washington, DC, between the hours of 8:30 a.m. and 4 p.m., Monday through Friday of each week, except Federal holidays.

Applicable Program Regulations: 34 CFR Part 472.

(Catalog of Federal Domestic Assistance Number 84.198B National Workplace Literacy Program)

Program Authority: 20 U.S.C. 1211(a).

Dated: June 2, 1994.

Augusta Souza Kappner,

Assistant Secretary, Office of Vocational and Adult Education.

Part V

Department of Housing and Urban Development

24 CFR Part 9

Enforcement of Nondiscrimination on the Basis of Disability in Programs or Activities Conducted by the Department of Housing and Urban Development; Final Rule

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Part 9

[Docket No. R–94–1510; FR–2163–F–05]

RIN 2501–AB04

Enforcement of Nondiscrimination on the Basis of Disability in Programs or Activities Conducted by the Department of Housing and Urban Development

AGENCY: Office of the Secretary, HUD.

ACTION: Final rule.

SUMMARY: This rule makes final a proposed rule published on May 30, 1991 which proposed to amend title 24 of the Code of Federal Regulations to create a new part 9, that would provide for the enforcement of section 504 of the Rehabilitation Act of 1973, as amended, in programs or activities conducted by HUD. The rule at 24 CFR part 9 is distinguished from the rule at 24 CFR part 8, which applies to private, State or local programs or activities receiving Federal financial assistance from HUD. This final rule at 24 CFR part 9 establishes standards for what constitutes discrimination on the basis of mental or physical disabilities; provides definitions for "individuals with disabilities" and "qualified individuals with disabilities"; establishes a complaint procedure for resolving allegations of discrimination; and also incorporates additional changes to reflect regulatory implementation of the Americans with Disabilities Act.

EFFECTIVE DATE: July 18, 1994.

FOR FURTHER INFORMATION CONTACT: Elizabeth Ryan, Office of Fair Housing and Equal Opportunity, room 5214, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410–5000, telephone (202) 708–2333 (voice/TDD). (This is not a toll free number.)

SUPPLEMENTARY INFORMATION:

I. Background

Section 504 of the Rehabilitation Act of 1973, as amended (section 504), states in pertinent part that:

No otherwise qualified individual with disabilities in the United States, * * * shall, solely by reason of her or his disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance *or under any program or activity conducted by any Executive agency or by the United States Postal Service. The head of each such agency shall promulgate such regulations as may be necessary to carry out the amendments to this section made by the Rehabilitation, Comprehensive Services, and Developmental Disabilities Act of 1978. Copies of any proposed regulation shall be submitted to appropriate authorizing committees of the Congress, and such regulation may take effect no earlier than the thirtieth day after the date on which such regulation is so submitted to such committees.* (29 U.S.C. 794 (1978 amendment italicized)).

On May 30, 1991 (56 FR 24604), HUD published a proposed rule that would amend title 24 of the Code of Federal Regulations to create a new part 9, that would provide for the enforcement of section 504 as it applies to programs or activities conducted by HUD (i.e., HUD conducted programs or activities). The part 9 rule is distinguished from the rule at 24 CFR part 8, which applies to private, State or local programs or activities receiving Federal financial assistance from HUD (HUD assisted programs or activities). However, the substantive nondiscrimination obligations of the agency as set forth in the part 9 rule are adapted from, and are very similar to, those contained in the part 8 rule. (See 24 CFR part 8; see also 28 CFR part 41, which is the section 504 coordination regulation for federally assisted programs issued by the Department of Justice (DOJ).) This general parallelism is in accord with the intent expressed by supporters of the 1978 amendment in House floor debate, including its sponsor, U.S. Rep. James M. Jeffords, that the Federal Government should have the same section 504 obligations as recipients of Federal financial assistance. 124 Cong. Rec. 13,901 (1978) (remarks of Rep. Jeffords); 124 Cong. Rec. E2668, E2670 (daily ed. May 17, 1978) *id.*; 124 Cong. Rec. 13,897 (remarks of Rep. Brademas); *id.* at 38,552 (remarks of Rep. Sarasin).

There are, however, some differences between this part 9 rule and the DOJ section 504 coordination regulations for federally assisted programs, as well as many other agencies' implementing regulations. Many of these changes are based on the Supreme Court's decision in *Southeastern Community College* v. *Davis*, 442 U.S. 397 (1979) [*Davis*], and the subsequent circuit court decisions interpreting *Davis* and section 504. These differences were discussed in detail in the preamble to the part 9 proposed rule at 56 FR 24604–24605. There are also differences between the part 9 proposed rule and the part 9 final rule. These differences are discussed in the following section.

II. Differences Between Part 9 Proposed Rule and Part 9 Final Rule

The Department invited public comment on the part 9 proposed rule. During the public comment period, which expired July 29, 1991, the Department received seven comments. The commenters included: One state agency for the visually impaired; a not-for-profit law firm that specializes in disability and health law; an organization representing the interests of senior citizens; two legal service organizations; and two disability advocacy organizations.

Following careful consideration of the issues raised by the commenters, and further consideration of the part 9 rule in light of regulatory implementation of the Americans with Disabilities Act (Pub.L. 101–336, approved July 26, 1990) (ADA), the Department has decided to adopt the part 9 proposed rule substantially as published on May 30, 1991. However, the Department has made some changes to the proposed rule in response to certain issues raised by the commenters, and in response to the final rules published on July 26, 1991, implementing titles I, II, and III of the ADA, which address, respectively, equal employment opportunity for individuals with disabilities (title I); nondiscrimination on the basis of disability in State and local government services (title II); and nondiscrimination on the basis of disability by public accommodations and in commercial facilities (title III). (See 29 CFR part 1630, 56 FR 35726 (title I); 28 CFR part 35, 56 FR 35694 (title II); and 28 CFR part 36, 56 FR 3544 (title III).

A change in terminology that has been made in the part 9 final rule (and which also will be made to the rule in 24 CFR part 8) is replacement of the term "handicap" with "disability." The Rehabilitation Amendments of 1992 (Pub.L. 102–569, approved October 29, 1992) amended the Rehabilitation Act of 1973 to replace "handicap" with "disability."

The additional changes made to the part 9 proposed rule by this final rule include the following.

Applicable Accessibility Standards

The final rule provides that HUD will follow the Uniform Federal Accessibility Standards (UFAS), except where the accessibility standards issued under the ADA provide for greater accessibility than the UFAS. The accessibility standards issued under the ADA are referred to as the ADA Accessibility Guidelines (ADAAG), and

are set forth in appendix A to 39 CFR part 1191.

The UFAS implements the accessibility standards required by the Architectural Barriers Act (42 U.S.C. 4151–4157) (Barriers Act), and these standards are set forth in 24 CFR part 40, appendix A for residential structures, and in 41 CFR 101–19.600 to 101.607 for non-residential structures.

The DOJ, by memorandum dated June 30, 1993, advised all Federal agencies that at a recent meeting, the ATBCB adopted a resolution urging Federal agencies to follow the ADAAG whenever it provides equal or greater accessibility than UFAS. The DOJ has requested that Federal agencies which have not issued their final rules implementing section 504 in Federally-conducted programs and activities comply with the ATBCB's request. The DOJ notes that from a legal point of view, current section 504 regulations do not prohibit implementation of such a policy because the regulations do not require compliance with UFAS, but, rather they simply state that compliance with UFAS is deemed to be compliance with section 504 new construction and alteration requirements.

Accordingly, this final rule provides that HUD will follow the ADAAG whenever it provides greater accessibility than the UFAS. Additionally, the terms "UFAS" and "ADAAG" will be added to the definition section of the part 9 rule—§ 9.103.

Revised Definition of "Accessible"

A minor revision is made to each of the definitions of *accessible* in § 9.103. Each definition includes the phrase "complies with applicable accessibility standards" to clarify that the design, construction or alteration undertaken must comply with applicable accessibility standards.

Revised Definition of "Accessible Route"

This final rule revises the definition of *accessible route*. The definition of *accessible route* in the part 9 proposed rule was modeled on the definition of *accessible route* in 24 CFR part 8. However, on further consideration, the Department finds the part 8 definition to be too limited for purposes of part 9.

Part 8 applies solely to HUD-assisted programs. The majority of these programs are concerned with assisting individuals and families to obtain decent and affordable housing by providing financial assistance (through rental subsidies or for the development and operation of public housing), or by endorsing a mortgage on a house or the mortgage note on a housing project (or both) for insurance. Thus, the part 8 definition of *accessible* route reflects part 8's focus on housing facilities.

Part 9, however, applies to all programs or activities conducted by HUD. These programs and activities, as noted in the preamble to the part 9 proposed rule (56 FR 24605), consist of the following: (1) Employment; (2) HUD's contact with the general public as part of ongoing agency operations; and (3) those HUD programs directly administered by HUD for program beneficiaries and participants. Activities within category 2 include communications with the public (telephone contacts, office walk-ins or interviews) and the public's use of the agency facilities. Activities within category (3) include programs that provide Federal services or benefits (e.g., housing facilities in HUD's Property Disposition Program, training at both HUD and outside facilities, contracting and policy-development). These activities involve many types of buildings and facilities, not just housing facilities.

Accordingly, the definition of *accessible route* route in part 9 is revised by replacing it with the definition of *accessible route* route used in the ADAAG. The definition of *accessible route* route in the ADAAG includes examples of interior accessible route routes and exterior accessible route routes.

Revised Definition of "Adaptability"

The definition of adaptability is also revised by this final rule. The definition of *adaptability* in the proposed part 9 rule was based on the definition of adaptability in 24 CFR part 8. The part 8 definition is solely concerned with adaptability in dwelling units, and, therefore, inappropriate for part 9, for the same reasons stated under the discussion of the revised definition of *accessible route* route. Accordingly, the Department is adopting the definition of *adaptability* based on the definition of *adaptability* provided in the UFAS and ADAAG, which provide the same definition for this term.

As revised in this final rule, adaptability will mean the ability of certain elements of a dwelling unit, such as kitchen counters, sinks and grab bars, to be added or altered so as to accommodate the needs of individuals with or without disabilities or to accommodate the needs of persons with different types or degrees of disability. This definition differs from the definition in the part 9 proposed rule in that it refers to "building spaces and elements" instead of "certain elements of a dwelling unit." Both UFAS and ADAAG use the phrase "building spaces and elements."

Replacement of Definition of "Agency-Owned Housing Facility" With "PDP Housing Facility"

The final rule replaces the term "agency-owned housing facility" with *PDP housing facility*. PDP refers to HUD's Property Disposition Program, and a definition is also included for this term. (See discussion below.) Since the only HUD-owned housing facilities are those in the Property Disposition Program, the Department believed use of the term "PDP housing facility" is a more accurate term.

Revised Definition of "Alteration"

The part 9 final rule replaces the definition of *alteration* set forth in the May 30, 1991 proposed rule with that definition provided in the ADAAG. This definition is more detailed and therefore provides more guidance on what constitutes, and what does not constitute, an alteration.

Revised Definition of "Facility"

The part 9 final rule also replaces the definition of *facility* in the May 30, 1991 proposed rule with that definition provided in the ADAAG. As with the definition of *alteration*, the ADAAG definition of *facility* is more detailed and therefore more helpful than the definition provided in the part 9 proposed rule.

Revised Definition of "Individual With Disabilities"

The definition of *individual with disabilities* (formerly, "individual with handicaps") is also revised by this rule.

Paragraph (a), which defines the term "physical and mental impairment" is revised to include the human immunodeficiency virus disease.

A new paragraph (b) is added to this definition to incorporate the provisions of former § 9.131 in the proposed rule, which addressed applicability of section 504 to current and former illegal use of drugs. The DOJ and the Equal Employment Opportunity Commission (EEOC) which reviewed the part 9 rule in accordance with Executive Order 12067 (see Section IV of this preamble) suggested that the exclusion of individuals currently engaged in the illegal use of drugs from the protection provided by section 504, and the inclusion of individuals undergoing, or having successfully completed, drug rehabilitation, are more appropriately addressed in the definition of "*individual with disabilities.*" Section 9.131 of the proposed rule has been

removed as a result of incorporation of its provisions in the definition of *individual with disabilities*.

Former paragraph (b) (paragraph (b) in the part 9 proposed rule), which addressed impairments that are not included in the definition of "physical or mental impairment" is redesignated as paragraph (c) in this final rule, and is revised to address what is excluded from the definition of *individual with disabilities* for purposes of employment.

In the part 9 proposed rule, paragraph (b) provided that the term "physical or mental impairment" did not include (1) an individual who has a currently contagious disease or infection and who, by reasons of such disease or infection, would constitute a direct threat to the health or safety of other individuals, and (2) an individual who is an alcoholic and whose current use of alcohol prevents the individual from performing the duties of the job in question. Although these exclusions are appropriate for inclusion under the definition of *individual with disabilities*, they are not appropriate for inclusion in the definition of "physical or mental impairment."

Accordingly, new paragraph (c) of the definition of *individual with disabilities* clarifies that the contagious disease and alcohol abuse exclusions are part of the definition of "individual of disabilities" and also clarifies that these exclusions are limited to the employment context, in accordance with section 504 which imposes this limitation.

New Definition for "Property Disposition Program"

As noted above, the final rule provides a definition for this term. *Property Disposition Program* is defined to mean the HUD program under which HUD administers the group of housing facilities that are either owned by the Secretary or where, even though the Secretary has not obtained title, the Secretary is mortgagee-in-possession. Such properties are deemed to be in the possession or control of the agency.

Direct Threat Standard—New § 9.131

The part 9 final rule adds a new § 9.131 to implement section 302(b)(3) of the ADA, which addresses the issue of "direct threat to the health or safety of others." Section § 9.131 provides that the agency (HUD) is not required to permit an individual to participate in or benefit from the goods, services, facilities, privileges, advantages and accommodations of the agency where the individual poses a direct threat to the health or safety of others. Section 9.131 is similar to § 36.208 of the final rule implementing title III of the ADA, published on July 26, 1991 (56 FR 35544) and codified at 28 CFR part 36. New § 9.131 is not intended to imply that individuals with disabilities pose risks to others. It is intended to address concerns that may arise in this area, and to establish a strict standard that must be met before denying service to an *individual with disabilities* or excluding that individual from participation in the programs or activities conducted by the agency.

Paragraph (b) of this section defines "direct threat" to mean a significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices, or procedures, or by the provision of auxiliary aids and services. This paragraph codifies the standard first applied by the Supreme Court in *School Board of Nassau County v. Arline*, 480 U.S. 273 (1987), in which the Court held that an individual with a contagious disease may be an *individual with disabilities* under section 504. In *Arline*, the Supreme Court recognized that there is a need to balance the interests of people with disabilities against legitimate concerns for public safety. Although individuals with disabilities are generally entitled to the protection of part 9, a person who poses a significant risk to others may be excluded if reasonable modifications to the agency's policies, practices, or procedures will not eliminate or reduce that risk (i.e., reduce it so that it is below the level of direct threat). The determination that a person poses a direct threat to the health or safety of others may not be based on generalizations or stereotypes about the effects of a particular disability. This determination must be based on an assessment of that individual that conforms to the requirements of paragraph (c) of § 9.131.

Paragraph (c) of § 9.131 establishes the test to be used in determining whether an individual poses a direct threat to the health or safety of others. The agency is required to make an individualized assessment, based on reasonable judgment that relies on current medical evidence, or on the best available objective evidence to determine: the nature, duration, and severity of the risk; the probability that the potential injury will actually occur; and whether reasonable modifications of policies, practices or procedures will mitigate the risk. This is the test established by the Supreme Court in *Arline*. This type of inquiry is essential if section 504 is to achieve its goal of protecting individuals with disabilities from discrimination based on prejudice, stereotypes, or unfounded fear, while giving appropriate weight to legitimate concerns, such as the need to avoid exposing others to significant health and safety risks. Making this assessment will not usually require the services of a physician. Sources for medical knowledge include guidance from public health authorities, such as the U.S. Public Health Service, the Centers for Disease Control, and the National Institutes of Health, including the National Institute of Mental Health.

Additional Changes

In addition to the above changes, and as discussed in further detail in Section III of this preamble, the final rule also revises § 9.170, which concerns the part 9 compliance procedure. A hearing procedure is not mandated by statute, and the Department has concluded that the compliance procedure set forth in § 9.170 provides an adequate remedy. Certain editorial changes were made to § 9.152 to clarify the extent of the agency's responsibility to modify existing housing.

II. Discussion of Public Comments

The revisions to the part 9 proposed rule discussed in section II above are further addressed in this section III, which addresses the issues raised by the public commenters.

Relationship of Section 504 to the Fair Housing Act and the Americans With Disabilities Act

Comment. Six of the commenters stated that the part 9 proposed rule did not incorporate the standards and requirements that appear in the Fair Housing Act [1] or in title II of the ADA. Two commenters expressed concern that the part 9 rule proposes to implement less stringent standards than the Fair Housing Act, and requested that the part 9 final rule conform to the Fair Housing Act requirements; thus, eliminating any conflict in program regulations. Another commenter stated that the ADA requires HUD's regulations to "refer to the ADA so that when HUD assumes responsibility for housing enforcement under the public services section (title II of the ADA), HUD will be better able to ensure consistency among all of its enforcement responsibilities."

Response. As noted in the preamble discussion under Section II, which discusses changes made to the part 9 proposed rule, HUD does, in several places in the final rule, incorporate the standards and requirements of the ADA. However, it is important to note that in

[1] Title VIII of the Civil Rights Act of 1968 as amended by the Fair Housing Amendments Act of 1988 is referred to as the "Fair Housing Act."

enacting the Fair Housing Act and the ADA, the Congress did not override the specific provisions of section 504. While all three statutes (the Fair Housing Act, the ADA, and section 504) provide certain civil rights protection to individuals with disabilities, the scope and mandate of each statute is different.

Section 504 is concerned with discrimination against individuals with disabilities in federally assisted and federally conducted programs and activities. Federal programs or activities subject to section 504 include those in the areas of employment, education, health, social services, housing and agency facilities. Under section 504, the mandate that a federally assisted or conducted program or activity be "accessible" to individuals with disabilities does not, in every case, require structural changes. Moreover, when compliance with the "program accessibility" of section 504 does require structural changes, structural changes are not required to the same extent as required under the Fair Housing Act. Under section 504, accessibility is defined in broader terms, as discussed in the preamble to HUD's part 8 interim rule implementing section 504 for HUD assisted programs and activities:

For example, even though a facility in which a federally assisted program is conducted is free of architectural barriers and thus meets requirements for facility accessibility, the program is not accessible if management policies and procedures effectively bar [individuals with disabilities] from participating in or otherwise benefiting from the program or activity. On the other hand, a program which is conducted in an inaccessible existing facility can be made accessible without altering the facility, where the program or activity can be delivered or otherwise be made available to a [disabled] beneficiary without loss of essential program benefits.

(*See* preamble to part 8 interim rule published on May 6, 1983, 48 FR 20638 at 20640)

The Fair Housing Act is concerned with discriminatory housing practices, and its provisions apply to all housing, not just federally-assisted or federally-owned housing. The Fair Housing Act is also concerned with structural accessibility. The Fair Housing Act establishes accessible design and construction requirements for certain new multifamily dwellings for first occupancy on or after March 13, 1991. These requirements, however, do not extend to existing facilities (i.e., alterations to existing facilities are not required).

The ADA is concerned with discrimination on the basis of disability in the areas of employment, public accommodations, State and local government services, and telecommunications. With respect to structural accessibility, title II of the ADA requires that newly constructed or newly altered State or local government facilities be designed and constructed or altered so as to be readily accessible to and usable by persons with disabilities. (*See* 56 FR 35574.)

The different mandates and scopes of section 504, the Fair Housing Act and the ADA limit the extent to which the regulations promulgated under these statutes can be uniform. Additionally, HUD's section 504 regulations are subject to the coordinating authority of the DOJ under Executive Order 12250 (45 FR 72995, 3 CFR, 1980 Comp., p. 298.) The purpose of DOJ's coordinating authority is to ensure that, to the greatest extent possible, there is uniformity in the implementation of section 504 by all Federal agencies. Accordingly, HUD's section 504 regulations are obliged to adhere, as closely as possible, to DOJ's prototype section 504 regulations for these types of programs, and to such other guidance as DOJ may provide in the issuance of section 504 regulations (for example, see the discussion concerning applicable accessibility standards in Section II of the preamble).

With respect to any conflict among the requirements or the accessibility standards of section 504, the Fair Housing Act and the ADA, and their respective regulations, HUD notes that an individual or entity that is subject to the provisions (including regulatory provisions) of more than one of these statutes must comply with the provisions that provide for the greater substantive rights or the more stringent accessibility standards.

Definition of "Accessible" (§ 9.103)

Comment: Definition Requires Clarification. Two commenters stated that the definition of "accessible" in the part 9 proposed rule lacks the specific guidance provided by the definition for this term in § 100.201 of HUD's Fair Housing Act regulations (24 CFR 100.201). One of the commenters stated that the part 9 definition of "accessible" with respect to individual dwelling units requires that a unit be designed to meet the specific needs of a qualified individual's particular disability or impairment. The commenter requested that HUD clarify that for a unit to be counted toward a program's five percent requirement for accessible units, all the accessibility requirements for dwelling units, as provided in 24 CFR part 40, must be met and not just those which might be adequate to meet the needs of the individual's specific disability.

Response. As discussed above, section 504 and the Fair Housing Act have different purposes. The Fair Housing Act's design and construction accessibility standards apply only to certain new multifamily housing. Section 504 is concerned with overall "program" accessibility, which includes accessibility standards for multifamily housing and other types of facilities, including Federal Government buildings. Additionally, the Fair Housing Act, unlike section 504, does not impose accessibility standards on alterations to existing housing and facilities. Accordingly, the definition of "accessible" in HUD's Fair Housing Act regulations is not sufficiently broad for section 504 purposes. However, as noted in Section II of this preamble, which discusses changes made to the proposed rule, the Department did make some modification to the definitions of "accessible" for purposes of clarity.

With respect to the question of whether an individual dwelling unit, that is altered to be accessible to a qualified individual with a specific disability, counts toward the program's five percent requirement, the Department notes that this issue is addressed by § 9.152 of the rule. Section 9.152 provides that if HUD undertakes alterations to a PDP multifamily housing project, that is subject to the accessibility requirements of § 9.152, a minimum of five percent of the total dwelling units, or at least one unit, whichever is greater, must be made accessible for persons with *mobility* impairments. (Emphasis added.) Section 9.152 also provides that if the unit is on an accessible route and is adaptable and otherwise in compliance with § 9.152(d) (which requires compliance with the definitions, requirements and standards of the UFAS, except where the ADAAG provides for greater accessibility) the unit is accessible for purposes of § 9.152. Section 9.152 further provides that an additional two percent of the units (but not less than one unit) in the project must be made accessible for persons with *hearing or vision impairments*. (Emphasis added.) Thus, whether an individual dwelling unit, which is altered for a specific qualified individual with disabilities, counts toward the program's five percent or two percent requirement depends upon the nature of the alterations undertaken to address the individual's disability.

Definition of "Accessible Route" (§ 9.103)

Comment: Definition Lacks Specific Guidance. Two commenters stated that the definition of "accessible route" as set forth in HUD's Fair Housing regulations provides more guidance than the definition in the part 9 proposed rule, and urged the Department to adopt the definition in the Fair Housing Act regulation.

Response. As discussed in the previous response, the differences between the mandate and scope of the Fair Housing Act and the mandate and scope of section 504 render the definition of "accessible route" in HUD's Fair Housing Act regulations inappropriate for section 504 purposes. However, as noted in section II of this preamble, the Department has revised the definition of "accessible route" to require compliance with the ADAAG. The Department believes that the ADAAG definition of "accessible route" provides more guidance than the definition of "accessible route" in the part 9 proposed rule, and should address the commenters' concerns.

Comment: Definition Should Reference Architectural Barriers Act. One commenter stated that the definitions of "accessible," "accessible route," and "adaptability" should reference the Barriers Act, which imposes access requirements on all HUD-owned, leased, and managed properties.

Response. As discussed in section II of this preamble, the definitions of "accessible route" and "adaptability" were revised in this final rule to adopt the standards of the ADAAG or UFAS, as applicable. Also, §§ 9.151 and 9.152 of the proposed rule, and of this final rule, which establish the requirements for new construction and alterations to existing facilities, provide that the definitions, requirements, and standards of the UFAS apply to facilities covered by this rule, except where the ADAAG may provide for greater accessibility.

Comment: Definition Should Provide Accessibility For Persons Who Are Hearing and Sight Impaired. One commenter stated that the definition of "accessible route" in the part 9 rule provides that "an accessible route that serves only accessible units occupied by persons with hearing or vision impairments would not be required to comply with those requirements intended to effect accessibility for persons with mobility impairments." The commenter requested that HUD revise this definition to include persons who are visually impaired, blind, or deaf and blind. The commenter stated that moving about safely in one's environment can be a major obstacle to independent living for individuals with these disabilities.

Response. HUD agrees with the commenter and believes that the revision made to the definition of "accessible route" by this final rule, which is to adopt the ADAAG definition of "accessible route," addresses the commenter's concern.

Definition of "Adaptability" (§ 9.103)

Comment: HUD Should Adopt the Definition of Adaptability Used in Fair Housing Regulations. Two commenters urged the Department to adopt the definition of "adaptability" in the Fair Housing Act regulations (24 CFR 100.205), and stated that the part 9 rule should not use a different definition than that contained in the Fair Housing Act regulations.

Response. The more explicit description of "adaptability" in the Fair Housing Act regulations results from the fact that the statutory language of the Fair Housing Act is explicit as to what constitutes accessibility and adaptability under the Act. The language in § 100.205(c) of HUD's Fair Housing Act regulations is taken directly from section 804(f)(3)(C) of the Fair Housing Act. However, the features of adaptable design and construction described in § 100.205(c) do not include all the features that may be required under part 9. For example, the accessibility/adaptability requirements of the Fair Housing Act do not require adjustable cabinetry, fixtures and plumbing. (*See* discussion of this issue in the preamble to the Fair Housing Accessibility Guidelines codified at 24 CFR, Ch. I, Subch. A, App. III.) Additionally, the Fair Housing Act does not require accessible/adaptable features for individuals with hearing or vision impairments. The section 504 definition of "adaptability" includes adjustable cabinetry and fixtures, and design features for persons with impaired hearing and vision. Thus, the Fair Housing Act definition of adaptability, which is directed largely to individuals with mobility impairments, is inappropriate for section 504 purposes.

Definition of "Auxiliary Aids" (§ 9.103)

Comment: Definition Should Include Devices for Persons With Impaired Cognitive Skills. Two commenters stated that the definition of "auxiliary aids" in the part 9 rule limits these aids to persons with impaired sensory, manual or speaking skills. The commenters stated that auxiliary aids and services should not exclude individuals with mental disabilities, and suggested that the definition be revised as follows: "Auxiliary aids means services or devices that enable persons with impaired sensory, manual, cognitive, interpersonal, or speaking skills to have equal opportunity . . . ."

Response. HUD's definition of auxiliary aids and services is consistent with the DOJ's definition for these terms. The DOJ interprets auxiliary aids and services as those aids and services designed to provide effective communication, e.g., making aurally and visually delivered information available to persons with hearing, speech and vision impairments. This interpretation was recently reiterated in DOJ's final rules implementing title II and title III of the ADA. (*See* 28 CFR part 35 (title II); and 28 CFR part 36 (title III); see, especially discussion in preamble to title III final rule at 56 FR 35565). To the extent that individuals with cognitive or learning disabilities have impaired sensory, manual, or communication skills, these individuals are covered by the definition of auxiliary aids and services.

Definition of "Individuals With Disabilities" (§ 9.103)

Comment: Definition Omits the Human Immunodeficiency Virus. Four commenters stated that the definition for "individuals with disabilities" in the part 9 rule omits from the list of physical and mental impairments the human immunodeficiency virus (HIV). The commenters stated that it is important to clarify that individuals who test positive for the HIV are covered because subsection (b) of the definition for "individuals with disabilities" excludes individuals who currently have contagious diseases and who pose a direct health and safety threat to others, or who, by reasons of the disease, cannot perform the duties of the job.

Response. As noted in section II of this preamble, HUD has revised the definition of "individuals with disabilities" in the final rule to clarify that persons with the human immunodeficiency virus disease (symptomatic or asymptomatic) are covered.

Comment: Direct Threat Standard Excludes Reasonable Accommodation Requirement. One commenter stated that the "direct threat to the health or safety of others" exclusion derives from the case of *School Board of Nassau County v. Arline*, 107 S.Ct. 1123 (1987), but fails to include the essential caveat that "the direct threat not be capable of elimination by reasonable accommodation". The commenter stated that the Congress, in its discussion of this direct threat exclusion in the legislative history of the Fair Housing Act, was careful to note the reasonable accommodation requirement. The commenter requested that the reasonable accommodation requirement be explicitly acknowledged in the part 9 final rule.

Response. As discussed in section II of this preamble, the Department has added a new § 9.131 to address the issue of "direct threat to the health or safety of others." This new section provides that the agency must determine whether reasonable modifications of its policies, practices or procedures will mitigate the risk posed by the individual determined to present a direct threat to the health or safety of others. Although the commenter uses the term "reasonable accommodation," which is the appropriate term within the context of the Fair Housing Act, the appropriate comparable term for section 504, generally, is "reasonable modification," which reflects section 504's application to a broader range of programs and activities. However, reference to reasonable accommodation is appropriate when discussing section 504's application to the employment.

Comment: Delete Reference to "Inability to Perform the Essential Elements of Job or Activity." One commenter stated that the exclusion from the definition of "individuals with disabilities" of the following phrase—"persons with a contagious disease who are unable to perform the duties of the job"—was unwarranted. The commenter stated that inquiries as to whether an individual with disabilities is able to perform the duties of a job or activity are relevant only with respect to whether the individual is "qualified"—and then only if the individual is unable to perform the essential duties, not all duties, of the job or activity. The commenter stated that reasonable accommodation must be provided, if necessary, to assist the individual in performing the essential duties. The commenter further stated: "Because this subsection involves the definition of 'individual with disabilities,' rather than 'qualified individual with disabilities,' the reference to inability to perform the duties of job should be deleted."

Response. The Department agrees with the commenter's statement that without reference to the essential duties and reasonable accommodation aspects of the analysis, this particular provision of the definition is misleading. Accordingly, the Department has revised paragraph (c)(1)(ii) of the definition of "individuals with disabilities" to include the following language: "An individual * * * is unable to perform the essential duties of the job, with or without reasonable accommodation."

Definition of "Multifamily Housing Project" (§ 9.103)

Comment: Multifamily Dwellings Covered by Section 504 Should Be the Same as Those Covered by the Fair Housing Act. Three commenters noted that the part 9 rule defined "multifamily housing project" to mean "a project containing five or more dwelling units," while the Fair Housing regulations define covered multifamily dwellings to mean buildings consisting of four or more dwelling units, if such buildings have one or more elevators, and ground floor units in other buildings consisting of four or more units. The commenters stated that the dwellings covered by the section 504 regulations should mirror those of the Fair Housing Act.

Response. The definition of "covered multifamily dwelling" found in the Fair Housing Act regulations is consistent with the definition of this term in the Fair Housing Act. The definition of "multifamily housing project" in the part 9 rule is consistent with the definition of this term in section 207(c) of the National Housing Act (12 U.S.C. 1713), and is the definition with which HUD program participants are familiar. The definition is also consistent with HUD's section 504 regulations for federally assisted activities. (*See* 24 CFR 8.3) Since section 504 extends only to federally assisted and federally conducted programs and activities, the Department believes that the definition of multifamily housing project, as set forth in the National Housing Act, which pertains to Federal housing programs, is the appropriate definition for HUD's section 504 regulations.

Comment: All HUD Housing Should Be Covered by Section 504, Including Single Family Homes. One commenter stated that the occupancy classification provision of the UFAS defines multifamily housing as apartment buildings, without reference to a number of units, and the residential section of the UFAS occupancy classification refers to one and two family dwellings. The commenter stated that the inclusion of the classification of one and two family dwellings in the UFAS indicates that these dwellings are also subject to the Barriers Act. The commenter requested that HUD make all of its housing, including single family homes, subject to the requirements of the Barriers Act.

Response. The fact that the UFAS contains provisions applicable to one or two family dwellings is not determinative of whether one or two family dwellings are subject to the requirements of the Barriers Act. Whether one or two family dwellings are covered by the Barriers Act depends upon whether a statute subjects these types of dwellings to the requirements of Barriers Act. One or two family dwellings are subject to the requirements of section 504, and possibly the UFAS, to the extent that they are part of a HUD conducted program and meet the requirements of 24 CFR 9.150(e).

Definition of "Qualified Individuals With Disabilities" (§ 9.103)

Comment: Eliminate Definition. Five commenters stated that the definition for "qualified individuals with disabilities" should be removed from the part 9 rule. One commenter stated that HUD concedes in the preamble to the proposed part 9 rule that housing programs do not require a definition of qualified individual with disabilities (56 FR 24606). The commenter stated that HUD included this definition so that the part 9 rule will cover all programs or activities conducted by HUD now and in the future, and so that HUD's regulation will be consistent with the DOJ's prototype regulation and the regulations of other Federal agencies (56 FR 24606). The commenter stated that HUD could achieve its purpose through other ways, such as explicitly describing the HUD programs or the kinds of HUD programs to which the definition applies, or explaining that this term does not apply to housing consumers

Response. The term "qualified individual with disabilities" is taken directly from the language of section 504. The protection afforded by section 504 is restricted to "qualified" individuals with disabilities. As noted in the preamble to the part 9 proposed rule, HUD does not conduct programs under which a person is required to perform services or achieve a level of accomplishment as a part of his or her participation in a particular program or activity (e.g., educational programs) (56 FR 24606). Notwithstanding this fact, HUD determined, as also noted in the preamble to the part 9 proposed rule, that it is important to include a definition for this term so that HUD's regulation will cover all programs or activities conducted by HUD now and in the future, and so that its section 504 regulation for federally conducted programs will be consistent with DOJ's prototype regulation. However, the fact that section 504 applies only to "qualified individuals with disabilities" makes it important to include a

definition for this term in HUD's section 504 regulations.

The purpose in defining the term "qualified individuals with disabilities" is to establish a uniform standard by which an individual with disabilities is determined to be "qualified" to participate in a federally assisted or federally conducted program. The standard, as established by DOJ on the basis of Federal case law concerning section 504, is whether, with appropriate modifications, an individual with disabilities is able to participate in, or achieve the purpose of a federally assisted or federally conducted program or activity. To be considered qualified, however, the modifications required for the individual with disabilities may not be those which would result in a fundamental alteration in the nature of the program. (*See* preamble to DOJ's coordination regulation for federally conducted programs codified at 28 CFR part 39, Editorial Note, 415–429 (1991) at 418; and preamble to proposed part 9 rule at 56 FR 24606.) HUD's definition of "qualified individuals with disabilities" incorporates this basic test established by DOJ and Federal case law and is consistent with the DOJ's definition of "qualified individual with disabilities" in its section 504 prototype regulation for federally conducted programs.

Comment: Eliminate Language Concerning Essential Eligibility Requirements

Five commenters objected to the language concerning "essential eligibility requirements" set forth in paragraph (b) of the definition. One commenter stated that the essential eligibility requirement language included "implicit" eligibility requirements.

Response. In defining "qualified individual with disabilities," HUD adheres to DOJ's guidance on the meaning and interpretation of this term, which guidance is set forth in DOJ's preamble to the final rule implementing its section 504 prototype regulation for federally conducted programs, codified at 28 CFR part 39, Editorial Note, 415–429 (1991). In this preamble, DOJ advises that the concept of "qualified individual with disabilities" includes the notion of "essential eligibility requirements". (*Id* at 419). Under section 504, a qualified individual with disabilities must be able to meet the essential eligibility requirements of a federally assisted or federally conducted program, with the recognition that reasonable modification may need to be made to the program for the individual with disabilities to meet the essential eligibility requirements of the program.

The inclusion of the term "implicit requirements" in the definition is to clarify that the essential eligibility requirements do not include only stated program eligibility requirements, but also those requirements that are inherent in the nature of the program. However, in including implicit requirements in the definition, HUD does not intend a program's eligibility requirements to include requirements that are not intrinsic to the program or that are applied solely to individuals with disabilities—and not to other tenants.

Comment: "All Obligations of Occupancy" Are Not Essential. One commenter stated that the "essential eligibility requirements" include the requirement to comply with "all obligations of occupancy." The commenter stated that all obligations of occupancy cannot possibly be essential. The commenter stated: "Rather than clarifying the obligations of program operators under section 504, this definition will mislead operators into believing that they can exclude any individual with disabilities who cannot fully satisfy every term of the lease, however incidental or unimportant."

Response. The phrase "all obligations of occupancy," as with the phrase "implicit eligibility requirements" discussed above, is intended to refer only to those requirements or obligations that are imposed on all tenants or residents, regardless of whether the tenants or residents are individuals with disabilities. The Department believes that it is important to retain the phrase "all obligations of occupancy" within the definition of "qualified individual with disabilities" because it is embodied in the concept of "essential eligibility requirements". To be eligible to participate in a HUD housing program, an applicant must be able to comply with all obligations of occupancy. Typical occupancy obligations include those related to rent, security deposits, use of premises, subletting, and utility charges. It is inappropriate for the Department to list in a regulation which obligations constitute "important" obligations of occupancy, because of the difficulty in ensuring the comprehensiveness of such a list, and because certain multifamily housing projects as a result of their location or use may require the inclusion of obligations (or terms) that are not generally found in leases for other multifamily housing projects. For the foregoing reasons, the Department declines to state which obligations of occupancy are those with which an individual with disabilities must comply.

Comment: Definition Fails to Note the Obligation of HUD to Provide Reasonable Accommodations. Two commenters stated that the definition fails to note the obligation of HUD to provide reasonable accommodation to individuals who would be able to satisfy essential program requirements with such assistance.

Response. HUD's definition of "qualified individual with disabilities" is consistent with the definition for this term found in DOJ's section 504 prototype regulation for federally conducted programs and in the section 504 regulations of other Federal agencies. The fact that the definition of qualified individual with disabilities does not explicitly refer to the "reasonable modification" requirement does not mean that the requirement is inapplicable to Federal programs covered by section 504. As noted earlier in this preamble, reasonable modification is required under section 504. The reasonable modification requirement, although not explicitly referred to in the definition of "qualified individual with disabilities," is referred to in the definition of "individual with disabilities" and is implicitly referenced in the language of the definition of "qualified individual with disabilities" that provides that modifications in the program or activity, which result in a fundamental alteration in the nature of the program, are not required. Conversely, modifications to the program that would not result in a fundamental alteration in the nature of the program are required.

Comment: Definition Should Include Direct Threat Standard and Eliminate Standard of Significant Risk of Substantial Interference with the Safety of Others. Five commenters supported incorporating the "direct threat" standard that is included in the Fair Housing Act, rather than the standard of "significant risk of substantial interference with the safety or enjoyment of others or with his own health or safety," as set forth in the part 9 rule. One commenter stated that it was absolutely improper to permit evaluation of whether an individual is a potential risk to his or her own health or safety. The commenter stated that: "In the housing context, such a concern can never be related to an essential eligibility requirement. Where an individual may pose a risk to him or herself and to others, the Fair Housing Act standard of direct threat to the health and safety of others is adequate."

Response. As discussed in section II of this preamble, the Department has

added a new § 9.131, which addresses the direct threat standard.

Self-Evaluation (§ 9.110)

Section 9.110(a) provides that HUD shall, within one year of the effective date of the part 9 final rule, evaluate its current policies and practices, and the effects of those policies and practices, including regulations, handbooks, notices and other written guidance, that do not or may not meet the requirements of part 9, and, to the extent modification of any such policies is required, HUD shall take the necessary corrective actions.

Comment: Self-Evaluation Section Should Be Delayed by Final Rule Deadlines. Two commenters suggested that this section be revised to state that remedial actions, which HUD has begun or is planning, will not be delayed by the "deadlines in this section." One of the commenters stated that the part 9 final rule should clearly state that HUD will complete the self-evaluation of its policies and practices within one year of the effective date of the final rule.

Response. The Department periodically reviews the requirements of its various programs, and the policies and practices of these programs, to ensure that all HUD programs, both HUD assisted and HUD conducted, reflect existing statutory requirements. Given this periodic review process, the Department does not intend or foresee any delay in the evaluation of HUD conducted programs to ensure that these programs meet the requirements of part 9, as required by § 9.110.

Comment: HUD Should Review Its Federal Preference Criteria, As Part of Its Self-Evaluation Process. One commenter urged the Department to review its Federal preference criteria for housing programs funded by the Department. The commenter stated that the current criteria are not clear on the definition of what is not a "regular sleeping accommodation" and that Federal preferences should be revised to give top preference to individuals released from institutions, such as hospitals, nursing homes and rehabilitation facilities.

Response. A review of Federal preference criteria for housing programs is not appropriate in connection with the development and implementation of this part 9 rule. This rule is concerned with the implementation of section 504 solely as it applies to HUD conducted programs. Federal preferences in housing affect all HUD housing programs, not only housing owned by HUD. Any changes to the list of individuals that should be given preferences in federally-assisted or federally-conducted housing is more appropriate for proposed rulemaking that provides for advance notice to, and solicitation of comment from, the public.

Comment: Expand Public Participation in the Self-Evaluation Process to Include Comments on Fair Housing Issues. Section 9.110(b) of the part 9 rule provides that HUD shall provide an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the self-evaluation process by submitting comments, both oral and written. One commenter recommended that HUD expand this section of the self-evaluation process to include fair housing issues that relate to people with disabilities.

Response. As discussed throughout this preamble, the mandate and the scope of the Fair Housing Act and section 504 are different. Accordingly, it is inappropriate for issues specifically related to the Fair Housing Act to be included in the section 504 self-evaluation process. However, to the extent that section 504 incorporates or overlaps with the Fair Housing Act, these issues may be raised in connection with the self-evaluation process.

Comment: Files Should Be Maintained Permanently. Section 9.110(c) of the part 9 rule provides that HUD shall, for a period of at least three years following the completion of the self-evaluation, maintain on file and make available for public inspection: (1) A list of interested persons; (2) a description of the areas examined and any problems identified; and (3) a description of any modifications made or to be made. Two commenters recommended that HUD maintain this file permanently. The commenters stated that HUD may make progress in the implementation and enforcement of section 504 if HUD's efforts are permanently catalogued, and that this progress is more important than maintaining consistency with the DOJ's coordination regulation.

Response. The Department believes that successful implementation and enforcement of section 504 will not be hindered by the rule's requirement to maintain the "self-evaluation" files for a period of three years. The Department notes that under § 9.110, HUD is not required to discard the self-evaluation files after the three year period has expired. Rather, HUD is required to maintain these files for a period of at least three years following the completion of the self-evaluation. HUD may maintain these files permanently or indefinitely. Accordingly, the Department believes that the minimum three-year requirement is sufficient.

Notice (§ 9.111)

Comment: This Section Should Clarify How HUD Will Communicate with People with Disabilities. Section 9.111 provides that HUD shall make available to employees, applicants, participants, beneficiaries, and other interested persons, information regarding the provisions of part 9. One commenter stated that although the preamble to the part 9 proposed rule indicated that certain HUD materials will be made available on tape and in Braille, nothing in the regulation makes that clear. The commenter requested that the part 9 proposed rule describe the specific ways in which HUD will communicate effectively with applicants, participants, personnel or other Federal entities, and members of the public who have disabilities.

Response. To make available to individuals with disabilities the information required by § 9.111, HUD will use, to the extent necessary, the auxiliary aids and services described in § 9.103. The definition of "auxiliary aids" in § 9.103 provides in relevant part as follows: "Although auxiliary aids are required explicitly only by § 9.160(a)(1), they may also be necessary to meet other requirements of the proposed regulation."

General Prohibitions Against Discrimination (§ 9.130)

Section 9.130 lists the general prohibitions against discrimination under section 504. Subsection (b)(vi) of § 9.130 states that it is discriminatory to:

"Deny a dwelling to an otherwise qualified buyer or renter because of a disability of that buyer or renter or a person residing or intending to reside in that dwelling after it is sold, rented or made available." (§ 9.130(b)(vi))

Comment: § 9.130 Should Include Relatives, Friends and Associates of Individuals with Disabilities. Three commenters stated that this paragraph was similar to language in the Fair Housing Act, except that the Fair Housing Act adds a third category of discrimination—"or because of a disability of any person associated with that person." The commenters urged adoption of this category of individuals so that the section 504 regulations, like the Fair Housing regulations (24 CFR 100.202), will prohibit discrimination against buyers and renters who have relatives, friends or associates who have disabilities.

Response. The Fair Housing Act prohibits, *inter alia*, discrimination

against any person on the basis of disability, whether or not it is the aggrieved persor or an associate or relative of that person who is disabled. Because of differences in the language and structure of the Fair Housing Act and section 504, the Fair Housing Act language is not necessarily transferable to section 504.

Comment: This Section Should Incorporate Language Concerning Reasonable Accommodation. One commenter requested that HUD incorporate the language of § 100.204 of the Fair Housing Act regulations concerning reasonable accommodation in the part 9 rule's provision establishing the general prohibitions against discrimination under section 504.

Response. HUD's Fair Housing Act regulation concerning reasonable accommodation is not appropriate for the section 504 regulations. The reasonable accommodation requirements of the Fair Housing Act are narrower than the "reasonable modification" requirements of section 504, because the Fair Housing Act requirements only refer to reasonable modifications and the rules, policies, practices or services associated with a dwelling unit. (*See* 24 CFR 100.204.) Under section 504, reasonable modifications will vary in the context of each Federal program or activity. Accordingly, it is important that the interpretation of reasonable modification with respect to a program or activity covered by section 504 not be limited to the interpretation provided by HUD's Fair Housing Act regulations. Additionally, as noted previously, the term, "qualified individuals with disabilities," used throughout the part 8 and part 9 rules implicitly incorporates the concept of reasonable accommodation or reasonable modification.

Program Accessibility: Existing Facilities (§ 9.150)

Comment: The Department Should Consider the Impact of the Americans with Disabilities Act on Existing Facilities. Section 9.150(b) provides that HUD is not required to make structural changes in existing facilities where other methods are effective in achieving compliance with this section. Three commenters stated that HUD should consider the impact of the ADA on HUD programs and activities. Two commenters stated that it would be helpful both to consumers and to HUD and Justice enforcement personnel if these regulations referred to the ADA and to the ADA title II regulations and standards.

Response. In developing this final rule, the Department in consultation with the DOJ and EEOC, has considered the impact of the ADA on HUD conducted programs and activities, and where appropriate, incorporated those requirements of the ADA that are applicable to these programs and activities.

Comment: Section 9.150(e) Should Clarify HUD's Responsibility to Make Reasonable Modifications in Housing Sold to Buyers with Disabilities. Section 9.150(e) provides that HUD is not required to make alterations to existing facilities that are part of HUD's Property Disposition Programs, unless such alterations are necessary to meet the needs of a current or prospective tenant during the time when the Department expects to retain legal possession of the facilities and there is no alternative method to meet the needs of that tenant. Section 9.150(e) further provides that nothing in this section shall be construed to require alterations to make facilities accessible to persons with disabilities who are expected to occupy the facilities only after HUD relinquishes legal possession.

One commenter stated that this section relieves HUD of all responsibility to make any modifications for buyers with disabilities who purchase housing through HUD's Property Disposition Program. The commenter stated that § 9.150(e) should be revised to clarify HUD'S responsibility to make reasonable modifications in housing sold to buyers with disabilities.

Another commenter stated that the part 9 final rule should be revised to provide that HUD will exert its best efforts to assist a purchaser in obtaining the funding and expertise that HUD is able to provide in making the building usable for tenants and owners with disabilities.

Response. Section 9.150 requires the housing provider to demonstrate that physical alterations to make a unit accessible would result in a fundamental alteration in the nature of the program or activity or in an undue financial and administrative burden. This section requires that where physical alterations would result in a fundamental alteration or undue financial and administrative burden, alternative action must be taken that would not result in such an alteration or such burdens, but nevertheless would ensure that individuals with disabilities receive the benefits and services of the program or activity.

In the preamble to the part 9 proposed rule, HUD explained why the traditional approach to program accessibility with respect to existing facilities is not appropriate for the Property Disposition Programs because HUD holds the properties only temporarily and for an unpredictable amount of time (56 FR 24611). Since HUD does not know how long it will be in possession of the property, the agency cannot identify a time period within which it can assess the needs of those who might wish to live there in the future. However, HUD recognizes that during the time that the agency retains possession of a housing property under this program, HUD provides a housing service to the residents and also has a section 504 obligation to those who apply for housing in the facility.

Program Accessibility: Alterations of Property Disposition Program Multifamily Housing Facilities (§ 9.152)

Section 9.152 imposes accessibility requirements on HUD when HUD undertakes alterations to multifamily housing facilities that are part of HUD's Property Disposition Program. This section would require that once HUD undertakes alterations that cost 75 percent or more of the replacement value of the building, HUD must make at least five percent of the units accessible to tenants with mobility disabilities and two percent of the units accessible to tenants with sight and hearing disabilities.

Comment: Section 9.152 Should Include the Fair Housing Act Standards for New Construction. One commenter stated that HUD adopted the 75 percent figure for its section 504 federally assisted regulations, because it purposely wanted the level of alterations to "be tantamount to new construction" (53 FR 20224). The commenter stated that the Department is now required to meet the Fair Housing Act new construction standards when altering housing facilities. The commenter further stated that this section requires the five percent/two percent standard only in buildings with 15 or more units that are undergoing significant alteration, and that this requirement conflicts with HUD's UFAS standards for federally owned residential property which has no minimum 15 unit requirement.

Response. As previously discussed, it is inappropriate for HUD to incorporate the standards and requirements of the Fair Housing Act in a regulation implementing section 504 because the purposes and goals of these two statutes are not identical. To the extent that newly constructed HUD multifamily housing is subject to the requirements of the Fair Housing Act and section 504,

HUD will adhere to the standards that provide for greater accessibility.

The UFAS standards were promulgated under the Barriers Act. (*See* 24 CFR part 40, App. A, 4.1; 49 FR 31528; 53 FR 20228.) Because section 504 requires compliance with accessibility standards in certain circumstances, the DOJ recommended that Federal agencies provide that new construction and alterations comply with the ADAAG or the UFAS (that is, compliance with the ADAAG whenever the ADAAG provides for greater accessibility than the UFAS). Compliance with the UFAS or the ADAAG therefore is deemed to be compliance with section 504. The DOJ recommended the UFAS and the ADAAG as the applicable accessibility standards for section 504 to reduce potential conflict between standards enforced under the Barriers Act and section 504. However, the degree of accessibility required by the Barriers Act and that required by section 504 are not identical, and the regulations and standards promulgated under section 504 and the Barriers Act reflect these differences.

Comment: Replacement Cost Cap of Section 9.152 Should Be Lowered from 75 percent to 50 percent. One commenter recommended lowering the replacement cost cap in § 9.152 because many states and cities nationwide have a lower triggering percentage. The commenter stated that HUD projects should not be allowed to remain inaccessible until a renovation totals 75 percent of replacement cost when private buildings are subject to a more stringent standard.

Response. The 75 percent replacement cost cap set forth in § 9.152 is also contained in § 8.23 of HUD's section 504 regulation for HUD assisted programs. The replacement cost cap issue was carefully considered by the Department during development of the final part 8 rule. The Department received 290 comments on this issue following publication of the proposed part 8 rule (53 FR 20224). In the preamble to the final part 8 rule, the Department explained in detail the reasons behind its decision to retain the 75 percent replacement cost cap. (*See* 53 FR 20224.) The comment made by the commenter on this issue in the context of the part 9 rule has not persuaded the Department to revise its initial decision that the 75 percent replacement cost cap is an appropriate standard for section 504 purposes. The Department points out, however, that HUD projects in jurisdictions which impose more stringent accessibility standards, than those prescribed in HUD's section 504 regulations, must comply with the more stringent requirements.

Comment: Section 9.152(b) is Unclear As to When Responsibility to Modify Existing Housing Ends. One commenter stated that paragraph (b) of § 9.152 is confusing. The commenter stated that housing providers who read the regulation do not understand when their responsibility to modify existing housing ends. The commenter stated that paragraph (b) should be revised to clarify that each time a building is altered, accessibility requirements apply.

Response. The Department believes that part of the confusion concerning § 9.152 results from the fact that the subheadings were inadvertently omitted at the time of publication of the part 9 proposed rule. Paragraph (a) of § 9.152 should be titled "Substantial Alterations," and paragraph (b) of this section should be titled "Other Alterations." The final rule includes these subheadings which indicates the extent of the provider's responsibility to modify existing housing. The Department believes that no further revisions to this section are necessary. The issue raised by the commenter, like the issue in the preceding comment, was the subject of considerable public comment at the time of publication of the proposed part 8 rule. (*See* 24 CFR 20224.) The Department believes that the lack of substantial public comment on § 9.152(b), which is identical to § 8.23(b), indicates that the provisions of this section are not confusing for the majority of HUD program participants. Accordingly, except for the inclusion of the subheadings, the Department declines to amend the language in this section.

Distribution of Accessible Dwelling Units (§ 9.153)

This section requires accessible units to be distributed throughout projects "to the maximum extent feasible and subject to reasonable health and safety requirements".

Comment: Eliminate Language Concerning "To the Maximum Extent Feasible". Two commenters recommended that the Department delete the language beginning "to the maximum extent feasible." The commenters stated that the Fair Housing Act prohibits segregating all tenants with disabilities into one area or into one part of a building.

Response. The language in § 9.153 is identical to the language in § 8.26 of HUD's section 504 regulation for federally assisted programs. Section 8.26 was the subject of considerable public comment following publication of the part 8 proposed rule. (*See* 53 FR 20226.) The commenters on the part 8 rule expressed concerns similar to those expressed by the commenters on this rule. In the preamble to the part 8 proposed rule, the Department stated that this provision does not allow "the unnecessary segregation of qualified individuals with disabilities" (53 FR 20226). The Department reaffirms that prohibition here, and notes that this prohibition is contained in § 9.130(b)(1)(iv), which prohibits the agency from providing different or separate housing, aid, benefits, or services to individuals with disabilities, or to any class of individuals with disabilities than is provided to others unless such action is necessary to provide qualified individuals with disabilities with housing, aid, benefits, or services that are as effective as those provided to others.

Occupancy of Accessible Dwelling Units (§ 9.154)

Section 9.154(b) provides that when offering an accessible unit to an applicant who is not disabled and does not require the accessibility features of the unit, the Department may require the applicant to agree (and may incorporate this agreement in the lease) to move to a non-accessible unit when available.

Comment: Department Should Require All Leases to Incorporate "Agreement to Move" Clause as Standard Practice. One commenter recommended that the Department incorporate this provision in the lease as standard practice.

Response. The Department believes that it is unnecessary to require that this provision be incorporated in the lease as standard practice. The Department believes that the language in § 9.154, which provides that this provision may be incorporated in the lease is adequate. The Department notes that this language was contained in § 8.26 of HUD's part 8 interim rule published on May 6, 1983 (48 FR 20655) and was retained in § 8.27(b) of the part 8 final rule, published on June 2, 1988 (53 FR 20240). Because this provision has been in HUD's section 504 regulations for approximately 10 years, the Department believes that HUD managers are aware that they are legally empowered to—and will—require an applicant without disabilities to agree to move to a non-accessible unit when one becomes available.

Housing Adjustments (§ 9.155)

This section requires the Department to modify its housing policies and practices to ensure that they do not limit

the participation of tenants with disabilities.

Comment: New Housing Policies Implemented In Response to Fair Housing Act Should be Included in § 9.155. One commenter stated that since the passage of both section 504 and the Fair Housing Act, HUD has changed some of its housing policies, as for example, making FHA mortgages available to non-profit organizations for the purchase of single-family homes that are to be used by groups of unrelated tenants with disabilities. The commenter recommended that these new policies be listed in the regulation.

Response. The Department does not believe that the part 9 rule is the proper place to enunciate any policy revisions resulting from the Fair Housing Act. All new policies have been or will be announced in a more appropriate forum.

Comment: Section 9.155(a) Should Include Reference to Reasonable Accommodation. Four commenters stated that the last sentence of § 9.155(a) discusses fundamental alterations and undue financial and administrative burdens but not reasonable accommodation, which indicates that HUD has no duty to reasonably accommodate an individual's disability.

Response. Again, the appropriate term, generally, for purposes of section 504 is "reasonable modification." The reasonable modification issue has been raised in connection with other sections of the part 9 rule. The Department refers the commenters to its previous response on this issue as set forth in this preamble.

Communications (§ 9.160)

Section 9.160 would require HUD to take appropriate steps to ensure effective communication with personnel of other Federal entities, applicants, participants and members of the public.

Comment: Section 9.160 Should Address the Communication Needs of Individuals with Impaired Cognitive Skills. One commenter stated that this section focuses on individuals with hearing and sight disabilities, and excludes individuals with impaired cognitive skills.

Response. The provisions of this section are not intended to exclude individuals who have disabilities other than hearing and vision impairments. Because hearing and vision impairments present easily identifiable communication difficulties, a number of auxiliary aids and services have been designed to overcome these communication difficulties, and serve as clear examples of how effective communication may be achieved under the requirements of section 504. However, the provisions of § 9.160 clearly provide that HUD shall, where necessary, furnish the auxiliary aid appropriate to an individual's disability, and in determining what type of auxiliary aid is necessary, shall give primary consideration to the request of the individual with disabilities.

Compliance Procedures (§ 9.170)

Section 9.170 would establish the procedures for processing complaints arising under section 504. In the preamble to the proposed rule, the Department specifically solicited comment on whether the compliance procedures for part 9 should include a hearing before an Administrative Law Judge. (See 56 FR 24613.)

Comment: Procedures Should Include Full Evidentiary Hearing Before an Administrative Law Judge. One commenter recommended that HUD provide complainants with the opportunity for a full evidentiary hearing before an Administrative Law Judge in appeals from the Assistant Secretary's determination.

Response. The issue of whether the part 9 rule should provide for an administrative law judge was carefully considered by the Department during development of the proposed part 9 rule, and again, after receiving this comment. The Department has concluded that the complaint processing procedure set forth in § 9.170 will provide for an adequate remedy, and therefore, it is not necessary to provide for a hearing before an administrative law judge. Accordingly, the "right to request a hearing" has been deleted from § 9.170 of the final rule.

IV. Other Matters

Coordination. This final rule has been reviewed by the Department of Justice. It is an adaptation of a prototype prepared by the Department of Justice under Executive Order 12250 (45 FR 72995, 3 CFR, 1980 Comp., p. 298) and distributed to Executive agencies. This final rule also has been reviewed by the Equal Employment Opportunity Commission under Executive Order 12067 (43 FR 28967, 3 CFR, 1978 Comp., p. 206).

Environmental Impact. At the time of development of the proposed part 9 rule, a Finding of No Significant Impact with respect to the environment was made in accordance with HUD regulations at 24 CFR part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969. That Finding of No Significant Impact remains applicable to this final rule and is available for public inspection during regular business hours in the Office of the Rules Docket Clerk at the above address.

Impact on Small Entities. The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this rule before publication, and by approving it, certifies that this rule does not have a significant economic impact on small entities. The purpose of this rule is to provide for the enforcement of section 504 of the Rehabilitation Act of 1973 as it applies to programs or activities conducted by HUD.

Executive Order 12612, Federalism. The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, *Federalism*, has determined that the policies contained in this rule would not, if implemented, have substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. Specifically, the requirements of this rule are directed to HUD programs and activities, and do not impinge upon the relationship between the Federal government and State and local governments. Accordingly, the rule is not subject to review under the Order.

Executive Order 12606, the Family. The General Counsel, as the Designated Official under Executive Order 12606, *the Family*, has determined that this rule does not have potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. The rule establishes requirements prohibiting discrimination against individuals with disabilities in programs and activities conducted by HUD.

Semiannual Agenda of Regulations. This rule was listed as sequence number 1528 in the Department's Semiannual Agenda of Regulations published on April 25, 1994 (59 FR 20424, 20434) pursuant to Executive Order 12866 and the Regulatory Flexibility Act.

List of Subjects in 24 CFR Part 9

Blind, Buildings, Civil rights, Employment, Equal employment opportunity, Federal buildings and facilities, Government employees, Persons with disabilities.

Accordingly, title 24 of the Code of Federal Regulations is amended by adding a new part 9, consisting of §§ 9.101 through 9.170, to read as follows:

PART 9—ENFORCEMENT OF NONDISCRIMINATION ON THE BASIS OF DISABILITY IN PROGRAMS OR ACTIVITIES CONDUCTED BY THE DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Sec.
9.101 Purpose.
9.102 Applicability.
9.103 Definitions.
9.110 Self-evaluation.
9.111 Notice.
9.112—9.129 [Reserved]
9.130 General prohibitions against discrimination.
9.131 Direct threat.
9.132—9.139 [Reserved]
9.140 Employment.
9.141—9.148 [Reserved]
9.149 Program accessibility: discrimination prohibited.
9.150 Program accessibility: existing facilities.
9.151 Program accessibility: new construction and alterations.
9.152 Program accessibility: Alterations of Property Disposition Program multifamily housing facilities.
9.153 Distribution of accessible dwelling units.
9.154 Occupancy of accessible dwelling units.
9.155 Housing adjustments.
9.160 Communications.
9.170 Compliance procedures.

Authority: 29 U.S.C. 794; 42 U.S.C. 3535(d).

§ 9.101 Purpose.

The purpose of this part is to effectuate section 119 of the Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978, which amended section 504 of the Rehabilitation Act of 1973 to prohibit discrimination on the basis of disability in programs or activities conducted by Executive agencies or the United States Postal Service.

§ 9.102 Applicability.

This part applies to all programs or activities conducted by the agency, except for programs or activities conducted outside the United States that do not involve individuals with disabilities in the United States.

§ 9.103 Definitions.

For purposes of this part:

Accessible: (1) When used with respect to the design, construction, or alteration of a facility or a portion of a facility other than an individual dwelling unit, means that the facility or portion of the facility when designed, constructed or altered, complies with applicable accessibility standards and can be approached, entered, and used by individuals with physical disabilities. The phrase "accessible to and usable by" is synonymous with accessible.

(2) When used with respect to the design, construction, or alteration of an individual dwelling unit, means that the unit is located on an accessible route and, when designed, constructed, altered or adapted, complies with applicable accessibility standards, and can be approached, entered, and used by individuals with physical disabilities. A unit that is on an accessible route and is adaptable and otherwise in compliance with the standards set forth in § 9.151 is "accessible" within the meaning of this definition. When a unit in an existing facility which is being made accessible as a result of alterations is intended for use by a specific qualified individual with disabilities (e.g., a current occupant of such unit or of another unit under the control of the same agency, or an applicant on a waiting list), the unit will be deemed accessible if it meets the requirements of applicable standards that address the particular disability or impairment of such person.

Accessible route means a continuous unobstructed path connecting accessible elements and spaces of a building or facility. Interior accessible routes may include corridors, floors, ramps, elevators, lifts, and clear floor space at fixtures. Exterior accessible routes may include parking access aisles, curb ramps, crosswalks at vehicular ways, walks, ramps and lifts.

ADA means the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 through 12213)

ADA Accessibility Guidelines (ADAAG) means the Accessibility Guidelines issued under the ADA, and which are codified in the Appendix to 39 CFR part 1191.

Adaptability means the ability of certain building, spaces and elements, such as kitchen counters, sinks, and grab bars, to be added or altered, to accommodate the needs of persons with or without disabilities, or to accommodate the needs of persons with different types or degrees of disability. For example, in a unit adaptable for a person with impaired hearing, the wiring for visible emergency alarms may be installed but the alarms need not be installed until such time as the unit is made ready for occupancy by a person with impaired hearing.

Agency means the Department of Housing and Urban Development.

Alteration means a change to a building or facility or its permanent fixtures or equipment that affects or could affect the usability of the building or facility or part thereof. Alterations include, but are not limited to, remodeling, renovation, rehabilitation, reconstruction, historic restoration, changes or rearrangements of the structural parts and changes or rearrangements in the plan configuration of walls and full-height partitions. Normal maintenance, re-roofing, painting, or wallpapering or changes to mechanical and electrical systems are not alterations unless they affect the usability of the building or facility.

Assistant Attorney General means the Assistant Attorney General, Civil Rights Division, United States Department of Justice.

Assistant Secretary means the Assistant Secretary of Housing and Urban Development for Fair Housing and Equal Opportunity.

Auxiliary aids means services or devices that enable persons with impaired sensory, manual, or communication skills to have an equal opportunity to participate in, and enjoy the benefits of, programs or activities conducted by the agency. For example, auxiliary aids useful for persons with impaired vision include readers, Brailled materials, audio recordings, and other similar services and devices. Auxiliary aids useful for persons with impaired hearing include telephone handset amplifiers, telephones compatible with hearing aids, telecommunication devices for deaf persons (TDD's), interpreters, note takers, written materials, and other similar services and devices.

Complete complaint means a written statement that contains the complainant's name and address and describes the agency's alleged discriminatory action in sufficient detail to inform the agency of the nature and date of the alleged violation of section 504. It shall be signed by the complainant or by someone authorized to do so on his or her behalf. Complaints filed on behalf of classes or third parties shall describe or identify (by name, if possible) the alleged victims of discrimination.

Current illegal use of drugs means illegal use of drugs that occurred recently enough to justify a reasonable belief that a person's drug use is current or that continuing use is a real and ongoing problem.

Drug means a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812).

Facility means all or any portion of buildings, structures, site improvements, complexes, equipment, roads, walks, passageways, parking lots, rolling stock or other conveyances, or

other real or personal property located on a site.

Historic properties means those properties that are listed or are eligible for listing in the National Register of Historic Places, or such properties designated as historic under a statute of the appropriate State or local government body.

Illegal use of drugs means the use of one or more drugs, the possession or distribution of which is unlawful under the Controlled Substances Act (21 U.S.C. 812). The term "illegal use of drugs" does not include the use of a drug taken under supervision by a licensed health care professional, or other uses authorized by the Controlled Substances Act or other provisions of Federal law.

Individual with disabilities means any person who has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment. As used in this definition, the phrase:

(1) "Physical or mental impairment" includes:

(i) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: Neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive; digestive; genito-urinary; hemic and lymphatic; skin; and endocrine; or

(ii) Any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities. The term "physical or mental impairment" includes, but is not limited to, such diseases and conditions as orthopedic, visual, speech, and hearing impairments, cerebral palsy, autism, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, Human Immunodeficiency Virus disease (symptomatic or asymptomatic), mental retardation, emotional illness, drug addiction and alcoholism.

(2) The term "individual with disabilities" does not include:

(i) An individual who is currently engaging in the illegal use of drugs, when the agency acts on the basis of such use. This exclusion, however, does not exclude an individual with disabilities who—

(A) Has successfully completed a supervised drug rehabilitation program, and is no longer engaging in the illegal use of drugs, or has otherwise been rehabilitated successfully, and is no longer engaging in such use;

(B) Is participating in a supervised rehabilitation program, and is no longer engaging in such use; or

(C) Is erroneously regarded as engaging in such use, but is not engaging in such use.

(ii) Except that it shall not violate this part for the agency to adopt or administer reasonable policies and procedures, including but not limited to drug testing, designed to ensure than an individual described in paragraphs (2)(i)(A) and (B) of this definition is no longer engaging in the illegal use of drugs.

(iii) Nothing in paragraph (2) of this definition shall be construed to encourage, prohibit, restrict or authorize the conduct of testing for illegal use of drugs.

(iv) The agency shall not deny health services provided under titles I, II and III of the Rehabilitation Act of 1973 (29 U.S.C. 701 through 777f) to an individual with disabilities on the basis of that individual's current illegal use of drugs, if the individual is otherwise entitled to such services.

(3) For purposes of employment, the term "individual with disabilities" does not include:

(i) An individual who has a currently contagious disease or infection and who, by reason of such disease or infection—

(A) Has been determined, in accordance with the provisions of § 9.131, to pose a direct threat to the health or safety of other individuals, which threat cannot be eliminated or reduced by reasonable accommodation, or

(B) Is unable to perform the essential duties of the job, with or without reasonable accommodation; or

(ii) An individual who is an alcoholic and whose current use of alcohol prevents him or her from performing the duties of the job in question or whose employment would constitute a direct threat to the property or the safety of others by reason of his or her current alcohol abuse.

(4) "Major life activities" means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

(5) "Has a record of such an impairment" means has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activities.

(6) "Is regarded as having an impairment" means—

(i) Has a physical or mental impairment that does not substantially limit major life activities but is treated by the agency as constituting such a limitation;

(ii) Has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairment; or

(iii) Has none of the impairments defined in paragraph (1) of this definition but is treated by the agency as having such an impairment.

Multifamily housing project means a project containing five or more dwelling units.

Official or Responsible Official means the Assistant Secretary of HUD for Fair Housing and Equal Opportunity.

PDP housing facility means a housing facility administered under HUD's Property Disposition Program.

Project means the whole of one or more residential structures and appurtenant structures, equipment, roads, walks, and parking lots which are covered by a single mortgage or contract or otherwise treated as a whole by the agency for processing purposes, whether or not located on a common site.

Property Disposition Program (PDP) means the HUD program which administers the housing facilities that are either owned by the Secretary or where, even though the Secretary has not obtained title, the Secretary is mortgagee-in-possession. Such properties are deemed to be in the possession or control of the agency.

Qualified individual with disabilities means:

(1) With respect to any agency non-employment program or activity under which a person is required to perform services or to achieve a level of accomplishment, an individual with disabilities who meets the essential eligibility requirements and who can achieve the purpose of the program or activity without modifications in the program or activity that the agency can demonstrate would result in a fundamental alteration in its nature; or

(2) With respect to any other agency non-employment program or activity, an individual with disabilities who meets the essential eligibility requirements for participation in, or receipt of benefits from, that program or activity.

(3) "Essential eligibility requirements" include stated eligibility requirements such as income, as well as other explicit or implicit requirements inherent in the nature of the program or activity, such as requirements that an occupant of a PDP multifamily housing facility be capable of meeting selection criteria and be capable of complying with all obligations of occupancy with or without supportive services provided by persons other than the agency.

(4) "Qualified person with disabilities" as that term is defined for purposes of employment in 29 CFR 1613.702(f), which is made applicable to this part by § 9.140.

Replacement cost of the completed facility means the current cost of construction and equipment for a newly constructed housing facility of the size and type being altered. Construction and equipment costs do not include the cost of land, demolition, site improvements, non-dwelling facilities and administrative costs for project development activities.

Secretary means the Secretary of Housing and Urban Development.

Section 504 means section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794). As used in this part, section 504 applies only to programs or activities conducted by the agency and not to federally assisted programs.

Substantial impairment means a significant loss of the integrity of finished materials, design quality, or special character resulting from a permanent alteration.

UFAS means the Uniform Federal Accessibility Standards, which implement the accessibility standards required by the Architectural Barriers Act (42 U.S.C. 4151 through 4157), and which are established at 24 CFR part 40, Appendix A for residential structures, and 41 CFR 101–19.600 through 101–19.607, and Appendix A to these sections, for non-residential structures.

§ 9.110 Self-evaluation.

(a) The agency shall, within one year of the effective date of this part, evaluate its current policies and practices, and the effects of those policies and practices, including regulations, handbooks, notices and other written guidance, that do not or may not meet the requirements of this part. To the extent modification of any such policies is required, the agency shall take the necessary corrective actions.

(b) The agency shall provide an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the self-evaluation process by submitting comments (both oral and written).

(c) The agency shall, for at least three years following the completion of the self-evaluation, maintain on file and make available for public inspection:

(1) A list of interested persons;

(2) A description of the areas examined and any problems identified; and

(3) A description of any modifications made or to be made.

§ 9.111 Notice.

The agency shall make available to employees, applicants, participants, beneficiaries, and other interested persons information regarding the provisions of this part and its applicability to the programs or activities conducted by the agency. The agency shall make such information available to such persons in such manner as the Secretary finds necessary to apprise them of the protections against discrimination assured them by section 504 and this part. All publications and recruitment materials distributed to participants, beneficiaries, applicants or employees shall include a statement that the agency does not discriminate on the basis of disability. The notice shall include the name of the person or office responsible for the implementation of section 504.

§§ 9.112–9.129 [Reserved]

§ 9.130 General prohibitions against discrimination.

(a) No qualified individual with disabilities shall, on the basis of disability, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity conducted by the agency.

(b) (1) The agency, in providing any housing, aid, benefit, or service, may not, directly or through contractual, licensing, or other arrangements, on the basis of disability—

(i) Deny a qualified individual with disabilities the opportunity to participate in or benefit from the housing, aid, benefit, or service;

(ii) Afford a qualified individual with disabilities an opportunity to participate in or benefit from the housing, aid, benefit, or service that is not equal to that afforded others;

(iii) Provide a qualified individual with disabilities with any housing, aid, benefit, or service that is not as effective in affording equal opportunity to obtain the same result, to gain the same benefit, or to reach the same level of achievement as that provided to others;

(iv) Provide different or separate housing, aid, benefits, or services to individuals with disabilities or to any class of individuals with disabilities than is provided to others unless such action is necessary to provide qualified individuals with disabilities with housing, aid, benefits, or services that are as effective as those provided to others;

(v) Deny a qualified individual with disabilities the opportunity to participate as a member of planning or advisory boards;

(vi) Deny a dwelling to an otherwise qualified buyer or renter because of a disability of that buyer or renter or a person residing in or intending to reside in that dwelling after it is sold, rented or made available; or

(vii) Otherwise limit a qualified individual with disabilities in the enjoyment of any right, privilege, advantage, or opportunity enjoyed by others receiving the housing, aid, benefit, or service.

(2) For purposes of this part, housing, aids, benefits, and services, to be equally effective, are not required to produce the identical result or level of achievement for individuals with disabilities and for persons without disabilities, but must afford individuals with disabilities equal opportunity to obtain the same result, to gain the same benefit, or to reach the same level of achievement.

(3) The agency may not deny a qualified individual with disabilities the opportunity to participate in programs or activities that are not separate or different, despite the existence of programs or activities that are permissibly separate or different for persons with disabilities.

(4) The agency may not, directly or through contractual or other arrangements, utilize criteria or methods of administration the purpose or effect of which would:

(i) Subject qualified individuals with disabilities to discrimination on the basis of disability; or

(ii) Defeat or substantially impair accomplishment of the objectives of a program or activity with respect to individuals with disabilities.

(5) The agency may not, in determining the site or location of a facility, make selections the purpose or effect of which would:

(i) Exclude individuals with disabilities from, deny them the benefits of, or otherwise subject them to discrimination under any program or activity conducted by the agency; or

(ii) Defeat or substantially impair the accomplishment of the objectives of a program or activity with respect to individuals with disabilities.

(6) The agency, in the selection of procurement contractors, may not use criteria that subject qualified individuals with disabilities to discrimination on the basis of disability.

(7) The agency may not administer a licensing or certification program in a manner that subjects qualified individuals with disabilities to discrimination on the basis of disability, nor may the agency establish requirements for the programs or activities of licensees or certified

entities that subject qualified individuals with disabilities to discrimination on the basis of disability. However, the programs or activities of entities that are licensed or certified by the agency are not, themselves, covered by this part.

(c) (1) Notwithstanding any other provision of this part, persons without disabilities may be excluded from the benefits of a program if the program is limited by Federal statute or Executive order to individuals with disabilities. A specific class of individuals with disabilities may be excluded from a program if the program is limited by Federal statute or Executive order to a different class of individuals.

(2) Certain agency programs operate under statutory definitions of "persons with disabilities" that are more restrictive than the definition of "individual with disabilities" contained in § 9.103. Those definitions are not superseded or otherwise affected by this regulation.

(d) The agency shall administer programs and activities in the most integrated setting appropriate to the needs of qualified individuals with disabilities.

(e) The obligation to comply with this part is not obviated or alleviated by any State or local law or other requirement that, based on disability, imposes inconsistent or contradictory prohibitions or limits upon the eligibility of qualified individuals with disabilities to receive services or to practice any occupation or profession.

(f) The enumeration of specific forms of prohibited discrimination in paragraphs (b) and (d) of this section does not limit the general prohibition in paragraph (a) of this section.

§ 9.131 Direct threat.

(a) This part does not require the agency to permit an individual to participate in, or benefit from the goods, services, facilities, privileges, advantages and accommodations of that agency when that individual poses a direct threat to the health or safety of others.

(b) "Direct threat" means a significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices, or procedures, or by the provision of auxiliary aids or services.

(c) In determining whether an individual poses a direct threat to the health or safety of others, the agency must make an individualized assessment, based on reasonable judgment that relies on current medical knowledge or on the best available objective evidence to ascertain: the nature, duration, and severity of the risk; the probability that the potential injury will actually occur; and whether reasonable modifications of policies, practices, or procedures will mitigate the risk.

§§ 9.132—9.139 [Reserved]

§ 9.140 Employment.

No qualified individual with disabilities shall, on the basis of disability, be subjected to discrimination in employment under any program or activity conducted by the agency. The definitions, requirements, and procedures of section 501 of the Rehabilitation Act of 1973 (29 U.S.C. 791), as established by the Equal Employment Opportunity Commission in 29 CFR part 1613 (subpart G), shall apply to employment in federally conducted programs or activities.

§§ 9.141—9.148 [Reserved]

§ 9.149 Program accessibility: discrimination prohibited.

Except as otherwise provided in § 9.150, no qualified individual with disabilities shall, because the agency's facilities are inaccessible to or unusable by individuals with disabilities, be denied the benefits of, be excluded from participation in, or otherwise be subjected to discrimination under any program or activity conducted by the agency.

§ 9.150 Program accessibility: existing facilities.

(a) *General.* Except as otherwise provided in paragraph (e) of this section, the agency shall operate each program or activity so that the program or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities. This section does not—

(1) Necessarily require the agency to make each of its existing facilities accessible to and usable by individuals with disabilities;

(2) In the case of historic properties, require the agency to take any action that would result in a substantial impairment of significant historic features of an historic property; or

(3) Require the agency to take any action that it can demonstrate would result in a fundamental alteration in the nature of a program or activity or in undue financial and administrative burdens. In those circumstances where agency personnel believe that the proposed action would fundamentally alter the program or activity or would result in undue financial and administrative burdens, the agency has the burden of proving that compliance with § 9.150(a) would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the Secretary or his or her designee after considering all agency resources available for use in the funding and operation of the conducted program or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, the agency shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits and services of the program or activity.

(b) *Methods.* The agency may comply with the requirements of this section through such means as redesign of equipment, reassignment of services to accessible buildings, assignment of aides to beneficiaries, home visits, delivery of services at alternate accessible sites, alteration of existing facilities and construction of new facilities, use of accessible rolling stock, or any other methods that result in making its programs or activities readily accessible to and usable by individuals with disabilities. The agency is not required to make structural changes in existing facilities where other methods are effective in achieving compliance with this section. The agency, in making alterations to existing buildings, also shall meet accessibility requirements to the extent compelled by the Architectural Barriers Act of 1968, as amended (42 U.S.C. 4151 through 4157), and any regulations implementing it. In choosing among available methods for meeting the requirements of this section, the agency shall give priority to those methods that offer programs and activities to qualified individuals with disabilities in the most integrated setting appropriate.

(c) *Time period for compliance.* The agency shall comply with the obligations established under this section within sixty days of July 18, 1994 except that where structural changes in facilities are undertaken, such changes shall be made within three years of July 18, 1994, but in any event as expeditiously as possible.

(d) *Transition plan.* In the event that structural changes to facilities will be undertaken to achieve program accessibility, the agency shall develop, within six months of July 18, 1994, a transition plan setting forth the steps necessary to complete such changes. The agency shall provide an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the development of the transition plan by submitting comments (both oral and written). A copy of the transition plan shall be made available for public inspection. The plan shall, at a minimum—

(1) Identify physical obstacles in the agency's facilities that limit the accessibility of its programs or activities to individuals with disabilities;

(2) Describe in detail the methods that will be used to make the facilities accessible;

(3) Specify the schedule for taking the steps necessary to achieve compliance with this section and, if the time period of the transition plan is longer than one year, identify steps that will be taken during each year of the transition period; and

(4) Indicate the official responsible for implementation of the plan.

(e) The requirements of paragraphs (a), (b), and (c) of this section shall apply to the Property Disposition Programs. However, this section does not require HUD to make alterations to existing facilities that are part of the Property Disposition Programs unless such alterations are necessary to meet the needs of a current or prospective tenant during the time when HUD expects to retain legal possession of the facilities, and there is no alternative method to meet the needs of that current or prospective tenant. Nothing in this section shall be construed to require alterations to make facilities accessible to persons with disabilities who are expected to occupy the facilities only after HUD relinquishes legal possession.

§ 9.151 Program accessibility: new construction and alterations.

Each building or part of a building that is constructed or altered by, on behalf of, or for the use of the agency shall be designed, constructed, or altered and provide emergency egress so as to be readily accessible to and usable by individuals with disabilities. The definitions, requirements, and accessibility standards that apply to buildings covered by this section are those contained in the UFAS, except where the ADAAG provides for greater accessibility for the type of construction or alteration being undertaken, and in this case, the definitions, requirements and standards of the ADAAG shall apply.

§ 9.152 Program accessibility: alterations of Property Disposition Program multifamily housing facilities.

(a) *Substantial alteration.* If the agency undertakes alterations to a PDP multifamily housing project that has 15 or more units and the cost of the alterations is 75 percent or more of the replacement cost of the completed facility, then the project shall be designed and altered to be readily accessible to and usable by individuals with disabilities. Subject to paragraph (c) of this section, a minimum of five percent of the total dwelling units, or at least one unit, whichever is greater, shall be made accessible for persons with mobility impairments. A unit that is on an accessible route and is adaptable and otherwise in compliance with the standards set forth in paragraph (d) of this section is accessible for purposes of this section. An additional two percent of the units (but not less that one unit) in such a project shall be accessible for persons with hearing or vision impairments. If state or local requirements for alterations require greater action than this paragraph, those requirements shall prevail.

(b) *Other alteration.* (1) Subject to paragraph (c) of this section, alterations to dwelling units in a PDP multifamily housing project shall, to the maximum extent feasible, be made to be readily accessible to and usable by individuals with disabilities. If alterations of single elements or spaces of a dwelling unit, when considered together, amount to an alteration of a dwelling unit, the entire dwelling unit shall be made accessible. Once five percent of the dwelling units in a project are readily accessible to and usable by individuals with mobility impairments, then no additional elements of dwelling units, or entire dwelling units, are required to be accessible under this paragraph. Once two percent of the dwelling units in a project are readily accessible to or usable by individuals with hearing or vision impairments, then no additional elements of dwelling units, or entire dwelling units, are required to be accessible under this paragraph.

(2) Alterations to common areas or parts of facilities that affect accessibility of existing housing facilities, shall, to the maximum extent feasible, be made to be accessible to and usable by individuals with disabilities.

(c) The agency may establish a higher percentage or number of accessible units than that prescribed in paragraphs (a) or (b) of this section if the agency determines that there is a need for a higher percentage or number, based on census data or other available current data. In making such a determination, HUD shall take into account the expected needs of eligible persons with and without disabilities.

(d) The definitions, requirements, and accessibility standards that apply to PDP multifamily housing projects covered by this section are those contained in the UFAS, except where the ADAAG provides for greater accessibility for the type of alteration being undertaken, and, in this case, the definitions, requirements and standards of the ADAAG shall apply.

(e) With respect to multifamily housing projects operated by HUD, but in which HUD does not have an ownership interest, alterations under this section need not be made if doing so would impose undue financial and administrative burdens on the operation of the multifamily housing project

§ 9.153 Distribution of accessible dwelling units.

Accessible dwelling units required by § 9.152 shall, to the maximum extent feasible, be distributed throughout projects and sites and shall be available in a sufficient range of sizes and amenities so that a qualified individual with disabilities' choice of living arrangements is, as a whole, comparable to that of other persons eligible for housing assistance under the same agency conducted program. This provision shall not be construed to require (but does allow) the provision of an elevator in any multifamily housing project solely for the purpose of permitting location of accessible units above or below the accessible grade level.

§ 9.154 Occupancy of accessible dwelling units.

(a) The agency shall adopt suitable means to assure that information regarding the availability of accessible units in PDP housing facilities reaches eligible individuals with disabilities, and shall take reasonable nondiscriminatory steps to maximize the utilization of such units by eligible individuals whose disability requires the accessibility features of the particular unit. To this end, when an accessible unit becomes vacant, the agency (or its management agent) before offering such units to an applicant without disabilities shall offer such unit:

(1) First, to a current occupant of another unit of the same project, or comparable projects under common control, having disabilities requiring the accessibility features of the vacant unit and occupying a unit not having such features, or, if no such occupant exists, then

(2) Second, to an eligible qualified applicant on the waiting list having a

disability requiring the accessibility features of the vacant unit.

(b) When offering an accessible unit to an applicant not having disabilities requiring the accessibility features of the unit, the agency may require the applicant to agree (and may incorporate this agreement in the lease) to move to a non-accessible unit when available.

§ 9.155 Housing adjustments.

(a) The agency shall modify its housing policies and practices as they relate to PDP housing facilities to ensure that these policies and practices do not discriminate, on the basis of disability, against a qualified individual with disabilities. The agency may not impose upon individuals with disabilities other policies, such as the prohibition of assistive devices, auxiliary aids, alarms, or guides in housing facilities, that have the effect of limiting the participation of tenants with disabilities in any agency conducted housing program or activity in violation of this part. Housing policies that the agency can demonstrate are essential to the housing program or activity will not be regarded as discriminatory within the meaning of this section if modifications would result in a fundamental alteration in the nature of the program or activity or undue financial and administrative burdens.

(b) The decision that compliance would result in such alteration or burdens must be made by the Secretary or his or her designee after considering all agency resources available for use in the funding and operation of the conducted program or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action required to comply with this section would result in such an alteration or such burdens, the agency shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that, to the maximum extent possible, individuals with disabilities receive the benefits and services of the program or activity.

§ 9.160 Communications.

(a) The agency shall take appropriate steps to ensure effective communication with applicants, participants, personnel of other Federal entities, and members of the public.

(1) The agency shall furnish appropriate auxiliary aids where necessary to afford an individual with disabilities an equal opportunity to participate in, and enjoy the benefits of, a program or activity conducted by the agency.

(i) In determining what type of auxiliary aid is necessary, the agency shall give primary consideration to the requests of the individual with disabilities.

(ii) The agency need not provide individually prescribed devices, readers for personal use or study, or other devices of a personal nature.

(2) Where the agency communicates with applicants and beneficiaries or members of the public by telephone, telecommunication devices for deaf persons (TDD's) or equally effective telecommunication systems shall be used to communicate with persons with impaired hearing.

(b) The agency shall ensure that interested persons, including persons with impaired vision or hearing, can obtain information as to the existence and location of accessible services, activities, and facilities.

(c) The agency shall provide signage at a primary entrance to each of its inaccessible facilities, directing users to a location at which they can obtain information about accessible facilities. The international symbol for accessibility shall be used at each primary entrance of an accessible facility.

(d) This section does not require the agency to take any action that it can demonstrate would result in a fundamental alteration in the nature of a program or activity or in undue financial and administrative burdens. In those circumstances where agency personnel believe that the proposed action would fundamentally alter the program or activity or would result in undue financial and administrative burdens, the agency has the burden of proving that compliance with this section would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the Secretary or his or her designee after considering all agency resources available for use in the funding and operation of the conducted program or activity and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action required to comply with § 9.160 would result in such an alteration or such burdens, the agency shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that, to the maximum extent possible, individuals with disabilities receive the benefits and services of the program or activity.

§ 9.170 Compliance procedures.

(a) Except as provided in paragraph (b) of this section, this section applies to all allegations of discrimination on the basis of disability in programs or activities conducted by the agency.

(b) The agency shall process complaints alleging violations of section 504 with respect to employment according to the procedures established by the Equal Employment Opportunity Commission in 29 CFR part 1613 under section 501 of the Rehabilitation Act of 1973 (29 U.S.C. 791).

(c) The Responsible Official shall coordinate implementation of this section.

(d) Persons may submit complete complaints to the Assistant Secretary for Fair Housing and Equal Opportunity, 451 Seventh St., SW., Washington, DC 20410, or to any HUD Area Office. The agency shall accept and investigate all complete complaints for which the agency has jurisdiction. All complete complaints shall be filed within 180 days of the alleged act of discrimination. The agency may extend this time period for good cause. For purposes of determining when a complaint is filed, a complaint mailed to the agency shall be deemed filed on the date it is postmarked. Any other complaint shall be deemed filed on the date it is received by the agency. The agency shall acknowledge all complaints, in writing, within ten (10) working days of receipt of the complaint.

(e) If the agency receives a complaint over which it does not have jurisdiction, it shall promptly notify the complainant and shall make reasonable efforts to refer the complaint to the appropriate Government entity.

(f) The agency shall notify the Architectural and Transportation Barriers Compliance Board upon receipt of any complaint alleging that a building or facility that is subject to the Architectural Barriers Act of 1968, as amended (42 U.S.C. 4151 through 4157), is not readily accessible to and usable by individuals with disabilities. The agency shall delete the identity of the complainant from the copy of the complaint.

(g)(1) Within 180 days of the receipt of a complete complaint for which it has jurisdiction, the Office of Fair Housing and Equal Opportunity shall complete the investigation of the complaint, attempt informal resolution, and if no informal resolution is achieved, issue a letter of findings. If a complaint is filed against the Office of Fair Housing and Equal Opportunity, the Secretary or a designee of the Secretary shall investigate and resolve the complaint through informal agreement or letter of findings.

(2) If a complaint is resolved informally, the terms of the agreement

shall be reduced to writing and made part of the complaint file, with a copy of the agreement provided to the complainant and the agency. The written agreement may include a finding on the issue of discrimination and shall describe any corrective action to which the complainant and the respondent have agreed.

(3) If a complaint is not resolved informally, the Office of Fair Housing and Equal Opportunity or a person designated under this paragraph shall notify the complainant of the results of the investigation in a letter containing—

(i) Findings of fact and conclusions of law;

(ii) A description of a remedy for each violation found;

(iii) A notice of the right to appeal to the Secretary;

(h)(1) Appeals of the findings of fact and conclusions of law or remedies must be filed by the complainant within 90 days of receipt from the agency of the letter required by § 9.170(g). The Assistant Secretary or the person designated by the Secretary to decide an appeal of a complaint filed against the Office of Fair Housing and Equal Opportunity may extend this time for good cause.

(2) Timely appeals shall be accepted and processed by the Assistant Secretary. Decisions on an appeal shall not be issued by the person who made the initial determination.

(i) The Assistant Secretary or the person designated by the Secretary to decide an appeal of a complaint filed against the Office of Fair Housing and Equal Opportunity shall notify the complainant of the results of the appeal within 60 days of the receipt of the request. If the agency determines that it needs additional information from the complainant, it shall have 60 days from the date it receives the additional information to make its determination on the appeal.

(j) The time limits cited in paragraphs (g) and (i) of this section may be extended with the permission of the Assistant Attorney General.

(k) The agency may delegate its authority for conducting complaint investigations to other Federal agencies, except that the authority for making the final determination may not be delegated to another agency.

Dated: June 9, 1994

Henry G. Cisneros,

Secretary.

Part VI

Department of Labor

Office of Labor-Management Standards

29 CFR Part 417

Local Labor Organization Officers; Procedure for Removal; Proposed Rule

DEPARTMENT OF LABOR

Office of Labor-Management Standards

29 CFR Part 417

RIN 1294–AA10

Procedure for Removal of Local Labor Organization Officers

AGENCY: Office of Labor-Management Standards, Office of the American Workplace, Labor.

ACTION: Proposed rule.

SUMMARY: The Department of Labor is proposing to amend the regulation pertaining to the procedure for removal of local labor organization officers pursuant to section 401(h) of the Labor-Management Reporting and Disclosure Act of 1959, as amended (LMRDA). Section 417.16 presently gives the Secretary of Labor the authority to bring suit against a union after a member has filed a complaint with the Secretary alleging that the local labor organization has failed to follow the officer removal procedures contained in the organization's constitution and bylaws. This proposed rule deletes that language, which purports to give the Secretary general authority to bring suit against a union for failing to follow its officer removal procedures even if the inadequacy of the procedure has not been established. This change will bring the regulation into conformity with a court of appeals decision that held that the Secretary lacks such authority.

DATES: Interested parties may submit written comments on this proposal. All comments must be submitted by August 15, 1994.

ADDRESSES: Written comments should be submitted to Edmundo Gonzales, Deputy Assistant Secretary for Labor-Management Standards, Office of the American Workplace, U.S. Department of Labor, 200 Constitution Avenue, NW., room N–5605, Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Kay H. Oshel, Chief, Division of Interpretations and Standards, Office of Labor-Management Standards, Office of the American Workplace, U.S. Department of Labor, 200 Constitution Avenue, NW., room N–5605, Washington, DC 20210; (202) 219–7373. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title IV of the Labor-Management Reporting and Disclosure Act of 1959, as amended (LMRDA), governs the election and removal of labor organization officers. Section 401(h) of the LMRDA (29 U.S.C. 481(h)) provides that if the Secretary of Labor, upon application of a member of a local labor organization, finds after a hearing in accordance with the Administrative Procedure Act, that the constitution and bylaws of the labor organization do not provide an adequate procedure for the removal of an elected officer guilty of serious misconduct, such officer may be removed for cause shown and after notice and hearing, by the members in good standing voting in a secret ballot conducted by the officers of such labor organization in accordance with its constitution and bylaws insofar as they are not inconsistent with the provisions of Title IV of the LMRDA.

The Department has interpreted section 401(h); when read in conjunction with section 402(a), as additionally granting the Secretary of Labor the authority to file suit against a union for failure to follow removal procedures whose adequacy has not been challenged. Section 402(a) states in part that "(a) a member of a labor organization: (1) Who has exhausted the remedies available under the constitution and bylaws of such organization and of any parent body, or (2) who has invoked such available remedies without obtaining a final decision within three calendar months after their invocation, may file a complaint with the Secretary within one calendar month thereafter alleging the violation of any provision of section 401 (*including violation of the constitution and bylaws of the labor organization pertaining to the election and removal of officers*) (emphasis added) * * *." Subpart B of 29 CFR part 417 implements this interpretation.

In *Donovan* v. *Hotel, Motel & Restaurant Employees Local 19*, 700 F.2d 539 (9th Cir. 1983), however, the court held, after examining the legislative history of the Act, that the LMRDA does not authorize the Secretary to bring civil action against a union for failure to follow its concededly adequate officer removal procedure. *Local 19* rejected the Secretary's reliance on section 402(a) as a basis for extending his authority under section 401(h) to intervene in officer removal proceedings where an adequate removal procedure exists. The court concluded that those regulations found in subpart B of 29 CFR part 417 which purport to give the Secretary general authority to intervene in union affairs upon a finding that a union has failed to follow its adequate removal procedures are void for lack of statutory authority.

Local 19 is the only judicial decision that addresses this issue, and the Department has determined, upon review, that the holding of the court in *Local 19* is correct. The Department therefore proposes to delete the language in subpart B of 29 CFR part 417 granting the Secretary authority to file suit against a union for failure to follow its adequate officer removal procedures.

Administrative Notices

A. Executive Order 12866

The Department of Labor has determined that this rule is not a significant regulatory action as defined in section 3(f) of Executive Order 12866 in that it will not: (1) Have an annual effect on the economy of $100 million or more, or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities, (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency, (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof, or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in Executive Order 12866.

B. Regulatory Flexibility Act

The Agency Head has certified that this proposed rule, if issued, will not have a significant impact on a substantial number of small entities as defined in the Regulatory Flexibility Act. The proposed rule will only apply to local labor organizations and would decrease the regulation of such labor organizations. However, the Department has determined that labor organizations regulated pursuant to the statutory authority granted under the LMRDA do not constitute small entities. Therefore, a regulatory flexibility analysis is not required.

C. Paperwork Reduction Act

This rule contains no information collection requirements. Therefore, the Paperwork Reduction Act of 1980, as amended, is not applicable.

List of Subjects in 29 CFR Part 417.

Labor unions

Text of Proposed Rule

In consideration of the foregoing, the Department of Labor proposes that subpart B of part 417 of title 29, Code of Federal Regulations, be amended as follows:

PART 417—PROCEDURE FOR REMOVAL OF LOCAL LABOR ORGANIZATION OFFICERS

In the authority citation for part 417 continues to read as follows:

Authority: Secs. 401, 402, 73 Stat. 533, 534 (29 U.S.C. 481, 482); Secretary Order No. 2–93 (58 FR 42578).

2. The heading part 417, subpart B, is revised to read as follows:

Subpart B—Procedures Upon Failure of Union to Act Following Subpart A Procedures

3. 29 CFR 417.16 is revised to read as follows:

§ 417.16 Initiation of proceedings.

(a) Any member of a local labor organization may file a complaint with the Office of Labor-Management Standards alleging that following a finding by the Assistant Secretary pursuant to Subpart A that the constitution and bylaws of the labor organization pertaining to the removal of officers are inadequate, or a stipulation of compliance with the provisions of section 401(h) of the Act reached with the Director in connection with a prior charge of the inadequacy of a union's constitution and bylaws to remove officers, as provided in subpart A of this part, the labor organization: (1) Has failed to act within a reasonable time, or (2) has violated the procedures agreed to with the Director, or (3) has violated the principles governing adequate removal procedures under § 417.2(b)

(b) The complaint must be field pursuant to section 402(a) of the Act within one calendar month after one of the two following conditions has been met: (1) The member has exhausted the remedies available to him under the constitution and bylaws of the organization, or (2) the member has invoked such remedies without obtaining a final decision within three calendar months after invoking them.

Signed in Washington, DC this 9th day of June, 1994.

Martin Manley,

Assistant Secretary for the American Workplace.

Part VII

Department of Education

34 CFR Part 386

Rehabilitation Training: Rehabilitation Long-Term Training; Final Rule

DEPARTMENT OF EDUCATION

34 CFR Part 386

RIN 1820–AB21

Rehabilitation Training: Rehabilitation Long-Term Training

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary amends the regulations governing grants for long-term training to implement the Rehabilitation Act Amendments of 1992 and the Technology-Related Assistance for Individuals With Disabilities Act Amendments of 1994. The Rehabilitation Long-Term Training program is authorized by section 302 of Title III of the Rehabilitation Act of 1973, as amended (the Act). The purpose of this discretionary grant program is to fund projects to provide academic training in areas of personnel shortages identified by the Secretary.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person. A document announcing the effective date will be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Richard Melia, U.S. Department of Education, 400 Maryland Avenue, SW., Room 3324 Switzer Building, Washington, DC 20202–2649. Telephone (202) 205–9400. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: These final regulations implement changes made by the Rehabilitation Act Amendments of 1992 (Pub. L. 102–569) and the Technology-Related Assistance for Individuals With Disabilities Act Amendments of 1994 (Pub. L. 103–218). These amendments direct the Secretary to issue regulations, as appropriate, to carry out the provisions of the Rehabilitation Act of 1973, as amended.

This program supports the National Education Goal that, by the year 2000, every adult American be literate and possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship. The Department supports a variety of training activities for vocational rehabilitation personnel so that they may assist individuals with disabilities in gaining the knowledge and skills to obtain employment and compete in a global economy.

On October 8, 1993, the Secretary published a notice of proposed rulemaking (NPRM) for the Rehabilitation Long-Term Training program in the **Federal Register** (58 FR 52606). The major issues related to this program are discussed in the preamble to the NPRM. Significant changes resulting from public comment since publication of the NPRM include—(1) A waiver provision for part of the non-Federal share of the cost of a project if an applicant demonstrates that it does not have sufficient resources for the entire match; (2) An exemption for existing projects from the requirement to direct 75 percent of the total award to scholarships; and (3) A broadening of the term "deaf" to include individuals who are "hard of hearing" and of the term "blind" to include individuals who have "vision impairment."

In addition, after the NPRM was published, the Technology-Related Assistance for Individuals With Disabilities Act Amendments of 1994 (Pub. L. 103–218) was enacted. Those amendments included a technical change to the Rehabilitation Act of 1973, as amended, in the area of rehabilitation training. That statutory change has been incorporated into these regulations by adding the use, applications, and benefits of assistive technology devices and assistive technology services to the list of areas of personnel shortages identified in § 386.1.

Analysis of Comments and Changes

In response to the Secretary's invitation in the NPRM, 386 parties submitted comments on the proposed regulations. An analysis of the comments and of the changes in the regulations since publication of the NPRM follows.

Major issues are grouped according to subject, with appropriate sections of the regulations referenced in parentheses. Other substantive issues are discussed under the section of the regulations to which they pertain. Technical and other minor changes are not addressed.

General Comments

Intent of Change in Long-Term Training Regulations

Comment: A commenter expressed the opinion that since university programs have long been addressed in the long-term category, the change in regulations appears to be intended to eliminate any training that results in less than an academic degree.

Discussion: Approximately 70 percent of grants under the Rehabilitation Long-Term Training program are currently for academic training. The 30 percent that are non-academic are concentrated in several areas: Administration, prosthetics and orthotics, community rehabilitation personnel, mental illness, independent living, client assistance program, supported employment, and deafness. The intent is not to eliminate any training for less than an academic degree, but to clarify and focus the specific mission of each training authority to improve program management. Regulations that accurately reflect the program purpose of providing academic training in areas of personnel shortages identified by the Secretary permit targeted allocations of funds to specific personnel needs, facilitate pertinent outcome measures, and ensure that administrative requirements relating to proposal evaluations, scholarships, recordkeeping, matching, and reporting are appropriate.

Changes: None.

Insufficient Public Input in the Regulations Development Process

Comments: There were a number of comments stating that the proposed regulations were developed without participation of the rehabilitation field.

Discussion: The Secretary agrees that open and extensive public participation strengthens the regulations process. In fact, extensive public input was obtained when the Rehabilitation Services Administration (RSA) convened a public meeting on rehabilitation training and published a notice requesting written public comments in May 1991. Comments received provided useful information that was considered in crafting the regulations. Also, training meetings were held throughout the United States in 1993 on the Rehabilitation Act Amendments.

Changes: None.

The Department Should Conduct a Needs Assessment Before Enacting New Regulations That Reduce or Eliminate Post-Employment Training for Rehabilitation Personnel

Comments: Most of the comments calling for needs assessments were from direct service providers who were concerned that the academic program emphasis in the Rehabilitation Long-Term Training program would reduce or eliminate crucial training for current service delivery personnel.

Discussion: The Department has conducted needs assessments of the training needs of personnel providing vocational rehabilitation services to individuals with disabilities since 1983 and will continue to do so in the future, as the authorizing statute requires it.

Changes: None.

Funding Post-Employment Training if Long-Term Training Regulations Are Enacted

Comments: A number of commenters expressed concern that there appears to be no money to provide post-employment training under training authorities other than long-term training. Commenters requested that, if the Rehabilitation Long-Term Training program is to be substantially changed, new regional networks of community-based continuing education units be established. These units would be similar to the Rehabilitation Continuing Education Programs and would be focused on individuals at the front lines of service delivery. Several commenters suggested that separate regulations could be developed for university and non-university grant recipients.

Discussion: The Secretary agrees that post-employment training needs of community rehabilitation training providers should be addressed, in part, by a network of regional continuing education programs. The Secretary annually allocates funds to address personnel shortages of qualified rehabilitation personnel. These funds are targeted to address training needs by professional discipline and rehabilitation jobs. The Secretary submits an annual report to the Congress containing and justifying rehabilitation training allocations in detail. The Secretary has authority to allocate funds from the long-term training area to continuing education or other short-term or specialized training for post-employment training of community rehabilitation personnel.

Changes: None.

Specific Comments by Section

The Program Purpose of Rehabilitation Long-Term Training (§§ 386.1 and 386.20(g)(2)

Comments: A number of commenters supported inclusion of academic training as the primary purpose of the Rehabilitation Long-Term Training program. They stated that the emphasis on academic outcomes is consistent with the requirements of the Rehabilitation Act Amendments of 1992 (1992 Amendments) to the Rehabilitation Act, which stress the use of "qualified" personnel. However, a number of other commenters asked about the statutory authority for funding only academic programs and excluding continuing education programs under the Rehabilitation Long-Term Training program. These commenters argued that there is no justification in the Rehabilitation Act for stating that the purpose of RSA's Long-Term Training program is to provide "academic" training.

Discussion: Section 302 of the Rehabilitation Act, as amended, is the statutory basis for the rehabilitation training programs. Except for the in-service training program, which now is included in the Act, the specific rehabilitation training programs, including the Rehabilitation Long-Term Training program, are established in regulations issued by the Secretary based on the statutory authority in section 302. The Secretary establishes programs so that each has a specific mission defined in regulations with appropriate outcome measures. The Secretary believes that the long-term training program should be focused on academic training.

Changes: None

Client Assistance Program (CAP) (§ 386.1)

Comments: Several commenters observed that preparation for employment in client assistance programs is not currently offered in academic training settings and that CAP training should continue to be provided under long-term training.

Discussion: The Secretary agrees that no current academic training exists for preparing individuals to work in client assistance programs and that there is a demonstrated need for continued post-employment training of CAP personnel. Existing CAP training projects will continue to be funded until their current grant periods end. The Secretary plans to invite future applications for CAP training under the provisions in section 302 of the Act and in the general regulations for Rehabilitation Training in 34 CFR part 385. Future CAP training notices will be targeted to specific needs for training and technical assistance and published for public comment before applications are solicited.

Changes: None.

Fields of Study Under the Rehabilitation Long-Term Training Program (§ 386.1)

Comments: Several commenters suggested revisions in the listing of fields of study to conform with the listing of fields of study in section 302(b)(1)(B) of the Rehabilitation Act and to include additional, specific fields, such as vision therapy and rehabilitation computer systems.

Discussion: The listing of fields in the Rehabilitation Act does not provide enough detail. For example, a specific category is needed for the Secretary to target training resources for the preparation of specialized personnel for individuals who are blind or have vision impairment. The list of 30 areas established in regulations builds upon the listing in the Act by using areas that have been included in past long-term training competitions because they are areas where needs assessments show continuing needs. The Secretary has the authority under § 386.1(b)(30) of the regulations to invite applications in other fields, such as vision therapy and rehabilitation computer systems, contributing to the rehabilitation of individuals with disabilities. Also, the Experimental and Innovative Training program (34 CFR part 387) offers opportunities for submittal of proposals to develop new types of training programs for rehabilitation personnel.

Changes: None.

Use of the Term "Blind" and the Term "Deaf" (§ 386.1)

Comments: One commenter suggested that the term "blind" be eliminated because it connotes the absence of vision, and the vast majority of individuals who are targeted for rehabilitation under this category have residual vision (i.e., are partially sighted). Another commenter suggested substituting a broader category that would include blind individuals as well as other individuals with visual impairment. One Commenter suggested elimination of the term "deaf" as it connotes the absence of hearing, and many individuals served under the Rehabilitation Act have partial hearing loss. The commenter suggested use of a more inclusive phrase, such as persons with hearing loss.

Discussion: The Secretary agrees that a change is needed in the identification of these categories of training. In the past, the Act included specialized personnel in providing services to individuals who are blind and to individuals who are deaf among the targeted areas of personnel shortages to which training projects might be directed. The terms "blind" and "deaf" were not specifically defined, but were broadly interpreted to include individuals with partial or total vision or hearing loss. The 1992 Amendments removed the terms "blind" and "deaf" from the listing of training areas in section 302(b)(1) and substituted training of personnel to provide services to individuals with specific disabilities

Since the regulations in 34 CFR part 386 provide the basis for specific allocations of training funds to targeted areas of personnel shortages, it is particularly important that the listing of targeted areas be as specific and inclusive as possible.

Changes: The Secretary has included "specialized personnel for rehabilitation of individuals who are blind or have vision impairment" and "specialized personnel for rehabilitation of individuals who are deaf or hard of hearing" as targeted areas within § 386.1 for training allocations.

Lack of Academic Training in Guam (§ 386.1)

Comment: One commenter expressed concern that rehabilitation training in Guam, which in the past has been provided through continuing education projects under the long-term training program, will no longer be available.

Discussion: The Secretary recognizes the need for improved access to rehabilitation training for Guam and other remote and isolated areas. The Secretary believes that these needs will be met, in part, by distance learning training, which was first funded in fiscal year 1993 as a result of the 1992 Amendments (section 803(a) of the Rehabilitation Act of 1973, as amended).

Changes: None.

Eligibility of State Agencies and Other Public or Nonprofit Agencies and Organizations, Including Institutions of Higher Education, Under the Rehabilitation Long-Term Training Program (§ 386.2)

Comment: One commenter noted that, since State agencies and other public or nonprofit agencies do not offer degrees or certificates, maintaining those organizations as eligible applicants implies the intent to continue non-academic long-term training.

Discussion: Section 302(a) of the Act establishes the broad eligibility criteria for applicants under the Rehabilitation Long-Term Training program. The Secretary is aware of the rapidly changing auspices and circumstances under which specialized academic and certificate training is offered in the field of rehabilitation. Consortia and partnerships of States, public or nonprofit private agencies and organizations, and institutions of higher education may be formed to address rehabilitation training needs. The Secretary encourages those efforts and desires regulations that will facilitate new approaches through flexibility in eligibility requirements.

Changes: None.

Professional Corporation or Professional Practice (§ 386.4)

Comment: One commenter wrote in support of the provisions in the regulations that define professional corporation or professional practice.

Discussion: The Secretary appreciates the support for the definition of professional corporation or professional practice.

Changes: None.

Related Agency (§ 386.4)

Comment: One commenter suggested substituting the legislative definition of "community rehabilitation program" in place of the language proposed in § 386.4(b) describing related agencies that are not American Indian rehabilitation programs.

Discussion: Section 7(25) of the Act includes an expanded definition of "community rehabilitation program." The Secretary reviewed the definition of community rehabilitation program in preparing regulations implementing the Rehabilitation Act Amendments of 1992. There is not an exact match between the expanded definition of community rehabilitation program in Title I of the Act and the legislative definition of related agency in Title III. Therefore, "community rehabilitation program" was not used in the definition of related agency.

Changes: None.

Including Specific References to Culturally Diverse Populations in Appropriate Sections of the Regulations (§§ 386.1, 386.20, 386.33, and 386.40)

Comments: Several commenters felt that, although individuals who are unserved or underserved by programs under the Act are specifically referenced in the description of the Rehabilitation Long-Term Training program, policies and procedures to include culturally diverse recruitment and retention efforts should be implemented for all 30 categories of rehabilitation training. Selection criteria should be modified to give credit for program development related to culturally diverse populations.

Discussion: The Secretary agrees that it is essential that all requirements in the Rehabilitation Act of 1973, as amended, are implemented to ensure equal access and outreach for traditionally underserved populations, including minorities. At present, the primary method for directing rehabilitation training program grantees to meet those requirements is through the assurances mandated for each applicant. The Department is currently working to implement section 21 of the Act, including outreach services and other related activities, to enhance the capacity of minority institutions to compete for grants, contracts, and cooperative agreements. In the future, the Department may propose specific priorities or selection criteria that address needs of traditionally underserved populations across the range of rehabilitation discretionary programs.

Changes: None.

Minimum 10 Percent Matching Requirement (§ 386.30)

Comments: Many comments were received objecting to the requirement that the Federal share of an award may not be more than 90 percent of the total cost of a project under this program. A number of commenters pointed out that the eight percent indirect costs currently allowed by the Department on training awards do not cover current administrative costs. Concern was expressed that many universities would not provide a 10 percent match. Some commenters observed that the present negotiated system offers flexibility. Many commenters pointed out that post-employment training programs for community rehabilitation personnel would have difficulty with the 10 percent required match. Some university commenters indicated that their institutions face substantial resource problems. Other commenters asked if the match could be in-kind. One commenter wrote that the limitation of 90 percent Federal support for proposed projects is fair and reasonable.

Discussion: The Rehabilitation Act of 1973, as amended, requires a matching component for rehabilitation training grants. The Secretary believes that, if the Department states the minimum matching amount in advance of negotiations, the award process is more understandable and efficient. Most current academic grantees under the Rehabilitation Long-Term Training program have negotiated awards with a match in excess of 10 percent. The Secretary is aware that a number of non-academic, post-employment training grantees under this program have experienced difficulty meeting even a 10 percent matching requirement. This problem will be solved, in part, by funding some future awards with a post-employment focus under the Rehabilitation Continuing Education program in which the current matching requirement as presented in recent closing date announcements is four percent. In all instances, the applicant share may be in-kind. As a result of a recent program audit that identified

problems in the use of faculty time for in-kind matching, the Secretary prefers that the applicant share in the Rehabilitation Long-Term Training program by directly funding student scholarship assistance as the designated match.

Changes: The 10 percent matching requirement remains, but a new provision has been added indicating that the Secretary may waive part of the non-Federal share of the cost of the project if the applicant demonstrates during the negotiations process that it does not have sufficient resources to contribute the entire match.

Requirements for Directing Grant Funds: Adverse Impact of the Requirement That a Grantee Must Use at Least 75 Percent of Total Award for Scholarships as Defined in § 386.4 (§ 386.31)

Comments: Numerous commenters, primarily from community rehabilitation programs and related personnel training programs, expressed concern that the proposed 75 percent scholarship requirement would limit access of community rehabilitation program personnel to needed continuing education programs.

Discussion: The Secretary agrees that personnel employed in community rehabilitation programs should continue to receive short-term, continuing rehabilitation training. This will be accomplished by offering that training under other, more appropriate Rehabilitation Training program categories, including 34 CFR part 389 (Rehabilitation Continuing Education Programs) and 34 CFR part 390 (Rehabilitation Short-Term Training). The Secretary believes that the availability of needed post-employment training for community rehabilitation personnel will be provided through regional continuing education programs. However, the Secretary wants to ensure that all currently funded multi-year long-term training projects continue for the remainder of their project period.

Changes: A new provision has been added (§ 386.31(c)) stating that the requirement for a grantee to use at least 75 percent of the total award for scholarships does not apply for the remainder of the project period for multi-year projects in existence as of October 1, 1994.

Comments: One commenter expressed concern that directing long-term training programs to use at least 75 percent of their total award for scholarships will reduce cross-training of professionals who work with individuals with disabilities.

Discussion: The Secretary believes that rehabilitation short-term, continuing education, and in-service training programs offer excellent opportunities for cross-training of rehabilitation professionals. In addition, the Secretary believes that existing professional program accreditation processes and individual licensure and certification procedures by national, State, and professional organizations are attentive to cross-training needs.

Changes: None.

Comments: Several commenters observed that scholarships are not needed in a prosthetic or orthotic curriculum because programs attract more than enough qualified students. Moreover, it was noted that prosthetic and orthotic programs are costly to operate. Students attend labor intensive lab classes with a low student to instructor ratio. Although programs are making changes that will reduce expenses, supply and equipment costs are high, and without additional Federal support, it would be difficult to operate them. Many students now take loans to pay for their education, are supported by employers, or are self-supporting. Supplementation of these resources with direct student support from RSA could be useful, but the commenters do not feel this should be the primary method of support.

Discussion: The Secretary acknowledges that prosthetics and orthotics (P & O) rehabilitation training is highly individualized and often requires intensive lab supervision and high equipment costs. The Secretary will take these unique circumstances, to the extent that they are supported with evidence in the proposal, into consideration in reviewing the requirement to direct at least 75 percent of the total award for scholarships. The Secretary is concerned by the argument that scholarships are not needed in P & O because the field attracts more than enough students. The purpose of the Rehabilitation Long-Term Training program is to provide academic training in areas of personnel shortages identified by the Secretary. P & O has been identified as an area with personnel shortages, and providing students with scholarships ensures that the work-or-repay provisions of the Rehabilitation Act will direct graduates to service in support of State rehabilitation agencies in areas of personnel shortages.

Changes: None.

Comments: A number of commenters requested that the current regulations be maintained to address specialized nonacademic programs in deafness, blindness, mental illness, independent living, and in vocational evaluation because unique, one-of-a-kind projects currently funded under long-term training would no longer be eligible for support under the new regulations.

Discussion: The Secretary believes that the Rehabilitation Long-Term Training program cannot be expected to meet all specialized training needs, particularly in nonacademic areas. The Secretary plans to make greater use of the extensive flexibility provided by section 302 of the Act and the six specific rehabilitation training programs to ensure that specialized training needs are addressed.

Changes: None.

Comments: Several representatives of tribal-controlled colleges commented that, because of support that they receive from the Bureau of Indian Affairs for each Native American student, there is less need for stipends and scholarships as student incentives. Tribal-controlled colleges, however, need greater levels of financial support to maintain national and regional networks through faculty travel, for supervision at internship sites, for course development, and for materials development. Commenters were concerned that the 75 percent limit would hurt program growth and quality and would be detrimental to undergraduate rehabilitation programs in rural regions where graduates work with American Indian clients.

Discussion: The Secretary agrees that tribal-controlled colleges and other training programs for Native Americans often conduct rehabilitation training under unique circumstances. Under § 386.31(b), the Secretary may award grants that use less than 75 percent of the total award for scholarships based on the unique nature of the project. It will be particularly important for applicants to document the unique circumstances that apply in their proposals to assist the Secretary in making this determination.

Changes: None.

Comments: Two commenters observed that, if a quantitative requirement regarding the percentage of funds directed to scholarships is necessary, there should be a reduction in the limit and a broadening of the unique circumstances under § 386.31(b) if less than 75 percent of the funds are devoted to scholarships. The Department should provide examples of circumstances of projects funded with less than 75 percent in scholarships. In addition, projects should be approved that demonstrate that the shortage they intend to meet is best met by funding training program resources such as faculty and equipment. Many traditional degree or certificate granting disciplines, such as physical medicine

and rehabilitation and its residency programs, are limited because of the lack of adequate numbers of faculty and, therefore, programs. Also, there should be an exception for training programs in newly emerging areas, such as independent living, that do not have degrees or certificates.

Discussion: The Secretary believes that a quantitative limit is necessary to establish clear standards for all applicants. Current long-term training grants average over $100,000 per year; therefore, a grant with 75 percent of the award targeted for scholarships will still have more than $25,000 for other related costs. Broadening the circumstances under which unique projects may be supported that use less than 75 percent of the total award for scholarships is not consistent with the overall objective of the long-term training program.

Changes: None.

Comments: Many commenters from university rehabilitation training programs expressed concern that programs at their institutions might be discontinued if Federal funds were required to be directed to student support rather than for paying for instructional costs.

Discussion: Existing regulations require academic training projects with a multi-year project period to increase the grantee's share of teaching costs progressively in each succeeding year so that total personnel costs are fully absorbed by the grantee at the termination of the project period. The 75 percent requirement provides greater latitude than existing regulations.

Changes: None.

Requirements for Directing Grant Funds: The Department of Education Should Target Priorities To Require Grantees To Award Specific Degrees or Certificates (§ 386.31).

Comments: One commenter requested that the Secretary use program announcements to target programs on degrees and certificates in appropriate areas. Two commenters requested that the Secretary be sensitive to individual student preferences for attending degree or certificate programs.

Discussion: The Secretary believes that current professional accreditation by the designated accrediting agency in the professional field in which grant support is being provided is adequate assurance that an academic program offers an appropriate degree. From time to time, the Secretary may assign an absolute priority to proposals offering a specific degree or certificate if the Secretary has determined that personnel shortages in the professional field require that preference. Those priorities will be presented for public comment before applications are solicited. The Secretary agrees that, to the extent possible in responding to personnel shortages, a wide range of degree and certificate programs offering Federal rehabilitation scholarship assistance should be available to facilitate student choice. However, no change in the regulations is required.

Changes: None.

Exclusion of Federal Employees From Receiving Training Scholarships (§ 386.33(a)(2))

Comment: One commenter protested that this is not a fair regulation because it discriminates against a group of people—Federal employees. The example was a full-time GS–7 Federal correctional officer enrolled in a rehabilitation counseling program at a university with an RSA grant.

Discussion: The Secretary agrees that the limitation on Federal employees serves no useful purpose.

Changes: The restrictive language has been dropped.

Grantee Disbursement and Scholarship Assurance Provisions (§§ 386.33 Through 386.43)

Comments: Several commenters called for a less adversarial phrasing of scholarship conditions to enhance recruitment of trainees. Other suggestions included placing the burden on the scholar (at the time of the exit interview) to report to the grantee using a packet containing several change-of-address forms, change-of-employment forms, and a completion of work obligation form. Another commenter stated the belief that any tracking or reporting activities pursuant to payback obligations are the exclusive responsibility of the granting agency.

Discussion: The regulations describe conditions that must be met by a grantee after award in subpart D and conditions that must be met by a scholar in subpart E. No adversarial system of grantee vs. scholar or Federal agency vs. grantee is implied or intended. The intent is to clearly identify the responsibilities of all parties. Tracking and recordkeeping, which can be facilitated by change-of-address and change-of-employment forms, are not excessively burdensome for the numbers of students supported by the average grant under the Rehabilitation Long-Term Training program.

Changes: None.

Work-or-Repay Requirements for Certificate Programs (§§ 386.4 and 386.34)

Comment: One commenter asked for assurances that the work-or-repay provisions will be applied to all academic degree pre- or post-employment programs as well as to non-degree awarding, certificate granting continuing education programs.

Discussion: The Secretary agrees that the work-or-repay provision applies to each individual who receives a scholarship, whether for a degree or a certificate program. The term "certificate" is defined in § 386.4 of the regulations. Examples of certificate programs that offer scholarships and are subject to the work-or-repay provision include post-baccalaureate training in allied health areas, such as occupational therapy, physical therapy, and prosthetics and orthotics. The Secretary believes that the work-or-repay provision does not apply to certificate programs in non-academic or emerging areas because no scholarship assistance is provided to individuals. Assistance in the form of per-diem expenses for short-term training is not considered to be scholarship assistance subject to the work-or-repay provision. It would be burdensome and inappropriate to enforce a work-or-repay provision for that assistance. The Secretary believes that confusion about the different types of certificates and the applicability of repayment will be resolved by focusing the Rehabilitation Long-Term Training program on academic scholarship training (degree and certificate) subject to the work-or-repay provision and using other more appropriate training authorities for non-academic, non-scholarship, post-employment training.

Changes: None.

Stricter Standards for Work-or-Repay Provision (§ 386.34)

Comment: One commenter suggested that grantees be required to arrange for all scholars to attend an extensive pre-enrollment work-or-repay seminar series at which participating agencies in the city or State (along with the grantee) would provide clearly detailed information regarding job opportunities for and subsequent responsibilities of scholars.

Discussion: The Secretary agrees that a job seminar would be valuable for many scholarship recipients and potential rehabilitation employers. Such an activity, however, should be at the discretion of the grantee and not a regulatory requirement.

Changes: None.

Flexibility in Future Applications of Work-or-Repay Requirements (§ 386.34)

Comment: One commenter encouraged flexibility in the application of this requirement to emerging fields like independent living.

Discussion: The Secretary agrees that the work-or-repay provision should apply only to academic training and that fields such as independent living (IL) do not currently provide academic training subject to the work-or-repay provision. The Secretary plans to support future post-employment training grants in IL under training authorities that are not subject to the work-or-repay provision. However, it appears likely that research and curriculum development advances will soon make academic training, particularly in community colleges, possible. Therefore, in anticipation of the need to provide academic or certificate training opportunities, the Secretary has also retained IL as a Rehabilitation Long-Term Training program field.

Changes: None.

Work-or-Repay Tracking Systems (§ 386.34(g))

Comments: Several commenters expressed concern that the proposed regulations inappropriately place grantee institutions in watch-dog roles. In particular, there was objection to the requirement for documentation that the grantee has checked for addresses of missing scholars with alumni organizations.

Discussion: The Secretary does not believe that the requirement that the grantee check with university-sponsored alumni organizations if it is experiencing difficulty in locating a scholar is inappropriate. The regulations do not constitute a basis for forcing disclosure of records from any private organization. If a grantee cannot document, because of the inability to locate a scholar who has graduated, that requirements of the work-or-repay provision have been met by an individual, the grantee will be responsible for reporting to the Secretary that the individual has not completed the requirement. The Secretary will then initiate enforcement actions as outlined in § 386.43. The intent of the regulations is to have the grantee exhaust all possibilities to locate and contact the individual before the matter is referred to the Secretary.

Changes: None.

Work-or-Repay Records (§ 386.34(h))

Comments: Two commenters expressed concern that the proposed regulations inappropriately obligate grantee institutions to perform time-consuming and expensive database creation, maintenance, updating, and reporting functions for as many as six years for which the grantee receives no compensation from the Federal Government.

Discussion: The Secretary believes that the work-or-repay provision is a partnership between grantees and the Federal Government. Grantees are closest to the individuals and are in the best position to advise, assist, and admonish scholars on matters related to their work-or-repay requirements. The Secretary believes that administrative costs for these activities are minimal and are not feasible for line itemization. Instead, the Secretary sees these costs as subsumed under grantee indirect costs. The regulations have been written to state clearly that the responsibility for recordkeeping extends until the repayment period has ended for all students provided scholarships.

Changes: None.

June 1, 1992, Effective Date for New Work-or-Repay Provisions (§ 386.34)

Comment: A commenter expressed concern that this requirement is being imposed a full five months before the 1992 Amendments to the Rehabilitation Act were even approved. The commenter asked how, if these proposed regulations are in response to the 1992 Amendments, can this date be required since it predates the amendments?

Discussion: The June 1992 effective date was set retroactively in the Rehabilitation Act Amendments of 1992.

Changes: None.

Payback Requirements for Scholars Who Become University Educators (§ 386.34)

Comments: Two commenters observed that the proposed regulations do not permit graduate and doctoral level scholarship recipients to meet the work-or-repay provision by teaching at a university unless the university has a formal agreement with the State agency identifying the university as a "related agency."

Discussion: The identification of a "related agency" derives from the Rehabilitation Act of 1973, as amended. Educators whose college or university employer meets the definition of a related agency (§ 386.4) by providing services to individuals with disabilities under an agreement with a designated State agency and who are employed in the area of specialty for which Federal support for their training was provided will have no problem meeting the requirement. Examples of acceptable arrangements include educators who have agreements to supervise field placements of students in training at State agencies and related agencies, who serve as advisors or consultants to State agencies and related agencies, and who provide direct services through their universities, including the instruction of individuals with disabilities. The key to meeting the work-or-repay requirement through employment in an educational institution is that the institution have an appropriate agreement with the designated State agency and that the scholar work in his or her specialty area.

Changes: None.

Proposed Six-Year Repayment Period (§ 386.34)

Comment: One commenter expressed concern that, after completing a two-year graduate program, a scholar will have only six years for repayment instead of the current ten-year repayment period.

Discussion: The time limits are set in the Rehabilitation Act Amendments of 1992.

Changes: None.

Work-or-Repay Provisions for Scholars Receiving Federal Benefits (§ 386.43)

Comment: One commenter suggested that the deferral of repayment due to disability be modified to exclude circumstances under which the individual achieves Social Security Disability Insurance (SSDI) earned income status.

Discussion: The Secretary does not believe that there is a need to distinguish the repayment status of scholars by the type of disability benefits a scholar may be receiving.

Changes: None.

Waiver of Notice of Proposed Rulemaking

In accordance with section 431(b)(2)(A) of the General Education Provisions Act (20 U.S.C. 1232(b)(2)(A)) and the Administrative Procedure Act (5 U.S.C. 553), it is the practice of the Secretary to offer interested parties the opportunity to comment on proposed regulations. However, the language added in § 386.1(b)(30) merely incorporates into the regulations a statutory change made by the Technology-Related Assistance for Individuals With Disabilities Act Amendments of 1994 to the Rehabilitation Act of 1973, as amended, and does not implement substantive policy. Therefore, the Secretary has determined, pursuant to 5 U.S.C. 553(b)(B), that public comment on the change in the regulations is unnecessary and contrary to the public interest.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive order is to foster an intergovernmental partnership and strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the response to the proposed regulations and on its own review, the Department has determined that the regulations in this document do not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 386

Grant programs, Rehabilitation training. Reporting and recordkeeping requirements.

Dated: June 9, 1994.

(Catalog of Federal Domestic Assistance Number 84.129, Rehabilitation Training: Rehabilitation Long-Term Training)

Judith E. Heumann,

Assistant Secretary for Special Education and Rehabilitative Services.

The Secretary amends title 34 of the Code of Federal Regulations by revising part 386 to read as follows:

PART 386—REHABILITATION TRAINING: REHABILITATION LONG-TERM TRAINING

Subpart A—General

Sec.

386.1 What is the Rehabilitation Long-Term Training program?
386.2 Who is eligible for an award?
386.3 What regulations apply?
386.4 What definitions apply?

Subpart B—[Reserved]

Subpart C—How Does the Secretary Make an Award?

386.20 What selection criteria does the Secretary use?

Subpart D—What Conditions Must Be Met After an Award?

386.30 What are the matching requirements?
386.31 What are requirements for directing grant funds?
386.32 What are allowable costs?
386.33 What are the requirements for grantees in disbursing scholarships?
386.34 What assurances must be provided by a grantee that intends to provide scholarships?
386.35 What information must be provided by a grantee that is an institution of higher education to assist designated State agencies?

Subpart E—What Conditions Must Be Met by a Scholar?

386.40 What are the requirements for scholars?
386.41 Under what circumstances does the Secretary grant a deferral or exception to performance or repayment under a scholarship agreement?
386.42 What must a scholar do to obtain a deferral or exception to performance or repayment under a scholarship agreement?
386.43 What are the consequences of a scholar's failure to meet the terms and conditions of scholarship agreement?

Authority: 29 U.S.C. 711(c) and 774, unless otherwise noted.

Subpart A—General

§ 386.1 What is the Rehabilitation Long-Term Training program?

(a) The Rehabilitation Long-Term Training program provides financial assistance for—

(1) Projects that provide basic or advanced training leading to an academic degree in one of those fields of study identified in paragraph (b) of this section;

(2) Projects that provide a specified series of courses or program of study leading to award of a certificate in one of those fields of study identified in paragraph (b) of this section; and

(3) Projects that provide support for medical residents enrolled in residency training programs in the specialty of physical medicine and rehabilitation.

(b) The Rehabilitation Long-Term Training program is designed to provide academic training in areas of personnel shortages identified by the Secretary and published in a notice in the **Federal Register**. These areas may include—

(1) Vocational rehabilitation counseling;

(2) Rehabilitation technology;

(3) Rehabilitation medicine;

(4) Rehabilitation nursing;

(5) Rehabilitation social work;

(6) Rehabilitation psychiatry;

(7) Rehabilitation psychology;

(8) Rehabilitation dentistry;

(9) Physical therapy;

(10) Occupational therapy;

(11) Speech pathology and audiology;

(12) Physical education;

(13) Therapeutic recreation;

(14) Community rehabilitation program personnel;

(15) Prosthetics and orthotics;

(16) Specialized personnel for rehabilitation of individuals who are blind or have vision impairment;

(17) Rehabilitation of individuals who are deaf or hard of hearing;

(18) Rehabilitation of individuals who are mentally ill;

(19) Undergraduate education in the rehabilitation services;

(20) Independent living;

(21) Client assistance;

(22) Administration of community rehabilitation programs;

(23) Rehabilitation administration;

(24) Vocational evaluation and work adjustment;

(25) Services to individuals with specific disabilities or specific impediments to rehabilitation, including individuals who are members of populations that are unserved or underserved by programs under this Act;

(26) Job development and job placement services to individuals with disabilities;

(27) Supported employment services, including services of employment specialists for individuals with disabilities;

(28) Specialized services for individuals with severe disabilities;

(29) Recreation for individuals with disabilities;

(30) The use, applications, and benefits of assistive technology devices and assistive technology services; and

(31) Other fields contributing to the rehabilitation of individuals with disabilities.

(Authority: 29 U.S.C. 711 and 771a)

§ 386.2 Who is eligible for an award?

Those agencies and organizations eligible for assistance under this program are described in 34 CFR 385.2.

(Authority: 29 U.S.C. 771a(a))

§ 386.3 What regulations apply?

The following regulations apply to the Rehabilitation Training: Rehabilitation Long-Term Training program:

(a) The regulations in this part 386.

(b) The regulations in 34 CFR part 385.

(Authority: 29 U.S.C. 771a)

§ 386.4 What definitions apply?

The following definitions apply to this program:

(a) Definitions in 34 CFR 385.4.

(b) *Other definitions.* The following definitions also apply to this part:

Academic year means a full-time course of study—

(1) Taken for a period totaling at least nine months; or

(2) Taken for the equivalent of at least two semesters, two trimesters, or three quarters.

Certificate means a recognized educational credential awarded by a grantee under this part that attests to the completion of a specified series of courses or program of study.

Professional corporation or professional practice means—

(1) A professional service corporation or practice formed by one or more individuals duly authorized to render the same professional service, for the purpose of rendering that service; and

(2) The corporation or practice and its members are subject to the same supervision by appropriate State regulatory agencies as individual practitioners.

Related agency means—

(1) An American Indian rehabilitation program; or

(2) Any of the following agencies that provide services to individuals with disabilities under an agreement with a designated State agency in the area of specialty for which training is provided:

(i) A Federal, State, or local agency.

(ii) A nonprofit organization.

(iii) A professional corporation or professional practice group.

Scholar means an individual who is enrolled in a certificate or degree granting course of study in one of the areas listed in § 386.1(b) and who receives scholarship assistance under this part.

Scholarship means an award of financial assistance to a scholar for training and includes all disbursements or credits for student stipends, tuition and fees, and student travel in conjunction with training assignments.

State rehabilitation agency means the designated State agency.

(Authority: 29 U.S.C. 711(c))

Subpart B—[Reserved]

Subpart C—How Does the Secretary Make an Award?

§ 386.20 What selection criteria does the Secretary use?

The Secretary uses the following criteria to evaluate an application:

(a) *Plan of operation.* (30 points) The Secretary evaluates each application on the basis of the criterion in § 385.32(a).

(b) *Quality of key personnel.* (10 points) The Secretary evaluates each application on the basis of the criterion in § 385.32(b).

(c) *Budget and cost effectiveness.* (10 points) The Secretary evaluates each application on the basis of the criterion in § 385.32(c).

(d) *Evaluation plan.* (5 points) The Secretary evaluates each application on the basis of the criterion in § 385.32(d).

(e) *Adequacy of resources.* (5 points) The Secretary evaluates each application on the basis of criterion in § 385.32(e).

(f)(1) *Evidence of need.* (10 points) The Secretary reviews each application for information that shows that the need for the training project has been adequately justified.

(2) The Secretary looks for information that shows that the need for the training project has been established in terms of rehabilitation supply and demand for qualified rehabilitation personnel and includes an assessment of how the project will respond to personnel needs established in local, State, or national studies.

(g)(1) *Relevance to State-Federal rehabilitation service program.* (10 points) The Secretary reviews each application for information that shows that the proposed project appropriately relates to the mission of the State-Federal rehabilitation service program.

(2) The Secretary looks for information that shows that the project can be expected either to increase the supply of trained personnel available to State and other public or nonprofit agencies involved in the rehabilitation of individuals with physical or mental disabilities through degree or certificate granting programs, or to improve the skills and quality of professional personnel in the rehabilitation field in which the training is to be provided through the granting of a degree or certificate.

(h)(1) *Nature and scope of curriculum.* (20 points) The Secretary reviews each application for information that demonstrates the adequacy of the proposed curriculum.

(2) The Secretary looks for information that shows—

(i) The scope and nature of the coursework reflect content that can be expected to enable the achievement of the established project objectives;

(ii) The curriculum and teaching methods provide for an integration of theory and practice relevant to the educational objectives of the program;

(iii) There is evidence of educationally focused practical and other field experiences in settings that ensure student involvement in the provision of vocational rehabilitation, supported employment, or independent living rehabilitation services to individuals with disabilities, especially individuals with severe disabilities;

(iv) The coursework includes student exposure to vocational rehabilitation, supported employment, or independent living rehabilitation processes, concepts, programs, and services; and

(v) If applicable, there is evidence of current professional accreditation by the designated accrediting agency in the professional field in which grant support is being requested.

(Approved by the Office of Management and Budget under control number 1820–0018.)

(Authority: 29 U.S.C. 711(c) and 771a)

Subpart D—What Conditions Must Be Met After an Award?

§ 386.30 What are the matching requirements?

The Federal share may not be more than 90 percent of the total cost of a project under this program. The Secretary may waive part of the non-Federal share of the cost of the project after negotiations if the applicant demonstrates that it does not have sufficient resources to contribute the entire match.

(Authority: 29 U.S.C. 711(c))

§ 386.31 What are the requirements for directing grant funds?

(a) A grantee must use at least 75 percent of the total award for scholarships as defined in § 386.4.

(b) The Secretary may award grants that use less than 75 percent of the total award for scholarships based upon the unique nature of the project, such as the establishment of a new training program or long-term training in an emerging field that does not award degrees or certificates.

(c) For multi-year projects in existence on October 1, 1994, the requirements of paragraph (a) of this section do not apply for the remainder of the project period.

(Authority: 29 U.S.C. 711(c) and 771a)

§ 386.32 What are allowable costs?

In addition to those allowable costs established in the Education Department General Administrative Regulations in 34 CFR 75.530 through 75.562, the following items are allowable under long-term training projects:

(a) Student stipends.

(b) Tuition and fees.

(c) Student travel in conjunction with training assignments.

(Authority: 29 U.S.C. 711(c) and 771a)

§ 386.33 What are the requirements for grantees in disbursing scholarships?

(a) Before disbursement of scholarship assistance to an individual, a grantee—

(1)(i) Shall obtain documentation that the individual is—

(A) A U.S. citizen or national; or

(B) A permanent resident of the Republic of the Marshall Islands, Federated States of Micronesia, Republic of Palau, or the Commonwealth of the Northern Mariana Islands; or

(ii) Shall confirm from documentation issued to the individual by the U.S. Immigration and Naturalization Service that he or she—

(A) Is a lawful permanent resident of the United States; or

(B) Is in the United States for other than a temporary purpose with the intention of becoming a citizen or permanent resident; and

(2) Shall confirm that the applicant has expressed interest in a career in clinical practice, administration, supervision, teaching, or research in the vocational rehabilitation, supported employment, or independent living rehabilitation of individuals with disabilities, especially individuals with severe disabilities;

(3) Shall have documentation that the individual expects to maintain or seek employment in a designated State rehabilitation agency or in a nonprofit rehabilitation, professional corporation, professional practice group, or related agency providing services to individuals with disabilities or individuals with severe disabilities under an agreement with a designated State agency;

(4) Shall reduce the scholarship by the amount in which the combined awards would be in excess of the cost of attendance, if a scholarship, when added to the amount the scholar is to receive for the same academic year under Title IV of the Higher Education Act, would otherwise exceed the scholar's cost of attendance;

(5) Shall limit scholarship assistance to the individual's cost of attendance at the institution for no more than four academic years except that the grantee may provide an extension consistent with the institution's accommodations under section 504 of the Act if the grantee determines that an individual has a disability that seriously affects the completion of the course of study; and

(6) Shall obtain a Certification of Eligibility for Federal Assistance from each scholar as prescribed in 34 CFR 75.60, 75.61, and 75.62.

(Approved by the Office of Management and Budget under control number 1820–0018.)

(Authority: 29 U.S.C. 711(c) and 771a(b))

§ 386.34 What assurances must be provided by a grantee that intends to provide scholarships?

A grantee under this part that intends to grant scholarships for any academic year beginning after June 1, 1992, shall provide the following assurances before an award is made:

(a) *Requirement for agreement.* No individual will be provided a scholarship without entering into a written agreement containing the terms and conditions required by this section. An individual will sign and date the agreement prior to the initial disbursement of scholarship funds to the individual for payment of the individual's expenses, such as tuition.

(b) *Disclosure to applicants.* The terms and conditions of the agreement that the grantee enters into with a scholar will be fully disclosed in the application for scholarship.

(c) *Form and terms of agreement.* Each scholarship agreement with a grantee will be in the form and contain the terms that the Secretary requires, including at a minimum the following provisions:

(1) The scholar will—

(i) Maintain employment—

(A) In a nonprofit rehabilitation agency or related agency or in a State rehabilitation agency or related agency, including a professional corporation or professional practice group through which the individual has a service arrangement with the designated State agency;

(B) On a full- or part-time basis; and

(C) For a period of not less than the full-time equivalent of two years for each year for which assistance under this section was received, within a period, beginning after the recipient completes the training for which the scholarship was awarded, of not more than the sum of the number of years required in this paragraph and two additional years; and

(ii) Repay all or part of any scholarship received, plus interest, if the individual does not fulfill the requirements of paragraph (c)(1(i) of this section, except as the Secretary by regulations may provide for repayment exceptions and deferrals.

(2) The employment obligation in paragraph (c)(1) of this section as applied to a part-time scholar will be based on the accumulated academic years of training for which the scholarship is received.

(3) Until the scholar has satisfied the employment obligation described in paragraph (c)(1) of this section, the scholar will inform the grantee of any change of name, address, or employment status and will document employment satisfying the terms of the agreement.

(4) Subject to the provisions in § 386.41 regarding a deferral or exception, when the scholar enters repayment status under § 386.43(e), the amount of the scholarship that has not been retired through eligible employment will constitute a debt owed to the United States that—

(i) Will be repaid by the scholar, including interest and costs of collection as provided in § 386.43; and

(ii) May be collected by the Secretary in accordance with 34 CFR Part 30, in the case of the scholar's failure to meet the obligation of § 386.43.

(d) *Executed agreement.* The grantee will provide an original executed agreement upon request to the Secretary.

(e) *Standards for satisfactory progress.* The grantee will establish, publish, and apply reasonable standards for measuring whether a scholar is maintaining satisfactory progress in the scholar's course of study. The Secretary considers an institution's standards to be reasonable if the standards—

(1) Conform with the standards of satisfactory progress of the nationally recognized accrediting agency that accredits the institution's program of study, if the institution's program of study is accredited by such an agency, and if the agency has those standards;

(2) For a scholar enrolled in an eligible program who is to receive assistance under the Rehabilitation Act, are the same as or stricter than the institution's standards for a student enrolled in the same academic program who is not receiving assistance under the Rehabilitation Act; and

(3) Include the following elements:

(i) Grades, work projects completed, or comparable factors that are measurable against a norm.

(ii) A maximum timeframe in which the scholar shall complete the scholar's educational objective, degree, or certificate.

(iii) Consistent application of standards to all scholars within categories of students; e.g., full-time, part-time, undergraduates, graduate students, and students attending programs established by the institution.

(iv) Specific policies defining the effect of course incompletes, withdrawals, repetitions, and noncredit remedial courses on satisfactory progress.

(v) Specific procedures for appeal of a determination that a scholar is not making satisfactory progress and for reinstatement of aid.

(f) *Exit certification.* The grantee has established policies and procedures for

receiving written certification from scholars at the time of exit from the program acknowledging the following:

(1) The name of the institution and the number of the Federal grant that provided the scholarship.

(2) The scholar's field of study.

(3) The number of years the scholar needs to work to satisfy the work requirements in § 386.34(c)(1)(i)(C).

(4) The total amount of scholarship assistance received subject to the work-or-repay provision in § 386.34(c)(1)(ii).

(5) The time period during which the scholar must satisfy the work requirements in § 386.34(c)(1)(i)(C).

(6) All other obligations of the scholar in § 386.34.

(g) *Tracking system.* The grantee has established policies and procedures to determine compliance of the scholar with the terms of the agreement. In order to determine whether a scholar has met the work-or-repay provision in § 386.34(c)(1)(i), the tracking system must include for each employment position maintained by the scholar—

(1) Documentation of the employer's name, address, dates of the scholar's employment, and the position the scholar maintained;

(2) Documentation of how the employment meets the requirements in § 386.34(c)(1)(i); and

(3) Documentation that the grantee, if experiencing difficulty in locating a scholar, has checked with existing tracking systems operated by alumni organizations.

(h) *Reports.* The grantee shall make reports to the Secretary that are necessary to carry out the Secretary's functions under this part.

(i) *Records.* The grantee shall maintain the information obtained in paragraphs (g) and (h) of this section for a period of time equal to the time required to fulfill the obligation under § 386.34(c)(1)(i)(C).

(Approved by the Office of Management and Budget under control number 1820–0018.)

(Authority: 29 U.S.C. 711(c) and 771a(b))

§ 386.35 What information must be provided by a grantee that is an institution of higher education to assist designated State agencies?

A grantee that is an institution of higher education provided assistance under this part shall cooperate with the following requests for information from a designated State agency:

(a) Information required by section 101(a)(7) of the Act which may include, but is not limited to—

(1) The number of students enrolled by the grantee in rehabilitation training programs; and

(2) The number of rehabilitation professionals trained by the grantee who graduated with certification or licensure, or with credentials to qualify for certification or licensure, during the past year.

(b) Information on the availability of rehabilitation courses leading to certification or licensure, or the credentials to qualify for certification or licensure, to assist State agencies in the planning of a program of staff development for all classes of positions that are involved in the administration and operation of the State agency's vocational rehabilitation program.

(Approved by the Office of Management and Budget under control number 1820–0018.)

(Authority: 29 U.S.C. 711(c) and 771a)

Subpart E—What Conditions Must Be Met by a Scholar?

§ 386.40 What are the requirements for scholars?

A scholar—

(a) Shall receive the training at the educational institution or agency designated in the scholarship; and

(b) Shall not accept payment of educational allowances from any other Federal, State, or local public or private nonprofit agency if that allowance conflicts with the individual's obligation under § 386.33(a)(4) or § 386.34(c)(1).

(c) Shall enter into a written agreement with the grantee, before starting training, that meets the terms and conditions required in § 386.34;

(d) Shall be enrolled in a course of study leading to a certificate or degree in one of the fields designated in § 386.1(b); and

(e) Shall maintain satisfactory progress toward the certificate or degree as determined by the grantee.

(Authority: 29 U.S.C. 711(c) and 771a(b))

§ 386.41 Under what circumstances does the Secretary grant a deferral or exception to performance or repayment under a scholarship agreement?

A deferral or repayment exception to the requirements of § 386.34(c)(1) may be granted, in whole or part, by the Secretary as follows:

(a) Repayment is not required if the scholar—

(1) Is unable to continue the course of study or perform the work obligation because of a disability that is expected to continue indefinitely or result in death; or

(2) Has died.

(b) Repayment of a scholarship may be deferred during the time the scholar is—

(1) Engaging in a full-time course of study at an institution of higher education;

(2) Serving, not in excess of three years, on active duty as a member of the armed services of the United States;

(3) Serving as a volunteer under the Peace Corps Act;

(4) Serving as a full-time volunteer under Title I of the Domestic Volunteer Service Act of 1973;

(5) Temporarily totally disabled, for a period not to exceed three years; or

(6) Unable to secure employment as required by the agreement by reason of the care provided to a disabled spouse for a period not to exceed 12 months.

(Authority: 29 U.S.C. 771(c) and 771a(b))

§ 386.42 What must a scholar do to obtain a deferral or exception to performance or repayment under a scholarship agreement?

To obtain a deferral or exception to performance or repayment under a scholarship agreement, a scholar shall provide the following:

(a) *Written application.* A written application must be made to the Secretary to request a deferral or an exception to performance or repayment of a scholarship.

(b) *Documentation.* (1) Documentation must be provided to substantiate the grounds for a deferral or exception.

(2) Documentation necessary to substantiate an exception under § 386.41(a)(1) or a deferral under § 386.41(b)(5) must include a sworn affidavit from a qualified physician or other evidence of disability satisfactory to the Secretary.

(3) Documentation to substantiate an exception under § 386.41(a)(2) must include a death certificate or other evidence conclusive under State law.

(Approved by the Office of Management and Budget under control number 1820–0018.)

(Authority: 29 U.S.C. 711(c) and 771a)

§ 386.43 What are the consequences of a scholar's failure to meet the terms and conditions of a scholarship agreement?

In the event of a failure to meet the terms and conditions of a scholarship agreement or to obtain a deferral or an exception as provided in § 386.41, the scholar shall repay all or part of the scholarship as follows:

(a) *Amount.* The amount of the scholarship to be repaid is proportional to the employment obligation not completed.

(b) *Interest rate.* The Secretary charges the scholar interest on the unpaid balance owed in accordance with 31 U.S.C. 3717.

(c) *Interest accrual.* (1) Interest on the unpaid balance accrues from the date the scholar is determined to have entered repayment status under paragraph (e) of this section.

(2) Any accrued interest is capitalized at the time the scholar's repayment schedule is established.

(3) No interest is charged for the period of time during which repayment has been deferred under § 386.41.

(d) *Collection costs.* Under the authority of 31 U.S.C. 3717, the Secretary may impose reasonable collection costs.

(e) *Repayment status.* A scholar enters repayment status on the first day of the first calendar month after the earliest of the following dates, as applicable:

(1) The date the scholar informs the Secretary he or she does not plan to fulfill the employment obligation under the agreement.

(2) Any date when the scholar's failure to begin or maintain employment makes it impossible for that individual to complete the employment obligation within the number of years required in § 386.34(c)(1).

(f) *Amounts and frequency of payment.* The scholar shall make payments to the Secretary that cover principal, interest, and collection costs according to a schedule established by the Secretary.

(Authority: 29 U.S.C. 711(c) and 771a(b))

Department of Housing and Urban Development

Office of the Assistant Secretary for Fair Housing and Equal Opportunity

Notice of Funding Availability for the Affirmative Fair Housing Marketing Reinvention Lab Project; Competitive Solicitation

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Fair Housing and Equal Opportunity

[Docket No. N–94–3765; FR–3650–N–01]

NOFA for the Affirmative Fair Housing Marketing Reinvention Lab Project; Competitive Solicitation

AGENCY: Office of the Assistant Secretary for Fair Housing and Equal Opportunity, HUD.

ACTION: Notice of funding availability (NOFA).

SUMMARY: This NOFA announces the availability of up to $1.0 million of FY 1993 Fair Housing Initiatives Program funding for a special project to be carried out in the Chicago, Illinois metropolitan area. The purposes of this project, which is part of the overall effort to reinvent the way the Department carries out its civil rights mission, are (1) to test the effectiveness of a metropolitan areawide affirmative fair housing marketing plan and associated activities to be administered by a central clearinghouse, especially in terms of generating increased housing choice and opportunity for eligible assisted and insured housing applicants; (2) to determine the potential savings in administrative costs for both housing providers and the Department if the clearinghouse concept were to be implemented permanently; and (3) to determine whether eligible applicants for federally-assisted and/or insured private rental or sales housing would be better served by the clearinghouse in terms of the support services performed during the mortgage loan evaluation and rental application processes.

In the body of this document is information concerning the purpose of the NOFA, eligibility, available amounts, selection criteria, how to apply for funding, and how selections will be made.

DATES: An application for funding under this Notice will be available following publication of the Notice. The actual application due date and time will be specified in the application kit. In no event, however, will the application be due before August 15, 1994.

ADDRESSES: To obtain a copy of the application kit, please write the Fair Housing Information Clearinghouse, Post Office Box 6091, Rockville, MD 20850 or call the toll-free number 1–800–343–3442.

FOR FURTHER INFORMATION CONTACT: Laurence D. Pearl, Director, Office of Program Standards and Evaluation, (202) 708–0288, or William Dudley Gregorie, Director, Program Standards Division, Office of Fair Housing and Equal Opportunity, room 5226, 451 Seventh Street SW., room 5224, Washington, DC 20410, (202) 708–2287. A telecommunications device (TDD) for hearing- and speech-impaired persons is available at (202) 708–2287. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act Statement

Application requirements associated with this program have been approved by the Office of Management and Budget, under section 3504(h) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)), and assigned OMB control number 2529–0033.

I. Purpose and Substantive Description

(a) Authority

(1) The Fair Housing Act

Title VIII of the Civil Rights Act of 1968, as amended, 42 U.S.C. 3601–19 (Fair Housing Act), charges the Secretary of Housing and Urban Development with responsibility to accept and investigate complaints alleging discrimination based on race, color, religion, sex, handicap, familial status or national origin in the sale, rental, advertising or financing of housing. The Fair Housing Act also directs the Secretary to cooperate with State and local agencies administering fair housing laws, and to cooperate with and render technical assistance to State, local and other public or private entities carrying out programs to prevent and eliminate discriminatory housing practices. The Act also directs the Secretary to administer the Department's housing and urban development programs in a manner affirmatively to further the objectives of the Act.

In addition to the Affirmative Fair Housing Marketing requirements described below, the Department has since 1971 attempted to translate the affirmatively furthering mandate through policy mechanisms such as the Site and Neighborhood Standards, Tenant Selection and Assignment and Equal Housing Opportunity Plans, and other program and project-specific strategies. In recent months the Department has recognized that these project and program-specific mechanisms do not fully address the broad-based fair housing problems which actually exist. The Department has also identified the problem of concentration of persons by race and income as a major barrier to the achievement of the objectives of fair housing in the United States. The Department is in the process of formulating appropriate responses that will be tested in the near future through special demonstration projects similar to this lab, including the feasibility of implementing a metropolitan areawide affirmative fair housing marketing plan through a clearinghouse mechanism.

(2) The FHIP Program

Section 561 of the Housing and Community Development Act of 1987, 42 U.S.C. 3616 note, established as a demonstration program the Fair Housing Initiatives Program (FHIP) to strengthen the Department's enforcement of the Fair Housing Act and to further fair housing. This program assists projects and activities designed to enforce and enhance compliance with the Fair Housing Act and substantially equivalent State and local fair housing laws. Implementing regulations are found at 24 CFR part 125.

Three general categories of activities were established at 24 CFR part 125 for FHIP funding under section 561 of the Housing and Community Development Act of 1987: The Administrative Enforcement Initiative, the Education and Outreach Initiative, and the Private Enforcement Initiative. Section 905 of the Housing and Community Development Act of 1992 (HCDA 1992) (Pub. L. 102–550, approved October 28, 1992), amended section 561 by adding specific eligible applicants and activities to the Education and Outreach and Private Enforcement Initiatives, as well as an entirely new Fair Housing Organization Initiative. Section 905 also gave the program permanent status.

The regulations at 24 CFR part 125, subpart C, describe the purpose and eligible activities under the Education and Outreach Initiative, the segment of the FHIP program under which the activity proposed in this NOFA is to be funded. Section 125.303(b) describes eligible outreach projects that may be funded under this initiative, including but not limited to the following:

"(1) Developing national, regional and local media campaigns;

(2) Bringing housing industry and civic or fair housing groups together to identify illegal real estate practices and to determine how to correct them;

(3) Designing specialized outreach projects to inform all persons of the availability of housing opportunities;

(4) Developing and implementing a response to new or more sophisticated housing practices that may result in discriminatory housing practices; and

(5) Developing mechanisms for the identification of and quick response to housing discrimination cases that involve physical harm."

The activities set forth in this NOFA are eligible activities under the Education and Outreach Initiative of the FHIP program, since they relate to various eligible activities of this initiative. Other sections of this NOFA will specifically illustrate how this relationship is facilitated.

(3) Affirmative Fair Housing Marketing Requirements

The Fair Housing Act states that it is the policy of the United States to provide, within constitutional limitations, for fair housing throughout the United States. The Act also states at Section 808(e)(5) that the Department of Housing and Urban Development shall administer its programs in a manner affirmatively to further the objectives of the Fair Housing Act. Affirmative Fair Housing Marketing has, since 1972, been one of the means by which the Department has carried out Section 808(e)(5) of the Act through the programs it has administered. The purpose of Affirmative Fair Housing Marketing as stated in the regulations at 24 CFR 200.600, is to "achieve a condition in which individuals of similar income levels in the same housing market area have a like range of housing choices available to them regardless of their race, color, religion, sex, handicap, familial status or national origin." These regulations also apply to all applicants for participation in HUD insured subsidized or unsubsidized housing programs whose applications are approved for:

Multifamily projects and manufactured home parks of five or more lots, units or spaces, and initial submissions by a lender for an application for mortgage insurance on a single family property, where the property is located in a subdivision and the builder or developer intends to sell five or more properties in the subdivision;[1] and dwelling units when the applicant's participation would exceed five or more HUD-insured single-family homes within the preceding twelve-month period. Such participants are required to develop an affirmative marketing program on a HUD-approved form. The regulations describe the specific components of an Affirmative Fair Housing Marketing Plan (AFHM) at 24 CFR 200.620.

The Department reviews and evaluates these affirmative marketing plans submitted on Form HUD–935.2 (see attachment) as part of an applicant's request for funding under a number of single-family and multifamily mortgage insurance and subsidy programs. These reviews and evaluations, as well as the monitoring of the implementation of these Affirmative Marketing Plans, are conducted under procedures outlined in HUD Handbook 8025.1 REV–2, Implementation of Affirmative Fair Housing Marketing Requirements. The Department also conducts compliance-related activities under the regulations at 24 CFR Part 108, Affirmative Fair Housing Marketing Compliance Regulations.

A number of evaluations of both the administration of affirmative fair housing marketing and the underlying objectives of the policy conducted since 1974 have raised questions about AFHM's effectiveness and results, especially in terms of its effects on racial housing patterns within housing market areas. These evaluations and recent assessments of how the review of Affirmative Fair Housing Marketing (AFHM) Plans fits into the overall workload of the Field Office FHEO Divisions and Program Operations Divisions in the Regional Offices have also raised questions about the overall cost-effectiveness and efficiency of the review process itself. The 1990 evaluation of AFHM performed by the Office of Program Standards and Evaluation recommended that the Department pilot test the use of a third party to accept applications, check references, and provide an applicant a list of all available housing opportunities under HUD-assisted and insured single-family and multifamily programs. The evaluation also recommended that the Department conduct studies of the manner in which various groups search for rental and sales housing and the costs and benefits of various marketing techniques. The activities described in this NOFA address these recommendations in large part.

(b) Allocation Amounts

For FY 1993, the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1993 (approved October 6, 1992, Pub. L. 102–389), (93 Appropriations Act) appropriated $10.6 million for the FHIP program. Of this amount, $1 million of Education and Outreach Initiative funds is made available under this NOFA to carry out an affirmative fair housing marketing "lab" experiment. The balance of $9.6 million in FY 1993 funds was made available in a NOFA published on December 22, 1993 (58 FR 68000) and amended on February 25, 1994 (59 FR 9235).

The Department estimates that the affirmative fair housing marketing lab project will function approximately 18 months at a cost to the federal government not to exceed $1.0 million dollars. The final cost will depend upon submissions from eligible applicants. In no case will the cost to the federal government for implementing the project under this NOFA exceed $1.0 million dollars. The continuing operation of the clearinghouse following completion of the lab will depend entirely on the income generated from fees and other funding sources.

(c) Project Objectives

As a means of implementing the Department's strong commitment to administer its programs affirmatively to further fair housing, the Department seeks to implement an affirmative fair housing marketing lab. This lab will test an areawide affirmative marketing approach intended to expand affordable housing opportunities for those persons identified as least likely to apply for the housing because of where it is located. The specific objectives of this lab are:

(1) To promote greater awareness and acceptance on the part of housing providers and the entire community of the need to market assisted housing on a nondiscriminatory basis throughout the metropolitan area to increase housing choice and advance equal housing opportunity;

(2) To develop a model for the use of metropolitan areawide affirmative marketing as an effective tool to affirmatively further fair housing and provide greater affordable housing choice and opportunity throughout a metropolitan area;

(3) To determine whether use of a clearinghouse is an effective method over the long-term for assisted and insured multifamily housing providers and builders and developers of HUD-insured single-family housing to carry out their responsibilities under the Affirmative Fair Housing Marketing Regulations; and

(4) To test ways for metropolitan areawide affirmative marketing clearinghouses to become and remain financially self-supporting.

(d) Eligible Applicants

The following entities, either individually or in combination, are eligible to apply for funding under this

[1] See the **Federal Register** of August 3, 1993 HUD Systems for Approval of Single-Family Subdivisions. This Final Rule included amendments to the Affirmative Fair Housing Marketing Regulations that added handicap and familial status as protected classes under these Regulations.

NOFA: Non-profit civil rights and housing organizations; organizations representing segments of the housing or mortgage lending industries; higher education institutions with expertise in civil rights and housing. While location within the Chicago metropolitan area would be highly desirable, it is not required.

(e) Project Components

HUD seeks to implement a fair housing marketing lab to examine new methods for offering privately operated federally assisted and insured multifamily housing, within the Chicago metropolitan area to all eligible residents of the area. For the purpose of this NOFA, the Chicago metropolitan area includes the City of Chicago and Cook, DuPage, Will, Kane, McHenry and Lake Counties. This area was selected because of its extensive past experience in implementing areawide interjurisdictional programs to promote fair housing and increased housing choice and because of the existing infrastructure for carrying out such programs. It is hoped that a new approach to affirmative fair housing marketing will result in a breakdown of jurisdictional barriers to housing opportunities and promote initiatives that diminish residential segregation and encourage residential diversity. The $1 million offered through this NOFA will be targeted toward affirmative fair housing marketing activities affecting either multifamily housing alone, single-family housing alone, or both simultaneously. In addition, an applicant may focus its proposed activities on either the entire metropolitan area or specific target areas which it may designate.

The Affirmative Fair Housing Marketing Lab involves three distinct elements:

(1) The first element of the lab entails the establishment of a metropolitan areawide clearinghouse that will:

(i) Develop and administer a metropolitan areawide affirmative fair housing marketing plan affecting participating privately-owned federally assisted and insured multifamily housing. A complete description of this Plan is found at Section IV (a)(2) of this NOFA. The plan would not include assisted housing owned by the public housing authorities in the Chicago metropolitan area, since at this time the Department's Affirmative Fair Housing Marketing Regulations do not apply to PHA-operated housing. Furthermore, the Department plans to conduct similar, larger-scale experiments on metropolitan-wide strategies which will combine both privately-operated and PHA-operated housing.

(ii) Develop and maintain the following databases:

(A) A metropolitan areawide database of all families eligible for privately operated HUD-assisted (including insured) multifamily housing who have used the services offered by the clearinghouse. The database would be compiled through any of the following methods:

(*1*) Encouraging families already on waiting lists of participating projects to take advantage of the housing opportunities offered by the clearinghouse. Under this concept, the project manager would notify in writing all families on his or her individual project waiting list of the existence of the clearinghouse and the availability of both the services and the expanded housing choices it will offer. The notice would also say that any family which was found to be eligible for any housing opportunity offered by the clearinghouse would not lose its position on the individual project's waiting list and would in fact be "crosslisted" for all projects for which the family was eligible.

Note: A participant may opt to continue to maintain its own project waiting list while using the other application intake services.

(*2*) Recruiting families who respond to advertisements placed in various media as part of the proposer's metropolitan areawide affirmative marketing plan;

(B) An areawide list of housing opportunities offered by managers of participating multifamily projects subject to AFHM requirements. These housing opportunities may be categorized by jurisdiction within the Chicago metropolitan area, by neighborhood within the City of Chicago, by assisted or insured housing program, and by bedroom size;

(C) The demographics of each development and the neighborhoods in which the assisted and insured housing opportunities are located must be included and updated as turnover occurs. Information on the social services, transportation, schools, churches, employment opportunities and other facets of the community must also be included.

(iii) Carry out a major effort to secure voluntary participation in the clearinghouse by a significant number of housing providers subject to AFHM requirements that do business within the area designated by the applicant. For purposes of this NOFA, housing providers include corporations, individuals, or other entities who own and/or operate apartment complexes of 10 or more units (including the Illinois Housing Development Authority which operates Section 8 Housing projects subject to AFHM requirements), realty companies and home builders who build, rehabilitate or sell 10 or more new single-family homes annually, and financial institutions involved in the making of loans on residential property. This effort shall include outreach and education programs targeted at apartment managers, real estate sales organizations and housing industry professionals, and shall describe the roles of the clearinghouse and the providers in helping individual families take advantage of expanding affordable housing choices throughout the Chicago metropolitan area. These outreach activities should be targeted especially toward those housing professionals that do business outside of racially-impacted, ethnically-impacted and lower-income impacted neighborhoods and are willing to attract applicants to those areas in which their race does not predominate. Such activities should also be targeted to housing professionals who do business in predominantly minority areas and are willing to attempt to attract non-minority applicants.

The clearinghouse operator will have to explain the financial benefits and obligations of participating in the clearinghouse, which can include the participants' being relieved of their AFHM and eligibility determination responsibilities. To encourage participation by housing providers, HUD will waive the AFHM requirements and, as necessary to permit participation, other regulatory and contractual requirements pertaining to tenant selection and assignment that are not required by statute throughout the period of the lab. These waivers would affect those who would otherwise be subject to the waived programmatic requirements (i.e., all persons approved for the development or rehabilitation of single-family subdivisions, multifamily projects of 10 or more units, and all other persons subject to AFHM Plan requirements in Departmental programs). This affirmative fair housing marketing lab will not alter in any way the requirement for Public Housing Authorities to develop and submit an Equal Housing Opportunity Plan (EHOP) for Section 8 existing housing.

(iv) Operate a one-stop metropolitan areawide housing center which shall perform the following services:

(A) Processing applications for participating federally-assisted and/or insured privately-owned and operated multifamily housing submitted by families who desire to investigate housing opportunities offered by participating owners, managers and real estate brokers. While making applicants aware of all housing opportunities in the area designated by the applicant, the office shall emphasize housing opportunities within areas in which the applicant is least likely to apply for the housing without special outreach activities, because of where the housing is located, and offer additional fair housing counseling for those persons desiring to relocate within such areas. The clearinghouse shall also encourage the creation of housing opportunities within predominantly minority sections of the lab area, so that applicants regardless of race or ethnicity may take advantage of them. The clearinghouse shall also make available information on transportation, schools, social services, employment opportunities and other facets of living in the area selected by the applicant.

For all families that have not previously been on an assisted project's waiting list, the clearinghouse could review for eligibility, perform income and employment verification, secure all information necessary to determine federal or local preferences, and automatically crosslist the applicant for each type of housing project within the program for which he or she is eligible. For example, if a family were to apply for a Section 221(d)(3) unit and were to be found eligible under that program, the family would be crosslisted for all of that program's projects which were participating in the clearinghouse.

(B) Conduct testing and other related activities, particularly in the event that an applicant served by the clearinghouse appears to have encountered discrimination on the basis of race, color, religion, sex, national origin, handicap or familial status or other prohibited conduct that may violate the Fair Housing Act or Executive Order 11063. However, testing for enforcement purposes may be funded only from sources other than this NOFA, and the proposer shall indicate clearly the purpose of any testing and the source and amount of funding devoted to this purpose. Testing, if carried out for educational purposes only, may be funded through this NOFA.

(C) Provide escort and other services to families willing to explore housing opportunities in neighborhoods where their race or ethnic group does not predominate and where they would have been least likely to apply without special outreach.

(v) The applicant can also propose any of the following activities affecting FHA-insured, VA or conventionally financed single-family housing which is affordable for low-income families. These activities may be funded either exclusively from this NOFA, exclusively from sources other than this NOFA or from both federal and non-federal sources:

(A) An areawide affirmative fair housing marketing plan which emphasizes the single-family market;

(B) An areawide list of single-family homeownership opportunities generated from financial institutions, realty companies and local governments. These entities may refer prospective home purchasers to the clearinghouse upon request, so that such purchasers can avail themselves of the homeownership opportunities listed by the clearinghouse; and

(C) A campaign that targets: (*1*) Realty companies and home builders who build, rehabilitate or sell 10 or more new single-family homes annually, and (*2*) financial institutions involved in the making of loans on residential property through the outreach program to housing providers contained in the proposed areawide affirmative marketing plan.

(2) The second element of the lab consists of an evaluation of the clearinghouse concept. The evaluation shall address:

(i) How the clearinghouse concept compares with the present system of HUD review of individual affirmative marketing plans and with the participation by local affiliates of the National Association of Realtors, the National Association of Homebuilders, the National Association of Real Estate Brokers and several other major national real estate industry organizations in the Voluntary Affirmative Marketing Agreement Program, in terms of cost-effectiveness; and

(ii) How effective the clearinghouse is in creating greater housing choice and opportunity and in affecting change in a community's housing occupancy and homeownership patterns.

The Department has decided that the evaluation of the activities conducted under this NOFA will be conducted by an independent contractor prior to the end of the project.

(3) The third element of the lab requires the development of new ways to:

(i) Identify groups within the eligible population that are less likely to apply for housing without special outreach;

(ii) Encourage those groups to take advantage of housing opportunities in nontraditional areas;

(iii) Identify effective advertising methods;

(iv) Increase awareness of nondiscriminatory tenant selection and application processing; and

(v) Test other ways to implement affirmative fair housing marketing.

(f) Selection Criteria/Ranking Factors

(1) Selection Criteria for Ranking Applications for Assistance

All proposals submitted in response to this NOFA will be ranked on the basis of the following selection criteria:

(i) *The anticipated impact of the proposal on the concerns identified in the application.* (25 points). In determining the anticipated impact of each proposal, HUD will evaluate whether the proposal is well-conceived and likely to be successful if implemented, and will consider the degree to which the proposal addresses the significant fair housing issues affecting the Chicago metropolitan area which had been identified in the fair housing analysis required under this NOFA. Particular emphasis will be placed on how the proposer describes the potential impact of the proposed plan on the fair housing environment. This criterion will be judged on the basis of the applicant's submissions in response to Paragraphs IV (a)(1), (a)(2) and (a)(6) of this NOFA under the heading "Checklist of Application Submission Requirements".

(ii) *The extent to which the proposal will provide benefits in support of fair housing after the lab has been completed.* (25 points) In determining the extent to which the proposal will continue providing benefits after funded activities have been completed, HUD will consider the degree to which the concept can be used as a model for similar metropolitan areawide affirmative marketing clearinghouses in other parts of the country. HUD will also evaluate how the applicant plans to insure the long-term financial viability of the clearinghouse fundraising from public and private sources or other means. This criterion will be judged on the basis of the applicant's submissions in response to Paragraphs IV (a)(1), (a)(2), (a)(5), and (a)(8) of this NOFA under the heading "Checklist of Application Submission Requirements".

(iii) *The extent to which the project will provide the maximum benefits in a cost-effective manner* (20 points). In determining the extent to which the proposal will provide the maximum benefit for the metropolitan area covered by this NOFA in a cost-effective manner, HUD will consider the quality and reasonableness of the proposed statement of work, and the timeline and

budget for implementation and completion of the lab.

HUD will consider as well the adequacy and clarity of proposed procedures to be used by the proposer for monitoring the progress of the lab and ensuring its timely completion. These procedures may consist of a system for checking whether or not the milestones established are being met.

The applicant's capability in handling financial resources (e.g., adequate financial control and accounting procedures) demonstrated through previous project management experience will be taken into account as part of the assessment. HUD will also consider the degree to which the applicant proposes to use funds for program costs as opposed to administrative costs. This criterion will be judged on the basis of the proposer's submissions in response to Paragraphs IV(a)(3), (a)(5) and (a)(7) of this NOFA under the heading "Checklist of Application Submission Requirements".

(iv) The *extent to which the applicant's professional and organizational experience will further the achievement of the proposal's goals* (20 points). In determining the extent to which the applicant's professional and organizational experience are likely to further the achievement of the proposal's goals, HUD will consider the applicant's experience in formulating and carrying out programs to prevent or eliminate discriminatory practices, including the applicant's management of past or current projects, including projects that have addressed the problem of providing housing on a nondiscriminatory basis to minorities, women, the disabled and other protected classes.

HUD will also consider these qualifications in the context of the applicant's overall knowledge of the fair housing environment in the Chicago metropolitan area. It will also consider the experience and qualifications of existing personnel identified for key positions, or a description of the qualifications of new staff that will be hired, including subcontractors and consultants. This criterion will be judged on the basis of the proposer's submissions in response to Paragraph IV(a)(3) of this NOFA under the heading "Checklist of Application Submission Requirements".

(v) *The extent to which the project will utilize other public or private resources that may be available* (10 points). The applicant shall describe whether in addition to the $1.0 million provided by this NOFA it plans to use other public or private resources. The other resources must be clearly and specifically targeted for this project and must be over and above the resources available to the applicant as part of its present, non-project operations for such expenses as salaries, equipment, supplies and rent. This criterion will be judged on the basis of the applicant's response to Paragraph IV (a)(4) of this NOFA under the heading "Checklist of Application Submission Requirements".

(vi) *Minority Business Enterprise/ Women-Owned Business Enterprise* (5 points). The applicant shall also describe its experience in Minority Business Enterprise/Women-Owned Business Enterprise contracting. The applicant shall provide a summary of the total amount awarded in each of the two categories for the previous three years and the percentage that amount represents of the total contracts awarded by the applicant in the relevant time period.

(2) Selection Process. Each application for funding will be evaluated competitively and awarded points based on the General Selection Criteria identified in the previous section. The final decision rests with the Assistant Secretary or her designee. After eligible applications are evaluated against the factors for award and assigned a score, they will be organized by rank order.

(3) Cost factors. The Department expects to fund one proposal as a result of this NOFA. It is possible, however, that two or more complete and eligible applications, after evaluation against the Selection Criteria, may be considered equal in technical merit. Should that occur, their relative evaluated cost will become the deciding factor. Furthermore, an applicant's proposal will not be funded whose costs are determined to be unrealistically low or unreasonably high.

(f) Applicant Notification and Award Procedures

(1) Notification

No information will be available to applicants during the period of HUD evaluation, except for notification in writing to those applicants that are determined to be ineligible or that have technical deficiencies in their applications that may be corrected. The Selectee will be announced by HUD upon completion of the evaluation process, subject to final negotiations and award.

(2) Negotiations

After HUD has ranked the applications and made an initial determination of applicants whose scores are within the funding range (but before the actual award), HUD may require that applicants in this group participate in negotiations to determine the specific terms of the grant agreement. In cases where it is not possible to conclude the necessary negotiations successfully, awards will not be made. If an award is not made to an applicant whose application is in the initial funding ranking because of an inability to complete successful negotiations, and if funds are available to fund any applications that may have fallen outside the initial funding ranking, HUD will select the next highest ranking applicant and proceed as described in the preceding paragraph.

(3) Funding Instrument

HUD expects to award a cost reimbursable or fixed-price cooperative agreement to the successful applicant. HUD reserves the right, however, to use the form of assistance agreement determined to be appropriate after negotiations with the applicant.

(4) Reduction of Requested Grant Amounts and Special Conditions

HUD may approve an application for an amount lower than the amount requested, withhold funds after approval, and/or the grantee will be required to comply with special conditions added to the grant agreement, in accordance with 24 CFR 85.12, the requirements of this NOFA, or where:

(i) HUD determines the amount requested for one or more of the components of the proposal is unreasonable or unnecessary.

(ii) The applicant has demonstrated an inability to manage HUD grants;

(iii) For any other reason where good cause exists.

(5) Performance Sanctions

A recipient failing to comply with the procedures set forth in its grant agreement will be liable for such sanctions as may be authorized by law, including repayment of improperly used funds, termination of further participation in FHIP, and denial of further participation in programs of the Department or of any federal agency.

III. Application Process

An application kit is required as the formal submission to apply for funding. The kit includes information on the Statement of Work and Budget for activities proposed by the applicant. An application may be obtained by writing the Fair Housing Information Clearinghouse, Post Office Box 6091, Rockville, MD 20850, or by calling the toll-free number 1–800–343–3442. To

ensure a prompt response, it is suggested that requests for application kits be made by telephone.

Completed applications are to be submitted to Laurence D. Pearl, Director, Office of Program Standards and Evaluation, Office of Fair Housing and Equal Opportunity, Department of Housing and Urban Development, room 5224, 451 Seventh Street SW., Washington, DC 20410. The application due date and time will be specified in the application kit. In no event, however, will the application be due before August 15, 1994. The application deadline is firm as to date and hour. In the interest of fairness to all competing applicants, the Department will treat as ineligible for consideration any application that is received after the deadline. Applicants should take this practice into account and make early submission of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays or other delivery-related problems. A transmission by facsimile machine ("FAX") will not constitute delivery.

IV. Checklist of Application Submission Requirements

(a) General Requirements

The application kit will contain a checklist of application submission requirements to complete the application process. Each proposal submitted under this NOFA must contain the following items:

(1) A metropolitan areawide analysis of the impediments to fair housing choice faced by individual homeseekers within the Chicago metropolitan area, taking into account any of the institutional problems involving the major segments of the real estate and lending industries. This analysis must include a discussion of the problems which specifically relate to the marketing of single-family and multifamily housing to all segments of the population, with particular emphasis on marketing to persons considered protected under the Fair Housing Act and other statutes. The analysis must also discuss the connections between the effectiveness of marketing and the processes of selecting tenants for multifamily projects and evaluating the creditworthiness of applicants for home mortgages. The analysis must also address how its proposed clearinghouse concept will (i) address any and all impediments identified, (ii) help effect change in the current racial and income related housing patterns within the Chicago metropolitan area affected by this NOFA, and (iii) help increase the awareness of all participants in the housing process, especially participants from the real estate industry, of their obligations under fair housing statutes.

(2) A metropolitan areawide affirmative fair housing marketing plan with the following components:

(i) A description of an overall advertising campaign targeted toward groups identified as least likely to apply for assisted housing located within areas for reasons such as the race or national origin of the persons in the area, the lack of units that are accessible to physically disabled persons in the area and the absence of significant numbers of families with children in the area. The campaign may be organized to reach the entire area affected by this NOFA or may be segmented to reach particular jurisdictions, sections within individual jurisdictions or particular segments of the eligible population. The plan shall describe the media to be used, including minority media, community organizations and contacts, referral services that assist disabled persons, and other tactics. The objective of this part of the plan is to encourage prospective renters and home purchasers to use the services of the clearinghouse in their housing searches, especially those services that will support their searches within non-traditional areas.

(ii) A campaign to involve the various provider communities in the clearinghouse on a voluntary basis, *e.g.*, assisted multifamily housing managers, local boards of realtors, home builders associations and individual home builders. The plan shall describe the methods to be used to recruit within the provider community, and how it plans to describe the incentives and obligations (both financial and otherwise) for participation in the clearinghouse. All such financial and other incentives and obligations shall be reviewed and approved by the Department prior to the implementation of this lab. The plan shall also describe any and all training programs to be presented to clearinghouse participants on their obligations under federal, state and local fair housing laws.

(iii) A fair housing counseling program to be given all prospective renters and homebuyers who use the clearinghouse's services to search for dwellings located within areas in which their race or ethnic group does not predominate and in areas where they would be otherwise least likely to apply for housing without special outreach activities due to factors pertaining to the racial or ethnic composition of the neighborhood.

(iv) A goals statement on ensuring increased housing choice and causing deconcentration by race and income in different sections of the community. These goals may be stated in terms of achieving socio-economic changes, *e.g.*, in the racial/ethnic composition of particular neighborhoods or projects, or of getting individual homeseekers to feel that their housing options were increased by availing themselves of the services offered by the clearinghouse. The goals can also be stated in terms of bringing about changes in the attitudes and practices of financial institutions, real estate offices, apartment management companies and other entities that make decisions about their customers' housing choices.

(v) Description of the structure of a consolidated areawide database for multifamily housing units offered by the clearinghouse's fair housing center. This database can be generated from applicants who avail themselves of the services offered by the fair housing center after it opens, or from the waiting lists maintained by the individual participating private owners or management companies prior to the center's opening. The proposer shall also describe the mechanics of actual tenant selection, *e.g.*, selection by the fair housing center staff or by the individual apartment management company or landlord; the procedures to be used by the clearinghouse in processing applications from individual apartment seekers and the arrangements to be made with participating multifamily project managers with respect to referrals from the clearinghouse and the actual selection of tenants;

(vi) Descriptions of activities appropriate to the single-family market, to be included by applicants who wish to emphasize marketing to the prospective home purchaser. Such activities may include:

(A) Testing appropriate methods of involving local financial institutions under the aegis of the fair housing center in activities which will increase the sensitivity and awareness of such institutions and their professional staff about the impact of their lending and mortgage credit review practices upon properties and individuals located in lower-income and racially and ethnically impacted neighborhoods;

(B) Testing new methods of marketing to nontraditional home purchasers, *e.g.*, low-income families, persons with disabilities, and first-time home purchasers who desire to increase their knowledge of the responsibilities of homeownership;

(C) Testing a clearinghouse system geared toward referring prospective home purchasers to real estate

professionals who will assist them in navigating the home purchase process.

(3) A statement of work, a budget—which must include a realistic amount, not to exceed $2,000, in travel costs for financial management training sponsored by the Department—and a timeline for the implementation of the proposed activities, consisting of a description of the specific activities to be conducted with these funds, the geographic areas to be served by the activities, the cost of each proposed activity and a schedule for the implementation and completion of the activities.

(4) A description of the applicant's experience in formulating or carrying out programs to prevent or eliminate discriminatory housing practices or in implementing other civil rights programs, the experience and qualifications of existing personnel identified for key positions, or a description of the qualifications of new staff to be hired, including subcontractors/consultants.

(5) A description of the financial mechanisms to be used by the clearinghouse operator in addition to the federal funds to make the clearinghouse self-sustaining. Such a mechanism shall be reviewed and approved by the Department prior to the implementation of this lab.

(6) A description of the procedures to be used by the applicant for monitoring the progress of the proposed activities.

(7) A description of the fair housing benefits that successful completion of the project will produce, and the indicators by which these benefits are to be measured. These possible benefits can include changes in racial, ethnic and income-related housing patterns that may have taken place during the testing period, increases in awareness and changes in lending, or sales and rental practices which result in fairer treatment for persons protected by civil rights statutes. Particular emphasis must be placed on measuring and comparing the costs and the benefits of the present system of HUD AFHM Plan processing and the clearinghouse concept being tested under this NOFA.

(8) A description of how the clearinghouse will be of continuing use in dealing with housing discrimination after the completion of the demonstration. In this section, the proposer shall explain how the clearinghouse plans to continue its existence after the expiration of this grant, describing the public and private sources of financing and the services which are both similar to and different from the services to be offered during the period of this grant.

(9) HUD Form 2880, Applicant Disclosures.

(10) The applicant must submit a certification and disclosure in accordance with the requirements of section 319 of the Department of the Interior Appropriations Act (Pub. L. 101–121, approved October 23, 1989), as implemented in HUD's interim final rule at 24 CFR part 87, published in the **Federal Register** on February 26, 1990 (55 FR 6736). This statute generally prohibits recipients and subrecipients of federal contracts, grants, cooperative agreements and loans from using appropriated funds for lobbying the Executive and Legislative Branches of the federal government in connection with a specific contract, grant, or loan. If warranted, the applicant should include the Disclosure of Lobbying Activities Form (SF–LLL).

V. Corrections to Deficient Applications

Applicants will not be disqualified from being considered for funding because of technical deficiencies in their application submission, e.g., an omission of information such as regulatory/program certifications, inadequate budget data, or incomplete signatory requirements for application submission.

HUD will notify an applicant in writing of any technical deficiencies in the application. The applicant must submit corrections within 14 calendar days from the date of HUD's letter notifying the applicant of any technical deficiency.

The 14-day correction period pertains only to non-substantive, technical deficiencies or errors. Technical deficiencies relate to items that:

(a) Are not necessary for HUD review under selection criteria/ranking factors; and

(b) Would not improve the substantive quality of the proposal.

VI. Other Matters

Section 504 Requirements

Recipients will be expected to comply with the requirements of Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794, and 24 CFR part 8. Section 504 prohibits discrimination based on handicap in federally assisted programs.

Prohibition Against Lobbying

On February 26, 1990, at 55 FR 6736, the Department joined in the issuance of a government-wide interim rule advising recipients and subrecipients of federal contracts, grants, cooperative agreements and loans exceeding $100,000 of a new prohibition against use of appropriated funds for lobbying the Executive or Legislative Branches of the federal government in connection with a specific contract, grant, or loan. In general, this rule prohibits the awarding of contracts, grants, cooperative agreements, or loans unless the recipient has made an acceptable certification regarding lobbying. In addition, the recipient must file a disclosure if it has made or has agreed to make any payment with nonappropriated funds that would be prohibited if paid with appropriated funds. The law provides substantial monetary penalties for failure to file the required certification or disclosure.

Environmental Impact

A Finding of No Significant Impact with respect to the environment has been made in accordance with the Department's regulations at 24 CFR part 50 which implement Section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332). The Finding of No Significant Impact is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays at the Office of the Rules Docket Clerk, room 10276, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410.

Executive Order 12606, The Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that the policies announced in this Notice would not have a significant impact on the formation, maintenance, and general well-being of families except indirectly to the extent of the social and other benefits expected from this program of assistance.

Executive Order 12612, Federalism

The General Counsel has determined, as the Designated Official for HUD under section 6(a) of Executive Order 12612, Federalism, that the policies contained in this Notice will not have federalism implications and, thus, are not subject to review under the Order. The promotion of fair housing policies is a recognized goal of general benefit without direct implications on the relationship between the national government and the states or on the distribution of power and responsibilities among various levels of government.

Drug-Free Workplace Certification

The Drug-Free Workplace Act of 1988 requires grantees of federal agencies to certify that they will provide drug-free workplaces. Thus, each applicant must certify that it will comply with drug-free

workplace requirements in accordance with 24 CFR part 24, subpart F.

Section 102 HUD Reform Act Documentation and Public Access Requirements; Applicant/Recipient disclosures

Documentation and Public Access Requirements

HUD will ensure that documentation and other information regarding each application submitted pursuant to this NOFA are sufficient to indicate the basis upon which assistance was provided or denied. This material, including any letters of support, will be made available for public inspection for a five-year period beginning not less than 30 days after the award of the assistance. Material will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. In addition, HUD will include the recipients of assistance pursuant to this NOFA in its quarterly **Federal Register** notice of all recipients of HUD assistance awarded on a competitive basis. (See 24 CFR 12.14(a) and 12.16(b), and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on these documentation and public access requirements.)

Disclosures

HUD will make available to the public for five years all applicant disclosure reports (HUD Form 2880) submitted in connection with this NOFA. Update reports (also Form 2880) will be made available along with the applicant disclosure reports, but in no case generally for a period of less than three years. All reports—both applicant disclosures and updates—will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. (See 24 CFR subpart C, and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on these disclosure requirements.)

Section 103 HUD Reform Act

HUD's regulation implementing section 103 of the Department of Housing and Urban Development Reform Act of 1989 was published May 13, 1991 (56 FR 22088) and became effective on June 12, 1991. That regulation, codified as 24 CFR part 4, applies to the funding competition announced today. The requirements of the rule continue to apply until the announcement of the selection of successful applicants. HUD employees involved in the review of applications and in the making of funding decisions are limited by part 4 from providing advance information to any person (other than an authorized employee of HUD) concerning funding decisions, or from otherwise giving any applicant an unfair competitive advantage. Persons who apply for assistance in this competition should confine their inquiries to the subject areas permitted under 24 CFR part 4.

Applicants who have questions should contact the HUD Office of Ethics (202) 708–3815 (TDD/Voice). (This is not a toll-free number.) The Office of Ethics can provide information of a general nature to HUD employees, as well. However, a HUD employee who has specific program questions, such as whether particular subject matter can be discussed with persons outside the Department, should contact his or her Regional or Field Office Counsel, or Headquarters counsel for the program to which the question pertains.

Section 112 HUD Reform Act

Section 13 of the Department of Housing and Urban Development Act contains two provisions dealing with efforts to influence HUD's decisions with respect to financial assistance. The first imposes disclosure requirements on those who are typically involved in these efforts—those who pay others to influence the award of assistance or the taking of a management action by the Department and those who are paid to provide the influence. The second restricts the payment of fees to those who are paid to influence the award of HUD assistance, if the fees are tied to the number of housing units received or are based on the amount of assistance received, or if they are contingent upon the receipt of assistance.

Section 13 was implemented by final rule published in the **Federal Register** on May 17, 1991 (56 FR 22912). If readers are involved in any efforts to influence the Department in these ways, they are urged to read the final rule, particularly the examples contained in Appendix A of the rule.

Authority: Section 561 of the Housing and Community Development Act of 1987 (42 U.S.C. 3616 note); Title VIII, Civil Rights Act of 1968, as amended (42 U.S.C. 3601–3619); Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: June 10, 1994.

Paul Williams,

General Deputy, Assistant Secretary for Fair Housing and Equal Opportunity.

BILLING CODE 4210–28–P

Affirmative Fair Housing Marketing Plan

U.S. Department of Housing and Urban Development
Office of Fair Housing and Equal Opportunity

Attachment

OMB Approval No. 2529-0013 (exp. 10/31/93)

1a. Applicant's Name, Address (including city, State and zip code) & Phone Number:

1c. Project/Application Number | 1d. Number of Units | 1e. Price or Rental Range From $ To $

1f. For Multifamily Housing Only: ☐ Elderly ☐ Non-Elderly

1g. Approximate Starting Dates: Advertising: Occupancy:

1b. Project's Name, Location (including city, State and zip code):

1h. County: | 1i. Census Tract:

1j. Managing/Sales Agent's Name & Address* (including city, State and zip code)

2. **Type of Affirmative Marketing Plan:** (mark only one)
☐ Project Plan ☐ Minority Area ☐ White (non-minority) Area
☐ Mixed Area (with _____ % minority residents)
☐ Annual Plan (for single-family scattered site units) **Note:** A separate Annual Plan must be developed for each type of census tract in which the housing is to be built.

3. **Direction of Marketing Activity:** (indicate which group(s) in the housing market area are least likely to apply for the housing because of its location and other factors without special outreach efforts)
☐ White (non-Hispanic) ☐ Black (non-Hispanic) ☐ Hispanic
☐ American Indian or Alaskan Native ☐ Asian or Pacific Islander

4a. **Marketing Program: Commercial Media:** (Check the type of media to be used to advertise the availability of this housing)
☐ Newspapers/Publications ☐ Radio ☐ TV ☐ Billboards ☐ Other (specify)

Name of Newspaper, Radio or TV Station	Racial/Ethnic Identification of Readers/Audience	Size/Duration of Advertising

4b. **Marketing Program: Brochures, Signs, and HUD's Fair Housing Poster:**
(1) Will brochures, letters, or handouts be used to advertise? ☐ Yes ☐ No If "Yes", attach a copy or submit when available
(2) For project site sign, indicate sign size _____ x _____; Logotype size _____ x _____. Attach a photograph of project sign or submit when available.
(3) HUD's Fair Housing Poster must be conspicuously displayed wherever sales/rentals and showings take place. Fair Housing Posters will be displayed in the:
☐ Sales/Rental Office ☐ Real Estate Office ☐ Model Unit ☐ Other (specify)

4c. **Community Contacts.** To further inform the group(s) least likely to apply about the availability of the housing, the applicant agrees to establish and maintain contact with the groups/organizations listed below that are located in the housing market area or SMSA. If more space is needed, attach an additional sheet. Notify HUD-FHEO of any changes in this list. Attach a copy of correspondence to be mailed to these groups/organizations. (Provide all requested information.)

Name of Group/Organization:	Racial/Ethnic Identification	Approximate Date	Person Contacted or to be Contacted

Address & Phone Number	Method of Contact	Indicate the specific function the Group/Organization will undertake in implementing the marketing program:

5. **Future Marketing Activities** (Rental Units Only). Mark the box(s) that best describe marketing activities to fill vacancies as they occur after the project has been initially occupied.
☐ Newspapers/Publications ☐ Radio ☐ TV ☐ Brochures/Leaflets/Handouts
☐ Site Signs ☐ Community Contacts ☐ Other (specify)

6. **Experience and Staff Instructions:** (See instructions)
6a. Staff has experience. ☐ Yes ☐ No
6b. On separate sheets, indicate training to be provided to staff on Federal, State and local fair housing laws and regulations, as well as this AFHM Plan. Attach a copy of the instructions to staff regarding fair housing.

7. **Additional Considerations.** Attach additional sheets as needed.

8. **Changes and Revisions:** By signing this form, the applicant agrees, after appropriate consultation with HUD, to change any part of the plan covering a multifamily project to ensure continued compliance with Section 200.620 of HUD's Affirmative Fair Housing Marketing Regulations.

Signature of Person Submitting this Plan & Date of Submission	For HUD-FHEO Use Only: Approval By: Signature & Date	Disapproval By: Signature & Date
Name (type or print)	Name (type or print)	Name (type or print)
Title & Name of Company	Title	Title

Previous Editions are Obsolete

form HUD-935.2 (10/92)
ref. Handbook 8025.1

Public Reporting Burden for this collection of information is estimated to average 0.75 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Reports Management Officer, Office of Information Policies and Systems, U.S. Department of Housing and Urban Development, Washington, D.C. 20410-3600; and to the Office of Management and Budget, Paperwork Reduction Project (2529-0013), Washington, D.C. 20503. Do not send this completed form to either of the above addressees.

Instructions

Send the Completed form to: Your Local HUD Office, Attention: Fair Housing and Equal Opportunity Director/Specialist

The Affirmative Fair Housing Marketing Regulations require that each applicant subject to these regulations carry out an affirmative program to attract prospective buyers or tenants of all minority and non- minority groups in the housing market area regardless of race, color, religion, sex or national origin. These groups include Whites (Non-Hispanic) and members of minority groups: Blacks (Non-Hispanic), American Indians/Alaskan Natives, Hispanics and Asian/Pacific Islanders in the Standard Metropolitan Statistical Areas (SMSA) or housing market area who may be subject to housing discrimination on the basis of race, color, religion, sex or national origin. The applicant shall describe on this form the activities it proposes to carry out during advance marketing, where applicable, and the initial sales or rent-up period. The affirmative program also should ensure that any group(s) of persons normally NOT likely to apply for the housing without special outreach efforts (because of existing neighborhood racial or ethnic patterns, location of housing in the SMSA price or other factors), know about the housing, feel welcome to apply and have the opportunity to buy or rent.

Part 1 - Applicant and Project Identification. The applicant may obtain Census Tract location information, item 1i, from local planning agencies, public libraries and other sources of Census Data. For item 1g, specify approximate starting date of marketing activities to the groups targeted for special outreach and the anticipated date of initial occupancy. Item 1j is to be completed only if the applicant is not to implement the plan on its own.

Part 2 - Type of Affirmative Marketing Plan. Applicants for multifamily and subdivision projects are to submit a Project Plan which describes the marketing program for the particular project or subdivision. Scattered site builders are to submit individual annual plans based on the racial composition of each type of census tract. For example, if a builder plans to construct units in both minority and non- minority census tracts, separate plans shall be submitted for all of the housing proposed for both types.

Part 3 - Direction of Marketing Activity. Considering factors such as price or rental of housing, the racial/ethnic characteristics of the neighborhood in which housing is (or is to be) located, and the population within the housing market area, public transportation routes, etc., indicate which group(s) you believe are least likely to apply without special outreach.

Part 4 - Marketing Program. The applicant shall describe the marketing program to be used to attract all segments of the eligible population, especially those groups designated in the Plan as least likely to apply. The applicant shall state: the type of media to be used, the names of newspapers/call letters of radio or TV stations; the identity of the circulation or audience of the media identified in the Plan, e.g., White (Non-Hispanic), Black (Non-Hispanic), Hispanic, Asian-American/Pacific Islander, American Indian/ Alaskan Native, and the size or duration of newspaper advertising or length and frequency of broadcast advertising. Community contacts include individuals or organizations that are well known in the project area or the locality and that can influence persons within groups considered least likely to apply. Such contacts may include, but need not be limited to: neighborhood, minority and women's organizations, churches, labor unions, employers, public and private agencies, and individuals who are connected with these organizations and/or are well-known in the community.

Part 5 - Future Marketing Activities. Self-Explanatory.

Part 6 - Experience and Staff Instructions.

a. Indicate whether the applicant has previous experience in marketing housing to group(s) identified as least likely to apply for the housing.

b. Describe the instructions and training given to sales/rental staff. This guidance to staff must include information regarding Federal, State and local fair housing laws and this AFHM Plan. Copies of any written materials should be submitted with the Plan, if such materials are available.

Part 7 - Additional Considerations. In this section describe other efforts not mentioned previously which are planned to attract persons in either those groups already identified in the Plan as least likely to apply for the housing or in groups not previously identified in the Plan. Such efforts may include outreach activities to female-headed households.

Part 8 - The applicant's authorized agent signs and dates the AFHM Plan. By signing the Plan, the applicant assumes full responsibility for its implementation. The Department may at any time monitor the implementation of the Plan and request modification in its format or content, where the Department deems necessary.

Notice of Intent to Begin Marketing. No later than 90 days prior to the initiation of sales or rental marketing activities, the applicant with an approved Affirmative Fair Housing Marketing Plan shall submit notice of intent to begin marketing. The notification is required by the Affirmative Fair Housing Marketing Plan Compliance Regulations (24 CFR Part 108.15). It is submitted either orally or in writing to the FHEO Division of the appropriate HUD Office serving the locality in which the proposed housing is located. OMB approval of the Affirmative Fair Housing Plan includes approval of this notification procedure as part of the Plan. The burden hours for such notification are included in the total designated for this Affirmative Fair Housing Marketing Plan form.

Part IX

Department of Education

34 CFR Part 682
Federal Family Education Loan Program; Final Rule

DEPARTMENT OF EDUCATION

34 CFR Part 682

RIN 1840–AB62

Federal Family Education Loan Program

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary amends the regulations governing the Federal Family Education Loan (FFEL) Program. The FFEL Program consists of the Federal Stafford, Federal Supplemental Loans for Students (SLS), Federal PLUS, and the Federal Consolidation Loan programs. These amendments are needed to implement changes made to the Higher Education Act of 1965, as amended (HEA), by the Higher Education Amendments of 1992 (Pub. L. 102–325). Public Law 102–325 added new section 428J to the HEA which authorizes the Secretary to establish a demonstration program for loan forgiveness for certain types of professional or public service. Under section 428J of the HEA, the Secretary is authorized to forgive portions of Federal Stafford Loans incurred by a student borrower who performs volunteer service or works in certain teaching or nursing areas. Minor changes to section 428J were made by the National and Community Service Trust Act of 1993 (Pub. L. 103–82). Section 428J was also recently amended by the Higher Education Technical Amendments of 1993 (Pub. L. 103–208). Those additional statutory changes are also reflected in these regulations. This program is not currently funded.

EFFECTIVE DATE: Pursuant to section 482(c) of the Higher Education Act of 1965, as amended (20 U.S.C. 1089(c)), these regulations take effect July 1, 1995, with the exception of the information collection requirements in § 682.215. The information collection requirements in § 682.215 will become effective on July 1, 1995, or after these requirements have been submitted by the Department of Education and approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980, whichever is later. A document announcing the effective date will be published later in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Barbara Bauman, Program Specialist, Loans Branch, Division of Policy Development, Policy, Training, and Analysis Service, U. S. Department of Education, 400 Maryland Avenue SW. (room 4310, ROB–3), Washington, DC 20202–5449. Telephone: (202) 708–8242. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: New section 428J of the HEA authorizes the Secretary to promulgate regulations to establish a loan forgiveness demonstration program in the Federal Stafford Loan Program. The purpose of the demonstration program is to encourage individuals to enter the teaching and nursing professions and to perform national and community service by offering partial Federal Stafford loan forgiveness. If funding is provided, the loan forgiveness program is available only to new borrowers who, as of October 1, 1989, had no outstanding debt on a FFEL Program loan.

On February 25, 1994, the Secretary published a notice of proposed rulemaking (NPRM) for part 682 in the **Federal Register** (59 FR 9376). The NPRM included a discussion of the major issues surrounding the proposed changes which will not be repeated here. The following list summarizes those issues and identifies the pages of the preamble to the NPRM on which a discussion of those issues may be found:

- Eligibility requirements for a borrower who wishes to qualify for loan forgiveness (page 9378);
- Application procedures for loan forgiveness (page 9378);
- Limitations of the loan forgiveness program (page 9378);
- Requirements for borrowers desiring loan forgiveness under the teaching, volunteer service or nursing categories (pages 9378–9379);
- Percentages of loan amounts eligible for forgiveness based on year of service completed (page 9379).

Substantive Revisions to the Notice of Proposed Rulemaking

Section 682.215(c) Application

- The Secretary has defined September 1 as the earliest date in which a borrower can apply for loan forgiveness in addition to the October 1 deadline for submitting applications.
- The Secretary has clarified that borrowers who submit incomplete and inaccurate loan forgiveness applications will not be considered for loan forgiveness unless and until a completed application is submitted.

Section 682.215(i) Definitions

- The Secretary has expanded the definition of both "elementary school" and "secondary school" to include nonprofit private day or residential schools to be consistent with the definition for these terms in the Perkins Loan Program definitions.

Analysis of Comments and Changes

In response to the Secretary's invitation in the NPRM, 14 parties submitted comments on the proposed regulations. An analysis of the comments and of the changes made to the regulations as a result of those comments follows.

Major issues are grouped according to subject. Technical and other minor changes, and suggested changes the Secretary is not legally authorized to make under the applicable statutory authority, are not addressed.

Section 682.215(a) General

Comment: Some commenters noted that there is no formal method specified in the regulations to inform borrowers about the loan forgiveness program. The commenters recommended that details be provided to borrowers in the application/promissory note or the disclosure statement. The commenters did not believe that lenders should be required to do a special mailing.

Discussion: The Secretary will ensure that guaranty agencies take steps to inform borrowers about the loan forgiveness program should the program be funded. These methods may include mention in the application/promissory note or disclosure statement or in public documents such as the Student Guide. Lenders will not be expected to publicize the program through a special mailing.

Change: None.

Comment: A commenter recommended that the definition of eligible borrower be clarified to convey that a borrower who had paid off an outstanding debt under the FFEL programs prior to October 1, 1989 would be eligible for the forgiveness program if the borrower became a "new" borrower with their first disbursement of a new FFEL program loan on or after October 1, 1989.

Discussion: The Secretary believes that the regulations convey that a borrower who has no outstanding debt under the FFEL programs as of October 1, 1989 would qualify as an eligible borrower.

Change: None.

Comment: A commenter asked if lenders would be required to produce a new repayment schedule for a borrower each year loan forgiveness is granted. The commenter also suggested that the percentages of loan forgiveness should

have no effect on the borrower's current payments.

Discussion: The Secretary does not believe that it is necessary for a lender to provide new repayment schedules to borrowers who receive loan forgiveness. The Secretary expects that the reduction of the loan amount owed by a borrower as a result of the loan forgiveness will most likely result in a reduction of the number of payments to be made by the borrower.

Change: None.

Comment: A commenter asked if all Federal Stafford loans were eligible for forgiveness under this demonstration program.

Discussion: The Secretary agrees that the regulations should be clarified to explain that subsidized, unsubsidized, and nonsubsidized Federal Stafford loans will be eligible for forgiveness under § 682.215.

Change: The final regulations have been revised to incorporate this clarification.

Comment: One commenter urged the Secretary to include loans made under the Federal Direct Student Loan Program to be eligible for the forgiveness program. The commenter believed that since the Omnibus Budget Reconciliation Act of 1993 stated that all terms and conditions under the Federal Stafford Loan Program, which include cancellation, deferment and other provisions, also apply to the Federal Direct Student Loan Program, Congress intended for the loan forgiveness program to be included as well.

Discussion: The Secretary agrees with the commenter that loans made under the Federal Direct Student Loan Program are eligible for the forgiveness program. Direct Loan regulations will specify Direct Loan borrowers' eligibility for loan forgiveness under this program.

Change: None.

Comment: Some commenters believed that the Secretary should provide timeframes and procedures by which to notify borrowers of their approval or denial of loan forgiveness eligibility. The commenters were also interested in knowing the timeframes and procedures that the Secretary will adopt to notify the holder regarding which borrowers will receive forgiveness and when the holder will be given the appropriate funds.

Discussion: The borrower will be informed of his or her eligibility for loan forgiveness by the Secretary in a timely manner. The Secretary will take appropriate steps to inform holders of proper procedures. However, the Secretary notes that without knowing the amount of appropriations, if any, that might be available for the forgiveness program and the potential number of recipients, it is impossible to define those methods in these regulations.

Change: None.

Comment: Some commenters expressed concern about borrower confusion regarding the borrower's repayment obligation if the borrower is eligible for loan forgiveness. The commenters were worried about the period of time between when a borrower applies for loan forgiveness and the holder's receipt of the loan forgiveness payment from the Secretary. The commenters wanted to know how the servicer would be notified that the borrower's loan or loans are eligible for loan forgiveness and whether the borrower would be required to continue to make regular monthly payments in the time period between the loan forgiveness application submission and payment from the Secretary.

Discussion: The Secretary recognizes the potential problems created by this structure. Because this program is not an entitlement, the Secretary cannot promise an otherwise eligible borrower that funding will be available to award a percentage of loan forgiveness. Therefore, the Secretary reminds the commenters that the borrower is still in repayment on his or her loan, regardless of eligibility for the loan forgiveness unless he or she is in an authorized deferment or forbearance period.

Change: None.

Comment: One commenter wanted to know if a borrower could participate in both a state forgiveness program as well as this demonstration program.

Discussion: Although the National and Community Service Act of 1990 (42 U.S.C. 12571 *et seq.*) precludes a borrower from receiving a loan cancellation benefit under both that program and this loan forgiveness program, the Secretary believes that a borrower participating in the loan forgiveness program under § 682.215 is eligible to participate in state forgiveness programs, where allowable by the state.

Change: None.

Section 682.215(b)

Comment: Some commenters believed that in the instances where a defaulted borrower made satisfactory repayment arrangements on the loans in default, a borrower should be allowed to have those defaulted loans forgiven as well. The commenters believed that if the motivation behind the demonstration program was to encourage borrowers to enter into public service, then defaulted borrowers could be further enticed into public service by being allowed to "work off" their defaulted loans as well as those not in default.

Discussion: This issue was thoroughly discussed at the negotiated rulemaking sessions that preceded publication of the NPRM. Given that there may be limited or no funding for this program, the Secretary felt that it would be inappropriate to provide this benefit on loans that are still in default.

Change: None.

Comment: A commenter recommended that the Secretary and the guaranty agencies establish a way to easily verify that satisfactory repayment arrangements had been made on a loan that is to be considered eligible for loan forgiveness.

Discussion: The Secretary encourages guaranty agencies to provide appropriate information to lenders regarding a borrower's loan status. Additionally, the Secretary anticipates that the National Student Loan Data System will assist in providing this type of information.

Change: None.

Comment: Two commenters recommended that the Secretary should encourage guaranty agencies to consider those borrowers who have defaulted on their loans but are likely to be eligible for loan forgiveness to be good candidates for a rehabilitated loan.

Discussion: The Secretary believes that it is illogical to conclude that eligibility for one program assures eligibility for another. The loan rehabilitation program has specific requirements separate from the forgiveness program.

Change: None.

Comment: One commenter requested that the Secretary clarify that defaulted loans that have been rehabilitated should be eligible for forgiveness.

Discussion: The Secretary agrees with the commenter. Once a loan has been rehabilitated it is no longer in default and is therefore considered to be eligible for forgiveness under this program.

Change: The final regulations have been revised to incorporate this clarification.

Section 682.215(c)

Comment: Three commenters urged the Secretary to develop a standardized loan forgiveness application form that includes such data items as borrower dates of service, loan balance information, eligibility, and interest amounts in order to simplify the process.

Discussion: The Secretary agrees and is committed to consulting with FFEL participants to develop a standardized

application form pursuant to the requirements of section 432(1) of the HEA.

Change: None.

Comment: One commenter questioned to whom the term "designee" in § 682.215(c) refers. The commenter also recommended that the Secretary provide the designee with a means by which to identify and verify that a certain type of facility, tax-exempt organization or teacher shortage area meets the criteria of § 682.215. The commenter suggested that a more suitable alternative would be to require the certifying official to certify that the organization meets the requirements of § 682.215.

Discussion: The term "designee" refers to the departmental official assigned with implementing this program. The Secretary will provide the designee with all necessary information at the appropriate time if necessary. The Secretary notes that the NPRM provided that the certifying official in each category of forgiveness certify that the borrower's service meets the requirements of § 682.215.

Change: None.

Comment: In considering the October 1 deadline for submitting forgiveness applications, some commenters recommended that the regulations define a specific timeframe as to the earliest date an application for forgiveness may be received. They reasoned that since funding for this program may be limited and will be awarded on a first-come, first-served basis, applicants should be informed of the first date upon which they can apply. The commenters also wished to know whether a borrower need complete the service prior to applying for forgiveness or merely have completed service before the October 1 deadline.

Discussion: The Secretary agrees with the commenters that a borrower should be informed of the first date on which a forgiveness application can be received. A borrower's application for forgiveness should be postmarked no earlier than September 1 of each year that forgiveness is requested. The Secretary has chosen the September start date in order to be fair to all categories of borrowers, since certain professions have more definitive begin and end dates or terms that may end in June or July that would give them an advantage over other borrowers if the earliest date to apply was July or August. The Secretary also believes that it is appropriate to require that the service be completed prior to the borrower's submission of an application for forgiveness. This would result in fair treatment to the greatest number of borrowers and would eliminate the need to confirm that the borrower completed the service.

Change: The final regulations have been revised to include September 1 as the earliest date for forgiveness applications to be received.

Comment: A commenter asked if applications for forgiveness should be routed through the lender or guaranty agency or directly to the Secretary.

Discussion: Applications for loan forgiveness should be directed to the Secretary.

Change: None.

Comment: Some commenters felt that there should be a provision whereby a borrower who qualified for forgiveness one year but did not receive it due to limited funding should be first to be considered for forgiveness the following year. The commenters also wanted to know if a borrower who qualified and received the forgiveness one year would be automatically eligible for the following year's forgiveness.

Discussion: This approach was discussed at the negotiated rulemaking sessions. The Secretary believes that given the limited amount of funding, there is no statutory basis to allow eligible applicants from one year to automatically qualify for the next year. Similarly, borrowers who were denied forgiveness due to lack of funding one year will not be given priority over the next year's applicants. Borrowers are required to reapply for each year for which they wish to receive the forgiveness benefit.

Change: None.

Comment: Some commenters wanted to know how to treat a borrower's incomplete forgiveness application. The commenters asked whether a borrower should be disqualified, or if allowed to provide the missing information, how much time should a borrower have to submit the information. They also wanted to know if the borrower's first-come, first-served status would be affected by submitting an incomplete application.

Discussion: An incomplete or inaccurate application will not qualify a borrower for receiving loan forgiveness. However, the Secretary will attempt to notify the borrowers who submit inaccurate or incomplete applications so that they will have an opportunity to complete and submit a complete application by the October 1 deadline.

Change: None.

Comment: A number of commenters expressed confusion over the treatment of borrowers with regard to forbearance. Some commenters questioned whether forbearance for eligible borrowers under the forgiveness program was necessary or administratively feasible.

Discussion: The Secretary reminds the commenters that all borrowers who request forbearance while they are serving in areas that would qualify for forgiveness are entitled to forbearance as stated in section 428J. The ability to obtain forbearance is based on the borrower's being engaged in qualifying service and is not dependent on whether the borrower actually receives the loan forgiveness.

Change: None.

Comment: Some commenters asked when a borrower could request forbearance since the borrower does not apply for forgiveness until after the year of service has been completed. The commenters questioned whether forbearance would be granted retroactively at the time the borrower applied for forgiveness or if the lender or servicer would be expected to grant forbearance to a borrower the year prior to application while the borrower was serving in an eligible position. The commenters felt that the wording of the NPRM regarding forbearance may be confusing for a borrower who may think that payments do not have to be made during the period of service. The commenters also wished to know if the forbearance applied only to the loans eligible for forgiveness or on all loans.

Discussion: The Secretary wishes to emphasize that the holder or servicer is to grant forbearance to a borrower upon the borrower's request while the borrower is serving in one of the categories of service eligible for forgiveness under § 682.215. A borrower shall receive forbearance while serving regardless of whether sufficient funding is available for forgiveness at the end of that year of service. The forbearance will apply to all loans held by the borrower that would normally be entitled to forbearance. A borrower who is not in an authorized deferment or forbearance status while serving is expected to follow the terms of the promissory note regarding repayment.

Change: None.

Comment: Some commenters recommended that all borrowers in qualifying service that wish to apply for forbearance be given explicit instruction as to the terms of the forbearance and the fact that receiving forbearance for service under § 682.215 was not related to receiving loan forgiveness for performing qualifying service. The commenters were concerned that a borrower would be incurring additional costs with a forbearance with the potential of not receiving the loan forgiveness benefit for performing qualifying service.

Discussion: The Secretary shares the concerns of the commenters and expects holders to provide information on the option of forbearance under this program as is required under the FFEL programs. The holders will inform borrowers that funding, if available for this program, is limited and that receiving a forbearance during qualifying service does not guarantee loan forgiveness under this program and as such may result in additional costs to the borrower.

Change: None.

Section 682.215 (e), (f), and (g)

Comment: Some commenters asked that the Secretary clarify that a borrower must apply for forgiveness each year following the year of qualifying service in the teaching, volunteer and nursing categories.

Discussion: The Secretary anticipates that some eligible borrowers may have completed qualifying service in previous years that would not be immediately preceding the time in which they apply for this program. In this situation, the Secretary envisions that a borrower would need to indicate the begin and end date of the year of service, as all other eligible borrowers are required to do. Loan forgiveness, if funding is available, would be at the level based on which year the borrower last received forgiveness. For example, a borrower who qualified and received the benefit for the first year of service, but not the second year, who now qualifies for forgiveness for the third year of service would receive the benefit as a second year participant in the forgiveness program.

Change: The final regulations have been revised to clarify that a borrower must apply each year to obtain loan forgiveness under this demonstration program.

Section 682.215(h)

Comment: Some commenters asked whether all Federal Stafford loans are eligible for loan forgiveness. They recommended that if all Federal Stafford loans are eligible the Secretary should specify how the holder should apply the forgiveness amounts.

Discussion: The Secretary clarifies that unsubsidized, subsidized and nonsubsidized Federal Stafford loans are eligible for this forgiveness program and that the holder should apply the forgiveness amounts first to the unsubsidized portion, followed by the subsidized and then the nonsubsidized portion of the loans.

Change: The final regulations have been revised in both § 682.215(a) and § 682.215(h) to incorporate this clarification.

Comment: Some commenters are worried that holders and servicers do not link individual loans to the specific academic years when the borrower was in school and will therefore be unable to identify which years constitute the borrower's last two years of undergraduate education or two-year period when the borrower was obtaining a post graduate teaching or additional teaching certificate.

Discussion: The Secretary believes that holders and servicers are able to track loan amounts for this purpose because numerous existing program requirements already require such tracking. Loans are made based on statutory annual loan limits for applicable undergraduate and post baccalaureate academic levels. This data is available on a loan-by-loan basis for each borrower in lender and guaranty agency systems and should be sufficient for purposes of implementing these provisions.

Change: None.

Section 682.215(h)(5)

Comment: A commenter objected to the provision in the NPRM that states that payments eligible for forgiveness under this program that were already repaid by the borrower will not be refunded. The commenter noted that a prudent borrower may choose not to risk the additional costs of forbearance given the questionable funding for this program and continue to repay the loan, perhaps resulting in paying a loan amount that could have been forgiven but is now not eligible.

Discussion: The statute does not authorize the refunding of any repayment of a Federal Stafford loan.

Change: None.

Section 682.215(i)

Comment: A commenter recommended that the term "secondary school" should not include education beyond the twelfth grade. The commenter stated that this definition conflicts with the commonly recognized definition of postsecondary education in many states and thus may confuse those involved in postsecondary education.

Discussion: This definition was taken from already existing FFEL program regulations.

Change: None.

Comment: One commenter objected to the Secretary limiting the teaching forgiveness provision to borrowers who teach in public elementary and secondary schools. The commenter pointed out that section 428J provides forgiveness for those borrowers who teach full time in a school that qualifies under section 462(a)(2)(A) of the HEA for loan cancellation for Perkins loan recipients. The commenter noted that under the Perkins Loan Program, cancellation is provided for full-time teachers in nonprofit private elementary schools as well. The commenter requested that the Secretary make the definitions of elementary school and secondary school consistent with the Perkins definitions.

Discussion: The Secretary agrees with the commenter.

Change: The final regulations have been revised to include nonprofit private schools in the elementary school and secondary school definitions. This change allows those serving in these types of schools to be eligible under the teaching forgiveness category of § 682.215(e).

Comment: A commenter suggested that the Secretary expand the definitions that pertain to the nursing category of loan forgiveness. The commenter asked that the Secretary broaden the eligibility of sites to encourage more nursing graduates to participate in the forgiveness program.

Discussion: The Secretary consulted with the Secretary of Health and Human Services (HHS) in determining the definitions that would apply to the facilities described in section 428J in which a borrower would be employed full-time as a nurse. These definitions were taken from HHS and other existing regulations. The statute indicates that the Secretary is to rely on the expertise of HHS in these areas. Accordingly, there will be no change.

Change: None.

Executive Order 12866

These final regulations have been reviewed in accordance with Executive Order 12866. Under the terms of the order the Secretary has assessed the potential costs and benefits of this regulatory action.

The potential costs associated with the final regulations are those resulting from statutory requirements and those determined by the Secretary to be necessary for administering the program effectively and efficiently. In assessing the potential costs and benefits—both quantitative and qualitative—of these regulations, the Secretary has determined that the benefits of the regulations justify the costs.

The Secretary has also determined that this regulatory action does not unduly interfere with State, local, and tribal governments in the exercise of their governmental functions.

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the response to the proposed rules and on its own review, the Department has determined that the regulations in this document do not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 682

Administrative practice and procedure, Colleges and universities, Education, Loan programs—education, Reporting and recordkeeping requirements, Student aid, Vocational education.

Dated: May 10, 1994.

Richard W. Riley,

Secretary of Education.

(Catalog of Federal Domestic Assistance Number 84.032, Federal Family Education Loan Program)

The Secretary amends part 682 of title 34 of the Code of Federal Regulations as follows:

PART 682—FEDERAL FAMILY EDUCATION LOAN PROGRAM

1. The authority citation for part 682 continues to read as follows:

Authority: 20 U.S.C. 1071 to 1087–2, unless otherwise noted.

2. A new § 682.215 is added to read as follows:

§ 682.215 Federal Stafford Loan forgiveness demonstration program.

(a) *General.* The Federal Stafford Loan forgiveness demonstration program is intended to encourage individuals to enter the teaching and nursing professions and to perform national and community service. Under this demonstration program, the Secretary repays portions of unsubsidized, subsidized and nonsubsidized Federal Stafford obligations that were incurred by a borrower during the borrower's last two years of undergraduate education if that borrower worked in those professions or performed that service. For purposes of this section, an eligible borrower is a borrower who, as of October 1, 1989, had no outstanding debt under the FFEL programs.

(b) *Borrower eligibility; requirements for qualification.* A borrower may obtain loan forgiveness under this program if he or she was employed as a full-time teacher in certain elementary and secondary schools teaching certain subjects or as a full-time nurse in certain types of hospitals or health care centers, or was serving as a volunteer under the Peace Corps Act or under the Domestic Volunteer Service Act of 1973, or was performing comparable service as a full-time employee of a tax exempt organization under section 501(c)(3) of the Internal Revenue Code of 1986. For purposes of this section, *full-time* means the standard used by a State or profession in defining full-time employment. For a borrower serving in more than one organization, the determination of "full-time" is based on the combination of all qualifying employment. A borrower who is in default on a FFEL loan and has not made satisfactory repayment arrangements is not eligible for forgiveness. However, if a borrower has made satisfactory repayment arrangements on the loan or loans in default, the forgiveness applies only to the loan or loans held by the holder that are not in default. Federal Stafford loans that have been rehabilitated are eligible for forgiveness.

(c) *Application.* To qualify for the forgiveness program, an eligible borrower shall apply to the Secretary each year following a completed year of service, but no earlier than September 1 and no later than October 1 of a given year. The application must be in writing, on a form provided by the Secretary and according to procedures established by the Secretary. An eligible borrower must complete a year of service prior to filing a loan forgiveness application with the Secretary. Eligible borrowers are chosen on a first-come, first-served basis to participate and must receive forbearance upon request for each year of service for which forgiveness is requested. An eligible borrower must reapply each year to receive the forgiveness benefit. Incomplete or inaccurate applications are not considered in the first-come, first-served process. If a borrower initially submits an incomplete or inaccurate application, the borrower must provide a completed application to the Secretary or his designee prior to consideration in the selection process.

(d) *Limitation; Stafford forgiveness recipients.* The total amount of loans forgiven is limited to the amount of funds appropriated for the fiscal year for the demonstration program.

(e) *Borrower eligibility; teaching forgiveness.* (1) To qualify for teaching loan forgiveness under this section, a borrower must have taught full-time for a year (as defined by the jurisdiction in which the borrower is employed) in a teacher shortage area as certified by the authorizing official. For purposes of this paragraph a teacher has taught in a teacher shortage area if—

(i) The teacher taught in a school that satisfied the criteria in section 465(a)(2)(A) of the Act for loan cancellation for Perkins loan recipients who teach in those schools; and

(ii) The teacher taught mathematics, science, foreign languages, special education, bilingual education or in any other field of expertise where the State educational agency determined there was a shortage of qualified teachers.

(2) The borrower, in the time frame provided under paragraph (c) of this section, for the year of service for which forgiveness is requested, must provide to the Secretary or his designee—

(i) A statement by the chief administrative officer of the public elementary or secondary school in which the borrower was teaching—

(A) Certifying the year that the borrower was employed as a full-time teacher;

(B) Certifying which subject area listed in paragraph (e)(1)(ii) of this section or designated by the State educational agency the borrower taught; and

(C) Verifying that the borrower taught in a school that satisfies the requirements of paragraph (e)(1)(i) of this section.

(f) *Borrower eligibility; volunteer service forgiveness.* (1)(i) To qualify for the volunteer service loan forgiveness under this paragraph, a borrower must have served as a full-time volunteer for at least a year (defined as twelve consecutive months) under—

(A) The Peace Corps Act; or

(B) The Domestic Volunteer Service Act of 1973 (ACTION programs).

(ii) A borrower may also qualify for the volunteer service loan forgiveness if the borrower performed service comparable to service provided under paragraph (f)(1) of this section as a full-time employee of an organization that is exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1986, if the borrower did not receive compensation that exceeds the greater of—

(A) The minimum wage rate described in section 6 of the Fair Labor Standards Act of 1938; or

(B) An amount equal to 100 percent of the poverty line for a family of two as defined in section 673(2) of the Community Services Block Grant Act.

(2) To qualify under this paragraph, the borrower must—

(i) Have worked for an organization that provides services to low income persons and their communities to assist

them in eliminating poverty and poverty-related human, social, and environmental conditions; and

(ii) Not, as part of his or her duties, have given religious instruction, conducted worship services, engaged in religious proselytizing, or engaged in fund-raising to support religious activities.

(3) The borrower, in the time frame provided under paragraph (c) of this section, for the year of service for which forgiveness is requested under paragraphs (f)(1), (f)(2), or (f)(3) of this section must provide to the Secretary or his designee a statement from an authorized official of the organization or agency for whom the borrower worked certifying—

(i) That the borrower served in a job that satisfies the requirements of this paragraph;

(ii) The date on which the borrower's service began; and

(iii) The date on which the borrower completed the year of service.

(g) *Borrower eligibility; nursing profession loan forgiveness.* (1) To qualify for the nursing profession loan forgiveness under this paragraph, a borrower must have been employed as a full-time nurse for a public hospital, a rural health clinic, a migrant health center, an Indian Health Service Health Center, an Indian Health Center, a Native Hawaiian Health Center or for an acute care or long-term care facility.

(2) To qualify for loan forgiveness under this paragraph, a borrower, in the time frame provided under paragraph (c) of this section, for the year of service for which forgiveness is requested, must provide to the Secretary or his designee—

(i) A statement from an authorized official where the borrower was employed certifying that the borrower was employed as a full-time nurse for a facility described in this section and served for the term of at least one year (defined as twelve consecutive months);

(ii) The date on which the borrower's service began; and

(iii) The date on which the borrower's year of service ended.

(h) *Forgiveness amounts.* (1) The Secretary repays the holder a percentage of the total amount of Stafford loans owed by the eligible borrower for—

(i) The borrower's last 2 years of undergraduate education; or

(ii) The 2 academic years in which a borrower who was not already participating in loan repayment pursuant to this section returned to an institution of higher education for the purpose of obtaining a post graduate teaching certificate or additional teacher certification.

(2) The Secretary repays loans on the following basis:

(i) 15 percent of the total original principal amount of Federal Stafford loans for each of the first two years in which the borrower is awarded the benefit and meets the requirements of this section.

(ii) 20 percent of the total original principal amount for each of the third and fourth years.

(iii) 30 percent of the total original principal amount for the fifth year.

(3) The Secretary repays the holder for the amount of interest, including capitalized interest, which accrued on the loan or loans subject to forgiveness over the year.

(4) Payments made by the Secretary must be applied first to the unsubsidized Federal Stafford portion of the loan, followed by the subsidized Federal Stafford portion, and then the nonsubsidized Federal Stafford portion.

(5) The amount of payments made by the Secretary under paragraphs (h)(2)(i), (h)(2)(ii), and (h)(2)(iii) of this section may not exceed the sum of the outstanding principal balance of the loan or loans subject to forgiveness plus all interest payments made in accordance with paragraph (h)(3) of this section.

(6) Payments received from a borrower who qualifies for loan forgiveness under this section may not be refunded.

(i) *Definitions.* The following definitions apply to this section:

Acute care facility means either a short-term care hospital in which the average length of patient stay is less than 30 days, or a short-term care hospital in which over 50% of all patients are admitted to units where the average length of patient stay is less than 30 days.

Elementary school means a public or nonprofit private day or residential school that provides elementary education, as determined under State law.

Indian Health Service Health Center means a health care facility (whether operated directly by the Indian Health Service or operated by a tribal contractor or grantee under the Indian Self-Determination Act), that is physically separated from a hospital and that provides one or more clinical treatment services, such as physician, dentist or nursing services, available at least 40 hours a week for outpatient care to persons of Indian or Alaska Native descent.

Long-term care facility means a facility that offers services designed to provide diagnostic, preventive, therapeutic, rehabilitative, supportive and maintenance services for individuals who have chronic physical or mental impairments.

This facility may have a variety of institutional and non-institutional health settings, including the home, and the goal of the service is to promote the optimum level of physical, social and psychological functioning.

Native Hawaiian Health Center means an entity (as defined in section 8 of the Native Hawaiian Health Care Act of 1988 (Pub.L. 100–579)—

(1) That is organized under the laws of the State of Hawaii;

(2) That provides or arranges for health care services through practitioners licensed by the State of Hawaii, if licensure requirements are applicable;

(3) That is a public or private nonprofit entity; and

(4) In which Native Hawaiian health practitioners significantly participate in the planning, management, monitoring, and evaluation of health services.

Public hospital means a facility (as defined in 24 CFR 242.1)—

(1) Owned by a State or unit of local government or by an instrumentality thereof, or owned by a public benefit corporation established by a State or unit of local government or by an instrumentality thereof;

(2) That provides community services for inpatient medical care of the sick or injured (including obstetrical care);

(3) Where not more than 50 percent of the total patient days during any year are customarily assignable to the categories of chronic convalescent and rest, drug and alcoholic, epileptic, mentally deficient, mental, nervous and mental, and tuberculosis; and

(4) That is licensed or regulated by the State (or, if there is no State law providing for such licensing or regulation by the State, by the municipality or other political subdivision in which the facility is located).

Rural Health Clinic means an entity (as defined under section 1861(aa)(2) of the Social Security Act and in 42 CFR 491.2 that—

(1) Is primarily engaged in furnishing to outpatients, physicians' services and services furnished by a physician assistant or by a nurse practitioner, as well as those services and supplies covered under sections 1861(s)(2)(A) and 1961(s)(10) of the Social Security Act;

(2) In the case of a facility that is not a physician-directed clinic, has an arrangement (consistent with the provisions of State and local law relative to the practice, performance, and delivery of health services) with

one or more physicians under which provision is made for the periodic review by those physicians of covered services furnished by physician assistants and nurse practitioners, the supervision and guidance by such patients as may be necessary, and the availability of those physicians for advice and assistance in the management of medical emergencies, and in the case of the physician-directed clinic, has one or more of its staff physicians perform the activities accomplished through such an arrangement;

(3) Maintains clinical records on all patients;

(4) Has arrangements with one or more hospitals, having agreements in effect under section 1866 of the Social Security Act, for the referral and admission of patients requiring inpatient services or diagnostic or other specialized services as are not available at the clinic;

(5) Has written policies, that are developed with the advice of (and with provision of review of those policies from time to time by) a group of professional personnel, including one or more physicians and one or more physician assistants or nurse practitioners, to govern those services which it furnishes;

(6) Has a physician assistant or nurse practitioner responsible for the execution of policies described in paragraph (5) of this definition and relating to the provision of the clinic's services;

(7) Directly provides routine diagnostic services, including clinical laboratory services, as prescribed in 42 CFR 491.2, and has prompt access to additional diagnostic services from facilities meeting requirements under title 42;

(8) In compliance with State and Federal law, has available for administering to patients of the clinic at least such drugs and biologicals as are determined under 42 CFR 491.2 to be necessary for the treatment of emergency cases and has appropriate procedures or arrangements for storing, administering, and dispensing any drugs and biologicals;

(9) Has appropriate procedures for review of utilization of clinic services to the extent that the Secretary determines to be necessary and feasible; and

(10) Meets other requirements as the Secretary of Health and Human Services may find necessary in the interest of the health and safety of the individuals who are furnished services by the clinic.

Secondary school means a public or nonprofit private day or residential school that provides secondary education, as determined under State law. In the absence of applicable State law, the Secretary may determine, with respect to that State, whether the term "secondary school" includes education beyond the twelfth grade.

State education agency means the agency or official designated by the Governor or by State law as being primarily responsible for the State supervision of public elementary and secondary schools.

Teacher means a professional who provides direct and personal services to students for their educational development through classroom teaching.

Department of the Interior

Bureau of Indian Affairs

Plan for the Use of the Gila River Indian Community Indian Judgment Funds in Docket No. 236–N Before the United States Court of Federal Claims; Notice

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Plan for the Use of the Gila River Indian Community Indian Judgment Funds in Docket No. 236–N Before the United States Court of Federal Claims

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

EFFECTIVE DATE: This plan was effective as of May 9, 1994.

FOR FURTHER INFORMATION CONTACT: Terry Lamb, Historian, Bureau of Indian Affairs, Division of Tribal Government Services, 2611 MS/MIB, 1849 C Street NW., Washington, DC 20240.

SUPPLEMENTARY INFORMATION: The Act of October 19, 1973 (Pub. L. 93–134, 87 Stat. 466), as amended, requires that a plan be prepared and submitted to Congress for the use and distribution of funds appropriated to pay a judgment of the Indian Claims Commission or Court of Claims to any Indian tribe. Funds were appropriated on January 25, 1993 in satisfaction of the award granted to the Gila River Indian Community before the United States Court of Federal Claims in Docket 236–N. The plan for the use of the funds was submitted to Congress with a letter dated January 24, 1994 and was received (as recorded in the Congressional Record) by the Senate on February 7, 1994 and by the House of Representatives on January 25, 1994. The plan became effective May 9, 1994 as provided by the 1973 Act, as amended by Pub. L. 97–458, since a joint resolution disapproving it was not enacted. The plan reads as follows:

Plan

for the Use of the Gila River Indian Community Judgment Funds in Docket No. 236–N before the United States Claims Court

The funds appropriated January 25, 1993 in satisfaction of the award granted in Docket No. 236–N to the Gila River Indian Community before the U.S. Claims Court, less attorney fees and litigation expenses, and including all interest and investment income accrued, shall be used and distributed as follows:

Per Capita Aspect

The Secretary of the Interior ("Secretary") shall make a per capita distribution of eighty percent (80%) of the principal, interest, and investment income accrued, in a sum as equal as possible, to each member of the Gila River Pima-Maricopa Indian Community, born on or prior to and living on the effective date of this plan. Any remaining amount, after the per capita payment to the members, shall revert to the tribe for use in the programming aspect of this plan.

Programming Aspect

Twenty percent (20%) of the principal, interest and investment income accrued shall continue to be invested with the interest to be available to the community's general fund on an annual budgetary basis to be used for operation of community programs.

If at some future date, the Gila River Indian Community decides to amend this Plan, the Plan may be amended with the approval of the Secretary.

General Provisions

The per capita shares of living, competent adults shall be paid directly to them. The per capita shares of deceased individual beneficiaries shall be determined and distributed in accordance with 43 CFR part 4, subpart D. Per capita shares of legal incompetents and minors shall be handled as provided in the Act of October 19, 1973, 87 Stat. 466, as amended January 12, 1983, 96 Stat. 2512.

None of the funds made available under this plan for programming or per capita distribution shall be subject to Federal or State income taxes, nor shall such funds nor their availability be considered as income or resources, nor otherwise utilized as the basis for denying or reducing the financial assistance or other benefits to which such household or member would otherwise be entitled under the Social Security Act or, except for any per capita shares in excess of $2,000, any Federal or federally assisted programs.

Hilda A. Manuel,

Acting Assistant Secretary—Indian Affairs.

[Docket No. 921233–2333; I.D. 011394B]

Endangered and Threatened Wildlife and Plants; Final Rule to Remove the Eastern North Pacific Population of the Gray Whale From the List of Endangered Wildlife

AGENCIES: Fish and Wildlife Service (Service), Interior, and National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: The Service is amending the List of Endangered and Threatened Wildlife and Plants (List) by revising the entry for the gray whale (*Eschrichtius robustus*) to remove the eastern North Pacific (California) population from the List while retaining the western North Pacific (Korean) population as endangered. In addition, the NMFS is amending its list of endangered species under NMFS jurisdiction. These actions correspond to a determination by NMFS, and concurrence by the Service, that the eastern North Pacific population of the gray whale should be removed from the List. The eastern North Pacific population has recovered to near its estimated original population size and is neither in danger of extinction throughout all or a significant portion of its range, nor likely to again become endangered within the foreseeable future throughout all or a significant portion of its range. The Service and NMFS believe that the western North Pacific gray whale population, which is geographically isolated from the eastern population, has not recovered and should remain listed as endangered.

EFFECTIVE DATE: June 16, 1994.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours, at the Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Kenneth R. Hollingshead, Office of Protected Resources, at the above NMFS address (telephone 301/713–2055), or Jamie Rappaport Clark, Chief, Division of Endangered Species, U.S. Fish and Wildlife Service, ARLSQ–452, Washington, D.C. 20240 (telephone 703/358–2171).

SUPPLEMENTARY INFORMATION: The Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*), is administered jointly by the Service and NMFS. NMFS has jurisdiction over most marine species, including whales, and makes determinations under section 4(a) of the Act as to whether a species should be listed as endangered or threatened. Reclassification of listed species from endangered to threatened and removal of species from the List require concurrence by the Service with the NMFS determination. The Service maintains and publishes the List, codified at 50 CFR 17.11 and 17.12, for all species determined by the Service or NMFS to be endangered or threatened.

On January 7, 1993 (58 FR 3121), NMFS published a final notice of determination that the eastern North Pacific (California) stock (population) of gray whale has recovered to near its estimated original population size and, while individual and cumulative impacts may have the potential to adversely affect the eastern population, that population is neither in danger of extinction throughout all or a significant portion of its range, nor likely to again become endangered within the foreseeable future throughout all or a significant portion of its range. NMFS determined, therefore, that the eastern North Pacific population of the gray whale should be removed from the List under the Act. NMFS also determined that the western North Pacific gray whale stock, which is geographically isolated from the eastern population, has not recovered and should remain listed as endangered.

NMFS conducted a comprehensive evaluation of the status of the species in terms of the factors contained in section 4(a)(1) of the Act for listing and delisting actions, and provided an extensive public comment period on its proposed determination (56 FR 58869; November 22, 1991). The Service has reviewed the complete administrative record regarding this action and finds that the determination is well based and concurs that the eastern North Pacific population should be removed from the List. Therefore, in accordance with section 4(a)(2) of the Act, the Service is amending the List by revising the entry for the gray whale to remove the eastern North Pacific (California) population, while retaining the western North Pacific (Korean) population as endangered. A list of endangered species under the jurisdiction of NMFS is contained in 50 CFR part 222. Therefore, concurrent with the Service's regulatory action, NMFS is amending § 222.23(a) to correspond with the amendment of § 17.11(h).

This final rule is issued under 50 CFR parts 17 and 222 and is not subject to Office of Management and Budget review under E.O. 12866. Because this rule implements a determination previously subject to notice and comment and will relieve an existing restriction, the Service Director and the Assistant Administrator for Fisheries, NOAA, under section 553(b)(B) and (d) of the Administrative Procedure Act (5 U.S.C. 553 *et seq.*), for good cause, find that it is unnecessary to provide additional notice and public comment on this rule or to delay for 30 days its effective date.

National Environmental Policy Act

The Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act (NEPA) of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Act, as amended. A notice outlining the reasons for this determination was published by the Service in the **Federal Register** on October 25, 1983 (48 FR 49244).

As amended in 1982 (Public Law 97–304), the Act, in section 4(b)(1)(A), restricts the information that may be considered when assessing species for listing. Based on this limitation of criteria for a listing decision and the opinion in *Pacific Legal Foundation* v. *Andrus*, 657 F.2d 829 (6th Cir., 1981), NMFS has categorically excluded all endangered species listings from environmental assessment requirements of NEPA (48 FR 4413, February 6, 1984).

List of Subjects in 50 CFR Parts 17 and 222

Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, and Transportation.

Regulations Promulgation

Accordingly, part 17, subchapter B of chapter I, and part 222, subchapter C of chapter II, title 50 of the Code of Federal Regulations, are amended as set forth below:

PART 17—[AMENDED]

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.

2. Section 17.11(h) is amended by revising the table entry for "Whale, gray" in the "Species" column under the heading for MAMMALS to read as follows:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

Species		Historic range	Vertebrate population where endangered or threatened	Status	When listed	Critical habitat	Special rules
Common name	Scientific name						
MAMMALS							
.	.	.	.	.	.	.	.
Whale, gray	*Eschrichtius robustus.*	North Pacific Ocean: coastal and adjacent seas. Formerly North Atlantic Ocean.	Entire, except eastern North Pacific Ocean: coastal and Bering, Beaufort, and Chukchi Seas.	E	3,536	NA	NA
.	.	.	.	.	.	.	.

PART 222—ENDANGERED FISH OR WILDLIFE

1. The authority citation for part 222 continues to read as follows:

Authority: 16 U.S.C. 1531–1544.

§ 222.23 [Amended]

2. Section 222.23(a) is amended by removing the words "Gray whale (*Eschrichtius robustus* (*glaucus, gibbosus*))" in the second sentence and adding in their place the words "Western North Pacific (Korean) gray whale (*Eschrichtius robustus*)".

14 CFR Part 91

Temporary Flight Restrictions; Proposed Rule

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 91

[Docket No. 26605; Notice No. 91–14]

RIN 2120–AD–55

Temporary Flight Restrictions

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM); withdrawal.

SUMMARY: This document withdraws a proposal to amend the Federal Aviation Regulations to require the operator of an aircraft used in conducting authorized news-gathering operations in an area covered by temporary flight restrictions (TFR) to contact the official in charge of the on-scene emergency response activities for the purpose of obtaining information about current and forecasted disaster relief aircraft activities. The objective of the NPRM was to increase the level of safety afforded aircraft used in conducting rescue or disaster relief operations. The FAA has carefully considered all of the comments received in response to the NPRM and as a result has concluded that safety in TFR's can be increased through procedural versus regulatory means. Accordingly, the NPRM is being withdrawn.

FOR FURTHER INFORMATION CONTACT: Ms. Ellen Crum, Air Traffic Rules Branch, ATP–230, Airspace-Rules and Aeronautical Information Division, Air Traffic Rules and Procedures Service, Federal Aviation Administration, 800 Independence Ave., SW., Washington, DC 20591; telephone (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Background

On July 24, 1991, the FAA published Notice No. 91–14 (56 FR 34000). The NPRM proposed amending § 91.137(c)(5) of the Federal Aviation Regulations (FAR) to require that: (1) All pilots of aircraft carrying properly accredited media personnel initially contact the official in charge of on-scene emergency response activities to ascertain the routes, altitudes, and operating areas in use by disaster relief aircraft; and (2) the aircraft be operated clear of all disaster relief aircraft operations identified by the official in charge. Currently, when TFR's are established for the purpose of providing a safe environment for the operation of disaster relief aircraft, aircraft carrying properly accredited newspeople may enter the prescribed area without prior approval, provided a flight plan has been filed. However, the aircraft must be operated above the altitude(s) being used by rescue or disaster relief aircraft. The process a pilot uses to determine which altitudes are being utilized is not prescribed in the current regulation.

Discussion of Comments

Thirty-one comments were received in response to the NPRM (the comment period closed September 23, 1991). Most commenters supported the goal of the NPRM to promote increased air traffic safety in TFR's; however, the best means to accomplish this was disputed.

Several commenters recommended that a common disaster frequency be established for all aircraft. Other commenters expressed concern over the potential inability of media aircraft to communicate with emergency ground officials, suggesting that on-scene ground officials be required to possess an aircraft compatible two-way radio. Suggestions were made to require pilot monitoring of the frequency while in the disaster area. Finally, suggestions were made to incorporate this proposed rule into the Airman's Information Manual rather than add it to the FAR.

The FAA recognizes the potential merit of this proposal and acknowledges the validity of the express concerns. Since this NPRM was published, the FAA has been reviewing regulations and procedures currently utilized for temporary flight restrictions.

In addition to aircraft carrying news media encountering difficulties in determining the altitude being used by disaster relief aircraft, other TFR problems have been cited. These problems include pilots being unable to receive the location of a TFR area in a timely manner; aircraft on instrument flight rules (IFR) flight plans and military aircraft on IFR training routes intruding into the TFR; the large number of aircraft in TFR's implemented for an incident or event generating a high degree of public interest; and the untimely process used to put TFR's in place, particularly when they involve critical situations such as toxic spills. In addition, of the 13 documented incidents in TFR's, only 2 were confirmed to be aircraft carrying news media. The other incidents involved general aviation aircraft or military aircraft that inadvertently penetrated the TFR's. The reason most often given was lack of information about the existence of the TFR and the inability to positively identify the TFR location.

Reasons for Withdrawal

Based on the comments received in response to Notice No. 94–14, and the additional data as stated above, the FAA has determined that there is inadequate justification to pursue further this regulatory action. The FAA has determined that additional study of current TFR procedures, which may include parts of Notice No. 91–14, is necessary. Therefore, it is in the best interest of all concerned to withdraw Notice No. 91–14.

The Decision and Withdrawal

Accordingly, the FAA concludes that further rulemaking on Notice No. 91–14 should not proceed at this time. Therefore, Notice No. 91–14 is withdrawn. This action does not preclude the FAA from considering similar proposals in the future or commit it to any further or future course of action on this subject.

The authority citation for part 91 continues to read as follows:

Authority: 49 U.S.C. 1301(7), 1303, 1344, 1348, 1352 through 1355, 1401, 1421 through 1431, 1471, 1472, 1502, 1510, 1522, and 2121 through 2125; Articles 12, 29, 31, and 31(a) of the Convention on International Civil Aviation (61 Stat. 1180); 42 U.S.C. 4321 et seq: E.O. 11514; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983).

Issued in Washington DC on June 8, 1994.

Harold W. Becker,

Acting Director, Air Traffic, Rules and Procedures Service.

Title 3—

The President

Proclamation 6701 of June 14, 1994

Father's Day, 1994

By the President of the United States of America

A Proclamation

June conjures up memories of sunny days, backyard cookouts, relaxing vacations, lush gardens in bloom, and on the third Sunday of the month, the celebration of Father's Day. This is a time set aside by tradition to pay tribute to fathers across our land and to thank them for their unconditional love, for their belief in their children's potential, and for their vital parental role. Their profound influence on their sons and daughters—on society itself—is incalculable.

The loving concern of fathers in raising, protecting, educating, encouraging, and providing direction for their children shapes our national character, as well as our children's. The positive interaction of fathers who responsibly welcome the challenges of guiding their children is immeasurable. Through the nurturing support of such parents, competent, caring, and resilient generations of citizens develop and thrive. These fathers, whether biological, foster, or adoptive, deserve our honor and gratitude.

All fathers in our society today must reinvest in supplying emotional and financial support for their children. It is never too late to assume the responsibility for meeting a child's needs. To do so, despite personal and economic hardship, is to help our children transcend adverse circumstances and to earn the love, respect, and appreciation that will become a legacy of devotion for generations long after ours.

Our Nation is becoming increasingly aware that a father's acceptance and support are powerful motivators. It is most fitting that we recognize our fathers' contributions today and every day—that we express, through word or deed, our appreciation to them and that we remember their love, their friendship, and their faith in us.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, in accordance with a joint resolution of the Congress approved April 24, 1972 (36 U.S.C. 142a), do hereby proclaim, Sunday, June 19, 1994, as "Father's Day." I invite the States, communities and people of the United States to observe this day with appropriate ceremonies as a mark of appreciation and affection for our fathers.

IN WITNESS WHEREOF, I have hereunto set my hand this fourteenth day of June, in the year of our Lord nineteen hundred and ninety-four, and of the Independence of the United States of America the two hundred and eighteenth.

William J. Clinton

Presidential Determination No. 94–26 of June 2, 1994

Determination Under Section 402(d)(1) of the Trade Act of 1974, as Amended—Continuation of Waiver Authority

Memorandum for the Secretary of State

Pursuant to the authority vested in me under the Trade Act of 1974, as amended, Public Law 93–618, 88 Stat. 1978 (hereinafter "the Act"), I determine, pursuant to section 402(d)(1) of the Act, 19 U.S.C. 2432(d)(1), that the further extension of the waiver authority granted by section 402(c) of the Act will substantially promote the objectives of section 402 of the Act. I further determine that the continuation of the waiver applicable to the People's Republic of China will substantially promote the objectives of section 402 of the Act.

You are authorized and directed to publish this determination in the **Federal Register**.

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

H.R. 1632/P.L. 103–266

To amend title 11, District of Columbia Code, and Part C of title IV of the District of Columbia Self-Government and Governmental Reorganization Act to remove gender-specific references. (June 13, 1994; 108 Stat. 713; 9 pages)

Last List June 15, 1994

INFORMATION ABOUT THE SUPERINTENDENT OF DOCUMENTS' SUBSCRIPTION SERVICE

Know when to expect your renewal notice and keep a good thing coming. To keep our subscription prices down, the Government Printing Office mails each subscriber *only one renewal notice*. You can learn when you will get your renewal notice by checking the number that follows month/year code on the top line of your label *as shown in this example*:

A renewal notice will be sent approximately 90 days before this date.

```
AFR  SMITH212J                DEC94 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

A renewal notice will be sent approximately 90 days before this date.

```
AFRDO  SMITH212J              DEC94 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402–9372 with the proper remittance. Your service will be reinstated.

To change your address: Please SEND YOUR MAILING LABEL, along with your new address to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To inquire about your subscription service: Please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9375.

To order a new subscription: Please use the order form provided below.

Order Processing Code: * 5468

Superintendent of Documents Subscription Order Form

Charge your order. It's easy!

To fax your orders (202) 512–2233
